Mr. Robert Zieber presented Council with three issues regarding the Biltmore Park Traffic Calming Plan: (1) many provisions of the Traffic Calming Policy have been ignored on the basis that the City will not have to pay for the speed humps; (2) the Biltmore Park Homeowners Association (HOA) Board of Directors has spent thousands of HOA dollars misrepresenting this project to homeowners; and (3) there are significant costs to all Asheville taxpayers for this ineffective and poorly planned project. City Manager Jackson said that he will have the City's Engineer meet with Mr. Zieber to follow-up on his concerns and will distribute an update to Council.

Use of Pritchard Park to Feed the Homeless

Mr. David Carey spoke against the proposed use of Aston Park to feed the homeless. He felt that the Senior Opportunity Center would be a much better location.

Reverend Christopher Chiaromonte urged City Council to work with and for the homeless.

Reverend Amy Cantrell, representing Zaccaeus House Church and the Asheville Homeless Network, spoke in support of allowing Pritchard Park as a place to meet, eat and cross paths. She urged Council not to make downtown Asheville an exclusion zone.

Mr. Stephen West, downtown resident and owner of the Miles Building, explained to Council how the quality of life has improved for the downtown residents since they have stopped feeding the homeless in Pritchard Park.

Ms. Judy Swan, downtown resident, spoke in opposition of feeding the homeless in Pritchard Park.

Mr. Fred Guggenheim, downtown resident, objected only to using Pritchard Park to feed the homeless, not to keep the homeless from using Pritchard Park.

A small business owner in downtown Asheville felt that to feed the homeless in Pritchard Park is not what the park was intended for.

Mrs. Guggenheim explained that since the feeding has stopped at Pritchard Park it has become more of a neighborhood park. She feels like the City has offered them other places to eat that would be more appropriate than Pritchard Park.

Mayor Bellamy said that over the last couple of weeks, City Council has received numerous e-mails categorizing Council members about this issue. City Council was made aware of this issue after members of the community contacted Council requesting order. Mr. Ripley told Council that he was serving food in Pritchard Park, was asked to receive a permit and the permit was denied by City staff. At that time, Assistant City Manager Jeff Richardson said that he would be happy to meet with Mr. Ripley and City staff to address the concern, not knowing that the meeting with City staff had already been set up prior to Mr. Ripley addressing Council. We discovered that another non-profit agency that provides services to the homeless 24/7 offered Mr. Ripley their kitchen but Mr. Ripley turned that offer down. City staff has offered Mr. Ripley the Senior Opportunity Center, which has offered to open their doors so that during the heat and cold Mr. Ripley can access their kitchen to help provide the food service to individuals, but Mr. Ripley turned down that offer as well. Another opportunity available for Mr. Ripley is to work in collaboration with the group that already provides the service on Saturdays at the Buncombe County Department of Social Services. Regarding the location at Aston Park, it was brought to her attention that Mr. Ripley said he didn't care about some of the activities that are happening at Aston Park, but the people in Aston Park worked hard to clean up that Park and the entire West End/Clingman Avenue neighborhood. City staff has offered Mr. Ripley several different locations, but Mr. Ripley has turned them down, wanting Pritchard Park. Cities across this nation trying to address this issue and some ways Asheville is addressing this is by (1) using Community Development Block Grant dollars; (2) using Housing Trust Fund monies to create housing for the homeless; and (3) supporting non-profit organizations that support the homeless. What is unfortunate is making it seem like this Council does not care for the homeless population, especially since Council is very receptive to working for the homeless. Some Council members open their wallets to support the homeless, some clean up after the homeless after they have thrown trash on their property; and some visit parks with their children who have seen activities and paraphernalia in the parks, but didn't use their position to make political statements about the homeless. She also feels it's wrong to make Council seem like they have done something wrong by adopting a 10-Year Plan to End Homelessness which is a beginning to address the issue. She feels this Council has been made out to be villains only because they have asked for order. City Council contributes to making sure that our community is upheld by every member of the

community, whether they are homeless or affluent. She feels this is a mechanism to divide our community and it needs to stop now. She urged Mr. Ripley (a Montreat resident) to not work to divide the Asheville community, but to work with the existing structure in our community. She hopes that Mr. Ripley's goal is to really serve the community and she challenged him to work with the non-profits and City staff to achieve that goal. She is committed to working on policies that are reasonable for everyone with those who see beyond their own agenda. She hoped our community can begin a healing process by working together to address this issue.

Closed Session

At 7:24 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 143-318.11(a)(5).; and (2) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11(a)(4). This motion was seconded by Vice-Mayor Jones and carried unanimously.

At 8:35 p.m., Councilman Freeborn moved to come out of closed session. This motion was seconded by Councilman Mumpower and carried unanimously.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:35 p.m.

Magdalen Burleson
CITY CLERK

Jerry M. Bellamy
MAYOR

Monday – June 12, 2006 - 9:00 a.m.

Special Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Present: Buncombe County Chairman Nathan Ramsey, Presiding; Vice-Chair Bill Stanley; Commissioner David Gantt; County Manager Wanda Greene; County Attorney Joe Connolly; and County Clerk Kathy Hughes (Absent: Commissioner Carol Peterson and Commissioner David Young).

Present: Senator Tom Apodaca; Senator Martin L. Nesbitt, Jr.; Representative D. Bruce Goforth; Representative Susan C. Fisher; and Representative Wilma M. Sherrill

Mayor Bellamy called the meeting to order at 9:00 a.m. in the Laurel Forum at UNC-Asheville. Councilman Freeborn then moved to adjourn the meeting to Conference Room 110 in order to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; and State of North Carolina. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Vice-Mayor Jones and carried unanimously.

At 9:50 a.m. Councilman Davis moved to come out of closed session and reconvene the meeting in the Laurel Forum. This motion was seconded by Councilwoman Cape and carried unanimously.

At 10:00 a.m. Mayor Bellamy and Chairman Ramsey called their respective boards to order to discuss water-related issues.

Mayor Bellamy outlined some issues that are important in impacting our area. Looking at the issue of water, the City is looking at a governance structure that will be a municipal-run system. The City has done a great deal to improve our system and we want to outline a couple things: (1) Asheville is the first city to have an active asset management program and it's structured to approach is to optimize the life-cycle costs of asset ownership necessary for providing reliable and dependable service to our customers: (2) we have environmental management standards for the ISO 14001 Certification; (3) we have computerized our maintenance system; (4) we have a capital improvement program in which we have over $6 Million that we are investing back into the system; and (5) we had an excellent peer review by QualServe. She felt it was important for individuals to know what we have done in the past 6-12 months regarding our system.

Regarding rate differentials, Mayor Bellamy said that when you look at differentials across the State of North Carolina, the average differential is 85% (they use that to offset costs). City Council is willing to give up our rate differential ability (which is about 85%) and for that 85%, it would cost us over $6 Million. Today we would like to see a tax equity payment of $6 Million for us to give up the rate differential ability. We are willing to talk about how we can get there.

Mayor Bellamy said another issue that has been important to the City is the Joint Planning Area (JPA). The City of Asheville is open to look at new approaches and alternatives to the JPA, especially since we are now we are looking at extending some of our services that we currently provide into the County.

Mayor Bellamy said the last issue is the Civic Center. The last proposal that we submitted to the County talked about support for our Civic Center. We are looking to get support for our Civic Center from Buncombe County and our legislative delegation. We do, however, want to express our reservations using sales tax for this support.

Commissioner Gantt said that throughout the whole discussions they have had four guiding principles. The County has presented the City with 9 separate offers, all that have been unanimous decisions, and they have all been rejected by the City. Eight offers were rejected and one offer accepted by then Councilman Joe Dunn. The most guiding principles for us is an independent Water Authority. Every time a city runs a water department they have to pay betterment costs to the N.C. Dept. of Transportation. The number we have is $4 Million. That is $4 Million right off the top. The repairs needs are around $350 Million that need to be put into the system. If we had an independent authority, we could put the money towards fixing the system since everyone wants to fix the system and make sure it doesn't get run down again. We always thought the MSD type model would be best. The money they receive is put right back into repairs and they have a capital plan to put $260 Million in over the next 20 years. The County is so insistent on an independent board because we have seen how well MSD works and the results to the rate-payers.

Commissioner Gantt said that another guiding principle for the County is no differential rates. The Sullivan Act has been law since the 1930's. We don't feel that for a necessary service that people should pay differential rates. There is no utility, except for a government run utility, that pays differential rates for services. Based on the history of our County, who paid for the system to begin with, there should be no differential rates.

Commissioner Gantt said their third guiding principle is that there be no forced annexation to receive water services. Water is a basic necessity and everyone should be entitled to it.

Commissioner Gantt said that finally, we want everyone to be treated equal. Someone is going to have to pay for this big mess we're in and we want everyone to be treated fairly. We will have to work together to do this. The offers we have made in the past have included taking over the Civic Center. Some of the offer packages were up to $50 Million and the County Manager has a copy of the eight specific proposals we have given and the one we accepted from then Councilman Joe Dunn. We have talked dozens of times because we want to work this out. As far as the specific proposal, basically if $6 Million is desired to be paid up front, that money would be paid by people that will probably never have water service and never got a benefit from it. We already have 3 other water systems within the City and we represent those people too. To say that we're going to give a whole lot of money from their coffers didn't seem right to us. We want everyone to be treated equally and fair and we are very interested in an independent board because that is the way we see the opportunity to fix up what we have. We are, however, interested in continuing talking.

Senator Nesbitt said that their position is well-known in that they put it into legislation. He said we do have a unique history in that in the 1930's our founding fathers made a deal. When everyone went broke they put all the water systems together. Prior to that time the City charged differential rates. When they pooled their reasons, they decided not to do that. The County residents gave up their water systems (he believed there were five) and gave them to the City. When the County residents gave up their ability to have their own water system based on that commitment, it seems unfair that 70 years later to say we are now going to increase your rates. That is where we were coming from. It's all about how you treat people. We did what we thought was best for the community. Asheville is not the only city in the state where this occurs. The City of Charlotte in Mecklenburg County have gone through a number of voluntary agreements to take over other people's water system for the agreement that they would phase out differential rates

and they did it over a 10-year period. At the end of that time, Charlotte will not be charging differential rates.

Representative Goforth was concerned about the negative attitude from Council toward the legislators. He felt it was the City's poor planning when they terminated the water agreement, knowing there would be an upfront loss of $2.5 Million. In addition, we are now in a lawsuit costing everyone money. He urged the City and the County to go back to the table and work out something fair for everyone.

Mayor Bellamy said that this meeting is a point to move forward. The City does have a shortfall in our budget, but we were not anticipating Sullivan Acts II and III taking away $1.1 Million. We have recently paid for and received completed a study that said the City needs to put $59 Million back into our system, not $300 Million inaccurately quoted. She hoped that as we move forward that accurate information is given. She requested a copy of the 9 proposals the County offered.

Senator Apodaca felt we need to look at the way the whole process started when the City gave notice of the termination of the water agreement and the way the legislators were kept out of it. He hoped everyone could put that behind them and move forward.

Representative Sherrill agreed that the biggest disappointment is the negative attitude the legislators have received from Councilman Mumpower, which is a bad reflection on all of City Council. She was totally against using water for forced annexation. She hoped we can move forward. We would all like to see something happen with the Civic Center and they have been begging for years for the figures and plans on what the City as a whole wants to do with the Civic Center.

Representative Fisher felt that we have the potential to get along and supported moving forward.

Councilman Mumpower passed out information on his position on the water issues. He said that he intends to continue insulting the actions of our legislative body against the citizens of Asheville. Our state legislators got involved in a local matter. Had they not trumped the process we would be at a much different place today in treating people in a fair and responsible manner. He said a few cities in North Carolina own and don't manage their own assets. Regarding the City of Charlotte, Charlotte is taking over the County of Mecklenburg. There is one in Chapel Hill which is a University owned system. Aside from those two, every other city in North Carolina of any size, including Hendersonville, Weaverville and Canton, own and manage their assets and it works. He stressed that Asheville is being treated differently and that is not fair. He said that he has never made a public personal attack on anyone. When our legislators passed Sullivan Acts II and III, they created a permanent division between the City and the County. He didn't create that, the legislators did and all he has done is to shine a light on it.

Commissioner Gantt said that 44% of the water ratepayers live outside the City limits. He agreed that this issue is not City vs. County, but is a matter of politics and control over the water facilities. He hoped we can get beyond the control issue.

Regarding differential rates, Councilman Newman said that is a core issue because we need some kind of rate structure to fix the system. Everyone is interested in treating the customers fairly, although we may have different opinions about what that fairness is. He shared Asheville's prospective on the rate structure. He said that when the various systems were combined, the basic understanding at that time was that on the lines that had been built and were being paid for by the bonds for the old water districts, the agreement was that the City could never charge differential rates on those lines (because there had been specific bond issue for

those specific lines). But Asheville's prospective is that there was never necessarily an agreement that on any future lines – 100 years in the future – that they couldn't start charging differential rates. Not that everyone will agree with that, but that is the other prospective. When the Regional Water Authority was created there was an administrative agreement between the different local governments not to charge differential rates. We feel the City's offer today is a big concession on our part. He said that City Council is willing to not challenge that legal question if we can work out an overall agreement that is fair. (At this time – 10:37 p.m. Councilman Freeborn left the meeting).

Mayor Bellamy said that other municipalities in Buncombe County charge differential rates. So, if you want no differential rates in Buncombe County then it should be across the board for every municipality in Buncombe County.

Senator Nesbitt felt that every place where they have a differential, the people know it. What we have here is 70 years of history where people built lines and joined the system with no differential rates and now the City wants to charge differential rates.

Councilman Mumpower explained that was why City Council's position is for incremental increases.

Councilwoman Cape said that we have an unusual situation in Asheville in that 50% of our daytime visitors don't live in the City and rely on City services, which are paid for by the Asheville taxpayers. We have to figure out a way to be fair and water is one of those pieces.

Vice-Mayor Gantt said that the County did a study of dollars into the County from City residents and County residents and dollars out. He thinks because of the services, it's a basic wash-out because the County does welfare, schools, general health and well-being and more money goes back to the City residents when they pay taxes. He lives outside the City limits, but has his office in the City and School District and receives services. And, actually there is a net increase return on the dollar spent by City taxpayers to the County. Maybe we should jointly study that issue. Mayor Bellamy felt it would be good to furnish the City the County's study so we can look at not only the City and County dollars, but where the State dollars go, because when we look at our infrastructure, that is where we are missing support.

Representative Goforth said that since the City took over the Golf Course we have differential rates. The City owns the property and County is paying the note on it for $2.5 Million. Mayor Bellamy responded that was the bonds are for McCormick Field. She said that the County was leasing the property from the City of Asheville and the County paid for the upfit. Any building that someone leases, the owner keeps the upfit when the tenant moves out.

Ms. Greene responded to Commissioner Gantt when he asked what the amount is that the County pays for debt service on bonds that the City has ownership of.

Vice-Chair Stanley wondered what the numbers are between City/County residents who go through the Department of Social Services and the Health Department.

Mayor Bellamy noted that we are all partners and despite of what it looks like, there are several ventures the City and County are collaborating successfully.

Senator Nesbitt felt that the City and Council can get over the differential rates hurdle after we solve some of these other problems. He suggested as a starting point that the City and County sit down and determine what is an equity. A lot of the things went away with the water agreement. The legislators don't have any role in that and it's not for us to decide what the

equities are. Once that is determined and we can help in some way, we will be willing to do that. The legislator's prospective is that we may be able to help with the Civic Center, golf course, McCormick Field, Nature Center, et al. He suggested putting all of those things together to be dealt with since they are County-wide services to where everyone can look at it. Maybe in that process we can find a way to help you with some of that and that will relieve the $6 Million problem. If you can solve some of it in another way, it is the same thing as giving you money. We need to help you find some money for the Civic Center or the County has to help you. He said they need a good plan on what to do about the Civic Center. We never had one, but he's not sure Council has reached consensus much less the community. If we are going to do something, we need to do what is right for this community for the next 30-40 years. He would like an expert from the outside to come in and tell us what this region needs. We are ready, willing and able to help in some way and we will try to help you out in that area.

Councilman Davis, Chair of the Civic Center Task Force, explained in detail the exhaustive process used to gather information from the community, culminating in a final report. He noted that they did not look at it from a regional approach. He explained the following two options that were presented to City Council by the Task Force: (1) Build a new arena, build Performing Arts Center and Media Center inside the existing arena, make Thomas Wolfe a flat floor facility; and (2) Renovate the arena, build a new performing arts center on the lot next to City Hall (Parkside) and make Thomas Wolfe a flat floor facility. A third option was to refurbish what we have. He then explained the rough cost estimates. In addition, the City has just had a study completed by Dr. Ha from Western Carolina University, which said that the Civic Center is currently operating at a deficit of about $400,000 a year, but generates ten times more in visitor spending dollars than it costs to operate the Center ($19 Million in money generated vs. $1.9 Million in operating expenditures). In addition to the economic impact of the Civic Center, it also generates over $4 Million a year in federal, state and local taxes.

Senator Nesbitt felt that the City has done a great job in studying the Civic Center, but to some extent the City has been laboring under what the City could do. What he is proposing is what the state legislators, the County Commissioners, and private sector can do to help. But, before they commit, they want to look at it from that prospective because we are the hub of this region.

Representative Goforth felt that we can lower the rates if we do what is best for the people. If you can get $5-6 Million from someone who will lease the water system, that makes sense to him.

Senator Apodaca feels that the City and County should concentrate on the water issue by separating out all the other facilities. Then find out where the true costs come and figure out a way to pay for those services but not on the back of water users.

Councilman Newman said that we have to address some of these tax equity issues and if we don't have any rate differentials, it's hard to see how it's fair to Asheville residents.

Vice-Mayor Jones voted to give notice to terminate the water agreement because she didn't feel like the water pipes were getting fixed (3 different governmental bodies were needed to approve the budget) and Asheville City rate-payers pay the highest water rates in the state. She said those two things were why she wanted to renegotiate the water agreement. She said that the City has made a capital improvement commitment of $6 Million this year to fix those pipes. She feels that the City-run system gives accountability to the voter. She said that the City is offering no rate differentials for a tax equity arrangement. This is a big movement since June of 2005. She felt the City has moved forward and hoped the County would move forward too.

Upon inquiry of Commissioner Gantt, Water Resources Director David Hanks felt that the City should be investing $6-8 Million every year for maintenance. Mr. Hanks said that if we have the resources and the ability, we probably have approximately $200-300 Million of real live needs out there as far as system-wide replacements, which is not uncommon of a water system our size. It's not feasible to do the projects at one time. Our CIP over the next seven years will go for maintenance.

Upon inquiry of Representative Sherrill, Mr. Hanks said that the annual raters pay about $20 Million per year, plus an additional $2 Million from development.

Upon inquiry of Representative Goforth, Mayor Bellamy said that we want to keep the water system because it is a City asset and that is one source that Asheville residents have direct accountability for. Over the last year, we have shown Asheville residents that we can be good stewards of our resources.

Chairman Ramsey said that City Council was extremely unwise not to take the offer of the County to take all the recreation facilities (including the Civic Center) so they could be paid for by the taxpayers throughout the County. Then we could come up with a plan on the Civic Center and go to the local delegation and others to come up with additional funding streams. The only thing they asked for in exchange was a true independent authority and that recreation facilities be governed jointly with the City and the County. The assets would still be owned by the City of Asheville.

Putting aside the non-betterment costs issue, Mayor Bellamy asked why the City shouldn't be allowed to run their own water system.

Chairman Ramsey felt that the City has every right to run their own water system, but when the City gave notice to terminate the water agreement, they faced certain consequences. (At 11:30 p.m., Senator Apodaca left the meeting.)

Vice-Chair Stanley said that we have a new Mayor and a new City Manager. He felt that the City and County Managers and the Mayor and Chairman they should be given an opportunity to work this out and bring to the respective bodies a proposed plan.

Senator Nesbitt said that the City is the one holding the problems. You have a water system you need to repair and civic center, et al. we need to do something with. Those are things as the County Commissioners and legislators have an interest in and we need to turn our attention to these problems. He said that in some reasonable way, under some reasonable plan, the legislators are willing to come to the table and help. In addition to the City and County being able to work it out, there will be help from your legislative delegation to do that. He thinks the City and County need to get together on the Civic Center issue and figure out what needs to be fixed and quantify it for the legislative delegation. We will then be ready to try to help, if that's possible. He said that this session is almost over and the City and Council will have some time to work on it before the next session, which starts in January of 2007

Commissioner Gantt suggested the City and County Managers get the income and expenses (including betterments) and the repair needs for the water system. Then the bodies can talk about the best way to manage it. He said he didn't care that much about how it's managed, but just that it gets fixed for the next 30-40 years.

Councilman Newman said that if we want to try to work this out locally, then we need to stay ahead of the judicial process. We may a little more time on the Civic Center, but some of the core water utility issues, we do need to try to work out as quick as we can. He felt that the City and County Managers need some direction on what each of the bodies can live with. The City

has come in and said we are committed to fixing the system. We are also willing to have no rate differentials going forward (with a tax equity payment of $6 Million/year) and will drop our legal challenge around that issue. He asked if any of the proposals that the County made in the past are still alive and what is on the table for negotiations.

Representative Sherrill said that if there is some agreement between the City and County, there may be something small we can find to do in the legislature before we adjourn this year. (At 11:39 p.m., Representatives Goforth and Sherrill left the meeting.)

Vice-Chair Stanley said that he didn't have a problem with the City running the water system, but just wanted to make sure where the money was going.

In response to Councilman Newman's question if any County proposals were still on the table, Commissioner Gantt said that unlike the negotiations, the County has made a conscious effort to not answer unless all five Commissioners agree. He said they would be willing to keep talking but all five Commissioners would need to agree on any proposals.

Chairman Ramsey said that he would not support a $6 Million tax equity payment unless they can come up with money which they don't have. He would support the water system being a City-run system but that all water revenue must stay in the system with no differential rates. He personally would be willing to compromise on some issues, but not others. Certainly he did not want to necessarily compromise on the one point that within ½ mile of the City limits future developments of a certain size would have to agree to be voluntarily annexed before they receive water service. We were on the record at the time accepting that. He is still willing to go in that direction and still willing to go the direction of the independent authority.

Councilman Mumpower said that all the County proposals ask Asheville to perform differently than Canton, Hendersonville, Waynesville, Weaverville, and all the other cities that own their assets in our area. He is not personally willing to support any agreement that says the City of Asheville has to behave differently than everybody else does.

Councilman Davis said that the City does have the tool to annex, if the area meets certain criteria, however, if the City and the County work together, we can have a place where people would want to build new development in the City.

Mayor Bellamy said the next step will be for the two Managers to circulate some dates for the next open meeting with all three bodies, at which meeting the report can be reviewed and we can see what needs to be done next and how we are going to get there.

Senator Nesbitt said that someone has to quantify the amount of the City's recreation facilities (that were transferred back after termination of the water agreement) and have that taken out of the equation before the legislators will know what they can do. We wouldn't just be helping the City with the Civic Center but around the corner we will be helping the City with the water system. If we take the burden off the City on the other facilities it will leave you with money to fix the water system.

Senator Nesbitt suggested the City and County Managers work together on coming up with a consensus group of things that could be put in an authority and how much money that will save the City if you do that. With all due respect, he thinks he would want an independent assessment on what we need to do regionally with the Civic Center.

Upon inquiry of Councilman Mumpower about the cost of the study, Senator Nesbitt said that the County would pay for it. And, it would need to be a new person not used before.

At 11:51 a.m., Mayor Bellamy and Chairman Ramsey adjourned their respective meetings.

Magdalen Burleson
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday – June 13, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

EXPRESSION OF SYMPATHY

On behalf of the City Council and the citizens of Asheville, Mayor Bellamy expressed its deepest sympathy to the family of Jackie Clark, who was killed on June 8, 2006, in an automobile accident. Division Chief Clark was an active member of the Asheville Fire Department for over 25 years.

INVOCATION

Councilman Freeborn asked for two moments of silence.

PLEDGE OF ALLEGIANCE

Mr. Fred English led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING JUNE, 2006, AS "APHASIA AWARENESS MONTH"

Councilman Davis read the proclamation proclaiming June, 2006, as "Aphasia Awareness Month" in the City of Asheville. He presented the proclamation to Ms. Edna Tipton who briefed City Council on some activities taking place during the month.

II. CONSENT AGENDA:

Mayor Bellamy asked that Consent Agenda "G" be removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 23, 2006

B. RESOLUTION NO. 06-111 - RESOLUTION AUTHORIZING THE MAYOR TO SELL AIR SPACE ADJACENT TO 12 S. LEXINGTON AVENUE TO CENTRINO LLC

Summary: The consideration of authorization authorizing the Mayor to convey air space adjacent to 12 South Lexington Avenue to Centrino, LLC.

On May 23, 2006, the City Council of the City of Asheville directed the City Clerk to advertise for upset bids regarding an offer to purchase air rights to City owned property adjacent to 12 South Lexington Avenue (PIN 9649.18-40-1034) for the sum of $2,000. The notice ran in the Asheville Citizen-Times on May 26, 2006, as provided in N. C. Gen. Stat. sec. 160A-269. No upset bids were received in response to said advertisement.

Approval of the resolution will authorize the sale of the property to Centrino, LLC for the amount of $2,000.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by independent appraisal.
- It will provide for a more practical approach to the air space occupied by the balconies.
- It will clarify responsibility and liability for the balconies.

There is no negative impact.

City staff recommends City Council authorize the Mayor to convey air space adjacent to 12 South Lexington Avenue to Centrino, LLC.

RESOLUTION BOOK NO. 30 – PAGE 31

C. RESOLUTION NO. 06-112 - RESOLUTION ACCEPTING BODDINGTON COURT AND A PORTION OF RACQUET CLUB ROAD AS CITY-MAINTAINED STREETS

Summary: The consideration of a resolution to accept Boddington Court and a portion of Racquet Club Road in South Asheville as City-maintained streets.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Boddington Court is a developer-constructed street that has an average paved width of 20 feet and a length of 0.14 miles. Engineering Department staff inspected this street and finds it to be constructed in accordance with the approved standards.

A portion of Racquet Club Road is currently maintained by the City. In order to accept maintenance of Boddington Court the City must accept maintenance of an additional section of Racquet Club Road. This section of Racquet Club Road is 20 feet in length and 0.02 miles long. The right-of-way for this section of Racquet Club has been recorded. The property owners adjacent to this section of roadway have requested the acceptance of the street.

Following City Council's approval of this resolution, Boddington Court and a portion of Racquet Club Road will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

Pros:

- Property owners inside the City on this section will receive relevant City services for future maintenance and other related street services.
- The City will receive Powell Bill funds from the NCDOT to maintain the roadway.

Cons:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council accept Boddington Court and a portion of Racquet Club Road in South Asheville as a City maintained street.

RESOLUTION BOOK NO. 30 – PAGE 32

D. RESOLUTION NO. 06-113 - RESOLUTION AUTHORIZING THE MAYOR AND KEY CITY STAFF TO ACCESS THE FEDERAL TRANSIT ADMINISTRATION'S TRANSPORTATION ELECTRONIC AWARD AND MANAGEMENT SYSTEM

Summary: The consideration of a resolution authorizing the Mayor and key City staff to access the Federal Transit Administration's Transportation Electronic Award and Management (TEAM) System.

The Federal Transit Administration (FTA) uses the TEAM system to award, administer and oversee federal funds granted to transit systems. The Mayor and the City Attorney require access to the system to agree on behalf of the city to the certifications and assurances sought by the FTA as a condition of making the grant, and, to actually submit the application for the grant which allows the City of Asheville to receive FTA funding. Grant administration and origination will be performed by the Transit and Parking Services Manager and the Transit Planner. This action is a required by the FTA in order to receive federal funds to support transit operations.

This action conforms with the Strategic Operating Plan in the Planning Focus Area- Goal #2-A Multi-modal Transportation System, leveraging outside funding sources

Pros:

- Allows the origination of grants to receive federal transit funding.

Cons:

- None

City staff recommends adoption of the resolution authorizing the Mayor and key City staff to access the Federal Transit Administration's Transportation Electronic Award and Management System.

RESOLUTION BOOK NO. 30 – PAGE 34

E. ORDINANCE NO. 3365 - ORDINANCE DISSOLVING THE TAXICAB ADVISORY BOARD

Summary: The consideration of an ordinance to dissolve the Taxicab Advisory Board.

The City Council Boards & Commissions Committee met and determined that the Taxicab Advisory Board is no longer necessary and should be dissolved.

The Taxicab Advisory Board was created by the Taxicab Ordinance and has never been constituted or appointed. The taxi affairs are being dealt with through staff level meetings with the providers. Where difficulties remain, the City Council Revenue and Finance Committee is acting as the final advisory group. The board is not needed in order to continue the business of the taxicab ordinance.

This action conforms with the Strategic Operating Plan in the Community Building area. Goal #1 - efficient and effective City Council procedures

Pros:

- Will eliminate a board that has no remaining function.

Cons:

- Possible perception the process for review may lack impartiality.

The City Council Boards & Commissions Committee recommends City Council adopt an ordinance to dissolve the Taxicab Advisory Board.

ORDINANCE BOOK NO. 23 – PAGE 1

F. ORDINANCE NO. 3366 - BUDGET AMENDMENT TO AUTHORIZE USE OF N.C. STATE DRUG SEIZURE FUNDS

Summary: The consideration of a budget amendment, in the amount of $66,290, to authorize the use of North Carolina State Drug Seizure Funds to fund training improvements for the Asheville Police Department.

The North Carolina State Drug Seizure Program is an equitable sharing program which divides the illegal proceeds from drug dealing between the North Carolina State government and local law enforcement agencies. It is designed to help off-set the considerable cost of drug enforcement by allowing local law enforcement agencies to use seized monies for equipment, training, and improvements that might not necessarily be budgeted for by the agency. The illegal proceeds are divided with 25% going to the North Carolina Department of Revenue and 75% going to the local law enforcement agency initiating the seizure.

To date, the City of Asheville Police Department has received $66,290 in North Carolina State drug seizure funding. This amendment will authorize the use of that funding to make critical improvements at the APD firearms range. These improvements include modifications to create a 100 yard firing range, paved access road, paved parking area, and operable restroom facilities. These improvements will enhance all APD officers firearms proficiency and overall officer safety training. This range is used monthly by the Drug Suppression Unit / Emergency Response Team for firearms training.

This action conforms to the City Council's Strategic Operating Plan under Partnerships to Improve Critical Services and Infrastructure. Goal 2, Objective A: Research and develop strategies for securing significant new recurring revenue sources.

Pro:

- North Carolina State drug seizure revenue used to fund improvements to the APD firearms range at no cost to city taxpayers.

Con:

- None noted.

City staff recommends City Council adopt the budget amendment, in the amount of $66,290, to authorize the use of North Carolina State Drug Seizure Funds to fund improvements to the Asheville Police Department firearms range.

G. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE FOURTH OF JULY CELEBRATION ON JULY 4, 2006

RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE BLUE RIDGE CLASSIC LACROSSE TOURNAMENT ON JULY 29, 2006

RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE LEXINGTON AVENUE ARTS & FUN FESTIVAL ON SEPTEMBER 10, 2006

These items were removed from the Consent Agenda for individual votes.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR AN INDIVIDUAL VOTE

RESOLUTION NO. 06-114 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE FOURTH OF JULY CELEBRATION ON JULY 4, 2006

RESOLUTION NO. 06-115 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE BLUE RIDGE CLASSIC LACROSSE TOURNAMENT ON JULY 29, 2006

RESOLUTION NO. 06-116 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE LEXINGTON AVENUE ARTS & FUN FESTIVAL ON SEPTEMBER 10, 2006

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following 2006 Special Events: (1) The Fourth of July Celebration on July 4, 2006; (2) The Blue Ridge Classic Lacrosse Tournament on July 29, 2006; and (3) The Lexington Avenue Arts & Fun Festival on September 10, 2006.

The below listed group has requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their event and allow for consumption at this event.

- Asheville Parks and Recreation produces the 4th of July Celebration and Fireworks spectacular as a community celebration and to attract visitors to the downtown area. This event will be held in Pack Square and along College Street, due to the Pack Square Conservancy construction project.

- The Blue Ridge Classic Lacrosse Tournament on July 29, 2006, in the designated area at the end of Azalea Park Field #4.

- The Lexington Avenue Arts and Fun Festival on Lexington Avenue on September 20, 2006.

The Asheville Parks and Recreation Department recommends City Council adopt the resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following 2006 Special Events: (1) The Fourth of July Celebration on July 4, 2006; (2) The Blue Ridge Classic Lacrosse Tournament on July 29, 2006; and (3) The Lexington Avenue Arts & Fun Festival on September 10, 2006.

Councilman Newman moved for the adoption of Resolution Nos. 06-114, 06-115, and 06-116. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Mayor Bellamy voting "no."

RESOLUTION NO. 06-114 - RESOLUTION BOOK NO. 30 – PAGE 35

RESOLUTION NO. 06-116 - RESOLUTION BOOK NO. 30 – PAGE 40

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO RECEIVE INPUT ON THE FISCAL YEAR 2006-07 ANNUAL OPERATING BUDGET

Mayor Bellamy opened the public hearing at 5:12 p.m.

Chief Financial Officer Ben Durant said that this public hearing is to receive input on the Fiscal Year 2006-07 Annual Operating Budget. This public hearing was advertised on June 2 and 9, 2006.

After a series of worksessions on the Fiscal Year 2006-07 Annual Operating Budget, the City Manager presented the budget to City Council on May 23, 2006. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the budget along with a notice of the public hearing was published on June 2 and 9, 2006. Adoption of the budget ordinance is scheduled for June 27, 2006, at the City Council meeting.

The Fiscal Year 2006-07 Annual Operating Budget is balanced with an Ad Valorem tax rate of $0.41 per $100 of assessed value. All essential City services are maintained.

A copy of the budget is available for public inspection in the City Clerk's Office. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, the budget may be changed by City Council in any way before adoption. It may also be changed by budget amendment after adoption with the only exception being the Ad Valorem Tax rate, which cannot be changed once adopted.

City staff recommends City Council conduct the public hearing on the City of Asheville Fiscal Year 2006-07 Annual Operating budget and include public input in considerations on the budget.

Mr. Fred English, Haw Creek resident, expressed concerns over the 90-day trial free bus period. He also felt it wasn't fair to have people who are trying to make a living to charge them more for parking.

Mr. Jeff Slosman, speaking on behalf of the Manufacturers Executive Association, said that the manufacturing sector has felt a tremendous burden due to the stormwater utility tax in the past year. He urged Council to be cautious before putting more burden on our area industries, especially regarding water and the privilege tax. Increasing the cost for water for large users would have an immediate repercussion on jobs in the area. We already pay more for water than other cities in the state and in the region. Higher costs might result in additional job losses for the area. He felt it was imperative that we keep the differential structure that is currently in place and not go to a flat rate structure. Regarding the CIP, manufacturers are willing to pay their fair share, but not a disproportionate fair share, since 90% of the water users are residential and 8% of the remaining 10% are manufacturers. The unbalanced fee structure will result in employers not be able to give wage increases to our employees or donations to the area's non-profits. Regarding the privilege licenses, to remove the cap totally would have an unfair disadvantage to the larger

businesses and manufacturers in the area. He urged Council to not place any more taxes on manufacturers because there may be potential job losses in the manufacturing sector in the Asheville area.

Mr. Hartley Eastwood, representing a group from Deerwood, was not opposed to paying their fair share to repair the water system, but was concerned about the water meter charge for the capital improvement plan. He said that Deerwood has 100 residential units. The plan for a residential one-inch meter would be $3.50 a month and a 6-inch meter is $9.90 a month. Deerwood has a 6-inch water meter and they share a water bill for assessments. Beyond the water meter is the homeowner's responsibility. He feels they are being charged an unfair share and asked for Council to reconsider charging them for the 6-inch meter, when they are in fact residential homes.

Ms. Robin Stickney, United Way Community Services Director, urged City Council to fund the 211 Call Center in that almost half of the 60,000 calls last year were from City residents.

Mr. Mac Cox, President of Crowfields Association, said that Crowfields contains 192 homeowners and expressed the same concerns as the homeowners from Deerwood.

Mayor Bellamy closed the public hearing at 5:29 p.m.

City Manager Jackson said that he would provide Council with background information on these budget concerns at the June 20, 2006, budget worksession.

Mayor Bellamy said that City Council will be holding another budget worksession on June 20 and then Council will consider adoption of the Fiscal Year 2006-07 Annual Operating Budget at their June 27, 2006, formal meeting.

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING THE MINIMUM LOT WIDTH FOR CUL-DE-SAC LOTS

ORDINANCE NO. 3367 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING THE MINIMUM LOT WIDTH FOR CUL-DE-SAC LOTS

Mayor Bellamy opened the public hearing at 5:30 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance amending the Unified Development Ordinance for the purpose of clarifying the standards concerning the required lot width for lots on cul-de-sacs. This public hearing was advertised on June 2 and 9, 2006.

The current regulations contained in the Code of Ordinances of the City of Asheville concerning the lot width for residential lots on cul-de-sac lots read literally that such lot width shall be twenty-five (25) feet at the front setback line (interpreted as a typographical error meant to be the property line) and an average of the required lot width over the entirety of the lot. The staff has long considered this standard as difficult to administer. The staff previously went through the process of amending this standard in conjunction with a number of other ordinance amendments. In the process of approving the numerous amendments made over the course of a few months, an accidental reinsertion of this problematic regulation occurred. This wording amendment simply corrects the clerical and drafting mistakes and creates a regulation concerning lot width on residential cul-de-sacs that is easily applied and appropriate for such development. The standard

is that such lots must be a minimum of twenty-five (25) feet at the front property line and eighty (80%) percent of the required lot width at the front setback line.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Considerations:

- This amendment provides for a simpler mechanism for determining lot width on cul-de-sacs without jeopardizing the need for such lots to be similar in size, etc. with other lots in the same zoning district.
- This amendment corrects clerical and drafting mistakes previously made concerning such regulations.

The Asheville Planning and Zoning Commission recommended approval of this code amendment on May 3, 2006, by a unanimous vote of 5-0. Staff recommends approval.

City staff recommends City Council approve the amendment to the Unified Development Ordinance for the purpose of clarifying the standards concerning the required lot width for lots on cul-de-sacs.

Mayor Bellamy closed the public hearing at 5:31 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3367. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 – PAGE 4

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ALLOW "REPAIR AND SERVICE BUSINESSES" AS A PERMITTED USE IN THE INDUSTRIAL DISTRICT

ORDINANCE NO. 3368 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO ALLOW "REPAIR AND SERVICE BUSINESSES" AS A PERMITTED USE IN THE INDUSTRIAL DISTRICT

Mayor Bellamy opened the public hearing at 5:32 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance amending the Unified Development Ordinance to allow "repair and service businesses" as a permitted use in the Industrial District. This public hearing was advertised on June 2 and 9, 2006.

The City of Asheville's Unified Development Ordinance does not currently permit "repair and service businesses" in the Industrial District. Such uses are allowed in the Commercial Industrial and River Districts. They are also allowed in the Community Business I, Community Business II, Highway Business, Regional Business, and Central Business Districts as uses by right subject to special requirements (restricted as to what may be repaired and whether outdoor operations or storage are permitted). Repair and service businesses are establishments primarily engaged in services (often including repair) to individuals, households or businesses. Examples would include: carpet cleaners; appliance repair; shoe repair; and electronic repair services. Heavy equipment and automobile repair are separately listed in the current ordinance and, therefore, would not be included in this classification.

This ordinance simply adds "repair and service businesses" to the list of permitted uses in the Industrial District.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Considerations:

- This amendment allows for "repair and service businesses" to be developed in Industrial Districts which seems an appropriate area for such operations.
- This amendment opens up additional areas where such businesses may operate without numerous limitations on operation.
- This amendment may be seen to deplete the available industrial sites in our community for use for non-industrial purposes.

The Asheville Planning and Zoning Commission recommended approval of this code amendment on May 3, 2006, by a unanimous vote of 5-0. Staff recommends approval as well.

City staff recommends City Council approve the amendment to the Unified Development Ordinance to allow repair and service businesses as a permitted use in the Industrial District.

Mayor Bellamy closed the public hearing at 5:32 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3368. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 – PAGE 6

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. QUALSERVE PRESENTATION

Mayor Bellamy was pleased to present the QualServe Peer Review plaque to the Water Resources Department. This plaque was presented to the City of Asheville by the American Water Works Association (AWWA). She then recognized Water Resource Department employees David Hanks, Mike Brookshire, Ron Kems, Carroll Woody and Leslie Carreiro.

Water Resources Director David Hanks gave a brief update of the 2005-06 water utility improvements: (1) Asset Management Excellence; (2) Environmental Management Standards (ISO); (3) computerized management system; (4) Capital Improvement Program; and (5) excellent peer review by QualServe.

Mr. Hanks then explained the a peer review is an objective set of external eyes by experienced utility professionals who take a high level look at the organization and make recommendations to senior utility management. The QualServe Peer Review was conducted by: Tom Clark, Round Rock, Texas; David Dawson, Abingdon, Virginia; Ron Thomas, Harlingen, Texas; Jim Miller, Anniston, Alabama, and Angela Lafferty, AWWA, Denver, Colorado.

He then shared the highlights of the strength findings: excellent water quality; formal education program is in place; committed to continuous improvement; safety policies are in effect and enforced and safety meetings occur on a regular basis; equipment is provided, personnel are

trained on its use and most important, employees use it; all facilities have an Emergency Response Plan in place; capital improvement needs have been identified; utility has debt capacity; construction crew – neighborhood projects; effective customer service (a) external customers are well served; and (b) an understanding of the importance of the water utility mission; Water Resources (a) dedicated staff; (b) certification/recognition of excellence; and (c) Asset Management Program; and continuous improvement (a) commitment/participation programs; (b) culture of continuous improvement; (c) support within business and commercial community; and (d) ISO 14001-2004 Certified – Environmental Management System.

He then shared the highlights of the opportunities findings: develop plan to locate all utility functions at a single central location; new employee orientation should include tours to all work sites to increase appreciation of fellow employee working hardships; a formal executive development program for senior staff should be implemented throughout the City; alternative financing options such as leasing and special assessments; ensure that talented staff will choose to make careers here; and fund major capital improvements.

B. CIVIC CENTER ECONOMIC IMPACT REPORT

Councilman Davis, Chair of the Civic Center Task Force, said that the economic impact study of the Civic Center on the local economy has been completed and is being presented to City Council for consideration. He thanked the Dr. Ha, the Civic Center Task Force members, Ms. Sasha Vrtunski and Mr. David Pisha for their hard work in reaching this point.

Ms. Sasha Vrtunski said that the Civic Center Task Force, created by City Council, recommended that the City carry out an economic impact study that would measure the impact of the Civic Center on the local economy. City Council funded the study, and it has been completed. Western Carolina University Professor of Economics Steve Ha conducted the study to estimate the economic impact of the Asheville Civic Center on the economy of Asheville and Buncombe County.

The study found that visitor spending related to the Asheville Civic Center is estimated to be over $19 million. Adding in the direct and indirect effects of the expenditures by the Civic Center, the total impact on the local economy is over $22 million. Measuring the impact in jobs, the Civic Center creates 295 direct jobs and 73 indirect jobs for a total of 368 jobs in the local economy. The study also breaks down the impacts in both dollars and jobs for each of the Civic Center venues (arena, auditorium, exhibit hall, banquet hall).

In addition to the impact on the local economy, a fiscal impact study of the Civic Center was carried out. It was found that the Civic Center generated $1.8 million in state and local taxes, and another $2.4 million in federal taxes, for a total of $4.2 million in taxes.

Advantages:

- The economic impact study reveals new information about the Civic Center's impact on our local economy.
- The Civic Center is generating over $22 million a year in local spending, creating approximately 368 jobs (directly and indirectly).

Disadvantages:

- None noted.

She said that this report is for informational only and for City Council use when considering the merits of future investment in the existing or new structures/programs of the Asheville Civic Center.

Dr. Inhyuck "Steve" Ha said that the purpose of the study was (1) to estimate the economic and fiscal impacts of the Asheville Civic Center on the economy of Buncombe County, N.C.; and (2) to examine the characteristics of the events (event length and type) and visitor profile, such as visitor volumes, and the residential origins of its visitors.

Key findings included: (1) the Civic Center is currently operating at a deficit of about $400,000 a year, but generates ten times more in visitor spending dollars than it costs to operate the Civic Center ($19 Million in money generated vs. $1.9 Million in operating expenditures); (2) events at the Civic Center range from one to more than five days in length and combined attract over 211,000 attendees a year; (3) overall in terms of payroll expenditures, other expenditures, and visitor spending, the Civic Center contributes more than $22 Million a year; (4) in terms of jobs, the Civic Center creates a total of 368 jobs in the local economy; and (5) in addition to the economic impact of the Civic Center, it also generates over $4 Million a year in federal, state and local taxes.

Dr. Ha then explained, using a map, Civic Center ticket sales by state. He then reviewed with Council a map showing ticket sales by North Carolina counties. Using charts, Dr. Ha showed the distribution of revenues and expenditures from the Civic Center over a three year average. The then showed a distribution chart of visitors by venue of the Auditorium, Banquet Hall, Exhibition Hall and Arena. Following that, he reviewed with Council the ticket sales from the box office, phone sales, internet sales and outlet sales.

Using tables from the IMPLAN analysis, Dr. Hall showed Council the economic impacts of the Civic Center and then by venue use. He reviewed the expenditures of visitors at the Civic Center and the fiscal impact of the Civic Center.

Dr. Ha presented council with three recommendations: (1) The Civic Center is making a significant amount of financial contribution to the Asheville-Buncombe economy. Due to its influence beyond Buncombe County, the Center is attracting revenues from outside the County; (2) a comprehensive survey needs to be conducted over a full 12-month period given the seasonal fluctuations of the type of events and length of events held. A survey of less than a year would not accurately portray spending behavior related to the Civic Center; and (3) the Civic Center could install a tracking system to consistently gather information about the characteristics of people attending events at the Civic Center.

In summary, Dr. Ha said that the study estimated Civic Center revenues and expenditures, event length and type, visitor volumes, and the residential origins of its visitors. The study also considered the direct and secondary economic and fiscal impact on the local economy and jobs generated as a result of the Civic Center.

The study's principal investigator found the Center is currently operating at a deficit of about $400,000 a year, but generates ten times more in visitor spending dollars than it costs to operate the Center ($19 Million in money generated vs. $1.9 Million in operating expenditures). Events at the Civic Center range from one to more than five days in length and combined attract over 211,000 attendees a year. Finally, in addition to the economic impact of the Civic Center, it also generates over $4 Million a year in federal, state and local taxes.

In terms of payroll expenditures, other expenditures, visitor spending, and taxes, the Civic Center contributes more than $22 Million a year.

Even though Dr. Ha was unable to respond to some questions due to the software design, he did respond to various questions and comments from Council, some being, but are not limited to: of the $4 Million in tax revenue generated, how much does the City get back; in terms of the software, does one finding impact other areas; out of the $22 Million impact, what are the proportions for inside the City, Buncombe County, and statewide; is the information based on the present day on the conservation side; is there a way to find out if the overnight visitors' destination was the Civic Center; what is the average salary of the 11 full-time employees; how was the dollar amount for the overnight visitor determined; and, has the IMPLAN tool been used in other communities to obtain a history of its use.

Councilman Newman wondered if there was a way to determine if the City had been investing money into the Civic Center annually if we would have a higher operating deficit, or if the well-maintained facility would be drawing more people.

Councilman Mumpower understands that without the visitor tracking, we have a suspect study. He said there is no question that there is secondary economic impact from the Civic Center, but Dr. Ha's ability to be thorough was hampered based on limited statistical data.

Mr. Dennis Justice suggested other variables to determine the economic impact of the Civic Center.

It was the consensus of City Council to accept this report.

C. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CONVENTIONAL WISDOM TO DEVELOP A COST ANALYSIS FOR REFURBISHING AND UPGRADING THE CURRENT CIVIC CENTER FACILITY

Councilman Davis, Chair of the Civic Center Task Force, said that as a result of the meeting with the state legislators and County Commissioners on Monday, June 12, 2006, at which time they asked the City to look at the Civic Center from a regional approach, he felt it may be appropriate to continue this resolution for a short period of time.

Ms. Sasha Vrtunski said that on May 9, 2006, the Civic Center Task Force presented its report to the Asheville City Council. The report recommended two options for consideration; the first included building a new arena, and the second called for building a new performing arts center next to City Hall. A third option, estimated at approximately $17 million, was also discussed. This third option would only cover repairs of deferred maintenance items and would not improve service to customers, nor conditions for event performers and producers.

During the May 9 Council meeting, there was a request from members of Council that a "fourth option" be developed. This option consists of refurbishing and upgrading the current facilities so that the Civic Center can continue operations into the future successfully. In pursuit of this option, staff contacted Ian Vingoe, a consultant with Conventional Wisdom, who wrote much of the Heery Report. Mr. Vingoe is intimately familiar with the Civic Center and has the capability to develop realistic and detailed estimates for improvements in a short time frame.

Mr. Vingoe has indicated that the fee for the costs estimates report will be up to $10,000 plus expenses. There is additional cost if City Council would like him to attend a City Council meeting to discuss the results. Staff is confident that the total cost of these items would not exceed $20,000. Staff proposes that we use savings in the current Fiscal Year 2005-06 Civic Center budget to fund this $20,000 expense; therefore, there will be no impact on the Fiscal Year 2006-07 budget.

Advantages:

- City Council will receive up to date cost estimates for improving the Civic Center, broken out into three milestones (levels of improvement).
- Updated cost estimates will also be useful in evaluating the second option proposed by the Civic Center Task Force (Parkside option), as that option calls for upgrading the Civic Center Arena.

Disadvantages:

- The cost analysis will cost between $10,000 and $20,000.

City staff recommends that City Council authorize the City Manger and/or his designee to enter into a contract with Conventional Wisdom, not to exceed a total of $20,000.

After each Council member voiced their opinions on whether or not to proceed with the study at this time, it was the consensus of Council to defer action on this matter and bring it back to Council on August 8, 2006.

Mayor Bellamy felt that it was important to look at all information from the standpoint of what will serve our community long-term.

D. RESOLUTION NO. 06-117 - RESOLUTION EXPANDING INSPECTION SERVICES INTO THE EXTRATERRITORIAL JURISDICTION AREA

City Attorney Oast said that this is the consideration of a resolution expanding inspection services into the extraterritorial jurisdiction area.

He said that the purpose of this report is to implement Council direction concerning issues and opportunities for managing growth in areas immediately proximate to the City limits through the extension of City development review services into the extraterritorial jurisdiction (ETJ).

City Council has directed staff to undertake extension of the full range of development review services into the ETJ. We have advised Buncombe County of this intention and have coordinated transition plans for service extension. The resolution effectuates Council direction in accordance with our service transition discussions with the County. This service extension will apply to the ETJ areas and will include the following services.

- Floodplain management
- Stormwater management
- Erosion control
- Street address services
- State Building Code
- Minimum housing code

City staff recommends City Council adopt the resolution extending the City's full range of development review services into the ETJ.

At the request of Vice-Mayor Jones, it was the consensus of Council to instruct the Mayor to write a letter to the Chairman of the Buncombe County Commissioners asking for enforcement authority for nuisance abatement in the extraterritorial jurisdiction area.

When Councilman Freeborn asked if there would be any financial impact to our General Fund, City Manager Jackson explained how the revenue will exceed expenditures by approximately $150,000.

In response to Councilman Davis, Building Safety Director Robert Griffin felt that the City can provide those services as efficiently as they are being done now. Under the current conditions, if someone is building in the ETJ, they go to the County to take out the building permit and then have to come to the City to take out their zoning permits. Whereas, once the ETJ is governing by the City for all building activities, they only have to make one stop at the permit and development services center.

Mr. Griffin also noted that the City does have a relationship with the Health Department regarding permitting wells and septic tanks. Regarding pricing, Mr. Griffin said that the vast majority of what is in the ETJ are one and two family dwellings. The City's fees and charges and the County's fees and charges for one and two family dwellings, as well as commercial, are virtually the same.

When Councilman Mumpower asked how long it takes to get an average permit in the City vs. in the County, Mr. Griffin did not know what the County's average turn-around time was. However, the City does studies each month on our matrix for issuing permits. He guessed the month of April for some projects were 29 days average time and he believed that was the longest time period for a building permit.

Councilman Mumpower said that it was his understanding that the County averages about 2 weeks.

Councilman Mumpower said that people cannot build substandard housing in North Carolina due to our State Building Codes. He felt it was presumptuous of the City to lay claim to a unique or special ability that is so much better than the County's. We can create urban standards that might be better for us in the long run, but we do that at the expense of controlling people who don't get to vote. He feels that is wrong.

City Attorney Oast said that the City already provides zoning and subdivision regulations in the ETJ except in the areas that the County zones. The building regulations are state-wide codes and all this does is changes who enforcement it.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 06-117. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 30 – PAGE 42

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of May 19-June 1, 2006: Leon Dejournett (Streets), Charlotte Tell (Streets), Grove Arcade (Streets), Arlene K. Schandler (Transit Services), Charles Whitted (Streets) and Amber Prestwood (Civic Center).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Kyle Ross asked Council to create an avenue for people to go, without having to hire an attorney, who have a complaint against the Police Department. In addition she would like City Council to have a collective voice and leadership over the Police Department. Mayor Bellamy asked that City staff contact Ms. Ross regarding her concerns.

Mr. Robert Zieber said that on May 23, 2006, he brought to Council's attention the following three issues regarding the installation of 24 speed humps on the public streets of Biltmore Park: (1) the City's Traffic Calming Policy has not been followed; (2) the Biltmore Park Traffic Calming Plan has been misrepresented b the Homeowners Association; and (3) the City will be assuming unknown costs for a project of questionable benefits. He felt that some members of the Homeowners Association Board of Directors have taken control of the petition process by withholding information and abusing their position to lobby and advocate for approval of the project despite a resolution limiting action on this matter. He has had some conversations with City staff regarding this since May 23, unfortunately he was not confident that he will get all his questions answered, so he is bringing this matter back to City Council. Mayor Bellamy clarified the City's traffic calming policy, specifically noting that the role in the petition process in that it is the homeowner's responsibility to get signatures on the petition for traffic calming. Mayor Bellamy asked that City Engineer Cathy Ball talk with Mr. Zieber to make sure that the City is following our guidelines in place.

CLOSED SESSION

At 7:32 p.m., Councilman Mumpower moved to go into closed session for the following reason: To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville and State of North Carolina. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Freeborn and carried unanimously.

At 9:00 p.m., Councilwoman Cape moved to come out of closed session. This motion was seconded by Councilman Freeborn and carried unanimously.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:00 p.m.

Magdalen Burleson
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday – June 20, 2006 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

GROWTH AND DEVELOPMENT POLICIES

Planning & Economic Development Director Scott Shuford said that City staff has taken the input received from the City Council worksession on May 16, 2006, and the Development Issues Forum on May 30, 2006, and produced the following summary report. He explained how the report is supported with a variety of attachments, listed below (but not specifically included in these minutes):

- Selected Council Minutes – May 16, 2006, Worksession
- Executive Summary and Complete Responses from the May 30, 2006 Development Issues Forum and follow-up correspondence
- Table Summarizing Proposed Revamping of City Zoning Districts
- Example Illustrating Ordinance Requirements
- Town of Knightdale UDO Development Review Process Example
- Proposed Land Use/Economic Development Analysis
- Neighborhood Coordinator Position and Formal Staff Query Program
- Town of Apex Interactive Development Map Link

Summary Report

Six common themes emerged from Council comments and public input. These are listed below:

- Development Regulations
- Economic Development
- Transportation
- Green Building
- Public Involvement/Communication
- Housing

Development Regulations:

A common theme has emerged with both Council members and the public requesting amendments to the UDO that make it clearer, more "environmentally-sensitive," and directive as far as important City goals. The following table summarizes content and clarification changes proposed by staff to address these issues. Some staffing resources will be needed to effectively implement and enforce these changes. Proposed completion date including public input via focus groups is December 31, 2006, using staff resources.

Proposed UDO Changes

Significant Content Changes	
Nonresidential zoning districts and mixed use zoning districts	See table that addresses changes proposed for this key section.
Parking, landscaping, buffering, and loading requirements	Illustrations, adjustments to requirements, retroactive landscaping requirements, simplifications (see example)
"Environmental" regulations: • Floodplain Management • Open Space • Hillside, Steep Slopes • Ridgetop	 • Best practices adjustments • Fee-in-lieu, increased scope • Increased scope • Increased scope
Nonconformities	Broader application, lower thresholds
Incentives for: Green building, multimodal transportation, affordable housing, smaller unit size	Process and development intensity adjustments
Significant Clarification Changes	
Development processes	Flow charts (see page from Town of Knightdale UDO)
Definitions	Review and add any needed definitions
Signs	Review and clarify as needed; match with revisions to zoning districts
General	Use of tables and charts
No Significant Changes Proposed	
Residential Zoning Districts	Maintain current requirements
Overlay Districts	Add adaptive reuse overlay district
Subdivision regulations	Minor technical adjustments

Economic Development

Public and Council concerns address the need for a broader perspective on economic development issues. The following steps are proposed:

- Completion of a comprehensive economic development incentives program to provide incentives to the "right" kind of business recruitment retention and expansion. Proposed program completion: December 31, 2006. Proposed program implementation: Beginning with FY 2007/2008 budget.
- Completion of a comprehensive economic development/land use analysis by an outside consultant to identify consistency between the City's development regulations and pattern and the adopted economic development goals. Follow-up work will coordinate adjustments to regulations and goals as necessary. Completion date for analysis is per attached report. Incorporation of ideas and concepts into development regulations and economic development incentives are dependent on Council direction.
- Website targeting areas of the City where redevelopment activities are encouraged (this is the so-called *Priority Places* program). Proposed completion: December 31, 2006.

Transportation

Promotion of multimodal transportation alternatives was identified by both Council members and the public as an important objective. The following steps are proposed:

- Budgetary focus on capital and operational needs for sidewalks, transit, greenways, and bike lanes/paths. Proposed program implementation: Beginning with FY 2007/2008 budget.
- Inclusion of best practices for multimodal transportation in City and MPO regulations and standards. Proposed completion: December 31, 2006.
- Identifying and implementing regulatory process, development intensity and financial incentives for incorporating multimodal and greenway amenities in development plans. Proposed program completion: December 31, 2006. Proposed program implementation – financial incentives: Beginning with FY 2007/2008 budget.

Green Building

Promotion of Green Building was mentioned by both Council members and the public as an important objective. The following steps are proposed:

- Promotion of best practices for Green Building in City brochures and web-based media. Proposed program completion: December 31, 2006.
- Inclusion of best practices for Green Building in City regulations and standards. Proposed program completion: December 31, 2006.
- Identifying and implementing regulatory process, development intensity, and financial incentives for incorporating Green Building methods in development plans. Proposed identification step: December 31, 2006. Proposed program implementation – financial incentives: Beginning with FY 2007/2008 budget.

Public Involvement/Coordination

Improving the content and extent of public communication was identified as a priority by Council and the public. Ideas for accomplishing these objectives include:

- Creation of a neighborhood coordinator position and formal staff query program. Possible inclusion in FY 2006/2007 budget.
- Installation of a development review mapping tool on the City webpage which would provide detailed information about development projects throughout the City. Proposed completion: December 31, 2006.

Housing

Promotion of affordable housing was identified by both Council members and the public as an important objective. The following steps are proposed:

- Budgetary focus on capital needs for affordable housing (Housing Trust Fund, infrastructure investments). Annually as part of budget process.
- Identifying and implementing regulatory process and development intensity incentives for incorporating affordable housing in development plans. Proposed program completion: December 31, 2006.
- Build on the "out-of-the-box" analysis of affordable housing options. Council objectives, and additional community input in order to restructure our housing programs, staff assignment, and financial resources for maximum effectiveness in the promotion of affordable housing. Proposed timeline: (1) identification of Council objectives (what affordable housing "looks like" – issues such as price ranges, rents, unit sizes, client/income group, etc.): September 30, 2006; (2) program analysis and development: December 31, 2006; and (3) community, stakeholder input – final Council direction: March 31, 2007.

Mr. Shuford responded to various questions/comments from Council, some being, but are not limited to: the need for a comprehensive plan on how to address affordable housing in the community; how is the form based performance zoning and the possibilities of illustrated ordinances moving forward and when will Council see those changes; what are some of the significant content changes in the zoning districts, parking, landscaping, buffering and loading requirements; will the residential zoning classifications change; and will there be opportunity for multi-family development based on footprints.

Councilman Mumpower felt that this is another framework for the City to control market forces and other issues in the community. Philosophically he felt the City is looking at finding ways to exert greater control over other people's property in the City.

Mayor Bellamy said that her goal in this process is to make things clearer and easier for developers and our community.

Councilman Newman felt that Council needs a range of different kinds of housing in the community. He felt that we may need to be specific when it comes to financial strategies, but a good land use plan will be respectful of neighborhoods and allow infill development with reasonable regulations and good incentives allowing the housing community do what they are good at doing.

It was the majority of Council's direction to accept the Planning & Development Department's work program outlined above.

MAYORAL ELECTION AND 4TH SEAT REPLACEMENT

City Attorney Oast said that N.C.G.S. 160A-63 prescribes the method of filling vacancies on municipal governing boards.

Depending on when during the term a vacancy occurs, the statute provides for the unexpired term to be filled first by approval of the Council, then by election at the next regular city election. The manner of filling vacancies on Council is not one of the features of the governmental structure (like term length or partisan elections) that Council can change by ordinance, but it appears to be possible for a municipal charter to prescribe a different procedure for a particular city.

Our limited research on other NC municipal charters indicates that, where a charter makes specific provision for filling vacancies, it either refers to the applicable State law, or prescribes a process not significantly different from State law. Some charters prescribe a different procedure for filling a vacancy in the Mayor's office than a vacancy on Council, and some specify a process that applies if Council fails to make an appointment within a certain time. Asheville's charter provides only that vacancies will be filled by the Council for the remainder of the unexpired term.

In summary, City Attorney Oast said that Council can appoint the next highest vote-getter, appoint whoever Council wants, or ask for legislative approval to change Asheville's charter to reflect that if the vacancy is not filled within 60 days then a special election must be held.

We will continue our research, and report any additional findings to Council.

Vice-Mayor Jones supported changing Asheville's charter to reflect that in the election year of the Mayor that if a seated Council member is elected Mayor that the unexpired seat be

filled by the 4th highest vote-getter. However, if the Mayor or a Council seat is vacated for other reasons, then Council should make the appointment, due to the cost of an election.

Upon inquiry of Councilman Mumpower, City Attorney Oast believed that the general law states that if a Council member is running for an office that they don't have to give up their current seat. He said that he would verify that information.

Councilman Davis was not certain that he could support the Charter change automatically giving the unexpired seat to the 4th highest vote-getter.

Councilwoman Cape could not support asking for another election due to the cost associated with elections and also do to the fact that the community had just voted. She would support a Charter change to allow the 4th highest vote-getter being appointed to the vacated Council seat.

Councilmen Mumpower, Newman and Freeborn also supported the Charter change to allow the 4th highest vote-getter being appointed to the vacated Council seat.

Upon inquiry of Councilman Newman, City Attorney Oast said that he would research why municipal elections hold their elections in odd-numbered years and why they are not held on the same election cycle as state and federal elections. If they were held in the state and federal election cycle, cities could save money and get a lot higher percentage of the community participating in the local elections.

Councilwoman Cape said that it says that any vacancy shall be filled by the Council for the remainder of the unexpired term. She wondered if she had to give up her seat now (with almost 4 years to serve) does that person sit for the almost 4 years until her term expires, or until the next election. City Attorney Oast said that general law provides that if there is an intervening city election, then the unexpired term gets filled at that election. He did feel that provision needs to be clarified.

Councilwoman Cape felt the Charter provision should be clarified that the unexpired term be filled at the next election.

After a brief discussion, it was the consensus of Council to ask the City Attorney to research the issue of filling the unexpired term at the next city election, in that some Council had concerns about the public voting for 3 members when there are 4 positions open.

Upon inquiry of Vice-Mayor Jones, City Attorney Oast said that City Council can chose to do partisan or non-partisan elections by an ordinance adoption.

Mayor Bellamy said that these items will be brought back to Council after the City Attorney has had an opportunity to research the individual questions.

BOARDS AND COMMISSIONS:

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to arrange interviews for Rhett Grotzinger, John Panarites, David Hillier and Martha Marshall the vacancies on the Airport Authority

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Janet Whitworth as an Alternate member to the Board of Adjustment.

It was the consensus of City Council to instruct the City Clerk to re-advertise the vacancies on the Civic Center Commission and to reappoint George Keller to that Commission.

It was the consensus of City Council to instruct the City Clerk to arrange interviews for Sheryl Near and Sharon West for a vacancy on the Civil Service Board.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Tommy Wilson (electrical contractor), reappoint Ronnie McAbee (journeyman electrician), appoint Fred Pratt (utility representative), reappoint Brian Kintner (licensed engineer) and reappoint Harold Garland (layman) to the Board of Electrical Examiners.

It was the consensus of City Council to instruct the City Clerk to arrange interviews for William Allison, Todd Williams, Tebbe Davis, Amanda Starcher, Lupe Perez, Christopher Lyman, Timothy Ownbey and Tom Gholson for vacancies on the Historic Resources Commission.

It was the consensus of City Council to instruct the City Clerk to instruct the City Clerk to reappoint James Fink as a regular member and John Hayes as an alternate member to the Noise Ordinance Appeals Board.

It was the consensus of City Council to instruct the City Clerk to instruct the City Clerk to prepare the proper paperwork to reappoint Sam Camp, Carol Ann Pothier and Laura Williams to the Recreation Board and arrange interviews for Wind Peter Motika, Pastor Spencer Hardaway, Randolph Walter, Scott Barnwell and Shelley Booth for other vacancies on the Recreation Board.

It was the consensus of City Council to instruct the City Clerk to arrange interviews for Frank Salvo and Ronald Storto for a vacancy on the Buncombe County Tourism Development Authority.

After a brief discussion, it was the majority of Council's wish to advertise for the HUB Project Plan's Community & Economic Development Alliance with the normal monthly vacancy listing.

At 4:55 p.m., Mayor Bellamy announced a short recess.

BUDGET WORKSESSION

City Council gave direction to City staff at their final budget worksession, prior to the scheduled adoption of the Fiscal Year 2006-07 annual operating budget on June 27, 2006.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 7:10 p.m.

Magdalen Burleson
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday – June 27, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Assistant City Manager Jeffrey B. Richardson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Mumpower gave the invocation.

ANNOUNCEMENTS

Mayor Bellamy asked that a new item be placed under New Business dealing with the receipt of funds from a local foundation.

Mayor Bellamy said that the City of Asheville has received a lot of negative attention as a result of the behavior of Asheville Tourists Manager Joe Mikulik on Sunday, June 25, 2006. In response, on June 27, 2006, Mayor Bellamy received the following letter from Mr. Mikulik: "I am writing to apologize for my behavior on the baseball field on Sunday, July 25, 2006, when the Asheville Tourists visited the Lexington Legends. As a resident of Candler, I take great pride in being able to work and live in the Asheville area and the last thing I want to do is bring embarrassment to my city, my team and my family. I have said that my actions were a result of frustration and I obviously went too far. I apologize to the fans, to the umpires, to the Colorado Rockies' organization and to the residents of Western North Carolina for my actions, and I regret what happened. My job with the Asheville Tourists is to develop players for the major leagues and I realize I must set an positive example for everyone involved. It is my goal to help our team move forward from this unfortunate incident." In addition, Mayor Bellamy also received a letter from the Mr. Marc Gustafson, Director of Player Development of the Colorado Rockies, the parent club of the Asheville Tourists, expressing their regret for any embarrassment that may have been brought upon the City of Asheville for Mr. Mikulik's actions. Mayor Bellamy asked that we put this incident behind us and support the Asheville Tourists.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. **APPROVAL OF THE MINUTES OF THE SPECIAL MEETING HELD ON JUNE 12, 2006, THE FORMAL MEETING HELD ON JUNE 13, 2006, AND THE WORKSESSION HELD ON JUNE 20, 2006**

B. **RESOLUTION NO. 06-118 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH THE RENAISSANCE PLANNING GROUP TO DEVELOP A TRANSPORTATION CORRIDOR STUDY OF US 70**

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Renaissance Planning Group in the amount of $124,525 to develop a transportation corridor study for US 70.

As the lead planning agency for the French Broad River Metropolitan Planning Organization (MPO), the City of Asheville staff administers federal transportation planning funds to carry out the MPO's annual Planning Work Program. Transportation planning is funded at 80% by the federal government. The required 20% matching funds are split among local governments in the MPO.

The US 70 Corridor study has been approved and budgeted through the MPO process and the City of Asheville budget process. The corridor study will take a comprehensive look at growth and development patterns, traffic, and bicycle and pedestrian issues. The primary objective of the study is to have a plan that will preserve the existing capacity of the roadway and minimize congestion and provide informed decision-making for costly road improvements in the future.

The Renaissance Planning Group was selected through a competitive proposal process. Renaissance has teamed with the firm Martin/Alexiou/Bryson located in Raleigh. The study will take place between July 2006 and April 2007.

The costs for the study will be shared according to the following breakdown:

Federal Highway Administration	$ 99,620
City of Asheville	$ 18,905
Town of Black Mountain	$ 6,000
Total	$124,525

Considerations:

- Although planning studies like these are expensive, the cost is minor compared to the cost of making road improvements, especially the wrong improvements. One traffic signal can cost between $40,000 and $200,000
- This study was budgeted through the MPO and City of Asheville process. 80% of the cost is paid with federal funds.
- This process is more regional in nature, which better insures for strengthening key stakeholder relationships.

City staff recommends the City Manager to sign a contract with Renaissance Planning Group in the amount of $124,525 to develop a transportation corridor study for US 70.

RESOLUTION BOOK NO. 30 – PAGE 43

C. RESOLUTION NO. 06-119 - RESOLUTION AUTHORIZING THE CITY MANGER TO ENTER INTO A TEMPORARY SERVICES AGREEMENT WITH FORSYTH INITIATIVE FOR RESIDENTIAL SELF-HELP TREATMENT FOR TEMPORARY WORKERS

Summary: The consideration of a resolution authorizing the City Manager to enter into a temporary services agreement with Forsyth Initiative For Residential Self-Help Treatment, Inc. (FIRST) for temporary workers.

The City of Asheville requires temporary workers throughout the budget year for seasonal workloads in the Public Works Department (Sanitation and Street Divisions) and the Civic Center. This agreement is a collective contract for all City departments.

FIRST is a non-profit organization that provides counseling to individuals and provides these individuals with opportunities to learn new skills through job placements with various organizations. The City of Asheville has utilized FIRST staff for the past two years with excellent results.

Benefits to contracting with FIRST include reduced costs in recruiting, hiring, and benefits for full-time workers. There is also a savings realized in management costs. The City is guaranteed all FIRST personnel requested, enabling operations to be fully productive at all times.

City staff recommends the City Manager be authorized to enter into a temporary services agreement with Forsyth Initiative For Residential Self-Help Treatment, Inc. for temporary workers.

RESOLUTION BOOK NO. 30 – PAGE 44

E. RESOLUTION NO. 06-120 - RESOLUTION GRANTING A UTILITY EASEMENT ACROSS CITY-OWNED PROPERTY LOCATED ON ROCKY RIDGE ROAD FOR AN UNDERGROUND ELECTRIC POWER LINE

Summary: The consideration of a resolution granting a utility easement across City-owned property located on Rocky Ridge Road (new fire station) for an underground electric power line

Progress Energy has requested an easement through City-owned property located on Rocky Ridge Road, to install an underground power supply line to a new fire station. The City will receive no consideration for this easement and historically has not received consideration for power line easements. Per State and local law, Progress Energy pays a utility franchise tax. Fire Department staff have reviewed this request, and have no objection to it.

Considerations:

- The easement will not interfere with the City's use of the property.
- The electric power supply line will be installed in such a manner as not to be a hazard;
- The line will be installed underground, as opposed to overhead.

If Council approves of this easement, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 30 – PAGE 45

E. RESOLUTION NO. 06-121 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR WIDENING LONG SHOALS ROAD FROM WEST OF CLAYTON ROAD TO EAST OF I-26, INCLUDING REPLACEMENT OF A WATER LINE

Summary: The consideration of a resolution authorizing the Mayor to execute a Municipal Utility Agreement with the North Carolina Department of Transportation (NCDOT) for widening NC 146 (Long Shoals Road) from west of SR 3501 (Clayton Rd) to east of I-26, including replacing the current existing 12 inch and 8 inch water lines along Long Shoals Road with a new 24 inch ductile iron line.

The current water lines on Long Shoals Road have numerous breaks. This NCDOT betterment project will be the second phase of placing a 24-inch ductile iron pipe line along Long Shoals Road, including crossing the French Broad River. The cost is $876,850, which will be paid in 3 equal annual installments to the NCDOT.

Pro:

- This project will enhance customer service by eliminating costly line breaks which cause water outages to area customers on the current line and will help loop the water system to the west and south regions of the system.
- The line size upgrade better prepares Asheville for the anticipated continued commercial and residential development along the Long Shoals and Avery Creek areas of southern Buncombe County.

Con:

- The final construction cost of this project is above the original engineer estimate due to dramatic increases in material cost in the past two years; however, funds will be budgeted in the Fiscal Year 2007/08 Water Fund Budget for this project.

City staff recommends approval of the Municipal Utility Agreement with NCDOT for the NC 146 (Long Shoals Road) Project: R2813 B.

RESOLUTION BOOK NO. 30 – PAGE 47

F. RESOLUTION NO. 06-122 - RESOLUTION APPOINTING AN ALTERNATE TO THE BOARD OF ADJUSTMENT

Summary: Ms. Jessica Erwin Leaven has declined the appointment as an Alternate member on the Board of Adjustment, thus leaving an unexpired term until January 21, 2009.

At City Council's worksession on June 20, 2006, the City Council instructed the City Clerk to prepare the proper paperwork to appoint Janet Whitworth, as an Alternate member to the Board of Adjustment, to serve the unexpired term of Ms. Leaven, term to expire January 21, 2009, or until her successor has been appointed.

RESOLUTION BOOK NO. 30 – PAGE 48

G. RESOLUTION NO. 06-123 - RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ELECTRICAL EXAMINERS

Summary: The terms of Tommy Wilson, Ronnie McAbee, Terry Ponder, Brian Kintner and Harold Garland expired on July 1, 2006.

On June 20, 2006, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Tommy Wilson (electrical contractor), Ronnie McAbee (journeyman electrician), Brian Kintner (licensed engineer) and Harold Garland (layman) to each serve an additional three-year term. All terms will expire on July 1, 2009, or until their successors have been duly appointed.

In addition, City Council instructed the City Clerk to prepare the proper paperwork to appoint Fred Pratt (utility representative) to serve a three year term, term to expire July 1, 2009, or until his successor has been appointed.

RESOLUTION BOOK NO. 30 – PAGE 49

H. RESOLUTION NO. 06-124 - RESOLUTION APPOINTING MEMBERS TO THE NOISE ORDINANCE APPEALS BOARD

Summary: The terms of James Fink (Regular member) and Scott Fowler (Alternate member) expire on July 1, 2006.

On June 20, 2006, City Council instructed the City Clerk to prepare the proper paperwork to reappoint James Fink as a Regular member to serve an additional three-year term, term to expire July 1, 2009, or until his successor has been appointed.

In addition, on June 20, 2006, City Council instructed the City Clerk to prepare the proper paperwork to appoint John Hayes as an Alternate member to serve an additional three-year term, term to expire July 1, 2009, or until his successor has been appointed.

RESOLUTION BOOK NO. 30 – PAGE 50

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE FOR MODIFICATION TO DIMENSIONAL AND DEVELOPMENT STANDARDS FOR CONDITIONAL USES AND CONDITIONAL DISTRICTS

ORDINANCE NO. 3369 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE FOR MODIFICATION TO DIMENSIONAL AND DEVELOPMENT STANDARDS FOR CONDITIONAL USES AND CONDITIONAL DISTRICTS

Mayor Bellamy opened the public hearing at 5:10 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance to allow City Council to revise certain requirements for establishing conditional districts. This public hearing was advertised on June 16 and 23, 2006.

Currently, the ordinances covering conditional zoning and conditional use permits contain provisions that limit or prohibit variances or modifications to the requirements of the corresponding or underlying general zoning districts, if those modifications are less restrictive. With respect to dimensional standards (height, setback, etc.) and other technical requirements (landscaping, buffering), this has proven to be unnecessarily restrictive, and has occasionally caused an applicant to seek a more intensive zoning classification than necessary for the use, and has limited Council's flexibility on some projects.

The amendment allows Council to modify these requirements in a manner appropriate to the project at the time the approval is granted. The proposed ordinance contains a requirement that such modifications that are less restrictive than allowed by the corresponding zoning be

described in public notices when possible, and that they be separately set out, along with the reasoning, in the ordinance granting the request.

At its June 7, 2006, meeting, the Planning and Zoning Commission voted unanimously to recommend adoption of the ordinance. There was no public comment at the meeting.

Considerations:

- Allows more flexibility in processes where flexibility is one of the stated goals;
- Reduce the potential for seeking inappropriate zoning classifications to address dimensional or technical issues

If City Council approves of the proposed amendment, adoption of the ordinance is recommended.

Mayor Bellamy closed the public hearing at 5:19 p.m.

Mr. Shuford responded to questions raised in an e-mail from Mr. James Judd received on June 27, 2006.

Councilman Davis felt that this amendment is a powerful tool in that it gives Council the opportunity to be more flexible with dimensions and that is largely what we deal with on many conditional zonings. To him, though, it seems like conditional zoning almost stands alone without this particular tool. In addition, he questioned if this amendment is before Council now largely to deal with the conditional use permit amendment proposed by the Grove Park Inn, which will be discussed next.

Mr. Shuford said that he has been working with City Attorney Oast on this amendment for at least a couple of months and stated that it was not prepared specifically for the Grove Park Inn conditional use permit amendment. This amendment enables Council to go beyond what the prior conditional zoning would allow. There have been plenty of circumstances where Council has required something more stringent than what the underlying zoning is or the applicant has proposed a greater setback. He felt this amendment gives Council the flexibility to make some adjustments that they may find to be beneficial for a site and it also puts the decisions about some of those issues in Council's hands and not in the hands of staff. From that standpoint, he thinks it is a positive amendment and is in keeping with Council's desire policy-wise to retain a fair amount of control over the development process.

Mr. Shuford responded to Councilwoman Cape's inquiry about specific cases where this flexibility would have been beneficial.

At the request of Councilman Newman, Mr. Shuford said that future staff reports will contain a specific box for requested modifications from underlying zoning development standards. However, sometimes staff may not know about them until the day of the meeting. He said that he does expect, by the end of the year, to have a development review mapping system in place and we will be sure to include a way to highlight the proposed deviations from the underlying zoning standards.

Councilman Mumpower felt that flexibility is a good concept, but predictability is a more important concept, especially with the UDO, so he would not support this amendment.

In response to Councilman Freeborn, Mr. Shuford felt that a con of the amendment would be that there might be some expectation that the underlying zoning standards would be applied and that expectation would not always be met. The counter to it is that when we know about it, we advertise it and make sure the public knows about it.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3369. This motion was seconded by Councilwoman Cape and carried on a 5-2 vote, with Councilman Davis and Councilman Mumpower voting "no".

ORDINANCE BOOK NO. 23 – PAGE 8

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE APPROVED CONDITIONAL USE PERMIT FOR THE GROVE PARK INN MASTER PLAN TO ALLOW FOR AN INCREASE IN BUILDING SIZE AND HEIGHT FOR THE NEW BUILDING TO BE CONSTRUCTED ON THE FORMER BATTLE HOUSE SITE

Mayor Bellamy opened the public hearing at 5:35 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Clerk Burleson administered the oath of office to anyone who anticipated speaking on this matter.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of an ordinance to amend the approved conditional use permit for the Grove Park In Master Plan to allow for an increase in building size and height for the new building to be constructed on the former Battle House site. This public hearing was advertised on June 16 and 23, 2006.

The Grove Park Inn Resort and Spa originally submitted a Conditional Use Rezoning (CUZ) application and Master Plan documents in the summer of 2004; the rezoning request and Master Plan was approved by the Asheville City Council in November of 2004 and it included five different phase. This approval consisted of a conditional use rezoning of a five acre, RS-4 Residential Single-Family Medium Density District parcel along with the review of an associated Master Plan showing development on this parcel along with four other project areas on the larger resort property (Aerial Map – Attached to City Exhibit 3). Using a blow-up aerial (City Exhibit 4), she showed the scale of the former Battle House, which has been demolished and removed. In addition, road and traffic improvements were required as a condition of approval.

It has been the intention of the owner to initiate development of Phase 1 and follow with subsequent phases of the Master Plan. Phase 1, the Battle House Condominiums (now referred to as "The Fitzgerald"), included the removal of the old Battle House and redevelopment of a new building into a 30 residential condominium units, approximately 1600-1700 s.f. each with basement storage, underground parking (56 spaces) and a 30,000 s.f. open space terrace area. Conceptual/illustrative plans were approved as exhibits to the Conditional Use Rezoning and Master Plan although specifics of building height, size, and materials were not considered they were represented to reflect the existing structure (City Exhibit 5). The Battle House was not salvageable in a practical way so they proposed to demolish and rebuild a new structure. Ms. Tuch showed character sketches of the proposed building approved in 2004 (City Exhibits 6 and 7), to show the west elevation and east elevation views.

The new structure was always described to architecturally reflect the former structure and the footprint to some degree does reflect that original character, but is larger than what was originally there. The former footprint was approximately 12,000 square feet and this is probably 15-16,000 square feet. The parking has been relocated underground and is not part of the site plan any longer. From a land disturbance prospective, it really didn't result in any more impervious surface. The applicant is now seeking an amendment to this phase of the Master Plan to allow for a building that is clearly larger and taller than what had been approved in concept.

Ms. Tuch reviewed with Council some schematic drawings of the footprint approved in 2004 (City Exhibit 8) and the proposed new footprint (City Exhibit 9). The new building proposal keeps the number of units unchanged at 30 total, but requests approval of a 4-storey structure that is 87,766 square feet (122,323 square feet including underground parking structure) with a maximum height of 48 feet (City Exhibit 10). In this case, height is defined as the distance between the floor of the main point of entry to the ceiling of the highest occupiable level. The Resort zoning restricts building height to a maximum of 80 feet except for where the property lies within a "transition zone" defined as the portion of property that lies within 100 feet of a residentially zoned area. In this transition zone, height is limited to that established in the least restrictive adjacent residential zone. In this case, the properties across Macon Avenue are within 100 feet and zoned RS-4 where the height of structures is limited to 40 feet (City Exhibit 11). Because of the approval of a wording amendment earlier in the meeting, City Council has the ability to establish dimensional requirements for properties in excess of the allowances allowed in the underlying zoning districts; as such, the Asheville City Council may approve the proposed height of 48 feet despite the underlying development standard that would normally restrict the height of a structure to 40 feet.

It is also important to note that the distance between grade and the highest roofline is shown to be 75 feet, 3 inches, where the height of the foundation and height of the roof pitch are included in this overall height measurement. These additional measurements are not included in the technical definition of height and are, therefore, not included when evaluating a structure for technical compliance with height standards. However, this overall height may be considered for compatibility purposes and should be considered as part of the proposed amendment.

Also as part of the amendment to Phase 1 is an underground parking structure that would support 60 resident parking spaces in addition to 11 surface parking spaces along with a comparable amount of open space that had been previously reviewed and approved. As with similar requests for approvals of development standards that exceed or deviate from those of the underlying zoning districts, the alternative standard must be approved prior to a final site plan review. If approved, this project will be required to return for a more detailed review by the Technical Review Committee (TRC).

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1) **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety and will be reviewed in more detail at a final review of the Technical Review Committee.

2) **That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The increase in overall square footage is the result of an increase in the proposed height of the building and does not negatively impact the amount of disturbance experienced on the ground plane. However, the revised footprint is somewhat larger than what currently exists and larger than what had originally been approved; nevertheless, when reviewed in context with the overall site plan, it does not appear to result in a significant increase in disturbance.

3) **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
Property values around the Inn property have continued to rise for the surrounding homes despite increases in resort and residential activity over the years. An increase in building height and size is not expected to have a negative impact on adjacent property values, particularly when the character of the structure is kept within that of the historic and other residential structures in the area.

4) **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The new Fitzgerald will architecturally reflect the character of the former structure and be well within scale and density of the adjacent resort property and nearby Longchamps Condominiums (5-6 story's). The proposal is also in relative scale with the adjacent historic Bynum House property and proposed Sunset Mountain condominiums which will be developed as part of the same residential community. The proposed structure is less compatible with the adjacent low density single family homes to the east but is not dramatically different in height from the former Battle House structure whose general height is measured at approximately 62 feet from grade to peak of roof. The new structure is approximately 75 feet tall but sits 4 feet lower than the former Battle House which would result in a net increase of approximately 9 feet.

5) **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The Asheville City Development Plan 2025 (ACDP 2025), through its Smart Growth Land Use Policies (adopted by the Asheville City Council in 2000), clearly supports and encourages compatible infill development. It also encourages City staff to employ zoning tools (Conditional Use Rezoning & Conditional Use Permits) to ensure some level of protection for compatibility and environmental sensitivity. Historic Preservation and its relationship to Smart Growth are also clearly described as being an effective way to revitalize and stabilize neighborhoods.

6) **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** This proposed development is within close proximity to transportation facilities with the Route 5 bus line running regularly down Charlotte, Macon, and Kimberly including hourly stops at the Grove Park Inn. As a component of the Master Plan approval, a new transit shelter will be coordinated along with new sidewalk installation running the length of Macon Ave. (one side) to Charlotte Street.

7) **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The proposed amendment does not increase the total number of units proposed and would not be expected to contribute an additional traffic impact beyond that which has previously been considered and approved. As a component of the Conditional Use

Permit, additional traffic calming measures have been required to be installed along a number of the affected roadways to better carry the load of the cumulative resort and residential traffic.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Allows for infill residential development of 30 luxury condominiums.
- Results in a larger/taller multi-family condominium structure that is approximately 9 feet taller than the former Battle House structure.

For the reasons outlined in this report, staff feels that the proposed development has many positive aspects and does meet the minimum standards required of a conditional use permit.

Concerns over neighborhood compatibility may be best addressed by those most affected by the proposed use. Staff recommends that the City Council utilize public input concerning this and other issues and carefully consider whether the conditional use permit should be conditioned to mitigate these concerns.

Mr. Gerald Green, representing the Grove Park Inn, said that they presented a conceptual plan for a 10-year Master Plan for the property in 2004. When we presented the plans for Phase I on the Battle House site, we did so without marketing studies and without a whole lot of detailed work. We did not feel it was appropriate to spend tens of thousands of dollars on a conceptual plan when a valid protest petition was filed and we didn't know if the conceptual Master Plan would be approved. Under the requirements of the conditional use permit, the new building is to be architecturally compatible with the Battle House. The façade has changed. Using a Macon Avenue elevation drawing (Applicant Exhibit 1), he showed how they tried to pick up more of the architectural details of the Battle House. He showed the elevation view from the golf course (Applicant Exhibit 2). He said they are looking at a larger building. The footprint is larger due to the marketing studies done which show that people who want to live in these units want larger units. He explained the different footprints of the original Battle House, Master Plan schematic and proposed Fitzgerald (Applicant Exhibit 3). The reason that the building has shifted is that a portion of the building is on the historic Bynum property and is also over a stream. The height increase is for 8 feet and the overall height is taller than the original Battle House (Applicant Exhibit 4). He showed the profile of the Battle House and the profile of the proposed building. He noted there was no height associated with the plan that was approved in 2004. He talked with the architect who did the conceptual plan and he pointed out that the width of the building that was approved was 16 feet greater than the Battle House. Maintaining the same roof pitch, he stated that the roof pitch would be 8 to 10 feet taller than the original Battle House (62 feet) , which would be somewhere between 70 and 72 feet with the plan that was approved. Although the height, as measured under the Code, would still be under the 40-feet, the overall height would come close to the 75 feet proposed with the existing plan. With the existing plan, we made the roof pitch less steep to reduce the overall height. We have tried to comply with the conditional use permit standards in that we have hired an ombudsman and provided funds to the City to initiate a traffic calming plan for the streets impacted by the proposed Master Plan. We have hired a consultant to do a stream mitigation and enhancement study to address neighborhood concerns and have hired an arborist who has started a study of the trees on the Battle and Bynum properties to identify those which need immediate attention. There was a self-appointed neighborhood committee established over 3 years ago and we have worked with them continuously. We presented these change to the neighborhood committee in

March and received no strong opposition until recently. The opposition was not so much as the changes being proposed, but the process to come back after the Master Plan was approved and ask for changes. He explained that when you have a plan for something this large (over 100 acres) over 10 years, we do not have the detail in the initial planning process that we do as we go along. We are asking you to allow us to work through the process. We will try not to have to come back to Council again as we work through the next 6-10 year process, but we can't promise that. We will try to listen to the neighbors and try to meet the demands of the market. We ask for your support.

The following individuals spoke in opposition of the amendment for various reasons, some being, but are not limited to: comparing the Macon Avenue elevations approved in 2004 with the proposal reveals a staggering increase in the building's proposed height and mass; the Fitzgerald's footprint will be twice the size of the Battle House's footprint; the architectural character of the Fitzgerald would be a grim parody of the Battle House; the new proposal represents more than a 75% increase in the building size, but with the same 30 condo units; even without this amendment the Grove Park Inn can profit handsomely from developing the Fitzgerald; appears that the Grove Park Inn has undertaken a strategy of obtaining approvals on a protracted, piecemeal basis; Grove Park Inn should submit closer to "final" versions of its development plans before seeking approvals; request should be tabled until the Grove Park Inn can bring back a more complete set of information; Grove Park Inn changed from being an Inn in the 1970's to a major commercial hotel in the middle of one of Asheville's oldest neighborhoods; if the City approves the amendment, it will threaten the neighborhood's trust in that City Council would approve a plan with different implications that the original one; hold construction until traffic calming is implemented per the conditional use permit approved in 2004; rezoning residential property to resort is a bad precedent for our neighborhood; size of proposed structure is doubled from that of the Battle House; additional investors who live outside our community have joined the Grove Park Inn on this venture and want a greater return for their investment; the Grove Park Inn will have no problem in selling the units regardless of their size; a larger footprint will result in more delivery trucks, more noise, more interference, more danger for children and pets in the area and more destruction of peace and calm of our neighborhood; if future amendments are requested, the Grove Park Inn should have to comply with any new ordinances and regulations adopted in the interim and not have them grandfathered in; the staff report seems to favor the developer with no objections as to the size, reasons for change, or effect upon the neighborhood; proposal changes the size and bulk so that it no longer represents the former Battle House; the Smart Growth and Sustainable Economic Development Plan has not been reviewed regarding this plan; the Grove Park Inn neighborhood; even though the neighborhood argued against the Master Plan approved, they have been working with the Grove Park Inn and the Grove Park Inn should be required to work with the conditionals already approved; neighborhood will continue to oppose any construction that does not include strict adherence to environmental issues and the safety of their neighborhood; City should protect neighborhoods; and traffic can be alleviated on Macon Avenue and Old Toll Road by using the road off of Charlotte Street that goes to the old tennis courts to reach the condominiums:

Mr. John Quinn, resident at 428 Sunset Drive (Neighborhood Exhibit 1)
Dr. Peter Gentling, resident at 500 Cherokee Road
Ms. Jane Northway, resident at 80 Edgemont Road
Reverend Christopher Chiaromonte
Ms. Sue Hunter, resident at 4 Evergreen Lane
Ms. Hope Hunter, resident at 4 Evergreen Lane
Ms. Grace Curry, resident at 59 Edgemont Road
Ms. Leah Karpen, resident at 400 Charlotte Street (Neighborhood Exhibit 2)
Ms. Glenda Burgin, resident at 599 Old Toll Road (Neighborhood Exhibit 3)
Mr. Tom Smith, resident of 25 Glendale Road
Ms. Mary L. Kirby, resident at 185 Macon Avenue

Mr. Jeff Slosman

Mr. Jerry Sternberg spoke in support of the amendment noting that no developer has ever done so much for a neighborhood as the Grove Park Inn. The Grove Park Inn is a great asset to our community in that it has contributed millions of dollars to non-profits and charities. The Grove Park Inn is working on the conditions imposed by Council, e.g., hiring an ombudsman and paying $375,000 to the City for traffic calming. He noted Grove Park Inn is the second largest employer in Asheville and has brought in millions of tourist dollars. We shouldn't try to drive the Grove Park Inn out of our area.

At 6:38 p.m., Mayor Bellamy closed the public hearing.

Councilman Freeborn moved to deny the amendment to the conditional use permit. This motion was seconded by Councilwoman Cape.

Councilman Newman could not support this particular amendment to the height and width; however, he would be supportive of changes to the Plan as they get into more detailed phases of their development. He felt it was good that the Grove Park Inn brought the 10-year Master Plan in so that Council could look at all the phases at the same time. Since the majority of concerns raised were about the width and height changes, he wondered if this particular amendment request was denied if Grove Park Inn could still move forward with the other parts of their Plan. Mr. Shuford responded that the Grove Park Inn can go forward with other phases of the project had that been approved so long as they are in keeping with the concept plan approved in 2004. They can go back to even this site and make the adjustments necessary to be consistent with what was approved in 2004 and develop this property as well.

Mr. Shuford asked that if Council denies this amendment request, he would appreciate any information that Council could provide about what the specific concerns are in case they get into other similar types of situations with this particular project since it is a 10-year plan.

Councilman Newman said that when Council considered the conceptual Master Plan in 2004, what was approved was what they felt would be appropriate for the scale and character of the neighborhood.

Councilwoman Cape agreed with Councilman Newman in that the increase is too much and the proposed building is not in scale with the neighborhood. She, too, would be supportive of amendments if they did not dramatically change the original Plan.

In response to Vice-Mayor Jones regarding traffic calming, City Traffic Engineer Anthony Butzek updated Council on the progress to date. He summarized by saying that the Request for Proposals are due on July 21, 2006, and we will be looking at an early 2007 to mid-spring construction implementation.

When Councilwoman Cape asked if the access from Charlotte Street was considered, Mr. Butzek said that it was looked at extensively. It was determined that it would have such a large impact to the golf course, it would not be a feasible option.

Vice-Mayor Jones said that she would be open for change, but felt that this amendment is too much.

Councilman Mumpower said that the Grove Park Inn is a good contributor to our City, but felt that the increase in square footage is substantial and the amendment steps away from the Master Plan. He did, however, feel that large developments like this should be phased in and understands things change.

Councilman Davis felt that the City did not uphold their part of the condition regarding traffic calming, in that we did say that the City would put the planning and the funding in place before construction began. He, too, felt that the Grove Park Inn is a great neighbor and did a good job in working with the neighborhood, but he could not support the substantial change in the Plan.

After a short discussion and upon further inquiry of Councilman Mumpower, Mr. Shuford explained that the reason why this is back before Council is because the changes were substantial enough that the building didn't look like the building that Council approved in 2004. He felt that the proposed development does meet the minimum standards required of a conditional use permit, and while scale and height issues are of a concern, staff didn't see a technical objection for that.

Mayor Bellamy felt that it is important for the City to commit to a specific timeframe on the implementation of the traffic calming. Mr. Shuford said that it is difficult for us to give Council a precise timeframe because part of the traffic calming process is working with the neighborhood to get what they want. He said this is probably the most significant traffic calming project in City's history and he doesn't want to establish an unrealistic deadline for how long it will take to implement. But, it is clearly understood that Council wants to see the implementation of traffic calming in that area as quickly as can be done.

Mayor Bellamy said that if the project is going to take longer than noted by Mr. Butzek, then we need to communicate that information to the neighbors who will be impacted, not just the ones who are at the meeting. She felt we must do a better job of articulating the timeline to make sure that everyone knows the process is moving forward. Mr. Shuford agreed and said that we will use the media we have available to get the word out and will work with the Grove Park Inn because they have a neighborhood newsletter about the project.

Mayor Bellamy felt that the Master Plan is the overall framework plan for what will be developed, not specifics. A course of action will be for the developer to continue to come back to Council if they want to change because the neighborhood residents should know what is happening every step of the way. That is why the conditions were attached to the permit. The developer will have to comply with the ordinances that are in effect when the amendments come forward. She did believe that dialog between neighborhood residents and the developer can create good development. Her concern is that the building change was too big and the fact that the City hasn't implemented the traffic calming didn't help the situation.

The motion to deny the amendment to the conditional use permit made by Councilman Freeborn and seconded by Councilwoman Cape carried on a 6-1 vote, with Councilman Mumpower voting "no."

At 7:11 p.m., Councilman Mumpower moved to go into closed session in order to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; and State of North Carolina. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Freeborn and carried unanimously.

At 7:46 p.m. Councilman Freeborn moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

C. **PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF 8 LOTS LOCATED ON ALEXANDER DRIVE – THE SKYLOFTS OF ASHEVILLE - FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT AND RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR A PROPOSED MULTI-FAMILY DEVELOPMENT**

ORDINANCE NO. 3370 - ORDINANCE TO CONDITIONALLY ZONE 8 LOTS LOCATED ON ALEXANDER DRIVE – THE SKYLOFTS OF ASHEVILLE FR-FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT AND RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR A PROPOSED MULTI-FAMILY DEVELOPMENT

Mayor Bellamy opened the public hearing at 7:47 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to conditionally zone 8 lots located on Alexander Drive – the Skylofts of Asheville – from RS-8 Residential Single-Family High Density District and RM-8 Residential Multi-Family Medium Density District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for a proposed multi-family development. This public hearing was advertised on June 16 and 23, 2006.

The subject property is located within the City Limits of the City of Asheville off of Alexander Drive and Carroll Avenue in the East End/Valley Street Neighborhood. The property fronts on both Carroll and Alexander. The project site contains 8 lots proposed for combination if the project is approved. Surrounding properties to the north and east are zoned RM-8 Residential Multi-Family Medium Density District and contain single- and multi-family housing. Properties immediately south (across Carroll Avenue) are zoned RS-8 Residential Single-Family High Density District and are primarily single family in nature, although the McCormick Heights Apartments are located behind the single-family homes that front on Carroll Avenue. To the west, the zoning is RM-8 and Institutional with a single-family home and the Tried Stone Missionary Baptist Church on abutting parcels. The property itself is currently zoned RS-8 to the south between Alexander Drive and Carroll Avenue and RM-8 to the north between Alexander Drive and the abutting properties which front on Curve Street. There is an existing single-family home on Carroll Avenue that would be demolished as part of this project. A small portion of the lot (.404 acres) is subject to the hillside ordinance.

The development proposal calls for the new construction of 8 buildings (constructed using green building techniques) containing 67 one- and two- bedroom condominiums. The buildings will have three floors with a garage level underneath. The footprint of the seven larger buildings is approximately 3500 square feet. Access to all units will be provided off of Alexander Drive. Although not needed to meet minimum parking requirements, there is a proposal to construct 28 on-street parking spaces along Alexander Drive by widening Alexander onto property owned by the developer. The applicant is proposing to do as little surface parking on the site as is possible in order to limit the amount of impervious surface within the development. The percent of impervious area proposed in the development is 38% (1.69 acres). All hillside regulations are complied with in the proposal. A 10-foot platted right-of-way that enters the property off of Carroll Avenue is proposed for closure. A sidewalk is shown for both sides of Alexander and off-site sidewalk connections proposed (through work with the City of Asheville Engineering Department) that would connect with the intersections of Weaver Street and Martin Luther King Jr. Drive. The sidewalk that would typically be required for the portion of the property along Carroll Avenue has been waived by the City of Asheville Engineering Department due to the extensive grading that would be required along the bank that abuts Carroll to create such a

sidewalk, the fact that Carroll already has a sidewalk on the other side of the street, and due to the additional sidewalk proposed to be provided by the developer along Alexander. A bus shelter is proposed for the existing bus stop on the corner of Martin Luther King Jr. Drive and Alexander Drive. The developer proposes to improve the water line along Alexander Drive by replacing the current 4" line with an 8" line.

At the time this report was created, the developers had stated their willingness to price 2, two-bedroom units at the City's defined affordable price ($120,000). They also stated their willingness to price 2, one-bedroom (expandable) units at the moderate price of $150,000. They were looking at additional affordable units.

The developers held two meetings with residents of the area (4-10-06; 5-15-06) to discuss the project and to listen to neighborhood concerns. The City of Asheville Public Works Department has completed testing of drainage systems along Carroll Avenue to make certain that the stormwater management proposals for the development would not create problems for the residents along this street.

At their meeting on April 17, 2006, the City of Asheville Technical Review Committee (TRC) reviewed the conditional zoning request and made a positive recommendation (with conditions) that the project be forwarded to the Planning and Zoning Commission.

At their meeting on June 7, 2006, the Planning and Zoning Commission reviewed the conditional zoning request and did not recommend the proposal in a vote of 3-3 (Mr. Cathey absent). Members of the Commission who were opposed to the project noted density and scale concerns while those in favor noted benefits associated with infill development and good site/building design.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The project, if approved, must meet the technical standards set forth in the City's Unified Development Ordinance. The existing site plan shows compliance with most all of the City's development standards and the applicant is working with City staff on full compliance.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The applicant has met all applicable provisions of the hillside regulations. The applicant has worked to create a design for this project that minimizes grading activity and impervious surface on the site. The applicant is proposing the use of green building techniques in the construction of this development.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The use of property that surrounds this site is varied. There are two other multi-family housing developments on abutting streets and another, smaller project, in the area that has recently been approved under conditional use zoning. The applicant is proposing buffering or other landscaping in compliance with City of Asheville standards along all property lines in the development.

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The East End Valley Street area contains an array of building types and uses with varying gross floor areas, densities and elevations to existing structures. The proposed footprint of the seven largest buildings in this project is 3500 square feet, much less than that of the Woodberry and McCormick Heights developments in the immediate area. The proposed three story elevation is not as reflected in the area although the Woodberry Apartments development has three story buildings and the newly approved Arbors of Beaux Catcher (off Ardmion Park Drive) will have four stories. The proposed density for this project is 14.6 units/acre. The McCormick Heights community has a density of 12.4 units/acre and the Woodberry Apartments 9.1 units/acre.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The proposed development supports the following Smart Growth Policies of the City of Asheville: (a) Locating development in areas where infrastructure exists and can easily be provided; (b) Finding appropriate opportunities to establish transit supportive densities (8-16 units per acre) and facilities; (c) Promoting infill developments proximate to the Central Business District and in developed areas that can support increased density in development; (d) Promoting green building; and (e) Providing some affordable housing.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** The proposed development is within a block of an existing transit stop and proposes to provide a shelter at this location in addition to pedestrian connections to the intersection where this stop is located. The developer proposes to improve the provision of water in the area by improving the existing water line along Alexander Drive.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The City of Asheville Traffic Engineer has indicated that the roads that will be accessed by those living in the proposed development are sufficient to handle any traffic generated. The developer will provide a double yellow line throughout the 90-degree curve on Alexander to improve the traffic conditions on that street. The provision of on-street parking by the developer should assist in calming traffic along Alexander.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Provides for infill development in an area in close proximity to downtown and infrastructure suitable for increased density of development.
- Project incorporates green building and environmentally sensitive approaches to development.
- The development incorporates higher elevations than much development in the area.
- The development is immediately abutting to mostly single-family residential development although considerable multi-family development is in very close proximity.

At their meeting on April 17, 2006, the TRC reviewed the conditional zoning request and made a positive recommendation, with conditions. The Planning and Development staff recommended the rezoning proposal to the Asheville Planning and Zoning Commission. The Commission, at their meeting on June 7th, 2006, did not recommend approval, in a vote of 3-3 (one member absent). Members of the Commission who were opposed to the project noted

density and scale concerns while those in favor noted benefits associated with infill development and good site/building design.

Mr. Mike Farmer, petitioner, said that they held two meetings with the residents to hear their concerns regarding the project. We worked hard to address those concerns and feels like they have come up with some good compromises. He feels that the project will make a positive impact on the neighborhood and will be good for the entire Asheville community. He feels this is a worthwhile model that other developers will mirror. They initially committed to offer 2 units to be designated as affordable housing and after hearing additional comments, they decided now to designate 7 units (or 10% of the project) to affordable housing. We need to be responsible neighbors. Many benefits incorporated into this project are only possible with the increase in density. If they are required to build under the existing zoning, then their flexibility in providing these benefits will be greatly reduced. He felt that if a private developer is willing to designate 10% of the project's total units as affordable housing and if a green built project is truly a goal for the Asheville community and if the respect we have shown for the use of the land for the neighborhood is good for the community, then Council should vote in support of this project.

Mr. Gerald Green, representing the petitioners, presented City Council with a letter of support from Mission Health & Hospitals, a letter from Tried Stone Missionary Baptist Church stating that "Tried Stone will work in cooperation with Farwood Properties to repair the section of damaged pipe on the church's property"; and a petition containing 7 signatures in support of the project. He reiterated that they have increased the number of affordable units to 7. He said they are also asking for an increase in the total number of units from 67 to 69 to offset some of the affordable units being provided. The project is infill development with a mixture of housing costs and is walkable to downtown; and it is a green built project meeting N.C. Healthy Built Home Standards. In addition, there is over 30% more open space than what is required. Regarding the stormwater problem, they have an agreement with Tried Stone Missionary Baptist Church and they are committed to address that problem which is caused by the crushed stormwater pipe on the church's property. Sidewalks will be constructed along Alexander Drive from Martin Luther King Jr. Drive up to Woodberry Apartments. A bus shelter will be constructed at the existing bus stop on Martin Luther King Jr. Drive. In addition to the waterline upgrade, there will be 3 fire hydrants provided in the area. There will be streetscape along both Alexander Drive and Carroll Avenue with additional plantings along both streets. There will be no access from the development to Carroll Avenue. The scale is compatible to the neighborhood and there are a number of architectural details on the buildings that will reflect the homes in the neighborhood. Alexander Drive will be upgraded with curb and gutter. There will also be on-street parking on Alexander Drive that is not required by the standards. Regarding the neighborhood's concern about traffic, the City's Traffic Engineer said that the streets are capable of accommodating the additional traffic. Regarding an increase in crime, all indications are that the project will not increase crime in the area, noting that all the units will be owner-occupied. Regarding the increase of property taxes for area residents, he talked with the Buncombe County Tax Office who said the project would be evaluated as a separate community and would not impact adjacent properties through increased property values. Regarding trees along Carroll Avenue, they will remove the dead and dying trees, but will preserve the healthy ones to be incorporated into the street buffer. He urged Council for their support of this project.

The following residents spoke not in opposition to housing, but in opposition to this project for various reasons, some being, but are not limited to: real estate prices are sky-rocketing and our tourist industry is always in need of more low wage service workers who cannot pay high prices for housing; long-time working class homeowners now face the prospect of losing their previously affordable homes because of escalating property taxes from this large upscale condominium complex; if this project this approved, the process of gentrification will accelerate and destroy the neighborhood as it now exists; existing residential area should not be changed to a higher density; Planning & Zoning Commission denied the project; buildings are too large;

existing water and sewer problems; Alexander Drive is not wide enough for on-street parking; existing traffic on Martin Luther King Jr. Drive is too much and also people ignore the school buses; if the rezoning passes, how will the affordable housing units be kept affordable; there are too many other apartment complexes in this area already; and existing water run-off onto properties:

Ms. Glenda McDowell, President of the East End/Valley Street Association
Mr. William Young, resident at 18 Martin Luther King Jr. Drive (presented petition containing 78 signatures)
Reverend Christopher Chiaromonte
Ms. Mary Young, resident at 18 Martin Luther King Jr. Drive
Ms. Sharon Burton, resident at 131 Carroll Avenue
Ms. Doris Daniels, resident at 42 Curve Street

The following individuals spoke in support of the proposed development for various reasons, some being, but are not limited to: this project will build 7 affordable units for 7 families; project will cater to more middle income residents who want to be able to work and live in the downtown area; if property taxes go up because of this development, the surrounding property owner's net worth will go up as well; walkable distance to downtown; infill development; underground parking will eliminate the need for asphalt parking; project followed the Healthy Built Homes Program; need for affordable homes that are disability accessible; positive unique model for this community; and allow different people to share in the heritage of the community:

Mr. Philippe Rosse, Executive Director of the Affordable Housing Coalition of Asheville-Buncombe County
Mr. Charlie White, resident at 21 Bearden Avenue
Mr. Carl Gunther, resident on Mountain Street
Mr. Mark Shriner, Chair of the Western North Carolina Green Building Council
Mr. Bart Floyd
Ms. Mary Love, former project manager for the Asheville Healthy Built Home Program
Mr. Jonathan Glover, resident at 84 Bartlett Street

At 8:35 p.m., Mayor Bellamy closed the public hearing.

Upon inquiry of Vice-Mayor Jones, Mr. Norman Divers, Civil Engineer for the petitioner, said that the stormwater problem has been discussed with the neighbors and City staff. He explained that on Carroll Avenue, the property owners are experiencing water in their basements when it rains hard is because their basements are tired into one storm drain line that runs into the storm drainage further down the street. When the gravel lot was constructed for the church across the street, a home was demolished and it caused a blockage in the drain line that was serving all those homes. The developer has reached an agreement with the church to access the property and have the opportunity to fix the storm drain line, which will alleviate the storm drainage issues for the residents on those lots. Regarding Alexander Drive, the storm drainage on Alexander Drive currently has curb-cuts that allows stormwater to run down along the road and eventually into the storm sewer system on Martin Luther King Jr. Drive. As part of the street improvements project for this project, they will be upgrading Alexander Drive to City standards, widening it an additional 8-feet to add the on-street parking, and also incorporating a storm sewer system that solely drains Alexander Drive. Further drainage issues upgrade from the petitioner's site is an off-site matter.

In response to Councilwoman Cape, the developer proposes to improve the water line along Alexander Drive by replacing the current 4" line with an 8" line at Martin Luther King Jr. Drive up to the high end of the petitioner's property and will add 3 new fire hydrants.

When Councilman Davis asked how long the line on Carroll Avenue had been crushed and if that repaired pipe would alleviate the problems, Mr. Divers felt it has probably been in that condition about 3-5 years. He said they only got to the first blockage, which was in the gravel parking lot. Once they start uncovering the line and work their way further upgrade, if other blockages are found (there is actually an inlet where they can actually see the pipe and see that it's flowing), they will actually extend their improvements all the way to that point since a commitment has been made to repair the line all the way up until there are no blockages.

Councilwoman Cape was glad that the developer will work with the Affordable Housing Coalition in keeping the units affordable. In addition, she suggested there be more of a variation of the buildings.

Councilwoman Cape moved for the adoption of Ordinance No. 3370, to conditionally zone 8 lots located on Alexander Drive – the Skylofts of Asheville – from RS-8 Residential Single-Family High Density District and RM-8 Residential Multi-Family Medium Density District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for a multi-unit development, subject to the conditions recommended by the TRC and City staff, noting that this request is reasonable based on the information provided in the staff report and in the staff recommendation. This motion was seconded by Councilman Newman.

Councilman Brownie spoke in support of the development noting that these kinds of infill developments are difficult.

Mr. Shuford suggested City Council add the following condition: That the number of units shall be increased to 69 with seven units meeting the affordability standards of the City of Asheville. In addition, he also suggested that he and City Attorney Oast work on a condition regarding the storm drainage issue, noting that it would be something similar to the drainage improvements described by the applicant shall be completed prior to the issuance of any Certificate of Occupancy.

Councilwoman Cape and Councilman Newman accepted the two additional conditions outlined by Mr. Shuford, noting that the storm drainage condition will be refined by the City Attorney.

Councilman Mumpower was uncomfortable with the developer having to "bribe" City Council with affordable housing units in order to have a decent chance to get his project approved. We do not have any standards in place where we provide incentives through our ordinances to give the developer the opportunity to bring this project alive. The affordable units will be subsidized by other people and we should go there cautiously.

Ms. Patsy Brison, attorney representing the developer, asked for clarification on the condition about no Certificate of Occupancy being issued until the drainage is addressed. Mr. Shuford said that it is his intent to refine the specific drainage improvements prior to the condition being signed by the Mayor. The improvements will specify the areas discussed tonight, not to include the up the hill situation which the developer has no control over.

In response to Councilwoman Cape, Mr. Farmer said that they have an agreement the Church that we will assist them in fixing the line. If the Church says we can't come on their property to fix the line, that would be an issue. But again, we do have an agreement already with the Church that they will cooperate with us to fix the line and it will be done. This will be done in conjunction with the side works we are doing on the property.

City Attorney Oast said that we will structure a condition that if the developer does everything they legally can effectuate the condition they promised to meet, that will be satisfactory compliance.

Mayor Bellamy said that growth, development and change in communities are difficult. The developer is representing that they are proposing a project of things Council has said was important, e.g. green building, inclusionary zoning, infill housing, etc. When there is a neighborhood that has vacant property, that owner can sell it to a developer who in their eyes will see the neighborhood improved. Even though a lot of her family members signed the petition against the project, she must make her decisions based upon the data presented to her. To her, this is a great project and she believes the developer has listened and worked with the community to address their concerns. Not everyone is pleased, but it is a step in the right direction for change in our community.

The motion made by Councilwoman Cape and seconded by Councilman Newman, including the follo ving two additional conditions (1) That the number of units shall be increased to 69 with seven units meeting the affordability standards of the City of Asheville; and (2) the Planning & Development Director and City Attorney work on a condition regarding the storm drainage issue, noting that it would be something similar to the drainage improvements described by the applicant shall be completed prior to the issuance of any Certificate of Occupancy carried unanimously.

ORDINANCE BOOK NO. 23 – PAGE 10

D. PUBLIC HEARING TO CONSIDER THE PERMANENT CLOSING OF AN UNOPENED RIGHT-OF-WAY OFF CARROLL AVENUE

RESOLUTION NO. 06-125 - RESOLUTION TO PERMANENTLY CLOSE AN UNOPENED RIGHT-OF-WAY OFF CARROLL AVENUE

Mayor Bellamy said that this public hearing was held on April 25, 2006. She said that it was continued until this date in order to make sure that all property owners are advised of the proper procedures concerning closing the right-of-way, and also in order for the closing to be discussed in conjunction with the conditional zoning public hearing on Alexander Drive – The Skylofts of Asheville.

Assistant Director of Public Works Richard Grant said that this is the consideration of a resolution to permanently close an unopened right-of-way off of Carroll Avenue. This public hearing was advertised on March 31, April 7, April 14 and April 21, 2006.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Mr. Martin Barnes of Brooks & Medlock Engineering, PLLC representing the property owner Farwood Properties, Mike Farmer, President of Farwood Properties, has requested the City of Asheville to permanently close to the public an unopened right of way off of Carroll Avenue as shown on Plat Book 6, Page 6, Block "C" in the Buncombe County Register of Deeds.

Public Works Department staff has researched and determined that this unopened right-of-way is not a City maintained street. Closure of this unopened right-of-way will not deny any of the abutting properties a reasonable means of ingress or egress. There is one parcel that abuts this section of right-of-way, owned by Farwood Properties. It is identified by PIN No. 9648.07-68-1457.

Pros:

- The closure allows the property to be used to its maximum potential.
- There will be no future compromise of ingress/regress to other property

Cons:

- In consideration of the location of the unopened right-of-way, staff can find no potential challenges regarding the closure of the alley.

City staff recommends that City Council adopt the resolution permanently closing the unopened right-of-way off Carroll Avenue.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 06-125. This motion was seconded by Councilman Freeborn and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 51

E. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF 56 WALTON STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL ZONING FOR A PROPOSED SCHOOL TO BE HOUSED WITHIN THE EXISTING CHURCH

ORDINANCE NO. 3371 - ORDINANCE TO CONDITIONALLY ZONE 56 WALTON STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL ZONING FOR A PROPOSED SCHOOL TO BE HOUSED WITHIN THE EXISTING CHURCH

Mayor Bellamy opened the public hearing at 9:05 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to conditionally zone 56 Walton Street from RS-8 Residential Single-Family High Density District to Industrial District/Conditional Zoning for a proposed school to be housed within the existing church. This public hearing was advertised on June 16 and 23, 2006.

This review concerns a proposed school on the property of Tabernacle Missionary Baptist Church on Walton Street. The applicant is seeking for the property to be rezoned from RS-8 to Institutional (CZ) to accommodate the school use. As noted above, schools are a Use By Right, Subject to Special Requirements in the RS-8 district, but the proposed site meets neither the lot size nor the primary access requirements for this district. In the Institutional district, schools are a permitted use, and do not have to meet these requirements.

The proposed school would be entirely housed within existing church buildings. (It is noteworthy that the main church building on the property was formerly the St. Anthony of Padua School.) The church is considering a possible future expansion at the rear of the main building as well as a possible future expansion of the parking area (both shown on the plans). The proposed school would not be involved in any such expansions other than possible relocation/rearrangement of vehicular use areas.

The site is located near the southern end of South French Broad Avenue (within the City Limits of the City of Asheville). The plans include 2 lots, with a combined area of approximately 1.23 acres. Vehicular access to the facility would be from the Walton Street side of the property. The amount of parking shown on the plan meets City requirements.

In its initial phase, the school aims to enroll 15 kindergarten students. If the program is successful, the school hopes to fill four classrooms, with a total of approximately 60 students in grades K-4.

The building, which the school aims to use, was built as a school in 1936. It ceased to operate as a school in the 1960s. The Tabernacle Missionary Baptist Church subsequently purchased the property. After review of the site plan, staff is of the opinion that the conditional zoning to allow the (re)establishment of a school use is reasonable.

At the May 15, 2006, meeting, the Technical Review Committee (TRC) approved the proposed concept plan, based on the conditions outlined in the staff report.

At the June 7, 2006, meeting, the Planning and Zoning Commission unanimously recommended approval of the rezoning request, with the added condition that enrollment be limited to a maximum of 75 students.

Staff has received no indications of opposition to the project. One neighborhood resident called to express support for the proposed school, but did express a desire that the project result in improved maintenance of the vegetation on the Scott Street side of the site, which, in the estimation of the neighbor, often causes a nuisance due to neglect. Staff is of the opinion that the additional landscaping required to meet buffer standards will improve the condition of this area.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements once the conditions enumerated by the TRC are met. The project must meet the technical standards set forth in the UDO, the City Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The proposed use is compatible with the surrounding natural features and topography.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
Staff does not expect that the proposed use would have anything more than a minimal impact on property values, and expects that the impact could just as likely be in a positive direction as negative.

4. ***That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.*** The proposed project would be in harmony with these characteristics of the area. The proposed school use will entail few changes to the exterior of the site other than improving one parking area and adding landscaping.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The adopted Smart Growth Land Use Policies listed in Asheville's City Development Plan 2025 state that existing neighborhoods near Downtown Asheville should be strengthened through infill development, and that traditional neighborhood development patterns should be recognized and encouraged. Further, the Vision – Smart Growth Initiative section encourages projects that employ adaptive reuse to "preserve the architectural character of the community." Thus, staff finds this project, which would increase the level of use of an existing structure, preserve a noteworthy building, and in fact restore a historic use, to be in compliance with the Comprehensive Plan.

   Aside from the possibility that the rezoning could facilitate development of a small business, this rezoning can be said to neither hinder nor promote the goals identified in the Strategic Operating Plan.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** The project's location near Depot Street ensures access to transportation facilities and other services. Transit route 18 serves the area. In addition, technical review from other departments has not revealed any problems for serving the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Proposed project would establish a school use on a property that was historically used as a school.
- Project's proposed adaptive re-use would preserve a noteworthy building.
- As of this writing, staff has received no indication of opposition to the project.
- Overall mission of project, a school "designed specifically designed for the needs of low-income minority children" could be described as a helpful one for the community.
- Project conforms to multiple policies in the Comprehensive Plan.

Staff is of the opinion that the proposed conditional zoning and concept plan would represent a net benefit to the community and therefore recommends approval of the request.

I move to approve the zoning map amendment from RS-8 to INST (Conditional Zoning)- subject to the conditions recommended by staff and find that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation.

The designer on the project and the Board Chair for the New City Christian School both spoke in support of the project.

Mayor Bellamy closed the public hearing at 9:12 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3371, to conditionally zone 56 Walton Street from RS-8 Residential Single-Family High Density District to Industrial District/Conditional Zoning for a proposed school to be housed within the existing church, subject to the conditions recommended by staff and find that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 – PAGE 14

F. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF 103 N. BEAR CREEK ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL ZONING FOR A PROPOSED PRE-SCHOOL

ORDINANCE NO. 3372 - ORDINANCE TO CONDITIONALLY ZONE 103 N. BEAR CREEK ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL ZONING FOR A PROPOSED PRE-SCHOOL

Mayor Bellamy opened the public hearing at 9:15 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to conditionally zone 103 N. Bear Creek Road from RM-8 Residential Multi-Family Medium Density District to Commercial Industrial District/Conditional Zoning for a proposed pre-school. This public hearing was advertised on June 16 and 23, 2006.

The subject property is located within the City Limits on N. Bear Creek Road, just north of the intersection of N. Bear Creek and Deaverview Road. Two parcels totaling 2.28 acres are included in this conditional zoning request. Access to the property is off of N. Bear Creek. Surrounding properties to the north and west are zoned residentially (RS-8, RM-8, RM-16) and the properties to the south and east are zoned Commercial Industrial. The land use pattern in the area follows the zoning. To the north are single-family homes; to the west, both single-family and multi-family housing. A self-service storage facility is located immediately south of the property. MB Haynes construction/contracting/electronics operation is located to the east.

The applicants, Amica Venturi and Ken Huck, wish to rezone their property from RM-8 Residential Mulit-Family Medium Density District to Commercial Industrial/Conditional Zoning for the purpose of establishing a preschool. The property currently contains a single-family home and dilapidated manufactured home. (The current property owners have been cited for a number of violations by the Building Safety Department, primarily concerning illegal dumping and the condition of the manufactured home. At the time of the drafting of this report, the applicant had assisted the property owner in demolishing most all of this manufactured home and clearing the property of debris). It is proposed that the single-family home be preserved. The applicants have not specified the exact use of this building. The development plan shows, in addition to the preservation of the existing home, the construction of two buildings approximately 3,744 square feet in size. A sidewalk along Bear Creek is proposed along with one-way entrance and exit drives to facilitate drop off and pick up of children.

At their meeting on May 15, 2006, the City of Asheville Technical Review Committee (TRC) reviewed the conditional zoning request and made a positive recommendation (with conditions) that the project be forwarded to the Planning and Zoning Commission.

At their meeting on June 7, 2006, the Asheville Planning and Zoning Commission unanimously (6-0) recommended approval of this application to the City Council.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The project, if approved, must meet the technical standards set forth in the City's Unified Development Ordinance. The existing site plan shows compliance with many of the City's development standards; the applicant is working with City staff on full compliance. The applicants are also working with the appropriate childcare-licensing professionals on the development of this site.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The applicant is working with appropriate City departments to ensure that proper buffers are established between any construction/site work and the stream and utility lines which lie to the north of the property.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The use of the property surrounding this site is varied. There exist commercial, industrial, and residential uses on various sides of the subject property. The applicants propose to save as much of the existing vegetation on the site as is possible. Compliant buffering is proposed in appropriate locations. The dilapidated manufactured home will be removed as part of the development of this property.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The character of the area in which this development is proposed is not easily defined due to the varied nature of uses found. The scale of the proposed buildings to be utilized for the preschool is in keeping with a residential area. The area has a fairly dense residential population for which the preschool would be a convenience.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The proposed development supports the 2025 Plan regarding permitting appropriately scaled non-residential uses that serve residents of neighborhoods in appropriate residential locations.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** Asheville Transit Route 15 services the Deaverview Apartments immediately southwest of the proposed development. All technical aspects of the project have or can be met by the applicants.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The applicants are working with the City of Asheville Engineering Department to provide appropriately for the automobiles that will enter and exit this property for the drop off and pick up of children attending the facility.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Proposes appropriate nonresidential use in a transition area between residential and commercial/industrial uses.
- Landscape plan indicates the preservation of considerable existing vegetation.
- Some may consider this application a commercial intrusion into a residential area due to the size of the proposed preschool operation.

Staff recommends approval subject to the conditions placed on the development by the TRC with the added condition that the site be cleaned up prior to obtaining final TRC approval on the project.

At their meeting on June 7, 2006, the Asheville Planning and Zoning Commission voted unanimously (6-0) to recommend this rezoning to the Asheville City Council.

Mr. Gerald Green, representing the petitioner, spoke in support of the conditional zoning and presented City Council with a petition containing 24 signatures of area residents supporting the establishment of a preschool in their neighborhood and to conditionally zone the property.

Mayor Bellamy closed the public hearing at 9:20 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3372, to conditionally zone 103 N. Bear Creek Road from RM-8 Residential Multi-Family Medium Density District to Commercial Industrial District/Conditional Zoning for a proposed pre-school, subject to the following conditions: (1) the TRC conditions being met; (2) that the site be cleaned up prior to obtaining final TRC approval of the project; and (3) that, if deemed necessary by the Planning Director, this project be reviewed by the TRC prior to issuance of any building [or grading, etc....] permits. Noting that the request is reasonable based on information provided in the staff report and as stated in the stated in the staff recommendation. This motion was seconded by Councilwoman Cape and carried unanimously

ORDINANCE BOOK NO. 23 – PAGE 18

At 9:25 p.m., Mayor Bellamy announced a short recess.

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 3373 - ORDINANCE ADOPTING THE FISCAL YEAR 2006-07 ANNUAL OPERATING BUDGET

Chief Financial Office Ben Durant said that this is the consideration of an ordinance adopting the Fiscal Year 2006-07 annual operating budget. The City Council public hearing was held on June 13, 2006.

328

The Fiscal Year 2006/2007 Annual Operating Budget was formally presented to City Council on May 23, 2006. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the Public Hearing was published on June 2 and June 9, 2006. The City Council conducted a public hearing on the budget on June 13, 2006.

The Fiscal Year 2006/2007 Annual Operating Budget is balanced with an Ad Valorem Tax rate of $0.4238 per $100 of assessed valuation, which is a revenue-neutral reduction from the current tax rate of $0.53 per $100 of assessed of valuation. All essential City programs and services are maintained.

The net operating budget as currently presented to City Council is set at **$117,011,971**, which includes a General Fund appropriation of **$77,858,556**. The final budget includes several changes that were made after the proposed budget was published on May 23. Those changes are summarized below:

- After the proposed budget was presented to Council, the Fire Department received notification that it had been awarded a federal SAFER grant which will partially fund the cost of three of the eighteen additional firefighters that were already included in the proposed budget. The FY 2006/2007 revenue from this grant totals **$94,616**. This additional revenue was used to 1) add funding to the budget to purchase a **$75,000** quick response vehicle (QRV) for the Fire Department; and 2) reduce the fund balance appropriation in the General Fund by **$16,616**.

- In addition, Council directed staff to include funding in the Transit Services Fund budget to expand the hours of operation for city buses and to initiate a limited-time fare free program. These new transit initiatives are funded with a **$248,116** transfer from the Parking Services Fund. Revenue from various parking fee increases was added to the budget to offset the cost of these new transit programs.

- Outside Agency funding is presented in accordance with City Council's recommendations. The full Council made several changes to the Revenue & Finance Committee's initial recommendations. Final Outside Agency appropriations for FY 2006-2007 total **$224,000**, which represents a net reduction of **$59,500** over the FY 2005-2006 budget of **$283,500**. Staff had included the full $283,500 in the initial FY 2006-2007 proposed budget as a place holder until Council made its final Outside Agency recommendations. Therefore, Council freed up **$59,500** when it set the Outside Agency funding level at $224,000.

- The Revenue & Finance Committee recommended various changes to the business privilege license fee schedule, including the elimination of maximum fee caps in the retail, wholesale, and service business categories. The full Council directed staff to look at various alternatives to the Committee's initial recommendation to eliminate the maximum caps. Staff completed its analysis and is now proposing a maximum fee of **$10,000** for retail, wholesale, and service establishments. This alternative proposal will produce approximately **$225,000** in additional revenue in FY 2006/2007, which is **$325,000** less than the **$550,000** in additional revenue that was initially included in the proposed budget.

  After the proposed budget was presented to Council, the City received two additional months of sales tax revenue from the State; and based on this information, staff was able to increase its sales tax projections for next year by **$300,000**. Staff proposes that this additional revenue, along with a portion **($25,000)** of the savings from reducing Outside Agency funding be used to bridge the **$325,000** revenue gap between the latest business license fee

proposal and the Revenue & Finance Committee's initial recommendation. The remaining $34,500 in Outside Agency savings will be added to the Manager's Contingency.

- Various changes or increases to fees & charges are presented in accordance with Council's recommendations. Specific fees & charges recommendations are provided as a part of the annual budget ordinance.

- Based on better than expected revenue and operating performance in FY 2005/2006, staff projects that the year-end deficit in the Civic Center Fund will be $375,000, which is approximately $400,000 less than the FY 2005/2006 budgeted operating transfer from the General Fund to the Civic Center Fund. Based on Council's direction, staff is proposing that this $400,000 be redirected from the Civic Center Operating Fund to the Civic Center Capital Fund to address high priority capital projects at the Center. The Budget Ordinance provides authorization for staff to execute this transfer.

Staff requests that Council review the FY 2006/2007 Annual Operating Budget, including the changes noted above, and make necessary recommendations or adjustments followed by adoption of the Budget Ordinance.

Mr. Durant explained the one remaining outstanding issue of the business privilege license fee. He summarized the current fee structure and the updated proposal in that staff was asked to look at setting a maximum fee as opposed to having an unlimited fee. They are now recommending the maximum fee of $10,000 for business privilege licenses. In summary, the effects of the proposed City changes is that (1) approximately 1,600 business establishments (60% of establishments under the City rate structure) will see their fees decrease due to the reduction in the gross receipts per volume change; (2) approximately 1,000 business establishments (37% of the establishments under the City rate structure) currently pay the minimum and will therefore see no change in their fee; and (3) 84 business establishments (3% of the establishments under the City rate structure) will see their fees increase due to increasing the maximum to $10,000 in the retail, service, and wholesale categories (and out of the 84 businesses, 12 establishments will pay the maximum $10,000 fee.

Councilman Newman moved to adopt the budget as presented by Mr. Durant except to include the recommended Revenue and Finance Committee business privilege license fees, being the minimum fee of $25, $0.50 per thousand over $15,000 + $25, and no maximum fee (not the $10,000 cap). This motion was seconded by Vice-Mayor Jones.

Upon inquiry of Councilman Newman about the neighborhood coordinator position in the Planning & Development Department, Assistant City Manager Richardson said that the City Manager will work with the Chief Financial Officer in trying to identify funds to have an existing intern be hired on a one-year contract basis for this position.

Considerable discussion was held at Councilman Newman's possible amendment to create a budget policy for implementing a uniform water rate which will be phased in over a 5-year period with the first of those 5-years beginning in Fiscal Year 2007-08, with a caveat that we have a policy of maintaining our current differential rate structure for manufacturing customers who are on the Asheville water system at their current lower rate structure. In summary, it was the majority of Council's decision to wait for updated information (since this is a policy decision that can happen anytime and has no impact on the budget being discussed now). Mr. Durant said that he can have the updated information to Council in approximately one month, with updated information to include statement of the impacts, what is the impact with the loss of Anvil, what it will look like phasing in, etc.

Councilman Mumpower moved to amend the main motion to ask staff to create some procedure to assure compliance regarding privilege license fees. Councilwoman Cape responded that conversations have begun with City staff to look at the process of the privilege license fee.

The motion to amend the main motion to instruct staff to create a procedure to assure compliance with the privilege license fees carried unanimously.

Mayor Bellamy moved to amend the amended main motion by adding the maximum fee cap of $10,000 on all businesses, except for manufactures which will have a $1,000 cap (including the $25 minimum fee; and $0.50 per thousand over $15,000 + $25) for at least one year and in next year's budget the Council's policy will be to ask staff to include a uniform business privilege license fee in the next year's budget. After discussion, the motion to amend the amended main motion carried on a 6-1 vote, with Councilman Mumpower voting "no."

Councilman Mumpower didn't support the motion because these are people that don't get to vote and it's always easy to go after businesses. Businesses are faced with parade of taxes and expenses and this is just one of many.

The amended main motion then carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 – PAGE 22

V. NEW BUSINESS:

A. ACCEPTANCE OF GRANT FUNDS

Councilman Mumpower was pleased to present Transit Director Bruce Black a check from the Chaddick Foundation in the amount of $25,000 for the Top A Stop Program.

Councilman Mumpower was also pleased to present Irby Brinson, Director of Parks & Recreation, a check from the Chaddick Foundation in the amount of $25,000 for Memorial Stadium.

B. RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE REGIONAL AIRPORT AUTHORITY

At the request of Vice-Mayor Jones, Chair of the Boards & Commissions Committee, it was the consensus of Council to fill the Airport Authority vacancies on July 11, 2006.

C. RESOLUTION NO. 06-126 - RESOLUTION APPOINTING A MEMBER TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that Mr. Victor Trantham has resigned, as a member of the Buncombe County Tourism Development Authority, thus leaving an unexpired term until August 30, 2007.

At the City Council worksession on June 20, 2006, City Council instructed the City Clerk to arrange interviews for Frank Salvo and Ronald Storto to fill the vacancy for the owner/operator of hotel, motel or other taxable tourist accommodation with 100 or fewer rental units.

After Council spoke highly of the candidates, Frank Salvo received 3 votes and Ronald Storto received 4 votes. Therefore, Ronald Storto was appointed to serve the unexpired term of

Mr. Trantham (representing the owner/operator of hotel, motel or other taxable tourist accommodation with 100 or fewer rental units), term to expire August 30, 2007, or until his successor has been appointed.

RESOLUTION BOOK NO. 30 – PAGE 53

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of June 2-15, 2006: Tana R. Oliver (Parks & Recreation), Doris Firkatoune (Civic Center), Johnny L. Bailey (Transit Services), Teresa Raines (Sanitation) and Robin Cline (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Robert Zieber noted this has been his third time to Council requesting the status of the Biltmore Park Traffic Calming Plan for speed humps. He said that he recently talked with City Engineer Cathy Ball who would be copying Mr. Zieber with the correspondence associated with this matter.

Reverend Christopher Chiaromonte commented on how the City was oppressing the poor.

Mr. Dwight Buckner, representing the members of the Downtown Association, voiced concerns over the budget process and parking deck increases.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:35 p.m.

Magdalen Burleson
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday – July 11, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Robin L. Cape

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

I. PROCLAMATIONS:

A. SENIOR OPPORTUNITY CENTER RECOGNITION AS A NC SENIOR CENTER OF EXCELLENCE

Mayor Bellamy recognized Mr. Joe Connolly, Director of the Land-of-Sky Area Agency on Aging, who presented the NC Senior Center of Excellence Award to Ms. Pam Kelly, Director of the Senior Opportunity Center; Ms. Irene Pickens and Mr. Daniel Campbell, Senior Opportunity Center staff; and Ms. Amy Rickman, Program Supervisor.

II. CONSENT AGENDA:

Councilman Mumpower asked that Consent Agenda "C" be removed from the Consent Agenda for discussion.

Mayor Bellamy asked that Consent Agenda "E" be removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 27, 2006

B. RESOLUTION NO. 06-127- RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH THE ASHEVILLE HUMANE SOCIETY FOR ANIMAL SHELTER SERVICES WITHIN THE CORPORATE LIMITS OF THE CITY

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with the Asheville Humane Society for animal shelter services within the corporate limits of the City.

For the past few years, Buncombe County has required the City to pay for animal shelter services through the Asheville Humane Society, who has contracted with the County to run the animal shelter. On June 27, 2006, the City approved the budget for Fiscal Year 2006-2007 and in that budget approved $121,000.00 to pay for shelter services. The City and the Humane Society need to enter into an agreement for the shelter services for the term of July 1, 2006, through June 30, 2007.

Pros:
- The City will not have to pay for the construction and operation of its own animal shelter to take care of its animal sheltering needs and the Humane Society will be responsible for the care of all animals brought to the shelter.

Cons:
- The City has to pay out of its general fund for shelter services where Buncombe County provides the same services to all other non-incorporated county residents at no additional cost except through county taxes.

City staff recommends the adoption of the resolution for animal shelter services for the term of July 1, 2006, through June 30, 2007.

RESOLUTION BOOK NO. 30 – PAGE 54

C. **RESOLUTION SETTING A PUBLIC HEARING TO CONSIDER VACATE THE DWELLING LOCATED AT 128 ALABAMA AVENUE BE VACATED AND CLOSED UNTIL BROUGHT INTO COMPLIANCE WITH THE HOUSING CODE**

This item was removed from the Consent Agenda for individual discussion.

D. **RESOLUTION NO. 06-129 - RESOLUTION AMENDING THE 2006 CITY COUNCIL MEETING SCHEDULE TO DELETE THE AUGUST 8, 2006, FORMAL COUNCIL MEETING**

RESOLUTION BOOK NO. 30 – PAGE 57

E. **RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 10TH ANNUAL BREWGRASS FESTIVAL ON SEPTEMBER 23, 2006**

This item was removed from the Consent Agenda for an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Freeborn and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA

RESOLUTION NO. 06-128 - RESOLUTION SETTING A PUBLIC HEARING TO CONSIDER VACATE THE DWELLING LOCATED AT 128 ALABAMA AVENUE BE VACATED AND CLOSED UNTIL BROUGHT INTO COMPLIANCE WITH THE HOUSING CODE

Summary: The consideration of a resolution setting a public hearing on July 25, 2006, to consider the dwelling located at 128 Alabama Avenue be vacated and closed until brought into compliance with the Housing Code

The structure located at 128 Alabama Avenue (PIN 9638.15-52-0910) is a two-story wooden frame, deteriorated dwelling. Work conducted without a valid permit within the dwelling resulted in four illegal units. The owner has obtained zoning approval for two units but has not completed the required work in order to obtain a Housing Certificate. At a hearing on March 5, 2005, the dwelling was deemed by the building inspector as being unfit for human habitation.

Additionally, the owner was ordered to make required repairs and obtain a housing certificate by May 9, 2005. Upon the owner's failure to comply with the Order, a re-accruing civil penalty was assessed on November 17, 2005. The civil penalty has accumulated to over $8,000 and continues to accumulate at the rate of $50 per day. To date, the illegally occupied dwelling remains unfit for human habitation and is being rented without the required Housing Certificate.

Pros:

- Removes occupants from a dwelling deemed unfit for human habitation
- Enforces the Housing Certificate requirement of the Housing Code
- Once vacated, allows the City to stop the accrual of the civil penalty
- Once vacated, allows the City to proceed with appropriate action to collect the total penalty owed

Cons:

- May require the City to file eviction proceeding to remove occupants from the dwelling.

This action complies with the City Council Strategic Operating Plan in that it promotes the focus area of Housing Opportunities, Goal #4, Objective C: Establish a proactive role for the City of Asheville to best utilize those programs available to it to dramatically increase the long-term availability of affordable housing.

The Building Safety Department recommends adoption of the resolution setting a public hearing on July 25, 2006, to consider the dwelling located at 128 Alabama Avenue be vacated and closed until brought into compliance with the Housing Code.

Upon inquiry of Councilman Mumpower, Director of Building Safety Robert Griffin said that they are in constant dialogue with the owner and there is an excellent opportunity that the owner will comply and the public hearing may be pulled from the July 25 agenda.

Councilman Mumpower moved for the adoption of Resolution No. 06-128. This motion was seconded by Vice-Mayor Jones and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 55

RESOLUTION NO. 06-130 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 10TH ANNUAL BREWGRASS FESTIVAL ON SEPTEMBER 23, 2006

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 10th Annual Brewgrass Festival on September 23, 2006.

Earlier this year this group received Council approval to serve malt beverages and/or unfortified wine at their event. However, they have changed the date and location of their event and this needs to be re-submitted again for Council consideration.

The 10th Annual Brewgrass Festival, which is a benefit for the Big Brothers/Big Sisters program, has requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their event and allow for consumption on September 23, 2006, in the Eagle/Market Street area of downtown Asheville.

City staff recommends City Council adopt the resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 10th Annual Brewgrass Festival on September 23, 2006.

Councilman Newman moved for the adoption of Resolution No. 06-130. This motion was seconded by Councilman Freeborn and carried on a 5-1 vote, with Mayor Bellamy voting "no."

RESOLUTION BOOK NO. 30 – PAGE 58

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF PROPERTY LOCATED AT 37 ARLINGTON STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING FOR A PROPOSED PARKING LOT

Mayor Bellamy said that on July 3, 2006, she received a letter from Mr. Robert L. Malkin, agent for Mr. and Mrs. Randall Higgins, doing business at 37 Arlington Street, Asheville, N.C., requesting "a continuation of the public hearing now scheduled for July 11 to July 25, 2006, based on a valid protest petition being filed on May 18, together with the absence of Councilwoman Robin Cape, during the public hearing on July 11. We were fully prepared to go forward on this conditional zoning request had we not been informed of Robin Cape's absence, which thereupon would require 100% of City Council approval. Further, Mr. Higgins' attorney is negotiating with attorney Patsy Brison towards providing a restricted deed to the signors of the protest petition, thus, to go forward with the public hearing on July 11 could be an untimely disadvantage to all parties."

City Attorney Oast said that since there is a valid protest petition filed, in order to adopt any change in zoning would require an affirmative vote of all six members of Council.

Mayor Bellamy said that she has spoken with Councilwoman Cape who is supportive of this continuance since she was not able to be at this meeting due to traveling on City business.

Councilman Newman said that in light of a valid protest petition and Councilwoman Cape's support for a continuance, he would support a continuance.

Councilman Mumpower said that since a valid protest petition has been filed, the goal is fairness and the petitioner should have the benefit of a full Council.

Ms. Patsy Brison, attorney representing neighbors who are opposed to the rezoning, submitted to Council a letter as follows: "You have received a request from the applicant's agent, Robert L. Malkin, for another continuance. The basis of the continuance is the absence of one council member on July 11 and a statement that the applicant's attorney has been negotiating with me about providing deed restrictions in exchange for withdrawal of the protest petition. While the clients I represent have been open to considering a proposal from the applicant, I have not received any proposals from the applicant through their attorney or agent. I have received a few telephone messages and have returned each of those but have not received any proposal for my clients to consider. As the applicant has already received one continuance, my clients and other neighbors will need to make a personal appearance plans to appear tonight to speak in opposition to the application in the event the matter is heard. My clients would like to proceed with this matter and oppose the request for a second continuance." She urged Council to hear the matter at this meeting.

Mayor Bellamy confirmed that the first continuance request by the petitioner was due to a Council member being absent from the meeting as well, and was not the petitioner's fault.

Councilman Mumpower moved to continue this public hearing until July 25, 2006. This motion was seconded by Councilman Davis and carried on a 5-1 vote, with Councilman Freeborn voting "no."

Councilman Mumpower encouraged the developer to communicate with the neighborhood to see if they can resolve any concerns.

B. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO ALLOW TATTOO PARLORS AS A PERMITTED USE IN THE COMMERCIAL INDUSTRIAL DISTRICT, THE HIGHWAY BUSINESS DISTRICT, THE REGIONAL BUSINESS DISTRICT, THE CENTRAL BUSINESS DISTRICT AND THE RIVER DISTRICT

At staff's request, due to a technical amendment, this public hearing will be re-advertised for the July 25, 2006, meeting.

C. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE UNIFORM NOTIFICATION FOR DEVELOPMENT REVIEW PROCEDURES

ORDINANCE NO. 3374 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE UNIFORM NOTIFICATION FOR DEVELOPMENT REVIEW PROCEDURES

Mayor Bellamy opened the public hearing at 5:17 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance amending the Unified Development Ordinance to provide uniform notifications for development review procedures. This public hearing was advertised on June 30 and July 7, 2006.

The City of Asheville's Unified Development Ordinance sets forth a number of different notification requirements for many of the different review processes that might occur for the development or subdivision of property. There seems to be no clear reason for this process differentiation and the variation in process has led to much confusion for citizens and for staff about the notification processes.

This proposed amendment, except when state statutory provisions require differing notification, establishes uniform guidelines for the notification of the public on all types of review. These guidelines state that the City will provide notification for all public meetings and public hearings associated with review processes in the following manner:

- Published notice in the newspaper at least ten (10) days prior to the date of the hearing/meeting.
- Mailed notice to those within two hundred (200) feet of the subject property mailed at least ten (10) days prior to the date of the hearing/meeting.
- Mailed notice to any known neighborhood contact person at least ten (10) days prior to the date of the hearing/meeting.
- Posted notice at least ten (10) days prior to the date of the hearing/meeting.

The amendment further states that the North Carolina General Statutes control where specific notification requirements are stated (currently this is only for amendments -- text or map -

- when those are being heard by City Council). Since there are no statutory requirements for other types of review, the amendment also provides that errors in notification for these other types of review, shall not affect the validity of any action taken at a public hearing or public meeting on such matters.

Considerations:

- The amendment provides for uniform notification procedures for all types of development review giving clarity on these procedures to citizens and staff.
- The amendment refers to the North Carolina General Statutes but does not spell out statutory requirements, thus avoiding conflicts in the future should statutory requirements be amended.
- The amendment makes notifications that are not required by statute, "guidelines", that the staff will follow in providing public notice on review processes. The amendment provides that errors in the provision of notice for these other processes will not negate any action taken at a public meeting/hearing on such matters.

At its meeting on June 7, 2006, the Planning and Zoning Commission unanimously (6-0) recommended approval of this wording amendment. Staff recommends approval as well.

Ms. Cogburn asked for Council consideration for two other amendment to the proposed ordinance as follows: "w. Section 7-5-1 (b) (3) be amended by deleting the following language: An application for a major works certificate of appropriateness must be filed with the director of the historic resources commission. When completed, the application shall be filed with the director of the historic resources commission at least 14 days prior to the historic resources commission meeting at which the request is to be heard."; and "Amend I. To add: Posting of sites as set forth in 7-5-20 is not required for major works certificates of appropriateness."

Mayor Bellamy closed the public hearing at 5:26 p.m.

Ms. Cogburn responded to Councilman Mumpower's concern regarding the treatment of errors in notification proposed in the amendment. He stated his concern for the City having ordinances designed to provide clarity, which then allow standards (in this instance, standards for notification) to be changed.

City Attorney Oast said that the technology for accessing and disseminating information is readily available and is being used, and our public notification process goes far beyond what the statutes require.

Ms. Cogburn responded to Vice-Mayor Jones' question why some of the mailing notices were being reduced from 400 feet to 200 feet.

City staff recommends City Council amend the Unified Development Ordinance (UDO) to provide uniform notification for development review procedures.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3374, with the two amendments outlined by Ms. Cogburn. This motion was seconded by Councilman Davis and carried unanimously.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE REGIONAL AIRPORT AUTHORITY

At the request of the Boards & Commissions Committee, it was the consensus of Council to delay the Airport Authority appointments until a full Council is present on July 25, 2006.

VI. OTHER BUSINESS:

At the request of the Boards & Commissions Committee, it was the consensus of Council to institute a procedure whereby when board and commission appointments are made during a formal meeting that all members of Council be present.

Councilman Mumpower encouraged citizens to volunteer to help build Top-A-Stops.

Councilman Newman was pleased to announce the following new improvements to the Asheville transit system: (1) implementation of the evening service, which provides transit services to all parts of town until 10:30 p.m.; and (2 the City's 90-day ride-for- free promotional campaign beginning on August 14, 2006.

Mayor Bellamy announced that the City of Asheville received a Weed and Seed Official Recognition from the Department of Justice for the West Riverside community, which is made up of the Pisgah View and Burton Street neighborhoods.

The following claims were received by the City of Asheville during the period of June 16-29, 2006: Willie D. White (Transit Services), Mark Anderson (Police), BellSouth (Water), Leanna Bowman (Water), Mariana Bartow (Water) and City of Asheville's Information Services (Information Services). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Joe Minicozzi, speaking on behalf of the Coalition of Asheville Neighborhoods Board, spoke to Council about the David W. Owen's report on three development issues. They narrowed the report to four points, as follows: (1) they asked Council to move immediately to direct staff to fix what has been constructed without Code compliance according to the report – Greenlife, the loading dock in the buffer; Staples, the setback issues; and Prudential, sign not being in compliance with the square footage requirement; (2) there were matters for open interpretation that should have gone to a quasi-judicial hearing either before City Council or the Board of Adjustment and they asked for Council direction to cease the practice at staff level; (3) there were 22-24 items of Code modification that could be initiated by staff and they would like to see those changes start within the next 90 days; and (4) bring forward an immediate halt to the alternative compliance buffer variances at the staff level. Mayor Bellamy noted that City Council is in the process of inviting Mr. Owens to make his presentation to Council and then Council will develop the steps to address the recommendations.

Mr. Reid Thompson urged City Council to direct the Police Department to enforce the laws, in that trucks are driving on Maxwell Street and police officers are not ticketing them. City Manager Jackson took exception that there hasn't been police response in that location. He said he would provide City Council with an update on enforcement action at that location.

Mr. Fred English spoke to Council about Pack Square and questioned how much money the City has contributed to that project, including the improvements to College Street. City Manager Jackson was not aware of any local matching dollars. Vice-Mayor Jones said that we are contributing in-kind support to make sure the project minimally impacts our citizens.

Councilman Mumpower suggested a worksession item be scheduled to discuss how City Council is going to respond to the extensive delays and the significant impacts of those delays to our community, since the delays are causing a dramatic economic and intrusive impact on our downtown businesses. The worksession discussion would be on how do we mitigate that impact. After a brief discussion, it was the majority of Council's decision to ask City staff to prepare a memo to Council to include some of the following, but not limited to, what is in the pipeline as far as parks and recreation activities and events, their timeline, their funding-raising; how will the delays be mitigated so as not to cause further congestion during the fall season; how will traffic be handled in that area; what money is available to complete the project and how will the different portions of the project be phased in. After that report is prepared by City staff, Mayor Bellamy said then a worksession could be scheduled.

Mr. George Grunewald expressed his feelings on the inadequacies that the Town of Biltmore Forest is paying for City water and Asheville Fire Department services. City Manager Jackson said that he would provide a response to Mr. Grunewald addressing his concerns.

Reverend Christopher Chiaromonte spoke in support of public restrooms downtown and the need for low cost apartments or roomy houses to get the homeless off the street.

CLOSED SESSION

At 6:17 p.m., Councilman Mumpower moved to go into closed session for the following reason: To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; Reid Thompson; Board of Adjustment; Greenlife Grocery of Asheville, LLC; and State of North Carolina. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Freeborn and carried unanimously.

At 7:30 p.m., Councilman Freeborn moved to come out of closed session. This motion was seconded by Councilman Mumpower and carried unanimously.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 7:30 p.m.

Magdalen Burleson
CITY CLERK

Jerry W. Bellamy
MAYOR

Monday – July 17, 2006 - 9:10 a.m.
Room 202 – Haynes Building
A-B Technical Community College
Enka Campus

Special Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape (arrived at meeting at 10:10 a.m.); Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Present: Buncombe County Chairman Nathan Ramsey; Commissioner David Gantt; and County Attorney Joe Connolly. (Absent: Vice-Chair Bill Stanley, Commissioner Carol Peterson, Commissioner David Young, County Manager Wanda Green and County Clerk Kathy Hughes).

Mayor Bellamy called the meeting to order at 9:10 a.m. in Room 202 of the Haynes Building at the A-B Technical Community College's Enka Campus. Vice-Mayor Jones then moved to adjourn the meeting to Room 200 in order to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; and State of North Carolina. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Davis and carried unanimously. (Councilwoman Cape was not present in the closed session.)

At 10:03 a.m. Councilman Freeborn moved to come out of closed session and reconvene the meeting in Room 202. This motion was seconded by Councilman Davis and carried unanimously.

At 10:00 a.m. Mayor Bellamy called the City Council meeting to order to discuss water-related issues.

Chairman Ramsey said that the majority of the County Commissioners could not attend this meeting, noting that a letter was sent last week indicating that. It was his understanding that on July 31, 2006, the entire County Commissioners are able to meet. However, he and Commissioner Gantt are available to answer any questions about the County's latest written offer.

Even though the County continues to strongly believe that an independent water authority is the best solution for the region, the County's latest offer on June 22, 2006, is (1) water will be a municipal system; (2) the County and the water districts will transfer to the City both the title and responsibility for all water facilities; (3) there will be no differential rates; (4) there will be no diversion of water revenues, and this will be verified annually through an independent review; (5) water will not be used as a tool to force annexation; (6) the City will transfer to the County both title and responsibility for McCormick Field, Nature Center, Golf Course, Recreation Park and the Civic Center. (This relieves the City of a net operating loss that is currently $1.1 million annually and which will grow substantially in the future. Additionally, the County could address the much-needed and long-deferred issue of improving or replacing the Civic Center.); (7) all lawsuits on water issues and any related claims will be dropped; and (8) the County and the City will cooperate in seeking the appropriate legislation necessary to implement this agreement.

Mayor Bellamy noted that since Asheville is the hub of Western North Carolina, the reality is that our daytime population goes from 72,000 to over 100,000 individuals who come into the City to do their business. In most cities in North Carolina there is an equity payment or they use their water resources to help cover the infrastructure costs.

Mayor Bellamy felt it would be appropriate to go through the County's proposal point by point and let the Commissioners know of the City's position. Then the things that the City and County agree on to be taken off the table. For starters, since the County and the City both agree that the water will be a municipal run system, that item should be taken off the table.

Commissioner Gantt said that the County's proposal is a package and they need to have the entire Commissioners at the table, as well at the state legislators since the legislators have the taxing and funding power to help us make these things happen. After checking with the state legislators, the date when the Commissioners and legislators (except for Senator Apodaca) can be present is July 31, 2006.

Mayor Bellamy continued stating that the City will accept the County's proposal point that the water system will be a municipal-run system. Again, since both bodies agree, that should be an issue taken off the table.

Chairman Ramsey noted again that the County clearly wants an independent water authority in that they feel it is the best for the region. He said that point is a major concession for their board. In addition, the County will be taking on a multi-million dollar annual financial cost. He didn't feel that the independent water system/municipal run system should be taken off the table but that doesn't mean that the County will pay $6 Million a year to the City.

Mayor Bellamy asked if the County's position is now changing from their proposal to the City on June 22 in that they agreed that water will be a municipal-run system.

Chairman Ramsey said that, in his opinion, the City can't pick and choose from the County's proposal. He agreed with Commissioner Gantt that it is a package offer, however, he was agreeable to changing some of the provisions.

Mayor Bellamy said the City's goal is not to consider the County's proposal on an all or none basis. The City's goal is to see where we can agree.

Commissioner Gantt was willing to listen to what the City agrees on and then they will go back to their entire board.

Mayor Bellamy then reviewed the City's position on each of the County's latest proposal points: (1) water will be a municipal system – the City agrees to that; (2) the County and the water districts will transfer to the City both the title and responsibility for all water facilities – the City agrees to that; (3) there will be no differential rates – the City could agree to that, subject to tax equity payments with a Consumer Price Index (CPI) attached on a 20-year agreement; (4) there will be no diversion of water revenues, and this will be verified annually through an independent review – the City could agree to that, subject to tax equity payments with a CPI attached; (5) water will not be used as a tool to force annexation – the City will accept the provision from the County's June 2005 offer that new developments within a half-mile can be annexed using the same criteria other North Carolina cities utilize; (6) the City will transfer to the County both title and responsibility for McCormick Field, Nature Center, Golf Course, Recreation Park and the Civic Center. (This relieves the City of a net operating loss that is currently $1.1 million annually and which will grow substantially in the future. Additionally, the County could address the much-needed and long-deferred issue of improving or replacing the Civic Center.) – the City is open to discuss this but wants to focus on water prior to any discussions on this provision; (7) all lawsuits on water issues and any related claims will be dropped – if the City receives support on the above responses, then this provision would be dropped; and (8) the County and the City will cooperate in seeking the appropriate legislation necessary to implement this agreement.

Mayor Bellamy said that the tax equity payment the City is requesting is $6.2 Million, which is 85% of the average differential across the State of North Carolina. Those municipalities across the North Carolina use that 85% differential to help offset the costs of people coming from outside their municipality into the municipality to do business. The City is willing to talk about how we can get there, which may not be all cash payments. However, the City should be compensated and that is either with a rate differential or with a tax equity payment.

Mayor Bellamy suggested Chairman Ramsey to go back to his board and relay the City's position on the County's latest offer, noting that the County response on an entire package or nothing is not a good process. She hoped at the meeting on July 31, which the County has arranged, the bodies can be open to discuss the provisions on a point-by-point basis and move forward.

Noting that this is only his perspective, Chairman Ramsey said that the more burden that all County residents would incur, then in exchange for that it seems to him that the City would make concessions. The largest financial obligation that the County was willing to incur was when it was an independent authority and the County was stepping out in making a major financial commitment to do that. This is so controversial, because over the past 80 years, the City has never charged differential rates for water customers and has never been able to tell future water customers that they had to be voluntarily annexed to receive water services. That is the way it's been because it is the County's contention that the City doesn't own the entire water system but the Court system will settle that point. He also pointed out that regarding a differential rate, our current overall rate is higher than the City of Hendersonville's outside rate. The County understands that the City incurs some expenses that should probably be borne by more taxpayers than those who live in the City of Asheville, e.g., Civic Center and the recreation assets. That is why they come into the picture, because it is not fair for City taxpayers to solely bear the burden for regional facilities. And that is the intent of the County to address some of that.

Chairman Ramsey requested the City make a list of the different inequities (elaborating on some of the costs) that the Asheville taxpayers are incurring that other 5 incorporated towns in Buncombe County don't have to incur, then, from his perspective, the County will be look at that to try to make sure that all taxpayers in our community are treated equitably.

Councilman Newman said that the City residents are paying for a lot of things by ourselves that have a lot of regional benefit that we think should be shared more regionally, especially if we would agree to not operate the water system the way that more other cities who own their systems in the State of North Carolina do.

Councilman Mumpower said a big inequity is that the City should be fairly compensated for what whatever percentage of the water system that we do own as do other cities like Hendersonville, Weaverville, etc. who own their systems. He noted that this system which has been in place for 80 years hasn't worked and could not understand why would we want to continue that and why would we not want to embrace the same model that every other city in North Carolina uses that owns their system.

Councilman Freeborn said that one of the biggest reasons why our rates are so much higher in this water system is because under the previous governance structure, problems were not fixed until the last minute when it costs the most to fix them. As a municipal run system, we will be proactive in fixing things ahead of schedule so we can ultimately save money in the long run. The present system does not work.

Vice-Mayor Jones did recognize the significance of the County's proposal for the system to be a municipal-run system, but also it was huge for the City to give up the rate differentials for

a tax equity payment. She hoped that the City and County can begin to talk about a mixture of payment and waiving of fees to get to a number for the tax equity payment that we think is fair. She was sure that the legislators want the City and the County to work this out and since this is the last week of session, she felt it was urgent that the City and County meet again this week.

Chairman Ramsey said that his entire board will need to discuss the provision that new developments within a half-mile can be annexed using the same criteria other North Carolina cities utilize. He would also like the list of the inequities that Asheville taxpayers pay that other municipal-taxpayers in our community don't pay. Personally, if the City wants the half-mile annexation and the $6.2 Million tax equity payment with a CPI, there would be no way he would support that. But, if the City can put some costs down that the City currently bears that are regional costs and the City feels like the County should assist in those, then he would be willing to sit down and discuss that. He personally would not support the one-half annexation provision as it is because the County had a threshold that it was larger developments and that is something we can discuss. Regarding the urgency to meet before the session ends, he felt sure that if a resolution or an interlocal agreement was reached, then when the General Assembly reconvenes next session, that they would make the necessary changes in state legislation.

There was a brief discussion surrounding the tax equity payment provision.

When Vice-Mayor Jones asked for the County to share with the City their documentation of property that the County owns, Chairman Ramsey responded said that the City gave to the County an itemized list of 18 miles of water lines and claimed that was all the County owned. The question is from a title standpoint and that is something the Courts will have to decide.

Councilwoman Cape said that when a builder builds a water line it is standard that they want the water system to take it over.

Councilman Newman asked if it would be helpful at our next meeting to talk about the question of ownership of the system, because the City feels it very clear that 95% of the water lines are not in question. County Attorney Connolly felt that information regarding ownership would be beneficial but asked that the information be provided to the County prior to the next meeting so the Commissioners will have an opportunity to review and respond. Vice-Mayor Jones felt the County should provide their documentation because it's not fair to have City staff do all the legwork. If the County feels strongly about this, then we need to compare notes. Chairman Ramsey felt we are getting into the heart of a legal issue and the attorneys for the City and County will handle this through a discovery process.

When Councilman Mumpower asked if there was agreement to determine the value of the system and who owns what part of the water system as a starting place for negotiations. And if there is an agreement, then ask staffs on both sides to bring their respective information to the table. Chairman Ramsey felt it would be helpful on the ownership aspect, because we will never agree on the value standpoint.

Chairman Ramsey asked that the City respond to the County's latest proposal in writing before the next joint meeting date, giving his entire board the opportunity to review and respond. Mayor Bellamy said that the City will hand deliver the written response to Chairman Ramsey's office, noting that this is the second proposal the City has put in writing to the County since the beginning of this year.

It was the consensus of all seated that the next meeting would be on July 31, 2006, at this same time and place if possible, unless the City and County Managers are able to arrange a meeting sooner.

Mayor Bellamy then adjourned the City Council meeting at 11:23 a.m.

Magdalen Bouleson
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday – July 18, 2006 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

CHAMBER ECONOMIC OUTLOOK

Mr. Tom Tveldt, Director of Asheville Metro Business Research Center, said that the Asheville metro is experiencing strong and stable economic growth. A balance of forces, centered around the area's quality of life amenities, will continue to support this durable pattern.

Through the first quarter of 2006, the Asheville metro has participated in 27 straight months of record-setting job levels. Over the year, 5,200 net new jobs have been added. With current total employment of 170,600 and a growth rate of 1.9 percent through the first quarter, Asheville has settled into a pace close to its historic average.

At 3.2 percent, Asheville's unemployment rate holds well below the state, the nation, and all but two of North Carolina's 13 other metro areas.

Balanced economic growth in the Asheville metro is being led by: specialized healthcare industry; record-setting tourism activity; emerging professional services sector; resilient housing market; baby-boom fueled population growth; and transforming manufacturing sector.

The Asheville metro has developed a unique and balanced economy. Four major activities characterize the core strengths of the area. Together, these drivers underpin Asheville's special economic position and foretell its direction. Predictably, the actions of each driver overlaps and supports other drivers in the local economy. History has also shown that a period of weakness for one driver can lead to the expansion of another. This was the recent experience of the health services industry's growth throughout the transition in manufacturing.

The well-established leisure and hospitality sector is experiencing record-setting growth. Within the initial phases of an entirely new national branding campaign, the industry is looking at spearheading over $15 million worth of media spending. Overnight accommodation sales are up 14 percent, and industry employment, up 3 percent, now stands at 21,700.

After several straight years of losses, the declines in local manufacturing employment have leveled out, with the first two months of 2006 showing gains. With 21,500 workers, the industry continues to be transformed into a high-skilled advanced sector, as exemplified by the major wage gains made over the last few years. In the Asheville metro economy, manufacturing alone contributes $898 million annually in wages.

Health services has grown into one of the area's major job creators. At over 26,000 workers, health services is now the largest industry sector in the Asheville metro. Strong gains in well-paying health services had softened earlier losses in the traditional manufacturing sector. Stable growth continues at an annual rate of 4-5 percent, as it has done for most of the last 15 years.

Local health services will continue strong because (1) concentration of specialized care facilities and technologies; (2) growing baby-boomer market; (3) nationwide trend of growing utilization and per capita spending; and (4) expanding geographic market.

Population growth remains a consistent and stable contributor to the local economy. At no time within the last 35 years has population declined. Estimates indicate moderate growth patterns will continue between 1.5-2.0 percent per year.

The Asheville metro is distinct in that more than 90 percent of local population growth is from in-migration, the remaining from births over deaths. Other North Carolina communities supply about 40 percent of the in-migrants. Florida tops the states with the highest number of in-migrants, accounting for about 12 percent of the total.

Mild population increases, stable job growth, and comparatively affordable prices have kept the residential housing strong. Unlike other communities, the Asheville market has avoided dramatic price appreciation and the threat of falling prices. Currently, home sales are up 10.3 percent for the year, with the average price up 7.8 percent.

In summary, the economic strengths of the Asheville metro assure that it continues along its path of stable economic growth. A balance of economic drivers, centered around the area's quality of life amenities and major demographic trends, will support this durable pattern. Over the last year, 5,200 net new jobs have been added. Health services and the leisure and hospitality industries continue as the major job creators, with an emerging professional/business services sector playing an increasingly important role. Local manufacturing continues its major transformation to high-skilled production, marking the way with sizeable wage gains.

Stable population growth, owing to in-migration and fueled by the retiring baby-boom generation, will continue to fuel growing home sales and guide residential building activity.

Mr. Tveidt responded to various questions from Council, some being, but are not limited to; is there any information that looks at how the small businesses have grown around the manufacturing sector; what sector will new jobs occur and will those jobs be from new employers or current employers who are able to expand; how will the HUB Project play into the future of brining in more jobs and will we see more diversity in service providers; how can we get areas that have a high unemployment rate connected with the new jobs; do we have any data about how Asheville compares to other parts of the state in terms of living wages; are there any economic development public policies where we can address wages; are we continuing to track the number of people coming to our area because of broadbanding, the Media Arts Project, etc.; are we making an aggressive attempt to reach the media arts group; and what is the average wage range per year in the private industry.

On behalf of City Council, Mayor Bellamy thanked Mr. Tvedit for his concise and informative presentation and looked forward to hearing more in the future.

EMERGENCY PLANNING

Public Health

Fire Chief Greg Grayson shared information on the emergency management principles and the good cooperation between the City, County state and federal agencies.

He said the system component representatives include City government efforts; County government efforts; NC Emergency Management efforts; Federal Emergency Management

efforts; and non-profit agencies as partners, such as American Red Cross, United Way 211, and a host of others.

The NC's system is an all-hazards approach to emergency assistance: severe weather (hurricane, snow, tornado, flood, drought); technological (hazardous materials/radiological, fixed nuclear facilities); man-made (weapons of mass destruction, cyber-terrorism); and lost person search/rescue.

The emergency management tradition phases include preparedness (training and equipment), response, recovery and mitigation.

The following is the NC Emergency Management system when disaster strikes in Asheville: (1) Disaster; (2) City of Asheville emergency services responds; (3) If disaster exceeds the City's capability, Buncombe County Emergency Medical assistance is requested; (4) If disaster exceeds Buncombe County capability, State Emergency Management activities; (5) If severity and magnitude of disaster exceeds state and local capacities, Governor requests federal assistance; and (6) if approved, State receives assistance from DHS/FEMA and other federal agencies.

The City of Asheville's primary emergency services are (1) Fire and Rescue; (2) Police; (3) Public Works (fleet and streets); (4) Water; and (5) support departments such as Finance, Information Technology, Engineering, Public Information, and Building Safety.

Key emergency rules for Asheville include (1) the City Manager keeps all elected officials apprised of emergency situations and obtains policy direction from elected officials when necessary; (2) Fire and Rescue has the key coordinating role to ensure that unified command and control is in place and operates in concert with Buncombe County and NC Emergency Management efforts; and (3) all other operating departments perform specific services as needed for emergency.

The Buncombe County's primary emergency services include Emergency Medical Services, Emergency Management, Sheriff's Department, Health, and support departments.

The transition from County to State emergency management is (1) all 100 counties have an Emergency Management Director whose position is partially funded by state government; (2) the state has three geographical districts that the County directors connect with. The WNC branch headquarters is located in Conover; and (3) NC operates an Emergency Operations Center in Raleigh 7/24/365 and upgrades when needed for all significant emergencies.

Dr. Martha Salyers, Team Leader for the Public Health Regional Surveillance Team, provided Council with statistics on the pandemic influenza. She explained that outbreak means occurrence of disease above the expected; epidemic is essentially the equivalent to outbreak; pandemic is a very large outbreak that encompasses many regions and affects a large portion of the population; and influenza is a viral disease caused by the influenza virus, from the Italian "influence."

Dr. Salyers explained the influenza virus stating that mutations can range from minor (seasonal flu) to major genetic recombination (pandemic influenza). She then explained how new flu strains are created.

One of the three kinds of influence that is in the news is the seasonal influenza - (1) November through April; (2) usual peak January-February; (3) yearly vaccine, (d) 200,000 hospitalizations and 36,000 deaths per year in the U.S., mainly very young and elderly; and (4) partial immunity exists from year to year.

Another kind of the influenza that is in the news is the pandemic influenza – (1) caused by new flu virus that becomes transmitted easily between humans; (2) 10 worldwide pandemics in 300 years; 3 in the U.S. in 20th century; (3) little or no immunity exists; and (4) no existing vaccine. No one knows when the next pandemic will come. It is estimated at every 15-40 years and we are overdue. In facing a pandemic, what can we do … (1) prevent it - (a) vaccine availability – probably 3-6 month after pandemic begins; (b) antiviral medication prophylaxis; (c) personal protection (masks, hand-washing, cough etiquette); and (d) "social distancing;" (2) treat it – antiviral medications (supply issues; and may not be effective for pandemic influenza strain); and (c) contain it – quarantine and isolation – limited effectiveness.

The third kind of influenza that is in the news is the Avian influenza, aka "Bird Flu." This is a type of flu that infects wild and domestic birds. This is currently spreading in southeast Asia and eastern Europe. It can be transmitted to humans or other mammals. The World Health Organization has documented 230 human cases as of July 14, 2006, resulting in 132 deaths and a case fatality rate of 57%. Human-to-human transmission has been very rate to date. The Bird Flu is bad for birds because North Carolina is the 3rd largest poultry producer in the U.S. It's bad for people because of the known transmission from birds to humans and the high case fatality rate. If it mutates and develops efficient human-to-human transmission, it could cause the next pandemic.

We are preparing for this. On the federal level, we have a Federal Pandemic Flu Plan: 2005-06. It includes: (1) purchase of H5N1 vaccine for 20 million persons; (2) increase U.S. ability to produce vaccine; (3) stockpile antiviral medications; (4) promote state and local preparedness; and (5) provide aid for international preparedness. On a state level, we have the NC Pandemic Flu Plan, which includes an October 2004 (updated in 2006) part of state Emergency Operations Plan to include: command and control; surveillance; vaccine preparedness; antiviral preparedness; mass case; healthcare facility preparedness; and communication.

There are several issues in local preparedness, which are (1) supplies of personal protective equipment, vaccine, medications (coordinate with state, federal, business, medical, and other response communities; (2) priorities for protection and treatment; (3) surge capacity; (4) continuity of operations (critical services, single points of failure, and plan for 40% staff absence; (5) command and control (partnerships and unified command); (6) communication (between responders and with our citizens; and (7) mobilizing the community.

Dr. Salyers responded to various questions/comments from Council, some being, but are not limited to: who should people contact for additional information; what is the solution to surge capacity response; how long do we have in the U.S. if there is an outbreak in Asia; is there a possibility that the 20 million doses of vaccinations will be ready, if necessary; what are some efforts that City Council can do to prepare for an outbreak; who is the most susceptible to the different flu types; and where can domestic bird owners find additional information to be better partners in mitigating that connection.

Dr. Salyers said that good planning and exercising is underway to address any outbreak in the U.S., and even though we are not ready yet, the City, County, state and federal governments are working hard to get there.

On behalf of City Council, Mayor Bellamy thanked Dr. Salyers on her informative presentation.

PUBLIC ARTIST OF THE YEAR/ASHEVILLE FILM ARTIST OF THE YEAR

Councilman Mumpower presented information regarding a Public Artist of the Year and Film Artist of the Year. He said that (1) we know Asheville is a premier arts destination; (2) we know that the Arts have a significant impact on our economy; (3) We know that it is Council policy to support the arts in Asheville; and (4) we know that money is tight and that the private sector carries the Arts in Asheville.

He said that the arts are an economic engine – one of many that pulls an important train – Asheville. The arts, at least many of them, have a constructive impact on our quality of life. The arts, in one form or the other, touch every living person in Asheville – through everything from Country Music to Mozart, ballet to swing, finger painting to the grand masters, majestic art deco buildings to majestic mountain touched by the hand of God – art surrounds us…

What we do to help… (1) The city provides roads, streets, and sidewalks to help people access the arts; (2) We work hard to help Asheville remain a safe place for people to enjoy the arts; (3) We fund the Civic Center – a major venue for the arts in our community; (4) We provide limited funding to nudge the arts forward in our community; and (5) We keep it on the radar screen.

Some of us have philosophical disagreements with using forced tax payer monies to directly fund the arts. Yet we also realize that the arts need help – the City of Asheville can have a major impact on the arts through our policies. There are other ways we can help that involve limited dollars.

Let's use our clout…and appoint an official "City of Asheville Public Artist of the Year" ad a "City of Asheville Film Artist of the Year." And once we've got it down, look toward other artistic groups we might support in similar fashion. It's a good place to start.

Regarding the Public Artist of the Year, (1) Use this honor to also garner public art for the community; (2) Open the competition to artists in Asheville and maybe add a few counties for spice; (3) Provide a $10,000 honorarium to the creator of winning piece – which is in turn donated to the City of Asheville for the purposes of exhibition as public art; and (4) Create a special annual event during through which we raise funds for the arts and bestow this honor.

Regarding the Film Artist of the Year, (1) Provide a $1,000 honorarium for the Film Artist of the Year; (2) Competition is open to Asheville residents; (3) Announce the winner at our annual Film Festival; and (4) Open the competition to all level of artistic involvement in film – acting, production, direction, screenplay, etc.

Where might we go from here… deliberate the merit of these requests; officially endorse the efforts if the majority wishes; refer the concepts to the respective Boards with some guidance and parameters for developing an implementation plan; and fund the $11,000 per year, but only with the understanding that this program will result in our obtaining a public art piece for our community each year.

He does understand that money matters, but what really matters is the recognition and honor; through this program we can begin building our public art in meaningful, but economic fashion – it's past due; and we have an opportunity to use the national reputation of Asheville to propel local artists forward toward their own fuller potentials.

He presented this thought to the Public Art Board three years ago and it has been deliberated. He believes they need some policy guidance and parameters that can help them help us.

He suggested Council create some kind of fund that people can contribute to in order to raise these monies. If Council supports this, he offered to assume the responsibility in the first year to raise the $11,000, with the understanding that the Public Art Board from that point forward is charged with trying to raise these monies and that the City "fill in the blanks" as necessary.

Councilwoman Cape supported the arts, however, she was concerned about the City getting involved in this when we have arts organizations in our community. She noted that our Public Art Board has been deliberating this idea for three years. We have an existing Arts Council that is doing incredible things in our community and had we funded them with $11,000, she felt that they could have then leveraged that amount, because of their existing fund-raising capabilities, into a larger amount of money. She felt we could make better use of our money in working with the Arts Council supporting them in their abilities to do this type of event. While she is very supportive of the idea of a local competition for public art, she questioned the need to compete with an existing structure that is trying to do those kinds of things now. She asked if Councilman Mumpower would be willing to consider working within the existing Arts Council structure.

Councilman Mumpower said that the City is already in the public art business with the Public Art Board and they have a mandate to bring public art to the community.

In response to Councilwoman Cape, Councilman Mumpower said that the Public Art Board only needs some policy guidance and some parameters to work with. He if confident that the Public Art Board can accomplish this if the City mandates it.

Councilman Freeborn felt this was a good way to get more public art to the community at a low cost. His only concern would be the unfunded aspect of this program. He would support this concept and ask that the Public Art Board look into this further.

Councilman Mumpower felt that if the Arts Council could have done this, they might have done it by now. He thinks it's very difficult for the arts community to focus, commit and execute something of this nature. He thinks there needs to be strong, central leadership and not to involve them would be unwise. However, he thinks we need to take a strong leadership role in this and focus ourselves and make it happen.

Councilman Davis spoke in support of this action and felt this type of incentive award to encourage film production is a great move forward. He offered to help Councilman Mumpower in the fund-raising.

. When Vice-Mayor felt we needed the input from the Public Art Board, Councilman Mumpower said that the Public Art Board does has a Master Plan to guide them and this falls into their responsibility of creating public works of art for the City of Asheville. The Board has endorsed the idea but has not endorsed the parameters, i.e., only Asheville residents or region; whether or not to ask winner to contribute the public art, etc. Over the past three years, they have been trying to actualize this and we need to provide the guidance.

Councilman Newman said that based on this information he has, he thinks the most ambiguous part is the funding. He felt we need clear expectations on what the public will do and what the expectation is from the private sector, opposed to do as much as you can and the City will make up the rest.

Mayor Bellamy's preference would be that the competition be open only to City of Asheville residents. She felt the amount for the film artist should be a little more than $1,000. She did support the concept, but felt the Board should not have to raise the money because the Public Art Board already has a fund to buy art. Our Superintendent of Cultural Arts David Mitchell

will work closely with this endeavor along with the Public Art Board. She noted that there is dialogue in the community with Mr. Mitchell to do something similar to this so she is glad it is coming forward now.

Councilman Mumpower thanked Mayor Bellamy for her support, but said he would like to try to raise that money.

In response to Councilwoman Cape, Parks & Recreation Director Irby Brinson explained the $50,000 one-time appropriation by Council for the Public Art Board to purchase art. He would provide Council with the language of the ordinance regarding matching funds.

Mr. Bill Fishburne, member of the Public Art Board, responded to questions from Vice-Mayor Jones and explained that the Board does support Councilman Mumpower's concept. He said the Board would love to work on this if they can just get a handle on what the program will look like.

Councilman Mumpower liked the idea of supporting Asheville arts as well, but we have a regional responsibility. Even though he would not encourage Council to go beyond 16-18 counties, we should expand our pool and increase our potential for getting meaningful art from people from this region. He felt that $10,000 provides enough compensation to provide some motivation for people to contribute their art.

Councilman Newman felt we should first take care of what we have and if there is any public support beyond that, then we could explore these creative ideas like this. He asked for feedback from the Public Art Board and others about what do we need to be doing to take care of what we have before we do anything else.

In response to Vice-Mayor Jones, Mayor Bellamy said that Mr. Mitchell has already identified the next spot for public art, which will be Carrier Park.

Councilman Mumpower said that with Council's consensus, he would be happy to lay out a beginning parameter list (coming from Council's discussion and working with Mr. Mitchell), have it reviewed by City Council, and then send it to the Public Art Board. One of those parameters would certainly be some level of collaboration and input from the arts community in general.

Vice-Mayor Jones felt it would be fair and helpful that Mr. Mitchell and some members of the Public Art Board be involved in developing the parameter list. If that occurs, then she would endorse the concept.

Mayor Bellamy's endorsement of the concept will not be limited to the Public Art Board's endorsement. She is willing to move forward in order to make this happen, without any input from Council on the parameters.

Councilman Newman asked staff for information on how much money do we need to be investing annually, whether from private or public sources, to maintain the public art that we have.

Councilman Mumpower is asking that if the City does want a Public Artist Program to come out of a Public Art Board, in collaboration with others, some parameters need to be given, i.e., we are willing to fund a portion to be determined (we would like a fund-raising component); and would we like to include or not include counties outside of Asheville, etc. The parameters would be broad things, not whether we want sculpture one year, etc. He'd like to come back to Council with some of those broad parameters, coming out of this discussion, and then if there is a majority view, then take it forward to the Public Art Board and let them flesh out the specifics. It was the consensus of Council to ask Councilman Mumpower proceed in this direction.

At 4:50 p.m., Mayor Bellamy announced a 10-minute recess.

ILLEGAL IMMIGRATION

Councilman Mumpower said that this is a presentation to the Asheville City Council on our responsibilities and potential local interventions in addressing illegal immigration.

A quick review of the issues are (1) Illegal immigration is a national, state and local issue; (2) The response by national and state elected officials has been slow and largely ineffective; (3) We have a responsibility to address, at the city level, our abilities to intervene locally; and (4) we need to begin a dialog of possibilities.

He outlined the realities of illegal immigration: (1) There are 300,000 plus illegal immigrants in NC; (2) Access, under current law, to social services and medical care is complete and funded by citizen tax payers; (3) We are required to educate the children of illegal aliens – there has been a 600% increase in numbers over the past 10 years at a cost of $8,500 per year per child; and (4) The majority of illegal immigrants are uneducated, unskilled, and do not speak English – their capacity for assimilation is dramatically impaired as a result.

Some myths surrounding illegal immigration include *We cannot survive without illegal immigrants* – 75% of our menial jobs (including agriculture) are completed by legal citizens; *Illegal immigrants have powerful economic impact* – yes, but when you factor in the costs for education, medical care, social services & entitlements – that impact is largely reversed; *We are a country of immigrants* – yes, all countries are, but the operative word is "illegal" – forcing your way through our borders represents a poor foundation for assimilation into a new country; and *American businesses have to have illegal immigration help to survive* – businesses and consumers may enjoy the savings of cheap labor and the opportunity to side-step a free market economy through hiring illegals, but that is more about selfish interests than necessity. Employers who hire illegal aliens transfer the hidden costs to tax payers.

Why Does It Matter? We are a nation upheld by a system of laws. We do not authentically support the citizens of Mexico neglected by the indifferences of their government through the patterned indulgences of our government. America lives on a thin veneer of sustainable civilization that must be nurtured and cared for much like the soil of the land – that is so quickly eroded when neglected.

So What Should We Do? (1) Fund/support the transportation of illegal immigrants who are arrested for violating city ordinances to the INS in Atlanta, starting with drug traffickers. There maybe funding available we can tap into; (2) Explore options for city enforcement of immigration laws (Charlotte model), business permit restrictions for those who employee illegal aliens, and/or other local opportunities; and (3) Complete a resolution to submit to our local legislative delegation and congressional representatives supporting prompt and meaningful intervention policies with illegal immigrants and those who employ them.

He said that a brief personal take is that (1) It is the jobs that are the attraction – employers who side step our laws hold the key to containing and reversing the flow of illegal immigrants; (2) It is irresponsible of us to remain passive while our laws, social order, and economy are being harmed by something we can help influence; and (3) The operative word is "illegal" – we should not be comfortable in our willingness to selectively and timidly apply our laws.

He asked to begin the dialog on possibilities.

Vice-Mayor Jones asked what we do currently if someone is arrested and the police find they are illegal. Capt. Tim Splain responded that generally we base all our actions on what the actual crime is. If the person has committed a felony, we charge them and prosecute them through the court system and contact the Immigration & Naturalization Service ("INS") so that at the end of their sentence they can then be deported. If they are a past-deported felon or someone who is in this country illegally and has a warrant out of them, then we contact INS and they come and pick them up from the Buncombe County Jail. These are exceptions for us. He could only recall a few instances in the recent past that we have had to do that, but by and large, most of the crimes we encounter are minor driving offenses.

In response to Councilwoman Cape, Capt. Splain said that if the crime is a minor traffic offense, we charge them by citation or take them to jail and have them charged and then the court process takes it's course. We do not contact INS.

Upon inquiry of Vice-Mayor Jones, Capt. Splain said that we have had a few instances where we have come across a van or a bus that had 10-15 people in them that are undocumented and we can't prove one way or another. In those instances we have not gotten the cooperation of the INS to pick them up. Basically, their base-line rule is it has to be at least 24-25 individuals, all in one location, before they will come and take them to Atlanta for deportation.

In response to Vice-Mayor Jones, Capt. Splain said that if the person is a hard-core criminal, INS will pick the individual up, especially if we have charged them with a state felony or federal crime. Otherwise they will only come if there is a big group.

Vice-Mayor Jones asked what happens if the person is arrested and convicted for drug trafficking. Capt. Splain said that it has been his experience that we have them go through our judicial system first and then they are deported, except in instances where this person is a past-deported felon and then they don't even take them into the court system. INS just comes and picks them up and immediately deports them. He did explain that our experience is fairly limited so far. We don't experience this on a daily basis.

Capt. Splain said the two issues recognized so far involving illegal immigrants is driving offenses and drug trafficking.

Councilman Davis said that the City Attorney's Office has research local law enforcement enforcing immigration.

In response to Councilman Davis, Capt. Splain said that he would have to research how many times within a year that we should have had people picked up by the INS, but didn't the group numbers necessary.

Councilman Newman was concerned that if someone is convicted of a serious crime or is a past convicted felon is deported, it seems like the absence of lack of security that our country has on our boarders isn't a very effective strategy.

Councilman Mumpower said that he sees this as a filtering opportunity to create at least some accountability, where none exists now, for people who come into this community illegally who will at least pause because they know there is some accountability.

In response to Councilman Mumpower, Capt. Splain said that the INS has picked up one individual from Asheville in the past year.

Responding to Councilman Newman, Capt. Splain that that we had approximately 20-25 illegal immigrants in our custody in the course of a year that we would have liked the INS, but they did not meet the qualifications for pick-up. In addition, there have been about twice that many for suspect cases.

In response to Councilwoman Cape, Capt. Splain said that if would have a positive impact if Asheville had the ability to transport people to the INS.

Councilwoman Cape felt she needed more information about the Charlotte model, the business permit restrictions, the other local opportunities, and information on what the INS' holding practices and mandates are. And if we were to consider any type a resolution to our local delegation, she would support that we simultaneously call for a methodology by which people can immigrate here legally and become contributing members of our society.

Mayor Bellamy asked if an illegal immigrant is arrested for drugs, can they post bail, get back out on the streets, over and over again. Capt. Splain said that yes, subject to the thresholds about past deportation, etc.

Councilman Mumpower said that his goal is to do what is going to be most effective in leading illegal immigrants who come into our community to pause and recognize that they are at risk for accountability and that includes any law, including employment and traffic offenses.

In response to Mayor Bellamy, Assistant City Attorney Curt Euler said that because illegal immigration is a federal statute, our police officers have limited jurisdiction in what they can and can't do in terms of detaining someone solely on an immigration matter. We would have to work with the federal government in getting Asheville officers the legal authority to detain persons.

Councilman Mumpower felt we should not just pick on illegal immigrants, but go after the people who employ these folks, and ask our leaders at the state and national level to do things to move forward. He asked that Council put this issue in the hands of our Legal Department and let them provide us with some guidance on possibilities.

Councilman Davis wondered if this is another layer we are using with our valuable resources. Regarding the employment issue, as a small businessman, he has employed an illegal immigrant, unknown to him, however; he was good employee but left when a threat that the INS was coming into the community. He said that typically illegals will have papers that will suit most employers, so he was concerned if we are stepping too far with the employment issue. Small businesses don't have the ability to go into the depth on possible employees and since there is not a national policy on this, how do we deal with this. He felt we needed to do some in-depth research on this issue because we will be placing a greater burden on businesses than at the national level.

Councilman Mumpower responded that we should take the measured steps that we are capable of in a responsible fashion and start asking our permitted businesses, if we can, to start paying the best attention they can. We have a lot of people that are actively looking for illegal immigrants to hire and he wants Asheville to do what we can do within the limits of our abilities.

Councilman Freeborn felt that from a public safety standpoint we need to give the tools to our officers to get illegal criminals out of our community. But again, some illegal immigrants who come to our community are honest, hard-working people, who just don't have proper documentation, and he doesn't have a problem with that necessarily. However, he does have a problem with employers who knowingly hire illegal immigrants because they know they can exploit them. The workers are being exploited and the employer is benefiting. He wondered whether or not we have the authority, or the resources, to tackle this issue at this point. He

would, however, support an effort towards helping our law enforcement officers get the resources they need in removing drug traffickers from our community.

Vice-Mayor Jones said this issue is very complex and there is not one answer. Regarding social services costs, they are mandated not to give their many services to illegal immigrants. Mental health reform is a big issue, which we should be talking about in our community. She asked to let our criminal justice experts, i.e., Police Chief, ask for what they need and then we can make an informed decision. This is a huge national, political issue and felt this was a good discussion for us to have as a community. If the Police Chief says this has risen to the level that we need to do some serious investigation, she will listen intently. The other end of the spectrum is that personally, she adopted her daughter 3.5 years ago and still she does not have her citizenship, after repeated attempts to obtain it. There are people who are trying to go through the proper channels but the system is a mess. She said we do have some good preventive issues taking place, i.e. there is a community effort lead by the District Attorney's Office to begin to infiltrate the Latino gangs forming targeting our young people. Again, she needed the Police Chief to advise Council that this is a big issue in terms of public safety and regarding the business permit restrictions, she felt we were out of our league as well. In terms of the resolution, it would have to be very comprehensive addressing both aspects - those people trying to become legal but are not able to because of the bureaucratic nightmare.

Mayor Bellamy said that she would support the transportation of illegal immigrants who are arrested for violating city ordinances to the INS in Atlanta starting with drug traffickers, because of the amount of resources that our police officers are putting on the street, i.e. community policing. Regarding the business permit restrictions, she was concerned about the enforcement mechanism. That would be very difficult for us to enforce. She would also be supportive of the resolution to our local legislative delegation and congressional representations as well.

Upon inquiry of Mayor Bellamy regarding the resolution, City Attorney Oast said that he would research this issue and provide Council with information about what we can do at a local level.

Councilman Newman is supportive of the Mayor's direction as well. Regarding the business permit restrictions, enforcement of this would not be a top law enforcement priority due to our resources.

Councilman Mumpower questioned if we have legal authority or not to transport illegal immigrants to the INS or not. He said there is a movement lead by Congressman Taylor to create a pilot program in Western North Carolina through the INS that they reimburse you for transport, etc. He would also like to suggest that we not take a line officer off the line and ask him to make the trip to Atlanta because there are lots of creative ways we can do this, i.e., off-duty officers, County officers, etc. Our policy guidance to the Police Chief should be what will help you, how can the City do it, what are the possibilities, and what are some creative opportunities for us to try to address this issue.

Councilman Davis asked if we have been talking with the Sheriff's Department to see if there is an opportunity for inter-departmental work. City Attorney Oast said that we have already been in touch with the Sheriff's Department and have begun exploring those issues, but are waiting on further direction from Council.

Vice-Mayor Jones said that as long as the system is broken about illegal immigrants being arrested, convicted and not going to jail, then she could support the transportation of individuals buying and selling hard core substances. The rest of the Councilman Mumpower's

request is beyond us and she will not be supportive at this time. In terms of the limited resources, we must be sensitive about what we ask our attorney's to research.

Mayor Bellamy felt that if we begin with an issue we are all against - drug trafficking – we can benchmark our success or failure over a year's time tracking the number of people taken off our streets and the impact it has had on our drug trafficking trade in our community. After that time, then we can begin to track the other crimes.

Vice-Mayor Jones said that she is not willing to go further than drug traffickers and if this is a pilot program for something broader, she is not supportive of it. Because drug-trafficking crime makes sense based on what we are seeing.

Councilwoman Cape said that when we look at violent crimes, she would like to have the option of getting people off the street.

Councilman Davis felt we should ask our City Attorney's Office to research what we can do, obtain the transportation cost, and see about the opportunity to work with the Sheriff's Department.

Councilman Mumpower felt there was clear direction by Council to (1) have our staff explore resolution potentials; (2) have our staff look into the transportation issue, i.e., partnership, etc.; and (3) have our staff look into our potential at the local level to address employers who intentionally violate our laws.

Mayor Bellamy said that there was not direction from Council to have our staff look into our potential at the local level to address employers who intentionally violate our laws.

Councilman Newman also raised a process question regarding the resolution because it was his understanding that City Council would consider issues regarding state or federal issues at one time. He didn't feel that Asheville is uniquely affected differently than every other community in North Carolina.

Mayor Bellamy noted that she did not get consensus from Council to have our staff explore resolution potentials either.

Councilwoman Cape said she would like more information on what is meant by business permit restrictions.

Councilman Freeborn is supportive of what is being requested, but not supportive, at this time, of spending staff resources on the business permit restrictions part of the issue. He suggested Councilman Mumpower, with a group of citizens, do some research and bring it back before Council with more information. He feels there is very little we can do as a City to go after employers, in light of all of the other things the City has to deal with, he is not willing to tackle that part of the issue at this time.

Councilman Mumpower said that he would be happy to undertake that research responsibility and asked to be placed on the next worksession agenda. Mayor Bellamy responded that she before she could commit to the next worksession agenda she would have to look at that agenda and let him know as soon as possible.

Mayor Bellamy asked that if Councilman Mumpower is going to get additional information, she would like to see more of a commitment from the District Attorney's Office regarding penalties for individuals who are arrested, so that we can ensure that we are not wasting anybody's time. Councilman Mumpower said that he will gather that information and be

very specific with clear recommendations. Mayor Bellamy also stated that the minutes of this meeting be included with the information when it comes back to Council.

SUSTAINABLE COMMUNITY ENVIRONMENTAL ADVISORY COMMITTEE & GREEN BUILDING INCENTIVES

Councilwoman Cape said that within the City of Asheville we have created a structure of boards and commissions as a means of being more inclusive of our citizens in the governance of this City. This structure has proven to serve an important role for the community, expanding the depth of discussion and acting as an agent to extend the resources and vision of local government.

She recommends the establishment of a citizen's advisory committee on energy and the environment because it is vital that our City, advance the principles of sustainability to enhance our quality of life. Sustainability means thinking about our behavior in the larger context and understanding that the choices we make now will have a profound effect on the future of our community.

Cities are the forefront of response and impact for the effects of economic, social and environmental stresses. Throughout this county, cities are leading their communities in discussions, exploration and actions to remedy and address these concerns. It is the role of community leaders to convene the discussions that can lead our City forward with a vision to the future, to seek to understand what the world is going to look like in 2050 and to determine how we can govern with that future in mind.

We are blessed with many residents within our City who have much to offer this endeavor in terms of their knowledge, interest and background in sustainability issues. With their help we can extend the opportunities for Council to think, plan and act in a manner that will allow us to more expediently address issues that affect the quality of life in our community, now and in the future.

The City of Asheville had had a tradition of undertaking initiatives to improve the environment, encourage green development, and support development of a healthy community. Additionally, we acknowledge that there are regional partners working toward these same goals. She recommended City Council establish a citizens' advisory committee on energy and the environment to address these issues at a City level and participate in the larger community and regional discussions of these same issues.

The committee would meet a minimum of once a month. This committee should consist of a diverse group of stakeholders including technical experts and interested citizens.

Councilman Newman said that he has been working with Councilwoman Cape on establishing this committee as well as opportunities for the City to be a leader on green building initiatives and creating incentives for green building and sustainability in the private sector. In anticipation of establishing this committee, he offered five ideas to either (1) charge this new committee; (2) give direction to City staff; and/or (2) City Council take the lead on working on them ourselves. Those issues regarding green building, environmental and energy sustainability in Asheville are: (1) should the City adopt a policy that all new municipal buildings over 5,000 square feet are certified under the LEED certification process; (2) create additional economic incentives for green building in the private sector; (3) whether or not the Council simply establish a goal for ourselves as a City for reducing our use of energy and also reducing our fuels; (4) ask staff to research the potential of converting our transit fleet to hybrid electric vehicles; and (5) ask staff to research is a parking cash-out policy for City employees which would create further incentives for City employees to use car-pool, use transit or walk to work.

Councilwoman Cape explained that the ICLEA organization is working on local level actions for climate protection. In order to benchmark our progress, she encouraged the City to join ICLEA ($1,200 annually), which will allow us to amplify our voice on an international level and utilize the tools they give us regarding inventory assessments and benchmarks to move us forward in achieving the goals we set for ourselves.

Councilman Mumpower would be supportive of the committee if it was set up as an advisory committee and structure them with narrow parameters at the beginning. He felt it would be appropriate to refer this to one of our Council standing committees and charge them with providing some parameters and guidance for that new committee. He liked the concept of green building and could support it as long as we do that in a measured fashion and look for incentives. In terms of the parking initiative, as long as Council is willing to pay for their parking spaces as a model for City employees, then he would consider it, however, he doesn't think it is a good idea. Regarding Councilman Newman's other ideas, if we aid toward points of realism and reality on where we spend our limited tax dollars, those are worth exploring.

Councilman Freeborn was supportive of joining the ICLEA organization and also supporting researching the cash-out policy for City employee parking since we do provide them with free access to the transit system. He would support the green building incentives and felt staff can find some good benchmarking programs. He would also support the establishment of the advisory committee on the environment and energy. He noted we are working towards getting a Clean Cities designation and if the City is able to bring their diesel fleet on board with a flex fuel, such a bio-diesel, 100 extra vehicles would help our regionalized area meet that Clean cities designation. That would help trigger funding mechanisms that would help aid in that switch. He would also be interested in looking at where we have an abundance of street lamps in neighborhoods, since that was a significant increase in the budget.

Vice-Mayor Jones was supportive of Councilman Newman and Councilwoman Cape's economy savvy alternatives. One caveat around the parking cash-out policy is that she heard it more as a bonus, opposed to having to pay for parking. Some employees work 9-5, however, for others it may be a hardship in terms of their physical abilities or they may live outside in the County.

Councilwoman Cape said that the cash-out policy is the kind of an issue that she would like the committee to flesh out and let them bring it back to us with the varying degrees.

Councilman Davis supported the creation of the committee as well, with narrow parameters. He would like to see the implementation explained better and perhaps that could be the committee's first task. As far a green building incentives, he has some hesitancies because some costs would be prohibitive. He realizes technology will get better through the years and hoped we will strive for that. He hoped we will continue working with the County in inventorying energy. He would like more information from City staff on the pros and cons of hybrid buses since hybrid is a good interim technology. In addition he would need additional information on the parking cash-out policy, and could only support it if it is a bonus for City employees.

Councilman Newman said that since it looks like Council is willing to establish the committee, he and Councilwoman Cape will go over the feedback from Council and work with City staff. They will bring it back to Council with a specific proposal for recommendations asking for (1) Council approval, (2) refer it to the committee, or (3) do more analysis on it.

Mayor Bellamy suggested that pros and cons be included when this matter is brought back to Council. Regarding the committee, we need to narrow the focus of the policy area going to the committee and make sure that any policy changes go through the same review process as other ordinances prior to coming back to Council, i.e., CAN, CIBO, etc. She is supportive of the

committee, however, she will not automatically approve the recommendations coming from the committee.

In response to Councilman Mumpower, Councilwoman Cape explained how City staff is involved in this and she envisions direct City staff involvement.

City Manager Jackson felt there would be a lot of City staff looking at these tactical issues. The City Manager's Office will provide support to this committee of the larger task of coming up with what is the environmental management plan for the community. The primary work is you form the committee and they will establish a master plan. He sees the committee using the investment in the goal setting tools of the ICLEA to begin its work by looking at what should be our long-range goals and how do we become an environmental setting and then you take the individual tactics and decide the priorities. Some may compete for your financial resources. You can look at models of those kinds of environmental management plans that come as a result of months of effort by these kinds of committees to set a visionary long-range plan for the community.

In response to Councilman Mumpower's concern about Councilwoman Cape using a "staff" presentation for her presentation, she assured him that the staff report arose from various meetings she attended with City staff. Councilman Mumpower asked that this item be placed on a future agenda to deal with that issue. Mayor Bellamy said that the issue of who is making who's presentation would be placed on an agenda if the topic rises to that point. Councilman Mumpower's concern was duly noted.

It was the consensus of Council to establish a citizens advisory committee on energy and the environment and that Councilman Newman and Councilwoman Cape review the information from Council and work with City staff to bring back to Council a specific proposal for recommendations asking for (1) Council approval, (2) refer it to the committee, or (3) do more analysis on it.

In addition, Mayor Bellamy asked that the normal process for appointment take place.

At 6:40 p.m., Mayor Bellamy announced a 10-minute recess.

RETIRED EMPLOYEES HEALTH CARE

Councilman Davis thanked Council for placing this item on Council's worksession agenda. He understands that our policy is to provide continued coverage at the employee rate for those retirees who haven't access to other group health plans. Those employees having access through an employed spouse's group coverage do not receive the benefit of continuation, in our program, at the employee price. He understands that the policy was put in place several years ago and asked for an update.

He then introduced Mr. John Ferguson, the City's third-party advisor, who briefed Council on the actions to date regarding retiree health insurance.

Mr. Ferguson explained in detail the three options Council has regarding this issue – (1) increase the coverage for all; (2) reduce the benefit (a) go back to the policy of the 1980's; or (b) cost-neutral; or (3) do nothing and leave the current situation as it is. With both options one and two, their may be legal implications and he would have to work with the City Attorney if Council so directed.

He reviewed with Council his analysis of the cost of offering subsidized benefits for retirees that are eligible for other health insurance. If the City provides this for just future retirees,

the cost would be approximately $18,680 in the first year, growing approximately $28,065 each subsequent year, so $53,114 in year 2 and $91,179 in year 3, etc. If it is offered to past and future retirees, the estimated maximum additional annual cost would be about $266,452 per year – even without considering cost increase trends of about 10% for retirees under the age of 65. He also confirmed that the number of employees offering retiree health coverage has decreased dramatically.

Mr. Ferguson responded to several questions/comments from Council, some being, but are not limited to: what happens with changes in relationships; how many retirees have elected to keep the City coverage at the higher rate; can you change your retirement option after you retire if circumstances change; can you cancel the insurance after you retire and then get back on it; what happens if the retired employee gets another job; is the insurance restricted to just the employee or is it extended to family members; and do retired employees have access to the Asheville Project.

Councilman Freeborn felt the City should look at the equity of our retirement package and felt this topic should be referred to the City's Revenue and Finance Committee for a recommendation.

Councilman Mumpower was more inclined to pass the equity question to City staff. He said that from a point of fairness and courage, the cost-neutral option has some potential.

Mayor Bellamy said that based on the last eight months regarding financial impacts, she could not support referring this to the City's Revenue and Finance Committee because of the nature of this, all of Council will want to have input. She would support, however, getting more information by City staff on the different options.

Personally, Mayor Bellamy would support keeping the retiree health insurance as it currently exists, especially since there may be legal consequences to make changes.

Councilman Mumpower supported asking staff to explore in detail the cost neutral solution and other potential solutions that they might identify for us, with the understanding that we do see an inequity and we would like to address it, if possible. He also asked staff to look deeply at the risk factors for cost-neutral and explore other possibilities.

Councilman Newman felt strongly to treat all our employees fairly and would support moving in the direction of cost neutral, unless there is a legal reason we cannot.

Councilwoman Cape would be interested in getting more information in moving towards cost- neutral and questioned what the possibilities would be for starting a policy change with the next new hires.

Councilman Freeborn felt that if this means changing the policy away from providing affordable access to health insurance for future employees, he won't support the change. If a change is make, he would support the more expensive route of giving everyone the option of the lowest cost, because if you work for an organization for 30-35 years you deserve something substantial for that.

Vice-Mayor Jones would support more information on the cost neutral analysis option.

Upon inquiry of Councilman Davis, Mayor Bellamy asked City staff to look at some our retention efforts, longevity pay

Mr. Ferguson said that he would work with City staff in providing Council with the following information (1) the legality for the second option; (2) cost options if we change this for future retirees; and (3) possibility of longevity pay.

CITY LAND REDEVELOPMENT AND FACILITIES PLANNING

Mayor Bellamy said that in looking where our City facilities are located throughout the City, she doesn't believe that we are making the highest and best use of that land. Our Purchasing Division is on Hunt Hill, overlooking Memorial Stadium and McCormick Field. It is an eyesore for the neighborhood. On our Charlotte Street corridor, we have some basic needs there and in the West End/Clingman Avenue neighborhood we have two other large facilities – the bus depot and the Parks & Recreation maintenance facility. Why don't we centralize where we put our facilities together and use our land for the best and highest use. She felt we needed to begin planning on how we want to grow our City facilities and needs with the amount of people anticipated to move to the Asheville area.

Planning & Development Director Scott Shuford said that this report is related to the City-owned property and redevelopment potential for Parkside and South Charlotte Street.

The goals for reuse or redevelopment include: Facilitate development of a Performing Arts Center; Provision of workforce housing; Significant tax base enhancement; and Smart Growth development pattern – infill, redevelopment and use of existing infrastructure.

With regard to the Parkside site redevelopment options, (1) Performing Arts Center Location; (2) Mixed use development – development mix may contain public and private parking, offices (including possibly some City offices), entertainment, retail, hotel, market residential and/or workforce housing; and (3) >$200M private investment.

Goals met on the Parkside site include: (1) Facilitate development of a Performing Arts Center; (2) Provision of workforce housing; (3) Significant tax base enhancement; and (4) Smart Growth development pattern – infill, redevelopment and use of existing infrastructure.

He then reviewed several sample projects for the Parkside site.

Development challenges/opportunities for the Parkside site include: (1) City doesn't own entire block or Hayes-Hopson building; (2) Context issues - Mt. Zion, EMS, Pack Square design guidelines; (3) Parking logistics are excellent; (4) Considerable developer interest; (5) Proximity to Pack Square Renaissance; and (6) Possible linkage with other Downtown properties.

The method of transfer would be a Request for Qualifications (RFQ)/Request for Proposals (RFP).

Regarding the Public Works area, redevelopment options would include: (1) Mixed-use development; (2) Greater utilization of South Charlotte Street; (3) Possible parking garage location; (4) Potential density > 50 units per acre; (5) Public space could be integrated into design >$200M development potential; and (6) Good location for access & near Downtown.

Goals met would include: provision of workforce housing; Significant tax base enhancement; and Smart Growth development pattern – infill, redevelopment and use of existing infrastructure.

He then reviewed several sample projects for the Public Works area for the east side of Charlotte Street and west side of Charlotte Street.

Development challenges/opportunities at this location would be (1) Need to relocate and replace facilities for City Water and Public Works; (2) Possible opportunity to consolidate all City maintenance facilities; (3) Attractive site - gateway area to Downtown; (4) Possible to phase the project; (5) Attractive site(s) for public-private partnership; and (6) Possible linkage with other Downtown properties.

The method of transfer would be a RFQ/RFP.

Alternatives would be to (1) Pursue RFQ/RFP for each site as a stand-alone project; (2) Package Parkside and Public Works sites for a combined RFQ/RFP; and (3) Package larger selection of City-owned properties for a combined RFQ/RFP.

In evaluating the alternatives for a stand-alone RFP/RFQ, the pros would be (1) simpler to assess; (2) shorter-term; and (3) less reliance on phasing or a master developer. The cons would be (1) no synergy with other properties; (2) may not accomplish goals without heavy City investment due to small scale and (3) less opportunity for creative ideas.

In evaluating the alternatives for two sites combined RFP/RFQ, the pros would be (1) synergy with other properties; (2) potential for less City investment per amount of private investment; (3) more opportunity for creative ideas; and (4) more opportunity for workforce housing and tax base enhancement. The cons would be (1) not as simple to assess; (2) longer-term; phasing; and (3) reliance on a master developer.

The alternative description for a package larger selection of City-owned properties for a combined RFQ/RFP; (1) Combine with Civic Center and near Civic Center properties (Economic Development office; Rankin Street parking deck; etc.); (2) Offer opportunities to expand development opportunities to other areas (Eagle-Market Street; transit maintenance facility; etc.).

The evaluation of alternatives for many sites combined RFP/RFQ, the pros are (1) synergy with other properties may get whole Civic Center redeveloped; (2) potential for less City investment per amount of private investment; (3) greatest opportunity for creative ideas; (4) greatest opportunity for workforce housing and tax base enhancement; and (4) greatest opportunity to consolidate City maintenance facilities. The cons could be (1) not as simple to assess; (2) longer-term; phasing; and (3) reliance on a master developer.

The recommendation would be a package larger selection of City-owned properties for a combined RFQ/RFP to (1) Combine with Civic Center and near Civic Center properties (Economic Development office; Rankin Street parking deck; etc.); and (2) Offer opportunities to expand development opportunities to other areas (Eagle-Market Street; transit maintenance facility; etc.).

Implementation issues would be (1) Staff expertise in evaluating responses; (2) Staff expertise in negotiating deal; (3) Scale of project; and (4) Facilities consolidation. Response would be to (1) Hire consultant from RFQ/RFP fees; (2) Selected firm(s) fund independent consultant to assist staff; (3) Discrete phasing allows for market absorption and infrastructure installation; and (4) Develop facilities consolidation plan.

Mayor Bellamy noted that the West End/Clingman Avenue Plan calls for the removal of the bus depot and the Parks & Recreation maintenance facility. Council hasn't talked about creating a Tax Increment Financing (TIF) district and she felt there are a lot of opportunities out there, but more importantly looking long-range.

Mr. Shuford responded to various questions/comments from Council, some being, but are not limited to: do we own land or will we have to purchase land to consolidate our City services;

will the cost of the land to be purchased more than the tax benefit of putting our land on the tax rolls; how old is the Public Works Facility; what is the anticipated cost of a new consolidated facility; are there any plans to use the West Asheville Armory site; has any thought been given to combining our services and development at the same location; Council would like to see the list of potential sites for combined City facilities when it is available; and how can we push the creative edge for what can be developed on our property.

Mr. Shuford said that this is an opportunity for us to take the Asheville name to get the best designer as possible. We would make our objectives known that (1) we would like to see park space as part of the South Charlotte Street redevelopment but certainly we are expecting a great deal of sensitivity to both the Eagle/Market Street commercial area and the Pack Square Renaissance Project; and (2) we are expecting there to be a substantial workforce housing component to the project. We will work with the consultant to tailor our RFQ to make sure that those issues are known and there will be opportunities for the responders to indicate to Council what their experience has been in addressing those issues so we will be able to accomplish many of those goals. He said that City Council will be highly involved in the RFP/RFQ process. He thinks we will be rewarded with ideas that exceed what we might even think about ourselves.

Councilwoman Cape said she would be a supporter of good, quality design, density and height in our downtown to make this the most functional environmentally supportive City we can.

Mayor Bellamy responded to Councilwoman's request to start preserving the 30 acres of greenspace behind Memorial Stadium.

Councilman Newman supported staff's recommendation to package a larger selection of City-owned properties for a combined RFQ/RFP. He was concerned that if we receive a big development interest, we don't want to shut out the smaller scale developers who may be interested in developing 1-5 acres. Mr. Shuford responded that Council has the option, in your criteria, to award some points for working with the local development and design community. Typically on something of this scale, there will be some major efforts to get the local players in the development game involved in a proposal for a variety of reasons – they know the area, they know a lot of the details about design and what works here, and also because there is a recognition they are local and they bring with it the perception of working fully with the community.

Mr. Shuford said that he will meet with the City Manager and see how we can move forward with Council direction.

STRATEGIC PLAN UPDATE

Assistant City Manager Jeff Richardson presented City Council with the short-term and long-term Strategic Plan updates based on Council's January 2006 retreat and subsequent budget worksessions during the Fiscal Year 2006-07 budget planning process.

The City Council adopted a Strategic Operating Plan approximately two years ago, in coordination with the adoption of the Fiscal Year 2004-05 budget. Since that time, staff has provided Council with quarterly operational updates on progress in each of the identified focus areas. At City Council's January 2006 planning retreat, Council discussed short-term and longer-term goals. Since that time, Council has discussed and modified these goals, in conjunction with any continuing interest identified in the 2004 Strategic Operating Plan. As result, he reviewed the final draft of the updated 2006 Strategic Operating Plan for council's review and direction.

Consideration:

- Multi-year Strategic Plans provide elected officials and staff the opportunity to do multi-year planning and prioritization of the city's longer term needs.

Once City Council reviews this document and provides any amendments necessary, staff recommends formal endorsement of this document.

Vice-Mayor Jones asked that the cleanliness of downtown be included. Mr. Richardson said that it is covered under "improve/enhance basic city services and customer services." He said it can be amended to focus on the downtown Central Business District, because we have enhanced garbage pick-up and are continuing to look at ways to spruce up the downtown area.

Councilman Davis did say there is a strong desire to more forward quickly with better core services in the Central Business District.

Councilwoman Cape suggested adding under economic development's short-term goals of pursuing available City property development opportunities.

Councilman Freeborn asked that we don't lose focus on the downtown bathrooms and hoped that if we have extra money this year, that some of it go toward that issue. Mayor Bellamy noted that our Economic Development Director has a presentation on that issue coming to Council soon.

Councilman Mumpower felt that a lot of the language we use in this document is arrogant and unrealistic to our abilities, i.e., provide sufficient, safe and affordable housing opportunities for all citizens. He felt our ability to implement most of the Strategic Operating Plan is marginal at least. Even though this is an attractive printed document, he felt we shouldn't spend our tax dollars or staff time on a printed-document such as this.

Upon inquiry of Councilwoman Cape, Mr. Shuford updated City Council on the ordinance amendment on the hillside and ridge top regulations, noting that his timeframe would be to gather public input in August, take the amendment to the Planning & Zoning Commission in September and to City Council the last Tuesday in September.

BOARDS AND COMMISSIONS:

It was the consensus of City Council to arrange interviews for Joseph Malki, Chip Hood, Tebbe Davis and Timothy Laughlin for vacancies on the Civic Center Commission.

Regarding the vacancies on the Community & Economic Development Alliance, Vice-Mayor Jones said that Council received very few applications and there is some expertise that Council wants to share on behalf of the City that did not come from the existing applications. Since the City has five appointments to make, she offered four options for Council (1) continue on in the process and interview from the existing resource list with interviews on August 22, 2006; (2) use the resource list in additional to two names each from Council and appoint the highest five vote-getters at this meeting; (3) re-open the application process with a deadline of August 10, and Council to interview on August 22, 2006 (noting that the City's five appointments will not be seated at the Committee's first meeting; however, noting that Mayor Bellamy and Councilwoman Cape are already members for City representation); or (4) if a member of Council recommends a name and all Council member support that appointment, then make that appointment at this meeting. It was the consensus of Council to re-open the application process with a deadline date of August 10, 2005, with Council members contacting two individuals, if they wish, would they feel will bring expertise to the Committee and have them fill out an application form.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to reappoint Stephanie Cooper and James Lewis to the Police Officers and Firefighters Disability Review Board. She said that the Buncombe County Medical Society is in the process of making a recommendation for the licensed physician.

It was the consensus of City Council to arrange interviews for Wendy Kussrow, William Langdon and Martha Jane Peiser for a vacancy on the River District Design Review Committee.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:39 p.m.

Magdalen Burleson
CITY CLERK

Jerry M Bellamy
MAYOR

Tuesday – July 25, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. APPOINTMENT OF KEISHA ROBERSON LIPE AS CITY CLERK OF THE CITY OF ASHEVILLE, EFFECTIVE AUGUST 2, 2006

Mayor Bellamy said that the Mayor and Council have just completed a search process to replace Maggie Burleson, City Clerk, who announced her retirement earlier this year after 31 years of exceptional service to the City of Asheville. While this process has proven to be quite challenging, given Maggie's past track record, she was very excited to announce that she and Council have chosen Keisha Lipe, an eight year employee in the City of Asheville who has an excellent work record and strong dedication to the customers she serves.

Vice-Mayor Jones moved to appoint Keisha Lipe as the City Clerk of the City of Asheville, effective August 2, 2006. This motion was seconded by Councilman Mumpower and carried unanimously.

ADDITIONS TO THE AGENDA

At the request of Vice-Mayor Jones, it was the consensus of Council to add a resolution appointing the Chairman of the Civil Service Board be added under New Business after New Business "B".

At the request of City Manager Jackson, it was consensus of Council to add a resolution authorizing the possession and/or consumption of malt beverages and/or unfortified wine for an event on August 17, 2006, under the Consent Agenda.

At the request of Mayor Bellamy, Consent Agenda "I" was pulled from the Consent Agenda for an individual vote.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 11, 2006; THE SPECIAL MEETING HELD ON JULY 17, 2006; AND THE WORKSESSION HELD ON JULY 18, 2006

B. ORDINANCE NO. 3375 - BUDGET AMENDMENT REGARDING THE COMMUNITY DEVELOPMENT SECTION 108 FUND

Summary: The consideration of a budget amendment, in the amount of $97,520, regarding the Community Development Section 108 Fund.

The purpose of this budget amendment is to budget $82,000 in Community Development Block Grant funds as revenue in the Section 108 Fund, as provided for in the 2006 Community Development Block Grant/HOME Action Plan. Additionally, this action will budget $15,520 in previously received program income in the Section 108 account. The revenue from these sources will provide sufficient funds to cover the principal and interest payments due to HUD on the City's Section 108 Community Development Block Grant loans in Fiscal Year 2006-2007.

Considerations:

- Correctly budgets funding already planned to cover payments due on the Section 108 loans

Staff recommends that Council approve the budget amendment, in the amount of $97,520, regarding the Community Development Section 108 Fund.

ORDINANCE BOOK NO. 23 – PAGE 47

C. RESOLUTION NO. 06-131 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH HAYNES ELECTRIC UTILITY CORPORATION FOR THE INSTALLATION OF FIELD LIGHTING AT MONTFORD RECREATION COMPLEX

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Haynes Electric Utility Corporation for the installation of field lighting at Montford Recreation Complex.

The City of Asheville Parks and Recreation Department is continuing to upgrade parks throughout the City of Asheville. One of the parks in need of renovation is the Montford Recreation Complex, which is situated behind the Montford Recreation Center. The Complex is one of the many locations for the City's Adult Softball Program and many other user groups. This project has become a necessity within the last few years because of safety issues surrounding the existing system. Existing poles are too deteriorated for repair companies to work on them, light fixtures do not illuminate enough of the playing field, and "banks" of lights are going out in the middle of scheduled activity. In order to initiate this project, staff prepared bid specifications for the removal of the old system and for the installation of a turn-key field lighting system. Bid specifications were sent out to electrical contracting companies to see of their interest. The following two contractors were the only companies to respond:

Haynes Electric Utility Corporation	$106,523
Newco Sports and Outdoor Lighting Co.	$125,200

Haynes Electric was the lowest responsible bidder, at the cost of $106,523. The bid process and Haynes Electric have complied with the Minority Business Plan. This project will be funded out the Parks and Recreation Department's Capital Project Fund.

Pros:

- This project will provide a safe lighting system that will be state-of--the art for all users of the facility.

- Due to current technology, the new system will be more energy efficient and the City of Asheville will receive a 25-year warranty that will cover material and labor.

Cons:
- The City of Asheville will spend Capital Project Funds for this project.
- The facility will be closed for a period of two weeks for the system to be installed.

City staff recommends the City Manager be authorized to enter into a contract with Haynes Electric Utility Corporation for the removal of the old lighting system and the provision and installation of a new lighting system at the Montford Recreation Complex.

RESOLUTION BOOK NO. 30 – PAGE 60

D. RESOLUTION NO. 06-132 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CAROLINA CORNERSTONE CONSTRUCTION INC. FOR THE CONSTRUCTION OF THE REED CREEK GREENWAY - PHASE I

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Carolina Cornerstone Construction, Inc. for the construction of the Reed Creek Greenway - Phase I.

The City of Asheville Parks and Recreation Department is expanding its greenway system throughout the City of Asheville. The Parks and Recreation Department has been acquiring land along Reed Creek Greenway (parallel to Broadway) for a number of years in order to initiate the construction of this high priority greenway. The Reed Creek Greenway, along with the nearby Glenn's Creek Greenway, will provide a model greenway system between neighborhoods, commercial and institutional districts.

Phase I entails the construction of this linear park between Catawba and Cauble Street. The work will entail the construction of a 10 wide paved trail and associated trailheads. Staff prepared plan documents that were then bid out. Carolina Cornerstone Construction, Inc. submitted the lowest responsible bid for the project of $183,644. The bid process and Carolina Cornerstone Construction have complied with the Minority Business Plan. This project will be funded out of the Parks and Recreation Department's Capital Project Fund.

Pros:
- This project will provide a safe, accessible bike and pedestrian route along a strategic corridor in the city.
- The project will provide an alternative mode of transportation as the city's street system becomes more congested.
- The greenway will protect and education the public about the environment, especially watershed systems.

Cons:
- The City of Asheville will spend Capital Project Funds for this project.
- The greenway will entail more landscape and cleaning maintenance than its current use as vacant land.

City staff recommends the City Manager be authorized to enter into a contract with Carolina Cornerstone Construction, Inc. for the construction of the Reed Creek Greenway - Phase I.

RESOLUTION BOOK NO. 30 – PAGE 61

E. RESOLUTION NO. 06-133 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A CONTRACT WITH APAC-ATLANTIC FOR THE FAIRVIEW ROAD WATER LINE REPLACEMENT PROJECT

Summary: The consideration of a resolution authorizing the Mayor to sign a contract with APAC-Atlantic for the project known as Fairview Road Water Line Replacement; and the associated budget amendment, in the amount of $193,099.

The Water Resources Department is installing a new water line on Fairview Road. The Department requires asphalt overlay of approximately 7,920 LF by 22 feet wide plus 25 intersections with a 2 inch overlay and stripe the center line on Fairview Road after installation of a new water line and connections to all side streets along the road. Funding is available in the Water Capital Projects Fund by reprogramming funds from the N.C. Dept. of Transportation ("NCDOT") Sweeten Creek II Project, which was completed at a cost below NCDOT's estimate for the project. Staff has to rely on NCDOT's estimate of projects. In this case, NCDOT underestimated the cost of the Sweeten Creek Project and the excess funding due to the final payment being lower than originally estimated by NCDOT can be reprogrammed to fund an additional $193,098.30 in water line installation costs for the Fairview Project. This cost exceeds the original budgeted funding due to higher than expected water line installation costs which were $274,000 more than the engineers estimate due to escalating construction material cost.

Water Resources requested quotes for the road overlay with APAC-Atlantic – Asheville Division being the low bid at $193,098.30.

PRO:

- This project will enhance the water system and the asphalt overlay will create better road infrastructure for the Oakley Community and the City of Asheville.

CON:

- The cost of the asphalt overlay is $193,098.30, which is available in the Water Capital Projects Fund due to the NCDOT Sweeten Creek Phase II Project being completed under budget.

City staff recommends City Council approval of the Mayor signing contract agreement with APAC-Atlantic, Inc. for the asphalt overlay of Fairview Road as well as approval of a budget ordinance amendment to provide adequate funding.

RESOLUTION BOOK NO. 30 – PAGE 62

F. ORDINANCE NO. 3376 - BUDGET AMENDMENT TO PROVIDE ADDITIONAL FUNDING FOR THE FAIRVIEW ROAD WATER LINE REPLACEMENT PROJECT

See Consent Agenda Item "E" above.

ORDINANCE BOOK NO. 23 – PAGE 49

G. RESOLUTION NO. 06-134 - RESOLUTION DIRECTING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY AT 8 CEDAR STREET, ASHEVILLE, N.C.

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property at 8 Cedar Street pursuant to the upset bid process provided in N. C. Gen. Stat. sec. 160-269.

On March 14, 2006, City Council authorized marketing property at 8 Cedar Street (PIN 9657.07-58-4903) that the City originally acquired for proposed street improvements, which are no longer needed. The next step in this process is advertising the offer through the upset bid process. The property has been offered for sale and a bid has been received in the amount of $158,600. The proceeds of the sale will be General Fund revenue.

The property is located at the intersection of Fairview Road and Cedar Street in the Oakley community. It is improved with a circa 1926 two story Dutch Colonial with white clapboard siding on a 0.1745 acre lot with typical residential landscaping, fencing, etc. It needs some repairs in order to obtain a Certificate of Occupancy.

The bid from R & G Properties is equal to the minimum price of $158,600.

Pros:

- The bid is equal to the appraised value and the upset bid method of sale will ensure a competitive process.
- The sale of the property will generate revenue for the City.
- It will place the property back on the tax rolls.
- It is an efficient use of resources, because un-needed property will return to private ownership.
- It will make available moderately priced housing in a fully serviced neighborhood.

Cons:

- Future growth and development in the area could require street improvements that could result in the need to reacquire the property, but that is not likely in the foreseeable future due to the residential character of the neighborhood and the number of inter-connecting neighborhood streets which provide alternative routes. Additionally a portion of the property along Fairview Road is being retained by the City to provide an improved turning radius and sidewalk.

Approval of the resolution will authorize advertisement for upset bids as provided in N. C. G. S. 160A-269.

City staff recommends adoption of the resolution authorizing the City Clerk to advertise an offer to purchase property at 8 Cedar Street pursuant to the upset bid process provided in N. C. Gen. Stat. sec. 160-269.

RESOLUTION BOOK NO. 30 – PAGE 63

H. THE RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CONVENTIONAL WISDOM TO DEVELOP A COST ANALYSIS FOR REFURBISHMENT AND UPGRADING THE CURRENT CIVIC CENTER FACILITY WAS CONTINUED FROM JUNE 23, 2006, TO AUGUST 8, 2006. DUE TO THE FACT THAT THE AUGUST 8, 2006, MEETING HAS BEEN CANCELLED, THIS MATTER WILL BE CONSIDERED ON AUGUST 22, 2006

I. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT A FUNDRAISING RECEPTION AS PART OF THE ASTON PARK TENNIS CENTER ENHANCEMENT CAMPAIGN ON AUGUST 17, 2006, AT THE COVINGTON CLUBHOUSE AT ASTON PARK TENNIS CENTER

At the request of Mayor Bellamy, this item was pulled from the Consent Agenda for an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEM PULLED FROM THE CONSENT AGENDA FOR AN INDIVIDUAL VOTE

RESOLUTION NO. 06-135 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT A FUNDRAISING RECEPTION AS PART OF THE ASTON PARK TENNIS CENTER ENHANCEMENT CAMPAIGN ON AUGUST 17, 2006, AT THE COVINGTON CLUBHOUSE AT ASTON PARK TENNIS CENTER

Summary: The consideration of a resolution making provision for the possession and consumption of malt beverages and/or unfortified wine at a fundraising reception as part of the Aston Park Tennis Center Enhancement campaign on August 17, 2006 at the Covington Clubhouse at Aston Park Tennis Center.

Asheville Parks and Recreation will produce the fundraising reception to help raise funds to support the cost of renovations at Aston Park Tennis Center. The reception will be held at the Covington Clubhouse located in Aston Park Tennis Center.

The Asheville Parks and Recreation Department recommends City Council adopt the resolution making provision for the possession and consumption of malt beverages and/or unfortified wine at the fundraising reception as part of the Aston Park Tennis Center Enhancement campaign on August 17, 2006 at the Covington Clubhouse at Aston Park Tennis Center.

Councilman Newman moved for the adoption of Resolution No. 06-135. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Mayor Bellamy voting "no."

RESOLUTION BOOK NO. 30 – PAGE 64

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER RENAMING THE EXISTING STREET OF "HOLIDAY INN DRIVE" LOCATED OFF HIGHWAY 240 EAST TO "RESORT DRIVE"

Mayor Bellamy said that on May 23, 2006, the petitioners requested this public hearing be continued to July 25, 2006, in order to address street signage. That request was granted. On July 7, 2006, the petitioner again requested the public hearing be continued to September 12, 2006. Therefore, Councilman Mumpower moved to continue this public hearing until September 12, 2006. This motion was seconded by Councilman Davis and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF PROPERTY LOCATED AT 37 ARLINGTON STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING FOR A PROPOSED PARKING LOT

ORDINANCE NO. 3377 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 37 ARLINGTON STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING FOR A PROPOSED PARKING LOT

Mayor Bellamy said that this public hearing was continued from May 23, 2006, and July 11, 2006, at the petitioner's request in order to have a full Council present because a valid protest petition had been filed. She then opened the public hearing at 5:08 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to conditionally zone property located on 37 Arlington Street from RM-16 Residential Multi-Family High Density District to Office District/Conditional Zoning for use of a parking lot in conjunction with the building on 37 Arlington Street. This public hearing was advertised on May 12 and 19, 2006.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property.

The subject property is located within the City Limits, off of Arlington Street approximately half a block east of the intersection of Arlington with Charlotte Street. The property does not abut a street but is accessed via the driveway to 37 Arlington Street. While we have advertised it as a part of 37 Arlington along with the Parcel Identification Number, it really is a separate free-standing property right now. It does have an association with the property on 37 Arlington in that it is the same ownership and the request concerns the salon that is located there and the needed parking for the salon. Surrounding properties to the north and east are zoned for multi-family development, the property to the west is zoned CBII and the property to the south is zoned Office. A variety of uses are found in the area including: vacant commercial land used for parking (immediately to the west); office uses (to the south); multi-family residential (to the north and east); and a small hotel (along Furman to the east).

The applicants wish to rezone their property in order to use the portion of it that is detailed in the petition for a gravel parking lot for the salon located at 37 Arlington Street. The balance of the property would remain RM-16. The number of stations in a salon determines the minimum parking requirements. This salon has ten (10) stations and would require twenty-six (26) spaces. The salon currently provides nine (9) parking spaces in an asphalt lot on the property at 37 Arlington.

The proposal is to rezone 10,372 square feet of the approximately 16,117 square feet in the subject parcel. This portion of the parcel would need to be combined with the parcel on which the salon is located to make the parking area conforming. There is already an existing parking lot there. The proposal is for a gravel lot containing fourteen (14) parking spaces. The applicant is proposing no new access to the property that is currently accessed via the drive at 37 Arlington. The applicants purchased the property about one year ago and proceeded to work on the parking area. They received a notice a violation from the City in November of 2005 when it was brought to our attention that they were clearing on the lot. They immediately came in and started working with City staff on an attempt to bring what they wanted to do with this particular property into compliance.

Their landscape plan is to establish a gravel parking lot with 14 spaces and this would bring their parking more closely into compliance with the requirements of the Unified Development Ordinance ("UDO") for the particular salon there. The salon as it exists now needs 26 spaces and this would give them 23 spaces and would hopefully take some of the parking off the street for the clients of the salon. The balance of the property would remain RM-16 and

access to this portion of this property, if ever developed, would be most likelihood be an easement or a recorded right-of-way off of Furman because it is a land-locked piece of property. Regarding the landscaping of the lot, the owners have worked with City staff to do a nice mix both of existing vegetation as well as a considerable amount of proposed vegetation.

One thing that has been a concern of those opposed to this is the access off of Furman Avenue and it has been suggested as a condition by both the Technical Review Committee ("TRC") and the Planning & Zoning Commission that access not be allowed off of Furman. The applicant has agreed to that condition and has also placed additional vegetation along the Furman side to preclude access from this parking area out that way.

At their meeting on April 17, 2006, the City of Asheville TRC reviewed the conditional zoning request and made a positive recommendation (with conditions) that the project be forwarded to the Planning and Zoning Commission.

The Planning and Zoning Commission, at their meeting on May 3, 2006, reviewed the conditional zoning request and recommended approval (4-1). At this meeting the Commission added the condition that access to the parking area not be afforded via Furman Avenue.

She asked that Council further condition this plan that the parking be used in the future only in conjunction with the conforming permitted use located at 37 Arlington Street. In addition, another condition requested is that this piece of property be combined with 37 Arlington Street property. In that case, if this property were ever sold and turned into another conforming use, that the parking in the future could only be used in conjunction with whatever use was on the other part of 37 Arlington Street.

Section 7-7-8(d)(2) of the UDO states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The project, if approved, must meet the technical standards set forth in the City's Unified Development Ordinance. The existing site plan shows compliance with most all of the City's development standards and the applicant is working with City staff on full compliance.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The applicant is proposing to leave substantial vegetation to the north and south so as to leave this portion of the property in its natural vegetative state.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The use of property surrounding this site is varied. There exist commercial and hotel parking areas in the immediate vicinity. Commercial and office uses, in addition to multi-family and single-family residences, are found in the area. The applicant is proposing landscaping, both existing and new plant materials, in order to buffer the parking area.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** Other non-residential uses in this area have parking located at the rear of

heir building. This parking area appears to be a little larger in scale than some of the others.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The proposed development supports the 2025 Plan regarding allowing appropriate nonresidential development within and adjacent to residential areas.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** The proposed development is within close proximity to transportation facilities and other utilities appear adequate. The project area is located near major road facilities and other service centers.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The proposed use will actually create a better situation for traffic along Arlington Street. The minimum parking requirement for this salon is 26 spaces. The current parking situation at 37 Arlington only provides for 9 off-street spaces. This additional parking will mean that fewer patrons will park on the street along Arlington.

Considerations:

- Improves parking situation for an existing use.
- Places service use parking adjacent to multi-family residential uses.
- The applicant is providing landscaping on all sides of the parking lot in compliance with all City regulations.
- The parking area is larger than many in the area used for non-residential uses. However, there are a number of non-residential use parking areas in the immediate vicinity.

Based on the above findings and the analysis provided in the report, staff and the Planning and Zoning Commission find this request to be reasonable. Staff recommends the approval of this conditional zoning request with the conditions as stated in the TRC report. The Planning and Zoning Commission, at their meeting on May 3, 2006, reviewed the conditional zoning request and recommended approval (4-1). At this meeting the Commission added the condition that access to the parking area not be afforded via Furman Avenue. City staff also requests the addition of the following two conditions: (1) that the parking be used in the future only in conjunction with a conforming permitted use located at 37 Arlington Street; and (2) that this piece of property be combined with 37 Arlington Street property.

City Attorney Oast said that late today he received information from Ms. Patsy Brison, attorney representing the neighbors who are opposed to the rezoning, with respect to some right-of-ways or easements that she contends crosses the property. It was his opinion that this is an issue that does not preclude City Council from considering this request. He said he will investigate that further and if turns out that it true, then the zoning is void from the beginning and he will advise Council. He is also talking with the applicant's attorney about this matter as well.

Mr. Robert Malkin, landscape architect representing the property owners, said that he has furnished to Council 15 letters in support of this rezoning request. He explained a brief history of the property noting that in 1999 the previous owner did receive a grading permit for the existing parking lot. When the property was bought by the current owners, it was assumed by both buyer and seller that the parking lot went with the building at 37 Arlington Street. At this time they would like to officially make that connection and allow the owners to use the existing parking lot as such. If Council chooses not to rezone this property, (1) there will be 14 cars parking on Arlington Street, which is currently congested; and (2) the minimum parking requirements of the

UDO cannot be met. He then explained the landscaping of the property, noting that they began working with the City as soon as they found out about the violation. Regarding the issue recently raised by Ms. Brison about an unopened street, he said that should be left up to the attorneys to decipher. They held a neighborhood meeting that generated 15 letters of support and in fact one property owner who signed the protest petition stated that the landscape plan was beautiful. He had a concern about the validity of the protest petition. In summary, he asked Council to approve this rezoning request and bring the parking lot into compliance.

Ms. Linda Cohen, resident of 4 Oak Park Road, presented City Council with a petition containing 78 signatures who are "opposed to the conditional zoning for the property at 37 Arlington Street and rezoning of the lot at 78 Furman Avenue for a parking lot." She urged Council to deny the rezoning request.

Ms. Gabrieal Cyr, resident at 291 E. Chestnut Street, said that she signed the protest petition because the rezoning will further erode the residential property in the area. She had no problem with the landscape design of the property. She felt the area needed to remain residential.

Reverend Christopher Chiaromonte spoke in opposition of the rezoning and felt that the buyers should have investigated the property thoroughly and not relied on the previous owner's assurances.

Ms. Patsy Brison, attorney representing neighbors who are opposed to the rezoning, felt this is truly an encroachment of a commercial use into a residential area. She said that the applicant, Mr. Higgins, sent a bull-dozer, knocking down trees, through the property right next to the access of Furman to get to the back of the existing parking lot. That created the concern in the neighborhood, who in turn contacted the City last fall. She said that a police officer arrived and asked Mr. Higgins to not continue the work but Mr. Higgins still persisted and did it over the weekend and the City later cited him for a zoning violation of not having a proper permit. She believes that this is part of the same lot as 37 Arlington Street and so the access off Furman Avenue is an issue. She then presented City Council with a letter dated July 25, 2006. She summarized the letter by explaining that late yesterday she received from her clients "information from the Parker family files that there is a twenty (20) foot wide unopened street running from Furman Avenue westward through the lot which is the subject of the rezoning request to the intersection of that street with a twenty-five (25) foot wide unopened street running from Chestnut Street south through the middle of the block." Attached to her letter were the deeds. She felt the City would need to resolve whether or not this property is still subject to the street dedication before proceeding with the rezoning request. She inquired of the City Clerk as to whether or not there had been a closing of this street and none of the street closings she found in her files indicated a closing of that street. She has not conducted a further investigation of the status of this street, as it would appear to be incumbent upon the applicant to make that investigation. She provided this information to the City Attorney and Mr. Bill Biggers, the attorney for the applicants. She noted that the Princess Ann Hotel will be bringing a rezoning request to the Planning & Zoning Commission, which will also chip away the good residential character of the neighborhood. As to Ms. Cogburn's suggestion of adding a condition that this parking lot be connected to the lot at 37 Arlington Street, technically she feels there may be an advertisement problem. She felt on that basis alone, the request should be defeated. If Council chooses to go forward, she requested Council revise Ms. Cogburn's condition that the parking lot only be used in the future for the existing use of the structure on 37 Arlington, because perhaps in the future a smaller use may not require that much parking.

Mr. Dean Nanney, resident at 79 Furman Avenue, showed City Council a video of the lot being graded. He spoke in opposition of the rezoning in that he felt that this would be spot zoning

for the Arlington property and it would erode the residential property. He felt Council would be rewarding the action of Mr. Higgins who continued to grade his property after being instructed by the police officer to stop. He said that when the grading was done for the original parking lot, the neighbors contacted the Planning Department and they were told that since the grading was done there was nothing the City could do. He urged Council to deny the rezoning request.

Mrs. Fredia Higgins, property owner, said that she is requesting this rezoning to have a place for her clients and employees to park off the street. She said that approximately 25-30 cars would be parked on the lot. She said they have no plans to pave the lot but are willing to do the landscaping.

At 5:50 p.m., Mayor Bellamy closed the public hearing.

Upon inquiry of Councilwoman Cape, Ms. Cogburn said that the business did receive an appropriate zoning permit at the time the salon was established.

When Councilwoman Cape asked about Ms. Brison's concern about the street running through the lot, City Attorney Oast said that that is a question of underlying ownership and City Council should not be called on to resolve that issue.

Councilwoman Cape said that we are trying to manage the growth of our community and we understand the value of small businesses to our community. We need to be responsive to the community in a lot of different ways. She was concerned about the additional cars on Arlington Street and noted that the area is already mixed use. She wanted to make the area as safe as possible.

When Councilwoman Cape asked about the land-locked piece of property, Ms. Cogburn said that the only thing that can be built is a single-family home, but prior to them doing that they would have prove to the City that they have legal access from Furman Avenue.

Vice-Mayor Jones confirmed that the lot is not being used as a parking lot now and the cars are currently parking on the street. Ms. Cogburn agreed in that the owners were asked to not park in the existing lot since November of 2005 until this matter was resolved.

Upon inquiry of Councilman Mumpower about the Planning & Zoning Commission vote, Ms. Cogburn said that the majority felt like this is a situation that had historically been there and that the applicants had come in and were trying to make it conforming and it would make situation related to the business more in conformance with the UDO. The one in opposition was regarding encroachment into a residential neighborhood.

Upon inquiry of Councilman Newman, Ms. Higgins said that previously the existing parking lot would only hold approximately ten cars which were basically for the employees of the salon.

Mr. Randy Higgins, property owner, explained that he was the person who called the police because someone had their vehicle blocking the right-of-way and he had asked them several times to move the vehicle, but they refused. The pile of debris showed in the video was debris he was wanting to haul away, but the vehicle was blocking his access. At first he wanted to tow the vehicle out of the way, and when the police came, they said it was a civil matter and that he should wait until the following Monday and talk with his attorney. All he did after the police officer left was go back onto his parking lot and continue piling up the debris and cleaning off his lot (old tires, beer bottles and cans, fallen tree limbs, etc.) so when he could get his equipment in there, he would only have to load it up and leave. He has not been cited by the City for anything other than the zoning violation.

Councilman Davis felt that the property owners have worked hard to make this lot something better than a run down parking lot in the past.

Councilman Mumpower felt this would take parking off of the street and feels that the cut-off for the access to Furman Street is a reasonable condition. In addition, it is an existing parking lot. He felt the information about the old street seems to reflect documentation that doesn't have relevancy today. This business employs people and he felt we need to make a reasonable accommodation to try to work with each other and he thinks this is reasonable.

Councilman Davis moved for the adoption of Ordinance No. 3377 to conditionally zone property located on 37 Arlington Street from RM-16 Residential Multi-Family High Density District to Office District/Conditional Zoning for a proposed parking lot, subject to the following conditions: (1) all conditions in the TRC being met; (2) access to the parking area not be afforded via Furman Avenue; (3) that the right-of-way access question be resolved; and (4) that the parking be used in the future only in conjunction with a conforming permitted use located at 37 Arlington Street, noting that this request is reasonable based on the information provided in the staff report. This motion was seconded by Councilman Mumpower and carried on a 6-1 vote, with Vice-Mayor Jones voting "no".

ORDINANCE BOOK NO. 23 – PAGE 51

C. ORDINANCE DIRECTING THE HOUSING CODE COORDINATOR OF THE BUILDING SAFETY DEPARTMENT TO VACATE THE DWELLING LOCATED AT 128 ALABAMA AVENUE

Mayor Bellamy said that the property owner, Mr. Joseph McCarson, is working with the City of Asheville for a resolution to the problem and has asked for a continuance of the public hearing. Therefore, Councilman Mumpower moved to continue the public hearing until September 12, 2006. This motion was seconded by Councilman Newman and carried unanimously.

D. PUBLIC HEARING TO CONSIDER REZONING 15 STATE STREET FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3378 - ORDINANCE TO REZONE 15 STATE STREET FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 6:22 p.m.

Urban Planner Nate Pennington said that this is the consideration of an ordinance to rezone 15 State Street from RM-8 Residential Multi-Family Medium Density District and RM-16 Residential Multi-Family High Density District to RM-16 Residential Multi-Family High Density District. This public hearing was advertised on July 14 and 21, 2006.

He said the subject site is located in West Asheville, within the City of Asheville's corporate limits, half a block south of Haywood Road. The property, approximately one-half acre in area, previously had a single-family residence, but has recently been cleared of any structures. The parcel is currently split zoned, with approximately .35 acre on the east side zoned RM-16 Residential Multi-Family High Density District and approximately .15 acre on the west side zoned RM-8 Residential Multi-Family Medium Density District.

The surrounding zoning is RM-16 to the north, east and south, and RM-8 to the north, west, and south. In addition, there is Community Business II zoning to north/northeast close to Haywood Road. The adjacent residential areas are a mix of single-family homes, duplexes, and vacant residential lots. The closest duplex is located on one of the adjacent lots to the south. The Rainbow Mountain Children's School's rear entrance extends onto the east side of State Street across from the southeastern corner of the subject property. The average lot size in the area is roughly 0.25 acres.

The current zoning line matches property lines for the properties to the north and south, but divides the subject property into two zoning districts.

The applicant, Michael Figuras as agent, has applied for a rezoning to designate the lot entirely RM-16. Based on acreage and density permitted with the current zoning configuration, either seven or eight units could potentially be permitted on this lot (staff cannot determine the exact number without a survey). The proposed rezoning would allow for the permitting of one additional unit. The RM-16 zoning district was intended to permit a full range of high density multi-family housing types along with limited institutional, public, and commercial uses appropriate to the area.

The RM-8 zoning district was established to provide a transitional area between high-density single-family uses and multi-family areas and to permit medium density multi-family development in areas where existing conditions make higher density development inappropriate.

As of this writing, planning staff has received two communications from neighbors seeking more information about the proposed rezoning. Neither citizen expressed opposition.

At their July 5, 2006, meeting the City of Asheville Planning and Zoning Commission voted unanimously to recommend approval of the proposed rezoning.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Proposed zoning would be compatible with the existing zoning of other parcels along State Street south of the commercially-zoned properties fronting Haywood Road.
- The potential for higher density infill development is consistent with both the City's Comprehensive Plan and Strategic Plan.
- Proposed rezoning would potentially allow a single additional unit within a multi-family development over what would be permitted under the existing zoning.
- Proposed rezoning would eliminate a split-zoned parcel.

Mr. Michael Figuras, agent for the applicant, spoke in support of the rezoning.

Mayor Bellamy closed the public hearing at 6:26 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3378 to rezone 15 State Street from RM-8 Residential Multi-Family Medium Density District and RM-16 Residential Multi-Family High Density District to RM-16 Residential Multi-Family High Density District and finds that the request is reasonable based on information provided in the staff report and as

stated in the staff recommendation. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 – PAGE 55

E. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF 3820 SWEETEN CREEK ROAD TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3379 - ORDINANCE TO ZONE 3820 SWEETEN CREEK ROAD TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 6:27 p.m.

Urban Planner Julia Cogburn said that this is consideration of an ordinance to zone 3820 Sweeten Creek Road to RM-16 Residential Multi-Family High Density District. This public hearing was advertised on July 14 and 21, 2006.

The City of Asheville has recently completed the voluntary annexation of a single lot located at 3820 Sweeten Creek Road (effective June 30, 2006). This area is currently in the Limestone Township of Buncombe County and is zoned low-density residential. The lot is approximately .72 acres in size. The lot is bordered to the south and south west by multi-family and institutional zoning and uses. To the north and east, the uses are predominately single-family in nature.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Zones property recently taken into the City of Asheville in consideration of the surrounding zoning and land use and existing infrastructure.
- Places higher density development opportunities where the infrastructure is appropriate for such development.

The City's Technical Review Committee, at its meeting on June 19, 2006, concurred with this recommendation. At a meeting on July 5, 2006, the Planning and Zoning Commission unanimously recommended approval of this initial zoning. (5-0).

Mr. John Couch, owner of the property, spoke in support of this initial zoning.

Mayor Bellamy closed the public hearing at 6:31 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3379, to zone 3820 Sweeten Creek Road to RM-16 Residential Multi-Family High Density District, and find that this initial zoning to be reasonable/unreasonable based on information provided in the staff report. This motion was seconded by Councilman Mumpower and carried unanimously.

380

F. **PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF 4 LOTS ON ROCKWOOD ROAD TO HIGHWAY BUSINESS DISTRICT**

ORDINANCE NO. 3380 - ORDINANCE TO ZONE 4 LOTS ON ROCKWOOD ROAD TO HIGHWAY BUSINESS DISTRICT

Mayor Bellamy opened the public hearing at 6:31 p.m.

Urban Planner Julia Cogburn said that this is consideration of an ordinance to zone 4 lots on Rockwood Road to Highway Business District. This public hearing was advertised on July 14 and 1, 2006.

The City of Asheville has recently completed the voluntary annexation (effective June 30, 2006) of four parcels off of Rockwood Road in South Buncombe County. These parcels are currently in the Limestone Township of Buncombe County and are zoned Employment. The four parcels combined are a total of 6.54 acres in size. There are currently four site plans that have been approved by Buncombe County for which the developer has obtained vested rights for five years. These plans show commercial (retail, restaurant, and hotel) usage of the property.

Other properties in the Airport Road area that are within the City's jurisdiction are zoned Highway Business District. Staff proposes the same zoning for these parcels. The Technical Review Committee had no issues with this zoning classification for these properties.

At a meeting on July 5, 2006, the Planning and Zoning Commission unanimously recommended this rezoning (5-0).

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable and recommends approval of this initial rezoning.

Considerations:

- Zones property recently taken into the City of Asheville in consideration of the surrounding zoning and land use and the City's Comprehensive Plan.
- Complies with the strategy of identifying appropriate areas for the location of larger commercial uses.

Mr. Steven Hankins, owner of property, spoke in support of this initial zoning.

Mayor Bellamy closed the public hearing at 6:33 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3380 to zone 4 lots on Rockwood Road to Highway Business District and find that the request is reasonable based on information provided in the staff report. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Freeborn voting "no."

G. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO ALLOW TATTOO PARLORS AS A PERMITTED USE IN THE COMMUNITY BUSINESS I DISTRICT, COMMUNITY BUSINESS II DISTRICT, COMMERCIAL INDUSTRIAL DISTRICT, THE HIGHWAY BUSINESS DISTRICT, THE REGIONAL BUSINESS DISTRICT, THE CENTRAL BUSINESS DISTRICT AND THE RIVER DISTRICT

In order to have some modifications reviewed by the Planning & Zoning Commission, this matter was pulled from the Council meeting agenda.

H. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO BRING PROVISIONS CONCERNING JURISDICTION IN ALIGNMENT WITH RECENT POLICY CHANGES

ORDINANCE NO. 3381 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO BRING PROVISIONS CONCERNING JURISDICTION IN ALIGNMENT WITH RECENT POLICY CHANGES

Mayor Bellamy opened the public hearing at 6:34 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an amendment to the Unified Development Ordinance ("UDO") to bring provisions concerning jurisdiction in alignment with recent policy changes. This public hearing was advertised on July 14 and 21, 2006.

On June 13, 2006, the Asheville City Council, looking at opportunities for improved management of growth in the City's extraterritorial jurisdiction (ETJ), voted to undertake extension of the full range of development review services into this area. Specifically, the Council voted that as of July 1, 2006, the City would not only regulate and administer the zoning aspects of the UDO in the ETJ, but would also administer sedimentation and erosion control, stormwater management, and floodplain management in the ETJ. This development review improvement, approved by Council, would also include the provision of building inspection services into this area.

This wording amendment simply makes needed code changes to reflect the policy and management decision concerning development review.

Considerations:

- Codifies policy and management decision of Asheville City Council.
- Change will lead to greater consistency and efficiency in the application and enforcement of development standards.

At its meeting on July 5, 2006, the Planning and Zoning Commission unanimously (5-0) recommended approval of this wording amendment. Staff recommends approval.

City staff recommends City Council adopt the ordinance to amend the UDO to bring provisions concerning jurisdiction in alignment with recent policy changes.

Mayor Bellamy closed the public hearing at 6:34 p.m.

Upon inquiry of Councilman Davis, City Attorney Oast said that the City has the legal ability to extend public enterprise within reasonable limitations.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3381. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 – PAGE 64

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 06-136 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE REGIONAL AIRPORT AUTHORITY

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that the terms of Rhett Grotzinger and Albert Anderson, as members on the Asheville Regional Airport Authority, expire on June 30, 2006.

At City Council's worksession on June 20, 2006, the City Council instructed the City Clerk to arrange interviews for Rhett Grotzinger, John Panarites, David Hiller and Martha Marshall. On June 27, 2006, Mr. Grotzinger submitted a letter to City Council stating "I would like to have my name withdrawn from consideration for reappointment to the Asheville Regional Airport Authority at this time. It has been an honor and privilege to serve our community on this board and I look forward to serving our community in a similar manner in the future."

When Councilwoman Cape asked if Mr. Grotzinger had written a letter asking that he be re-considered as a candidate, Mayor Bellamy said that she has talked with Mr. Grotzinger and he has officially put his name back in for consideration of reappointment to the Airport Authority. Councilwoman Cape asked that in the future all Council members be made aware of any change in status concerning appointments, and suggested that the candidate be required to submit that request in writing.

Vice-Mayor Jones said that three Council members were not notified by the applicant that he was putting his name back in for reappointment. She felt that as Chair of the Boards & Commissions Committee, that was problematic.

At this time, John Panarites received 2 vote; David Hillier received 5 votes; Martha Marshall received 3 votes; and Rhett Grotzinger received 4 votes. Therefore, Mr. Grotzinger was reappointed to serve an additional four-year term respectively and Mr. Hillier was appointed to serve a four-year term respectively, both terms to expire June 30, 2010 or until their successors have been appointed.

RESOLUTION BOOK NO. 30 – PAGE 65

B. RESOLUTION NO. 06-137 - RESOLUTION APPOINTING A MEMBER TO THE CIVIL SERVICE BOARD

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that the term of Sophie Dixon, as a member of the Civil Service Board, expired on May 21, 2006.

At City Council's worksession on June 20, 2006, the City Council instructed the City Clerk to arrange interviews for Sheryl Near and Sharon West.

By a unanimous vote, Sharon West was appointed to serve a two-year term, term to expire May 21, 2008, or until her successor has been appointed.

RESOLUTION BOOK NO. 30 – PAGE 66

C. RESOLUTION NO. 06-138 – RESOLUTION APPOINTING A CHAIR TO THE CIVIL SERVICE BOARD

Vice-Mayor Jones said that City Council must appoint a Chairman of the Civil Service Board annually.

It is the recommendation of the City Council Boards & Commissions Committee to reappoint T. Clark Brown, who currently serves as Chair, to serve at the pleasure of City Council.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Mayor Bellamy moved for the adoption of Resolution No. 06-137. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 67

C. RESOLUTION NO. 06-139 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Asheville-Buncombe Historic Resources Commission.

The terms of Frank Thomson and Curtis Walk expired on July 1, 2006. In addition, Keith Hargrove has resigned from the Historic Resources Commission, thus leaving an unexpired term until July 1, 2007.

On June 20, 2006, City Council instructed the City Clerk to arrange interviews for William Allison, Todd Williams, Tebbe Davis, Amanda Starcher, Lupe Perez, Christopher Lyman, Timothy Ownbey and Tom Gholson. Mr. Davis was not interested in the vacancy. Mr. Gholson and Mr. Allison were unable to attend the interview.

After Council spoke highly of the candidates, Todd Williams received 5 votes; Amanda Starcher received 6 votes; Lupe Perez received 7 votes; Christopher Lyman received 2 votes, and Timothy Ownbey received 1 vote. Therefore, Lupe Perez and Amanda Starcher were appointed as members of the Asheville-Buncombe Historic Resources Commission to each serve three-year terms respectively, terms to expire June 30, 2009, or until their successors have been appointed. In addition, Todd Williams was appointed to serve the unexpired term of Mr. Hargrove, term to expire July 1, 2007, or until his successor has been appointed.

RESOLUTION BOOK NO. 30 – PAGE 68

D. RESOLUTION NO. 06-140 - RESOLUTION APPOINTING MEMBERS TO THE RECREATION BOARD

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that the terms of Sam Camp, Frank Fishburne, Carol Ann Pothier, James Grant and Laura Williams, as members

on the Recreation Board, expire on June 30, 2006. In addition, Matt Davis and Eleanor Campbell have resigned, thus leaving two unexpired terms until June 30, 2008.

At City Council's worksession on June 20, 2006, the City Council instructed the City Clerk to prepare the proper paperwork to reappoint Sam Camp, Carol Ann Pothier and Laura Williams to each serve an additional three-year term respectively, terms to expire June 30, 2009, or until their successors have been appointed.

Also at Council's June 20, 2006, worksession, the City Clerk was instructed to arrange interviews for Wind Peter Motika, Pastor Spencer Hardaway, Randolph Walter, Scott Barnwell and Shelley Booth. Mr. Walter called the City Clerk and withdrew his name from consideration for physical reasons.

By unanimous vote, Wind Peter Motika and Pastor Spencer Hardaway were appointed as members of the Recreation Board to each serve a three-year term respectively, terms to expire June 30, 2009, or until their successors have been appointed; and Scott Barnwell and Shelley Booth were each appointed to serve the unexpired terms of Mr. Davis and Ms. Campbell, terms to expire June 30, 2008, or until their successors have been appointed.

In addition, Sam Camp, Carol Ann Pothier and Laura Williams were each reappointed to each serve an additional three-year term respectively, terms to expire June 30, 2009, or until their successors have been appointed.

RESOLUTION BOOK NO. 30 – PAGE 69

VI. OTHER BUSINESS:

Board and Commission Appointments

Vice-Mayor Jones was very disappointed around the process of the Airport Authority appointments. Her number one criteria for appointment for any board is not knowledge (because the right people can learn), and it is not a certain status (although very important, she doesn't believe that political correctness of representation should trump over-qualifications). Her number one criteria is that a person understands their role as a board member. Part of that understanding is what is off-limits for board members to do. Board members do not amend by-laws because they are dissatisfied with the operational aspects of the board. Another important criteria is conclusive communication. Last night our state representative who was appointed to the Airport Authority and calling in on a conference call was not given the courtesy of one minute to get off hold in order to participate as a voting member of that board. She would have hoped for better behavior particularly our City appointees. The behavior of this board, as recently as last night, has not met either of her standards. She works for a board of directors for a living and has also served on numerous boards and observed many up close and personal. This Airport Authority has been very dysfunctional. Sadly, the pattern of odd maneuvers continue and the dysfunction lives on. Back-door deals sicken her and must stop. The Airport is critical to our economic future and as one of our excellent candidates stated "boards are instruments of public service, not vehicles to build resumes or exercise personal agendas." She will hold out hope for a better future for that board.

Councilman Mumpower agreed with Vice-Mayor Jones in that politics for board positions is distasteful. He will look forward to hearing more details about this. But in fairness to Mr. Grotzinger, he specifically raised the question at our last Board & Commission meeting as to whether he was still a candidate or not. We had heard some rumors about that. So, he didn't think we are coming into this blind. He thinks there was ample opportunity to reach out to Mr. Grotzinger and confirm that.

Vice-Mayor Jones confirmed with the City Clerk that there was no written correspondence from Mr. Grotzinger asking that he be re-considered for reappointment. The last correspondence that she saw was the letter from Mr. Grotzinger asking that "his name be withdrawn from consideration for reappointment to the Asheville Regional Airport Authority at this time."

Miscellaneous Topics

Councilman Mumpower thanked the volunteers for helping build the Top-A-Stop on Fairview Road. In addition, he thanked former Councilwoman Barbara Field for her good effort helping come up with the design for the Top-A-Stop.

Councilman Freeborn thanked Mr. Bill Hensley and a large number of parents to have worked on the playground at Vance Elementary School.

Councilman Newman spoke about the successful evening transit service and announced the 90-day ride for free promotional campaign starting on August 14, 2006.

Councilwoman Cape spoke about her participation in the Design Science Lab, which is a design science program formed in conjunction with the United Nations and other organizations to look at a problem-solving mechanism for regional issues.

Claims

The following claims were received by the City of Asheville during the period of June 30 – July 13, 2006: Hilbert Councell (Sanitation), Riley Cleveland (Transit Services), Ben Trotter (Streets), Sabrina Hilario Gilbert (Streets) and Progress Energy (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Reverend Christopher Chiaromonte asked Council to encourage the Bele Chere food vendors to give to the poor what they would only throw away.

Mr. Gene Hampton spoke about how the quality of life begins with quality education.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 7:03 p.m.

Keesha Lee
CITY CLERK

Terry M. Bellamy
MAYOR

Monday – July 31, 2006 - 9:00 a.m.
Room 202 – Haynes Building
A-B Technical Community College
Enka Campus

Special Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman (participating via speaker phone); City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Present: Buncombe County Chairman Nathan Ramsey, Presiding; Vice-Chair Bill Stanley; Commissioner David Gantt; Commissioner Carol Peterson; Commissioner David Young; County Manager Wanda Greene; County Attorney Joe Connolly; and County Clerk Kathy Hughes

Present: Senator Tom Apodaca; Senator Martin L. Nesbitt, Jr.; Representative D. Bruce Goforth; and Representative Susan C. Fisher (Absent: Representative Wilma M. Sherrill)

Mayor Bellamy called the meeting to order at 9:00 a.m. in Room 200 of the Haynes Building at the A-B Technical Community College's Enka Campus. Vice-Mayor Jones then moved to recess the meeting to Room 128 in order to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; and State of North Carolina. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilwoman Cape and carried unanimously.

At 9:50 a.m., Mayor Bellamy recessed the closed session to reconvene the meeting in Room 200.

At 10:10 a.m. Mayor Bellamy and Chairman Ramsey called their respective boards to order to discuss water-related issues.

Mayor Bellamy recapped the City's position from the last meeting on July 17, 2006, noting that each offer has received consensus.

Mayor Bellamy recapped the City's position from the County's latest proposal, noting that each item has received consensus by the City: County's latest proposal points: (1) water will be a municipal system – the City agrees to that; (2) the County and the water districts will transfer to the City both the title and responsibility for all water facilities – the City agrees to that; (3) there will be no differential rates – the City could agree to that, subject to tax equity payments with a Consumer Price Index (CPI) attached on a 20-year agreement; (4) there will be no diversion of water revenues, and this will be verified annually through an independent review – the City could agree to that, subject to tax equity payments with a CPI attached; (5) water will not be used as a tool to force annexation – the City will accept the provision from the County's June 2005 offer that new developments within a half-mile can be annexed using the same criteria other North Carolina cities utilize; (6) the City will transfer to the County both title and responsibility for McCormick Field, Nature Center, Golf Course, Recreation Park and the Civic Center. (This relieves the City of a net operating loss that is currently $1.1 million annually and which will grow substantially in the future. Additionally, the County could address the much-needed and long-deferred issue of improving or replacing the Civic Center.) – the City is open to discuss this but wants to focus on water prior to any discussions on this provision; (7) all lawsuits on water issues and any related claims will be dropped – if the City receives support on the above responses, then this provision

would be dropped; and (8) the County and the City will cooperate in seeking the appropriate legislation necessary to implement this agreement. She said that if there are changes to the offer made by the County, she will ask for a recess in order for Council to consider those changes.

Commissioner Gantt said that the County believes very strongly that an independent authority is a much better choice for the people they represent. An independent board will save millions in betterment costs as that money could go back into the system. The County's principles are that everyone should be treated the same, money brought in from water should go back into fixing the system, and delivering water at the lowest possible cost. The independent board would be non-political and by far the most economical way to achieve those goals for the people they represent. The Metropolitan Sewerage District ("MSD") model is a successful model. The offer from the City on July 17, 2006, was basically $125 Million over the next 20 years payment or some compensation to City Council and the water would be a City-run department along with some negotiation about the ½ mile annexation. On the County's last offer, they offered a City-run department and $1.1 Million to settle the matter. They will not enter into any serious discussions about using County money in any way for the $6.2 Million, plus a CPI, over 20 years without some accountability for where the money is going to go and how it's going to be spent. We also believe the package should include the community assets, such as the Civic Center, Recreation Park, etc., that were in the Water Agreement in 1981. We concede these are regional assets and we think the County should be at the table from a financial standpoint. Our understanding from the last meeting that that was something City Council wanted to discuss separately, however, we feel that it was very important to put that together with the water discussions, just as it was 25 years ago.

Upon inquiry of Senator Nesbitt, Mayor Bellamy said that the City will commit to this agreement for 20-years.

Upon inquiry of Representative Fisher, Mayor Bellamy explained that the $6.2 Million tax equity payment is 85% of the average differential across the State of North Carolina.

Councilman Mumpower said that Asheville should be treated like all other cities who own their water assets, noting that the City of Charlotte is essentially the whole County of Mecklenburg and is in no way similar to Asheville. He felt that the City has already compromised going down from 100% of the differentials to 85%, noting that City taxpayers will be paying 40% of that.

In response to Senator Nesbitt, Councilman Mumpower said that City Council has talked about how important it is that the differentials be implemented incrementally over time. In fact, one of their proposals was a 40% rate differential over a 7-year period and the freedom to go beyond that later, which would represent an increase in the County bill of approximately $7 a month.

Upon inquiry of Representative Goforth, Mayor Bellamy said that the City's non-betterment costs to the N.C. Dept. of Transportation over the past five years was approximately $600,000.

Representative Goforth felt the City should solicit proposals to see what they can get for their investment if the water system is run by an independent authority.

Vice-Mayor Jones said that there are other issues, other than money, with an independent authority. An independent authority is removed from the people and a City-run department holds direct accountability to City Council.

Chairman Ramsey said that if the City Council is willing to consider an independent authority, then we need to find out the numbers so there can be a weighing of the different attributes of each model.

Mayor Bellamy said the County's concern over the $6.2 tax equity payment was that they can't justify where the funds would go. The County can designate a portion of funds to go to the Civic Center or to the Golf Course, etc. and it is easy for the City to track those funds so the County can have that direct accountability. City funds are easily trackable and that should not be a hindrance to the negotiations.

Upon inquiry of Mayor Bellamy of where the County's offer of $1.1 Million came from, Chairman Ramsey said that figure is the annual operating costs of McCormick Field, the Nature Center, the Golf Course, and the Civic Center. That figure doesn't include the capital costs and under our offer the County taxpayers as a whole would take over the financial responsibility for the capital needs of those facilities. In reality, it will potentially be much greater than $1.1 Million. If the County taxpayers as a whole take over the financial responsibility for those facilities, then the County should have the control of those facilities and they can work with the City and the local delegation on the ultimate needs for those facilities, e.g., location, needs, etc., and find funding of those needs.

Mayor Bellamy felt that if the water system will be a municipal run system and the County's concern is the $6.2 tax equity payment, she feels that can be negotiated.

In response to Councilman Mumpower, Chairman Ramsey reiterated that it is the County's contention that the City doesn't own the entire water system and the court system will make that determination.

Senator Nesbitt felt it would be beneficial for the City and the County to exchange data to support each's position on who owns how much of the water system lines.

A brief discussion took place regarding condition of the Civic Center and the City's efforts in addressing the issue.

In response to Senator Nesbitt, Mayor Bellamy said that it's important to honor the past, but we have been elected to look at the future.

Chairman Ramsey said that we do want to settle this without litigation. He feels that what is separating the City and County, if we are talking about a municipal department, is the money. Our Board would still like to consider an independent authority and would be open to that discussion. If the City would agree to an independent authority, we realize the City would be making a major concession and based on that, there would be significant more compensation to the City and how that compensation would be paid would be open for negotiation.

Vice-Mayor Jones felt that our offers are much closer. The last litigation that was settled around this in 1958 with Candler, one of their conclusions was "the City of Asheville, however, still has the right to establish a different rate for service outside it's corporate limits to persons, firms and corporations not located or residing in a district that has constructed and maintained at its own expenses water and water systems." This is part of the trail that we are trying to honor.

Councilman Davis explained that when the City terminated the water agreement, we were at a point to where the Water Authority was dysfunctional and the system was not functioning. The City had a study performed, which directed the repair of the system and we are moving rapidly towards fixing the system. We are providing good water at a reasonable rate, as reasonable as you can when you live in the mountains. Our water bills look extorted because of

the MSD charge is printed on our bills. We are trying to get people to pay their fair share. He would not be willing to consider an independent authority.

Councilwoman Cape explained that an independent authority isn't accountable to the citizens. She felt the City of Asheville is doing a great job in managing their water system and should have the right to continue to do so.

Councilman Mumpower's position was that he didn't care if it was a city-owned system or an independent authority, as long as the City is fairly compensated for giving up control of the water system.

Councilwoman Cape felt that if the County thinks an independent authority is the answer, then give Council the data to support why the County thinks it's in the City's best interest.

Commissioner Gantt felt that the County provided that data in the 2004 offer combining recreation and water.

Councilwoman Cape didn't think that mixing everything in one pot is the best way to make decisions. We are all interested in working together on all those things, but it just doesn't have to be in one bundle to best represent our citizens.

Chairman Ramsey said some benefits of an independent authority include: (1) takes away the non-betterment costs; and (2) guarantees that 100% of the water money goes back into the system; and (3) since 45% of the customers live outside the City limits, it better reflects that it is a community-wide collaborative approach. He said that the County is willing to agree to a municipal-run system, and we also understand the concerns that Councilman Davis has that if the City absorbs additional costs that other municipalities in Buncombe County don't have to occur, then we are willing to look at those tax equity pieces to come up with a package to make sure that City of Asheville residents aren't unfairly burdened. But if the City is asking for $6.2 Million and the County is offering $1.1 Million, then we won't be able to come to terms.

Mayor Bellamy said that we all understand that the City wants a municipal-run system, the County doesn't want any diversion of funds, and the County doesn't want any rate differentials. We agree to that for 20 years. Regarding the compensation, she suggested we direct our respective managers to discuss that issue and report back to their respective bodies.

Councilman Mumpower asked that Asheville be allowed to start an aggressive differential process and cap our differential at 25% for five years and then after than make it incremental. Then we have a clean system and don't get into all these other complexities.

Representative Fisher asked if the City can show how much money of that money will go to the Civic Center, Golf Course, McCormick Field and Recreation Park, and how much of those facilities are used by County residents, City residents, and regional people. If that can happen, then why can't we just look at that piece and go on with the water agreement alone.

Councilman Gantt said that the County is willing to take those facilities back and that the County still has bonds that they are paying off at about $400,000 a year.

County Manager Greene asked that she and City Manager Jackson be given a compensation number to work with.

In response to Senator Nesbitt, Councilman Davis said that he does have difficulty in giving the recreational assets to Buncombe County, particularly the Civic Center. He feels that the County did a major renovation at McCormick Field but there is a quality of service by the

County that he is not comfortable with. We need to be accountable to our people and if we give that to the County, the City will lose that control.

Regarding the Civic Center, Senator Nesbitt said that the people of this area deserve more than the current Civic Center. They deserve a place where we can bring culture to this area, a meeting place for this area, and we can draw major events. He doesn't think that venue does that or that it will do that.

Chairman Ramsey said that after listening to City Council, an independent authority is off the table. His Board will have to discuss (1) the 20-year term because his Board would prefer a longer term; and (2) the title and responsibility for recreational facilities. Again, his Board does not want any rate differentials. He would support giving our respective managers direction but was uncertain what that direction would be, given the City's $6.2 Million offer and the County's $1.1 Million offer.

Mayor Bellamy said that the City has spent the last eight months working on a plan of action for the Civic Center that includes looking at Parkside, a renovated arena, a performing arts center, etc. We can't do any of the proposals by ourselves. Are you willing to assist us in renovating the facility, whether it's where it is or moving it. Vice-Chair Stanley said that the County has been willing to assist from the very beginning. Mayor Bellamy said that since the County is willing to help us, then how is that different from our $6.2 Million we are asking the County to assist with the funds if we know that we need help on this facility that you have agreed to help us. That can get us where we need to go and that fund would be set up differently with County oversight. The main point is how can we help each other. If the County needs an oversight committee, we would not be opposed to that.

Mayor Bellamy said that it appears that the recreation facilities and the compensation issue are intertwined. She feels that the respective managers should look at this issue because whatever plan the City comes up with at the Civic Center, the City cannot do it alone. We need the help of the County Commissioners and the state legislators. City Council is willing to discuss McCormick Field and the Nature Center.

Chairman Ramsey said that in the County's most recent offer asked that we be given title to those recreational facilities because we recognize that significant money needs to be spent on them. We would need to be able to issue bonds against those facilities to pay for that work. It was our hope that in the future we could receive alternative revenue sources to pay for those, but we also understood that the alternative revenue sources would not pay for 100% of the capital improvements. So it would need additional County tax dollars. The debt service on a $50 Million debt is $3 Million a year. If you combine the $1.1 Million operational costs and the $3 Million annual debt service, the amount is $4.1 Million. He would not support the County paying $6.2 Million.

At 11:46 a.m., Mayor Bellamy recessed the meeting in order for City Council to reconvene their closed session in Room 128 in order review the $6.2 Million tax equity amount.

At 12:25 p.m. Councilman Davis moved to come out of closed session and reconvene the meeting in Room 200. This motion was seconded by Vice-Mayor Jones and carried unanimously. (At this time, Councilman Davis left the meeting.)

Commissioner Gantt said that they unanimously indicated that the County is not comfortable in giving unearmarked money to City Council under any circumstances. We can't borrow the money unless we have title to the facilities. The offers that the City has made indicate almost a presumption that there is a right to charge differential rates and a right to use the money for other purposes other than water, which we believe you do not have that authority. Any

discussions we have concerning agreements need to be permanent and not a 20-year duration because we don't think it is in the best interests of the people we represent to come back in 20 years and do this all over again.

Chairman Ramsey said that the only other alternative to raise the funds would be a General Obligation Bond to be voted on by the taxpayers.

Mayor Bellamy confirmed that the County's offer of $1.1 Million will not change unless the City gives them title to the facilities.

Mayor Bellamy noted that the County has debt on McCormick Field and they don't have title to it. County Manager Greene responded that they had to pledge another asset because they didn't have clear title to McCormick Field.

When Vice-Mayor Jones asked if we have the appraised value of the Civic Center, McCormick Field, Recreation Park and the Golf Course, City Manager Jackson said that he did not have those figures available.

Mayor Bellamy said that the reason why the water agreement was terminated was because Asheville wanted to be treated like all other municipalities in North Carolina. Today we were willing to reduce on our rate differentials because that is something that other municipalities are negotiating, however, the City of Charlotte has other funding mechanisms to help with other things in their community. We need help with our regional facilities and we have heard clearly from the County that they are willing to help, but we need a commitment from our legislators as well.

Senator Nesbitt said that the legislative delegation is ready, willing and able to help with the Civic Center, but they need to have a product to sell. He was agreeable in taking the studies and needs already identified by the community, however, he wanted someone to take a regional look at the Civic Center so that we make sure when we spend this money that we are doing what we need to do for the next 30-50 years.

Mayor Bellamy said that Council is now offering the compromise from a $6.2 tax equity payment from the state average of 85% to a $4.5 Million tax equity payment, which represents approximately a 64.5% of the state average. With the water agreement, we were at $2.4 for law enforcement and $1.1 that we received from the water system to help with these issues. We are now only asking for $1 Million, which would represent 65% of the state average. When we terminated the water agreement, we wanted to make sure that the system was being effectively repaired and we wanted to make sure we had orderly growth and management. Over the last 18 months we have proven that we can run that system. Again, we are willing to come down to $4.5 Million, which represents 65% of the state average to prove to you that we can do a good job.

Chairman Ramsey said that based on the current offer on the table by the County, if the County took over title to the Civic Center, the debt service on a $50 Million debt is $3 Million a year. If you combine the $1.1 Million operational costs and the $3 Million annual debt service, the amount is $4.1 Million. Again, he said that the County would need title to the Civic Center, Recreation Park, McCormick Field and the Nature Center so they can issue debt on those.

Vice-Mayor Jones felt there are other ways to re-direct money that would not impact the County's bottom line, i.e., how the sales tax is allocated now. If there is a genuine willingness to dig deep, there are ways to come up with the money.

Mayor Bellamy said that City Council has given direction to City Manager Jackson to work with the County Manager on the $4.5 Million tax equity payment to see what kind of an agreement could be worked out.

Chairman Ramsey said that the County has given the City the scenario of the $4.1 Million tax equity payment.

Vice-Mayor Jones felt that the County Manager needed to have broader discretion in how to come up with compensation, other than the only way to get to the $4.1 Million is for the City to give title to the facilities so the County can issue debt. If that is the only way, then she is not willing to go down that road.

Senator Apodaca said that this is like a marriage in that we dated in the 1920's and decided to get married around 1935-40. Then a couple of years ago our partner wanted a divorce - didn't tell the other partner, just went to a lawyer and got a divorce. He said we now have issues about who brought what assets to the marriage and that issue has to be decided first. The other issue is that the partner who instituted the divorce now wants child support in addition to other things. The City wants their cake and icing too. The City doesn't want to give up the Civic Center, McCormick Field, etc. but still wants to keep the water monies. He said they have to draw the line somewhere. It may come to the point where the delegation may have to decide and they don't want to do that. He said that temporarily they did, but they can undue whatever they did if they are so inclined - if it is going the way it should.

Chairman Ramsey and Mayor Bellamy agreed that the respective managers will sit down and discuss the tax equity issue and see what the next steps will be. In addition, they directed them to arrange another follow-up meeting date.

At 1:10 p.m., Mayor Bellamy and Chairman Ramsey adjourned their respective meetings.

Sonja Lyle
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday -- August 15, 2006 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

TAX BILL EDUCATION

Chief Financial Officer Ben Durant said that per City Council's request, staff has prepared a report on the Fiscal Year 2006/2007 tax bills for real property, which taxpayers will begin receiving during the month of August.

He said the Buncombe County Tax Office mails out tax bills on real property (residential, commercial, & industrial) in early August of each year, and the bills are due on September 1st. There is, however, a four month grace period that allows taxpayers to pay their bills up to January 5th before interest is added. In effect then, January 5, 2007, is the deadline for paying Fiscal Year 2006-07 property taxes.

All City of Asheville taxpayers pay property taxes to both the City of Asheville and to Buncombe County. In addition, approximately 65% of City taxpayers also pay the City School District property tax. Each of these taxing jurisdictions adjusted their property tax rates for Fiscal Year 2006-07 in response to the recent revaluation. The City of Asheville adopted a revenue-neutral tax rate, but Buncombe County set its rate above revenue-neutral. The table below highlights the Fiscal Year 2006-07 tax rate changes:

Jurisdiction	FY 2005-06 Tax Rate	FY 2006-07 Tax Rate
City of Asheville	53 cents	42.38 cents
Buncombe County	59 cents	53 cents
City School District	20 cents	15 cents

He reviewed two sample tax bills for City taxpayers whose property increased by the city-wide average of 45%.

Upon inquiry of Councilman Mumpower, Mr. Durant said that we are not realizing any more revenue this year than last year, except through growth and except for the adjustment we had to make to compensate for the loss of sales tax revenue.

In response to Vice-Mayor Jones, Mr. Durant said that the County-wide average property values went up was 45% due to re-evaluation. He explained that there are many different scenarios that could show a reduction in property taxes as well, since the City's tax rate is revenue-neutral. He said that he could provide additional information to Council showing the different property values in different areas of Asheville.

When Councilman Mumpower asked what the average increase was for a City resident's tax bill increase, noting City residents are also County residents, Mr. Durant said that it was a little more than 10%.

Mayor Bellamy proudly noted that the City started this fiscal year "in a hole" and still decreased our tax rate for Asheville citizens.

In response to Councilwoman Cape, Mr. Durant said that the City has very little influence in the reevaluation process, since counties are statutorily responsible.

Mayor Bellamy urged elderly residents to call the Buncombe County Tax Collector to see if they are eligible for the Homestead Exemption for a reduction in their property taxes.

DOWNTOWN POLICY DIRECTION AND SERVICE LEVELS

Economic Development Director Sam Powers said that the purpose of this staff report is to provide a brief review on limited specific issues and to "test the aim" on these specific issues relative to Council's policy wishes.

City Council has outlined downtown priorities through documents such as Council's Strategic Operating Plan, and the Asheville Center City Plan. These plans share a vision for Downtown Asheville as a safe, clean, physically attractive, vibrant business and residential area with a strong sense of place.

Public Restrooms: In 2002, City staff, led by Parks and Recreation staff, conducted a survey of publicly owned or available restroom facilities, and also outlined options from other cities that provide public restrooms. This survey was updated in July 2006. The updated survey shows that there are 32 publicly-owned facilities in the downtown area, some being, but are not limited to: 29 Haywood Street, Pack Library, Civic Center, Skateboard Park, City Hall, Courthouse, Transit Center, etc. Availability for use by the public and hours of operation for many of these facilities is limited. New public restrooms will be part of the new Pack Square Park when it is completed, however, the facilities will not be available until 2008.

He showed examples of public restrooms located in Black Mountain, N.C.; Boulder, Colorado; and Atlanta, Georgia, briefing outlining the budgets, type of restroom, and maintenance schedule.

Mr. Powers said that the restrooms at 29 Haywood Street were closed in February of 2002. If those restrooms are to be re-opened, the issues would be the operation and maintenance and the need for an attendant. Determination of a user profile for development of any new downtown public restrooms will be a policy decision to be answered as any process moves forward.

Cleanliness/Graffiti: Part of the challenge for downtown is the lack of a sustainable, dedicated funding source for many of the elements that community leaders observed on a recent trip to Greenville, SC. In Asheville, services such as sidewalk cleaning, litter and trash pickup and the provision of receptacles, landscaping and streetscapes, graffiti, policing, street maintenance and bulb outs, are under different city departments, and there is no "downtown" department to coordinate efforts. City staff, led by the Assistant City Manager, has convened a "Downtown Staff Task Force" to keep abreast of initiatives downtown and to coordinate activities that affect downtown, such as the Pack Square construction project. Increasingly, downtown is subject to very large amounts of pedestrian traffic from visitors/tourists which strain the City's ability to keep up with trash generated and which heavily contribute to the dirty conditions on the sidewalks.

Wayfinding/Kiosks: The need for a comprehensive Wayfinding/Signage Program has been identified as a goal of the Center City Plan. Recent public presentations by nationally known expert Roger Brooks heightened awareness of the need to redevelop a comprehensive system that includes color coding and uniformity in signage, and incorporates other elements such as kiosks and banners into the overall program. The City's MPO Coordinator, Dan Baechtold, is serving as the Project Manager for the Wayfinding initiative, and Dan has met with Buncombe

County Tourism officials to begin development of the specifications for the signage development portion of the Wayfinding Program. Buncombe County Tourism leaders have expressed a strong interest in moving the gateway and signage element forward in cooperation with the City and other partners. Expectations for the type of kiosk system, i.e., static stationery vs. electronic interactive, to be incorporated into the overall Wayfinding program, will determine the kiosks development and where the kiosks are to be located.

Pack Square Park: The Pack Square Park is scheduled to be completed in 2008. Once the park has been completed, there will be additional operational and programming expectations. The park will become the showplace for the downtown area and will be in high demand for use by many groups and individuals. Prior to construction, over 80 groups used this area which will rise to well over 100 due to everyone wanting to be in this area. A management plan will need to be agreed upon between the City of Asheville and Pack Square Conservancy to ensure that this area is maintained to a high level and that overuse does not result in increase maintenance and destruction to the park. This management plan will need to allow for certain areas of the park to be closed periodically for protection of the grounds and turf management. In addition, a clear delegation of responsibilities will need to be outlined as it relates to programming of the space. Pack Square Park will add to the economic vitality of the surrounding area, much like what has occurred around Pritchard Park after that renovation. A strong revitalization plan for the surrounding area should be explored as completion of the new park occurs. Currently, Parks and Recreation staff is working with the Management Committee of the Conservancy to develop a management plan that will meet everyone's expectations.

He said that the Center City Plan can serve as the Master Plan for Downtown. Staff recommends that major stakeholders in the downtown area be convened to look at resource development and division of responsibilities. The stakeholders will review Council's goals relative to the Center City Plan and report back to Council with specific recommendations. These stakeholders include: Asheville Downtown Association, Tourism Development Authority, Chamber of Commerce, Buncombe County government, representatives of social service agencies such as A Hope, Quality Forward, Downtown Commission, Sustainable Economic Development Commission, City Council Planning and Economic Development Committee, DARN (Downtown Asheville Residential Neighbors), and key city departments.

Councilman Mumpower advocated for some action now on the public restrooms and the downtown kiosks. Regarding graffiti, Mr. Powers said that the City does work with Quality Forward by supplying materials on graffiti removal; however, the rate of graffiti is growing dramatically.

Councilman Mumpower would like to see us consider a reward fund for people who can identify vandals. He felt we could get people to contribute to that fund.

Vice-Mayor Jones also supported moving forward with public restrooms.

Councilwoman Cape asked for additional research on the cost of public restroom attendants, noting that the City should partner with groups. Mr. Powers said that some preliminary research has been done. We have talked with stakeholders and service providers and the possible solution seems to revolve around working with agencies like A Hope. They have expressed a willingness to do that and provide an attendant. He said that City staff's two issues with public restrooms are having them attended and where they are visible. A preliminary budget necessary for substantial upgrades to the 29 Haywood Street restrooms would be approximately $70,000.

It was the consensus of City Council to move forward on opening the public restrooms at 29 Haywood Street and instructed City staff to bring forward to Council a budget.

Mayor Bellamy said that in opening up the restrooms at 29 Haywood Street with an attendant, the idea came up about putting a kiosk in the corridor, or some public art, or individual vendor booths that have a product to sell. People will be traveling in and out of the corridor and it will make the people feel safe. In addition, we need to make sure that the parking deck stairwells are cleaned on a regular basis. She suggested some signage be placed in the stairwells of where the public restrooms are located.

Mr. Powers believed that there is funding in the budget that will help with the maintenance in the stairwells.

Councilwoman Cape also envisioned the corridor at 29 Haywood Street as being one of the kiosk areas.

Councilman Freeborn requested information on the stainless steel, self-cleaning facilities. Mr. Powers said that he would provide more information; however, they are in the neighborhood of approximately $100-$200,000.

Councilman Newman said that the Buncombe County Tourism Development Authority (TDA) is very excited at the Wayfinding Program and suggested that we talk to them about some capital costs out of their earmarked product development monies since Asheville is the product.

Councilman Davis agreed with Councilman Newman that we should explore with the TDA a percentage of their product development monies to maintaining our core services, like street cleaning, restrooms, signage, etc. He also felt we should consider restrooms that are family-oriented.

Councilman Davis felt it was an appropriate time to revisit the Downtown Social Issues Task Force Report, which Council accepted. They made several recommendations and we should work with them as partners. In addition, Mr. Dwight Buckner, member of the Downtown Social Issues Task Force, has requested permission from City Council to put up the "Spare Change for Real Change" boxes, the program for people to put their change in the boxes instead of to the homeless.

Upon inquiry of Councilwoman Cape, Mr. Powers said that we will talk with private companies with public restrooms, i.e., BB&T Building, Pack Place, about their hours of service when the restrooms are open.

Councilwoman Cape also asked for information if there are restrooms located under the Pack Square monument.

Councilman Mumpower said that one of the main reasons most public restrooms are not open to the public is because they are abused, and public safety should be an important component. He also spoke more strongly in stand-alone kiosks in public view.

Mayor Bellamy felt that the individuals that traveled to Greenville, S.C., recently would be a good group to be included in the stakeholders. She looked forward to having the stakeholders review the Center City Plan, with Council's goals in mind, and bring their recommendations back to Council.

Mayor Bellamy asked that City staff investigate a policy regarding the placement and maintenance of newspaper stands.

Mayor Bellamy also asked that the Transit Facility be more inviting with perhaps hanging baskets.

Councilwoman Cape asked City staff to look into the possibility of recycling containers downtown.

In response to Councilman Freebom on a timeframe for the stakeholders meeting, Mr. Powers said that the TDA, last week, had a public meeting where they rolled out their marketing plan for the coming year. The TDA expressed a strong commitment in partnering with the City to push the Wayfinding issue forward. Mr. Baechtold has taken the lead role of project manager and has had several meetings with the TDA staff. As soon as the TDA designates a staff person, he will work with Mr. Baechtold. He feels we are moving at a good pace for getting a Request for Proposals developed and certainly within 120 days we should be able to start developing criteria for the Request for Proposals to move the project forward.

Vice-Mayor Jones said that in terms of the Wayfinding Program, we should design our signs or ordinances around what works for our community.

Vice-Mayor Jones stressed that cigarette butts are trash and people should be educated to not throw them on the ground. In addition, she asked that the cleaning of the sidewalk grates be cleaned on a more frequent basis.

Councilwoman Cape explained why she felt the graffiti should be removed as quickly as possible instead of having of a reward fund for people turning in vandals.

In response to Councilwoman Cape, Councilman Davis said that he would take the Downtown Social Issues Task Force Report back to the Downtown Commission for their updated review prior to bringing it back to City Council.

It was the consensus of City Council to have the stakeholders review the Center City Plan, with Council's goals in mind, and bring their recommendations back to Council.

WATER UNIFORM RATE DIRECTION

Councilman Newman said that earlier this year Council held a lot of discussions about the analysis that has been done about what we need to do to investing in the long-term repair and maintenance of our water system. We have begun a Capital Improvement Plan that begins implementing repair of our long neglected water system. We also had discussions about what is our plan going to be in terms of the overall rate structure since the City is running our water system again. Did we want to continue with the rate structure under the old Regional Water Authority or do we want to look at some other models. We had discussions about moving toward a uniform rate policy. Some members of Council were interested in making that policy during the budget process, but it was decided to deal with that as a stand-alone issue.

He reminded Council that during the budget process, we approved a new meter based fee to fund the Capital Improvement Plan. Separate from any tweaking or fundamental changes we might want to make to the meter based fee, he asked Council to consider (1) do we want to move towards phasing in a uniform water structure over the next 4-5 years; and (2) if we do move towards phasing in the uniform water structure, do we want to maintain our existing rate structure for our manufacturing customers, due to the economic climate and the importance of that sector to retain jobs in our community. He supported both.

Councilman Davis felt that he could not support moving towards a uniform water structure at this time because small businesses are having to pay a stormwater fee, business license fee, meter based fee, parking fees, etc.

Councilman Freeborn felt we should move toward a uniform rate. He felt we should go back and review the Capital Improvement Plan meter based fee and base it on consumption, not on meter size. He felt everyone should pay the same for the quality of water they get.

Mayor Bellamy felt that next month we will have had almost 3 months data with the Capital Improvement Plan fee and that can be discussed at the next worksession. She has asked City staff to report back to Council on bonds.

Councilwoman Cape supported the uniform rate structure being phased in over five years. She felt that we needed to be a partner with businesses and residences in the community to help them find ways to make water cost-effective. We need to be good stewards and look the long term of our water usage, especially with development pressures, more people moving into our community etc. The best way to do that is to make sure that everyone is using water a cost-efficiently as possible. She thinks that in five years we should have some best practices that will help people reduce their bill, but they must also work toward efficiencies. She, too, would be interested in getting more information on possible changes to the Capital Improvement Plan meter based fee.

Councilman Mumpower felt that we should revisit this issue at another time since not only have we not ironed out some of the confusion on the Capital Improvement Plan meter based fee, but we are in serious water agreement negotiations.

Councilwoman Cape felt that if we do have the exclusion for manufacturers, that we must be clear on the definition of a manufacturer.

Vice-Mayor Jones would be supportive of a uniform water rate being phased in and asked for information on the wholesale rates.

As a secondary issue, Councilwoman Cape asked for information about the flood and the relationship with the amount of water we are overflowing.

Mayor Bellamy said that instead of making a decision at this time about a uniform water rate, to begin in 2007, it would make sense that we challenge staff at the next worksession to (1) look at our ability to issue debt; (2) see what our capital improvement needs are for the water department; (3) look at our Capital Improvement Plan rate; and (4) look at the best way to put money back into the system.

MAXWELL STREET TRUCK REGULATION

Police Chief Bill Hogan said that City Council has continued to receive concerns from citizens regarding traffic problems along Maxwell Street, specific to truck deliveries that occur at the west end of the Greenlife Grocery Store, adjacent to Maxwell Street.

I. Physical Conditions
- Area includes a mix of zoning districts (CB-II, RM-8, NCD and HB)
- Affected roadways include Merrimon Ave., Maxwell St., and Marcellus St.
- Maxwell Street is split-zoned CB-II & RM-8
- Uses in the area include single and multi-family residential, small office and service uses, and a 20K square foot grocery store with an 89 space parking lot.

II. Past Actions
- Redesign of loading dock, parking lot, and driveways to minimize use of Maxwell Street by trucks

- Enforcement and direction as described by the Asheville Police Department (APD). A summary of citations are as follows from 1/1/05 to 6/30/06: 64 calls for service regarding improper parking on Maxwell Street. APD has issued 24 parking citations, 2 warning parking citations, and 63 other traffic citations issues to vehicles on Maxwell Street.
- Direction of trucks to enter and exit via Merrimon Avenue, using Maxwell only at the loading dock
- Posting of 'No Trucks' signs on Maxwell. ('No Truck' signs are intended to restrict through truck traffic but allow local truck delivery).
- Loading dock chained to prevent deliveries between 6 pm and 6 am.
- Trash dumpster was replaced with a trash compactor to more readily handle garbage disposal.
- Affected parties have participated in mediation efforts.
- Installation of a wood panel privacy fence along the loading dock area in addition to the landscape buffer was approved for the project.

III. Current Traffic Patterns

- Trucks are supposed to access to and from Merrimon Avenue.
- A few trucks still enter via Broadway to Maxwell.
- Some parking encroaches into neighborhood, but Greenlife has mostly curtailed this through direction to employees and addition of more on-site parking.
- Driveway on Maxwell provides a good route to the signal at Merrimon & Chestnut, a safer means of exiting than at the Greenlife driveway on Merrimon.
- Truck Delivery Volume: Over a recent four day period, Greenlife received 56 truck deliveries. Approximately 25% of those trucks were large trucks, which assess the larger loading dock; most trucks utilized Maxwell Street in order to access the smaller loading dock because this loading/unloading area only has an entrance/exit from Maxwell Street.

IV. Concerns

- Proliferation of Traffic Violations (illegal parking & blocking of public right-of-way)
- Increased Opportunity for Noise Violations
- Land Use Conflict – although the residential area is zoned to allow medium density multi-family, the majority of residences are single family and are adjacent to a medium impact grocery retailer.

V. Options/Alternatives

Traffic Engineering Options:

1. **Prohibit trucks on Maxwell except getting in and out of loading dock.**
   Considerations:
   - Requires Council ordinance.
   - Affects everyone on Maxwell Street; i.e. moving trucks would be prohibited for residences.

2. **Construct devices in street to physically prevent trucks from bypassing.**
   Considerations:
   - Removes parking.
   - Limits access for all large vehicles, not just those bound for Greenlife.

3. **Limit truck size and/or number. Application proposed use of ~40' single-unit trucks. Subsequent conversations estimated one large truck per day, or 4-5 per week.**

400

Considerations:

- Burdensome economic impact on business.

City Attorney is researching legal grounds for such restrictions.

Planning Options:

1. Add a noise wall or other noise mitigating measure around the existing loading dock area.

Considerations:

- Various mitigation measures can vary significantly in cost and effectiveness (i.e. Bamboo Screening = inexpensive & easy to install but limited effectiveness vs. Engineered Noise Wall = very costly but more effective).
- Developer has already exceeded current development requirements.
- Lack of adequate space to create a fully effective measure – cannot physically eclipse the entire loading area due to its existing configuration.

2. Possible reconfiguration of loading area to keep all truck maneuvering on site.

Considerations:

- Loading docks would remain in their present location.
- Will require additional land & development costs
- The additional property required is not owned or leased by Greenlife Grocery and would require acquisition.
- Would result in the loss of one single family home.
- Could be designed to keep all truck maneuvering and parking off of Maxwell Street.
- Would allow for additional buffering/screening of loading docks and trucks.

3. Conduct a zoning study to analyze compatibility of various zoning alternatives with the RM-8 properties in the area (two possible options are listed below).

Rezone RM-8 properties to NCD

Considerations:

- Allows for a greater mix of uses with more options for redevelopment.
- Resolves land use conflict issues over the long term.
- Eliminates the split-zoned right-of-way on Maxwell Street.
- Would correct some non-conforming uses while rendering others non-conforming.

Apply 'Adaptive Re-use' Overlay zoning to RM-8 properties

Considerations:

- Allows for redevelopment while maintaining the residential character of the structures.
- Does not eliminate the split-zoned right-of-way on Maxwell Street (underlying zoning remains the same).
- Would correct some non-conforming uses while maintaining conformity of other existing uses.
- Would encourage the conversion of residential uses to low-impact non-residential uses.

Economic Development Options:

1. Explore development plans of the Greenlife site with property owners to determine if opportunities exist to mitigate impacts through redevelopment.

2. Explore ways to estimate cost and design issues associated with the relocation of the loading dock.

3. Explore opportunities to plan for infrastructure and parking improvements that support redevelopment of the Greenlife properties and surrounding areas.

City staff recommends continuing to enforce city statutes pertinent to this site. In addition, to approach the property owners and discuss expansion plans in an effort to proactively address long-term parking and traffic issues associated with the site development.

Councilwoman Cape wanted the City to be much better at planning than just permitting. We need to be more sensitive in the future about integrating two different uses right up next to each other. She would love to have Mr. Swann to expand his store and move the loading dock. She wanted to make sure that the intent of our buffering and landscape laws are met.

Mr. Richardson said the officers at Greenlife Grocery have been pleased with the performance of the store. The performance of the store is outdistancing its physical capabilities in some ways. They want to be a neighborhood grocery store and a partner in the community. They feel they have taken significant efforts to mitigate the issues associated with the concerns of City Council. It is his understanding that Greenlife officers have talked with property owners; however, he did now where those discussions are at this point. But, City staff has expressed an interest to be at the table proactively at the front end of those discussions to look strategically long-term at traffic, parking and the effect on the adjacent streets.

Upon inquiry of Councilwoman Cape, Mr. Richardson said that he would research the cost to the City of the 64 calls for service.

Councilwoman Cape stated that she didn't like Maxwell Street being used for trucks and asked for clarification of the "No Truck" signs on that street. City Attorney Oast said that we run into a problem of where there is residential and commercial use on a street when we use those signs. We are still reviewing that issue. He also said that "No Truck" signs mean no trucks are allowed on that street unless the use of Maxwell Street is the only way to get to your point of destination.

Vice-Mayor Jones would like the loading dock to be moved. However, in that we don't have that power, she would like for there not be big loading trucks on Maxwell Street. If Council prohibits trucks on Maxwell Street, you are cutting off the Maxwell Street service entrance for Greenlife, which has always been there. If you prohibit all trucks on Maxwell Street, then you prohibit any trucks, including personal moving vehicles, on that street and that creates other unintended consequences. He said we have and will continue to work with the owners and operators of Greenlife Grocery in order to mitigate the traffic that has to go on Maxwell Street. Some steps have already been undertaken and have to some degree been successful. His opinion is that you will have a very difficult time prohibiting trucks on Maxwell Street and that an ordinance of that nature might be invalidated.

In response to Councilman Mumpower, Mr. Richardson said that in general "No Truck" signs mean no through trucks. You cannot use Maxwell Street as a street to carry you to a point of destination on property that does not abut Maxwell. There are two exceptions to the Code. The one exception that applies to this matter is the one that allows for the loading or unloading of a truck to and for property located adjacent to that public street - meaning that if a truck is accessing Maxwell Street to specifically access the loading dock, it is an exception to our code.

Mr. Anthony Butzek, Traffic Engineer, said that the signs were put up as we worked with Greenlife to mitigate and minimize the amount of trucks on Maxwell Street. We placed them at

points where trucks were coming in and making deliveries. Greenlife also made some changes to their driveway so the trucks could access to and from Merrimon Avenue. He said that we can remove the confusing "No Truck" signs and replace them with worded signs of "No Through Trucks." The intent was to make it obvious to the truck drivers that they were not to use that street.

When Councilman Freeborn asked if there was information available about how many of the 63 traffic violations were from people who live on Maxwell Street, how many generated from Greenlife, or how many were people just driving through the neighborhood. Mr. Richardson said he will have to get that detailed information, however, it is his understanding it is a combination of all those.

Councilman Freeborn felt the only real option is to make it physically impossible for trucks to go down Maxwell Street. He felt that this matter needs to be addressed and suggested a public involvement session where people from Maxwell Street and Greenlife work something out.

Councilman Newman's goal would be to get the trucks off Maxwell Street entirely for safety reasons as well. He did think there are different design ideas for that to happen and if there are future redevelopment opportunities he would be supportive of those conversations.

Vice-Mayor Jones requested that the gate that is open to the dumpster closed.

Councilman Mumpower thinks we have an unfortunate situation, but not a catastrophic situation. He thinks we are on the right track of working with the Maxwell Street neighborhood and Greenlife for a workable solution.

Mayor Bellamy said that the City Council will receive a report from Professor David Owens regarding his third party review of this issue and after that discussion, then Council can decide of how they wish to move forward.

When Councilman Davis asked what percentage are the 64 calls for service from residents living on Maxwell Street, Mr. Richardson said that approximately 90% of those calls are from Mr. Reid Thompson and some have been from Greenlife as well.

Councilwoman Cape recommended trucks be allowed in the loading docks and after they are unloaded, the gates are shut. And, that staging of the trucks not be on Maxwell Street.

Mayor Bellamy agreed there are ways to address this concern and we need the assistance of Greenlife to address this situation.

At 5:52 p.m., Mayor Bellamy announced a one-hour recess, at which time City Council would hold a closed session. Councilman Mumpower then moved to go into closed session in order to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: the City of Asheville and the State of North Carolina. The statutory authorization is contained in N. C. Gen. Stat. sec. 154-318 (a) (3). This motion was seconded by Councilman Davis and carried unanimously.

At 6:52 p.m., Councilman Freeborn moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

ILLEGAL IMMIGRATION POLICY DIRECTION

Councilman Mumpower said that this is a follow-up to the July 18, 2006, worksession item. He said that the problem is as follows:

1. Illegal aliens represent a significant public safety threat – DUIs, uninsured motorist risks, drug distribution, violent crime, repeat offenses, terrorism, etc.
2. Due to language barriers, ID falsification, legal and political restraints, and lifestyles founded outside of our society's civil structure, enforcement of our laws is spotty, inefficient, and expensive.
3. Illegal aliens represent a persisting social expense in terms of medical care, public education, social services, the judicial system, and other unfunded drains on our system.
4. There are currently 300,000 to 600,000 illegal aliens in North Carolina operating outside of the law under circumstances poorly conducive to cultural integration, personal accountability, and sustainable social order.
5. With the exception of the governments of other countries that generate broad based despair in their people, those who employee illegal aliens in this country represent the primary cause and solution to many of our issues with illegal immigration. If we begin enforcing our existing laws and expanding efforts to address those who illegally fund the exodus as a means to personal gain and circumventing the self-correcting nature of a fairly applied free market economy, we can reverse that exodus and strengthen the fragile top soil of our civilization and culture.

Recent State and Federal Actions that Impact on Local Government

1. NC SB 602 – Requires proper documentation to obtain a drivers license
2. NC SB 1523 – Requires all state schools to verify legal status of all new employees.
3. NC SB 1523 – Allows authorized state and local enforcement officers to perform immigration enforcement.
4. Congressional authorization has been created for local law enforcement officers to participate in a Delegation of Authority Program (287-G of the Immigration and Naturalization Act)
5. There is a local regional pilot initiative by Congressman Taylor (the first in the Country) involving WNC law enforcement bodies (strongly led by Henderson and Buncombe Counties) to solve the need for temporary jail facilities, legal authorization, and transportation issues.

What Can We Do?

1. Seek authorization of 2 or more existing APD officers (hopefully Spanish-speaking) as in the Federal Delegation of Authority Program.
2. Begin participation in the regional initiative to identify and intervene with illegal aliens who break our laws.
3. Take action (formal resolutions, direct contact, etc.) to request Federal and State authority to hold accountable those who knowingly employee illegal aliens without proper work permits, temporary resident status or citizenship.

Councilman Mumpower read the following letter he received from Congressman Charles H. Taylor on August 10, 2006: "As you are no doubt aware, the issue of illegal immigration is one touching communities across the nation -- including our own, here in Western North Carolina. The illegal aliens present in the State of North Carolina now place us in the unenviable position of eighth in the nation for population of illegal individuals, at an estimated 300,000. While the responsibility for addressing the ever-growing illegal immigration problem rightly rests with the federal government, it is very often our own local law enforcement agencies who first encounter

illegal aliens, during the course of their daily policing duties. In such instances, these officers can find themselves working against a morass of confusing jurisdiction, legal and bureaucratic obstacles, rather than moving swiftly toward the goal of ensuring that those who break our nation's immigration and public safety laws are incarcerated and deported. Fortunately, a federally-authorized program exists to assist our local law enforcement agencies with this growing challenge. Section 287 (g) of the Illegal Immigration Reform and Immigrant Responsibility Act created a program of intergovernmental cooperation to facilitate the handling of illegal aliens by state and local law enforcement officers. Pursuant to a memorandum of understanding between federal immigration and Customs Enforcement (ICE) officers and their local counterparts, local law enforcement officers may receive particularized training and the necessary resources and latitude to pursue investigations relating to illegal aliens -- including violent crimes, human smuggling, gang and organized crime activity, narcotics smuggling and money laundering. Officers in the Charlotte area have executed such an agreement with ICE agenda, and have experienced tremendous success in pursuing and prosecuting criminal cases involving illegal aliens. Based on interest expressed to me by several local law enforcement agencies in Western North Carolina, it is my hope to create a regional 287 (g) program in our area. As the largest metropolitan area in the Eleventh District, the City of Asheville certainly has a role to play in the success of such a program. Accordingly, I want to extend to the City my enthusiastic invitation to participate actively in a regional 287 (g) initiative. I look forward to working with you and the City of Asheville's law enforcement community to advance this program."

Police Chief Bill Hogan responded to various questions/comments from Council, some being, but are not limited to: out of the 13,711 arrests in 2005, how many were created by illegal immigrants and what was the nature of their arrests; if City Council approved two additional police officers, where would those officers be placed and would those officers be assigned to illegal immigrants; what is the guidelines for bail for illegal immigrants, especially relating to violent crimes; does the Police Department consider Driving Under the Influence a serious crime; have we had any illegal immigrants create violent crimes or drug trafficking in the last 90 days; what group is the leading provider of hard drugs in Western North Carolina; how many beds are in the Buncombe County Jail; how is an illegal immigrant identified if they have no identification; what percentage of illegal immigrants are in the ICE system; what percentage of the people arrested and taken to the Buncombe County Jail come from the City; are our officers experiencing frustration with arresting people who have no identification; and can you adjudicate someone with an identification.

When Councilman Freeborn asked if illegal immigrants are a problem for the Asheville Police Department since out of the 13,711 arrests in 2005 approximately 6.2% were suspected illegal immigrants, Police Chief Hogan said that this is not an overwhelming problem for us now.

Upon inquiry of Councilman Mumpower, Police Chief Hogan said he has no objection to participating in the Federal Delegation of Authority Program.

Mayor Bellamy said that at the July 18, 2006, worksession, there was support on Council to adopt a resolution.

City Attorney Oast presented City Council with a resolution adopted by the National League of Cities Board of Directors on July 21, 2006, which supports comprehensive immigration reform. He also presented City Council with a draft Asheville resolution in support of immigration reform. In the Asheville resolution, it reads "The City Council does hereby recognize the substantial contributions that immigrants have made to the City of Asheville, and requests that action be taken at the federal level to enforce immigration laws, and to devote sufficient resources to enforce those laws, as set out in the above-referenced National League of Cities resolution. The City Clerk is hereby directed to transmit a copy of this resolution to Senators Elizabeth Dole and Richard Burr, and to Congressman Charles Taylor."

Councilman Freeborn felt that the resolution should be placed on Council's August 22, 2006, regular meeting agenda, and not the Consent Agenda.

Councilman Newman welcomed Chief Hogan's further guidance about what we need to do to address these issues in a way that is practical for our community as this is a very complex and entrenched issue. He does agree with the idea that employers should be held accountable, but we need federal policies to set up the framework to do that. He welcomed Chief Hogan's advice on if there are additional policies needed to protect our community from dangerous criminals. But absent some specific request from him, it seems like the tools are already there for him to handle those problems and there needs to be some additional processes set up that we can plug into on a national and regional level to make some meaningful differences. He understood Chief Hogan say that if regional programs are developed, certainly we would be part of them.

Councilman Davis encouraged the Police Department to get involved in what is happening in the Charlotte area with the agreement with ICE.

Councilman Mumpower confirmed that City Council supports the Police Chief in doing the things that he feels is helpful and necessary for the public safety of our community in this area.

PUBLIC ARTIST OF THE YEAR/ASHEVILLE FILM ARTIST OF THE YEAR

Councilman Mumpower said that this is a follow-up proposal to Asheville City Council to advance our measured support for the arts in our community.

By supporting the arts (1) We know Asheville is a premier arts destination; (2) We know that the Arts have a significant impact on our economy; (3) We know that it is Council policy to support the arts in Asheville; and (4) We know that money is tight and that the private sector carries the Arts in Asheville.

Arts matter because (1) The arts are an economic engine – one of many that pulls an important train – Asheville; (2) The arts, at least many of them, have a constructive impact on our quality of life; (3) The arts, in one form or the other, touch every living person in Asheville – through everything from Country Music to Mozart, ballet to swing, finger painting to the grand masters, majestic art deco buildings to majestic mountain touched by the hand of God – art surrounds us.

The following is what the City does to help (1) The city provides roads, streets, and sidewalks to help people access the arts; (2) We work hard to help Asheville remain a safe place for people to enjoy the arts; (3) We fund the Civic Center – a major venue for the arts in our community; (4) We provide limited funding to nudge the arts forward in our community; and (5) We keep it on the radar screen.

He said that it is not just dollars. Some of us have philosophical disagreements with using forced tax payer monies to directly fund the arts. Yet we also realize that the arts need help – the City of Asheville can have a major impact on the arts through our policies. There are other ways we can help that involve limited dollars.

He feels we should use our clout and (1) appoint an official "City of Asheville Public Artist of the Year," (2) And a "City of Asheville Film Artist of the Year," (3) and once we've got it down, look toward other artistic groups we might support in similar fashion.

Regarding the Public Artist of the Year, he has have collaborated with Mr. David Mitchell of the Parks and Recreation staff and the Public Arts Board in reviewing and improving the

proposed parameters for this award that he now wishes to submit to you today for policy consideration. With these broader policy guidelines, he believes the Public Arts Board can begin their good work in bringing this initiative to full potential.

He then outlined the Public Artist of the Year 10 Point Plan: (1) This would be an annual competition – culminating during an unveiling and award presentation at Bele Chere. (A visible venue that can contribute to the enthusiasm around this award while enhancing Bele Chere.); (2) The competition would be open to artists who live, work, or study in Asheville and Western North Carolina. (We need a broad pool of potential applicants to assure that we obtain quality public art annually through this initiative. Asheville is the hub of public art in WNC and this is one means to assuming a regional leadership role in the arts.); (3) There would be a $10,000 award to the competition winner. (The Public Arts Board would be charged with raising 50% of those monies – he would assume responsibility for the first year) - additional 50% will come from general fund, grants, and other sources; (4) There would be an understanding that the winning piece would be donated to the community to be added as a permanent and maintained component of the city's public art opportunities; (5) There would be collaboration with the organized arts community (Asheville and area arts councils, college arts programs, etc.) in implementing this awards process; (6)The model of competition used in the Bele Chere poster contest in past years and other legitimate arts competitions would be considered with an eye on developing criteria that are inclusive, fair, and conducive to the long-term success of the effort; (7) A plaque to honor winners would be placed in a prominent location in the city; (8) Potential sites for locating the public art piece would be a factor in the competition – including but not limited to city parks; (9) Judges would represent a diverse cross section from Asheville and WNC with an interest in public art and the broader cultural, economic, political and social interests of the community. The panel is to include an out of area artist of recognized talent and the judging will be conducted on a blind basis; and (10) Our goal would be to make the process fun and festive as we propel our artists with strong recognition and enhance the availability of public art in Asheville.

Regarding the Film Artist of the Year, he said there is a second group we can recognize that offers additional opportunity to support the arts in our community.

He explained that (1) This competition would be open to all Asheville and Buncombe County residents and students in the film arts; (2) It would be an annual competition – culminating during the film festival; (3) There would be a $1,000 honorarium for the Film Artist of the Year provided through the general fund, grants, and other means; (4) The Board would be charged with raising additional funds as needed; (5) Opportunities would be developed to display recognized works on our city channel, public access channel, and other means; (6) Collaboration with the organized arts community would be requested; (7) Models of other successful competitions would be considered and/or duplicated; (8) A plaque to honor winning film artist would be placed in a prominent location in the city; (9) The full spectrum of film art skills should be eligible for award – including production, acting, direction, screenplay, etc.; and (10) Judges are to represent a diverse cross section from the community with an interest in film art and the broader cultural, economic, political and social interests of the community.

From here, City Council can (1) Deliberate the merit of these requests; (2) Officially endorse the efforts if the majority wishes; (3) Refer the concepts to the respective Boards with these broad parameters for developing and implementing a plan; and/or (4) Fund up to $11,000 per year, but only with the understanding that this program will result in our obtaining a public art piece for our community each year.

In conclusion, he said that (1) The money matters, but what really matters is the recognition and honor; (2) Through this program we can begin building our public art in meaningful, but economic fashion – it's past due; and (3) We have an opportunity to use the national reputation of Asheville to propel local artists forward toward their own fuller potentials…

Councilman Davis felt this was a good thing; however, he was concerned about keeping the piece of art forever. He also felt we may consider giving more than a $1,000 honorarium for the Film Artist of the Year.

Upon inquiry of Councilwoman Cape, Mr. Butch Kisiah, staff member to the Film Commission, said that the Film Commission reviewed Councilman Mumpower's proposal but took no official action. They were intrigued with the idea; however, they wanted to take a closer look at it. Regarding the $1,000 honorarium, the Commission discussed using that money to support other agencies that are involved in the arts.

Councilwoman Cape noted that the Film Commission was concerned about having to be fund-raisers and that was not the purview of their Commission. She expressed concern in that film-making is different from art in that film-making is a collaborative process and takes a team and didn't know where we would draw the line on who contributed the most. The Commission was concerned about the criteria that would be used to award the honorarium. She felt that if the City is interested in supporting the arts, there is a lot of ways to leverage that through existing organizations that are trying to do that. She felt we should work with what is existing already and see how the City can assist.

When Mayor Bellamy suggested Councilman Mumpower present this proposal to the Film Commission for their support, Councilman Mumpower said that the Film Commission formally approved the concept a couple of years ago when he was a member of the Commission and they were positive about it.

Councilman Freeborn felt we should remand this back to the respective boards and charge Councilman Mumpower to come up with an actual formalized plan with buy-in from the various players in the community.

Mayor Bellamy liked the idea of taking the proposal back to the boards for the criteria, but first asked if there was Council support for the initiatives or not.

Councilwoman Cape asked for additional information on what money already exists with the Public Art Board and what they are charged with. She wanted to know if we are honoring the money we have already given to the Public Art Board. She was frustrated when the Council reviewed the outside agency requests and didn't give any money to existing agencies that are supporting the arts in incredible ways. She would not support funding these two initiatives and would rather see the money go to the existing organizations to leverage that money.

When Vice-Mayor Jones asked if the Public Art Board was supportive of them raising money, Councilman Mumpower said that he would relieve them of that responsibility and try a three-year pilot program in which he would take personal responsibility for raising the $5,000, if the Public Art Board doesn't raise it. Vice-Mayor Jones would be supportive of that and suggested an evaluation at the end of the first year.

Regarding the Asheville Film Artist of the Year, Councilman Mumpower said he would be happy to let Councilwoman Cape that the proposal back to the Film Commission for review. But, with regard to the Public Artist of the Year, he asked for Council's support in providing the Public Art Board with these broad guidelines for them to work with and come back to Council with a proposal.

Mayor Bellamy said that the majority of Council supported giving the Public Art Board these broad guidelines for them to work with and come back to Council with a proposal.

Councilman Davis asked at some point to be brought up to date on the Film Festival.

BOARDS AND COMMISSIONS:

Mayor Bellamy suggested that City staff meet with Chairmen of the various boards they are responsible for to advise them of their role.

After a brief discussion on the appointment process for the five vacancies on the Community & Economic Development Alliance, it was the consensus of City Council to (1) appoint Scott Dedman; (2) interview Steve Cochran, Joyce Dorr, Cheryl McMurry and Ty Hallock; and (3) consider as candidates, but not interview: Greg Walker-Wilson; Chuck Tessier, David McConville, Becky Anderson and Kim MacQueen.

It was the consensus of Council to reappoint Tom Byers and Steven Sizemore to the Planning & Zoning Commission.

It was the consensus of Council to reappoint Herman Turk to the Buncombe County Tourism Development Authority.

OTHER BUSINESS:

Councilman Newman was pleased to report that on the first day of the pilot free ride on the Asheville Transit System program, our ridership was up almost 60%.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:23 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Cape gave the invocation.

CITY'S TAX RATE

Mayor Bellamy said that she would like to take a moment to talk about an issue that has been the focus of several media reports in the last few days: the city's budget process and tax rate. It is important to every member of Council that citizens understand their upcoming tax bills, and so she appreciated the opportunity to briefly address this issue again tonight.

At the City Council retreat in January, City Council set a goal of adopting a revenue neutral tax rate. There is a state statute that defines revenue neutral as the rate that will produce the same amount of revenue produced by the current tax rate if no reappraisal had occurred.

Once Council said that was their goal, staff calculated Asheville's revenue neutral tax rate at 41 cents. And even though the city started the budget process with a $2.4 million dollar shortfall, the city manager worked to fill that gap and propose a budget with the revenue neutral tax rate. The proposed budget document made City Council's intentions clear: to hold the line on property taxes at the 41 cent revenue neutral rate.

However, after the proposed budget was presented to the public, Buncombe County announced that it was looking at increasing its property tax rate from the revenue neutral rate. This was important because the County's tax rate directly impacts the amount of sales tax revenue Asheville receives. Buncombe County's sales tax formula is based on the amount of property taxes a local government takes in; so, the higher a jurisdiction's property tax rate, the more sales tax revenue it receives.

She reviewed a slide from a public meeting held on May 8, 2006, where we discussed this impact. At that same meeting, we also discussed how the city's tax rate would have to be adjusted to avoid losing sales tax revenue.

In essence, City Council had to adjust our property tax rate to keep overall revenues coming into the city equal to the overall expenses. We were looking at Asheville's entire financial picture. It's in this context that the tax rate was referred to as an adjusted revenue neutral rate. Many of you are small business owners, and you know that by this definition, City Council's objective was not to raise new money. Our objective was to hold the line on taxes without having to cut critical public services. Our objective was to keep revenues equal to expenses without raising the tax burden above what was required to keep the city's finances in order.

The next slide she showed was how this affected the statutorily defined revenue neutral rate. Asheville's tax rate was adjusted by 1.38 cents in order to make up for the lost sales tax revenue. If Council had not adopted the additional 1.38 cents, Asheville would have been lacking $1.5 million in revenue. We discussed this information at a public meeting on June 20, 2006, so that Asheville citizens would understand what was happening with the city's tax rate and why.

City Council included tax bill education on our agenda last week to make sure our tax rate information right before tax bills were mailed. After that presentation, City staff discovered that the final budget document did not include how and why the tax rate was adjusted from 41 cents to 42.38 cents. Staff has acknowledged this administrative oversight and corrected the adopted budget document. In fact, we are in the process of printing revised budget documents that will be available to the public.

Having acknowledged that mistake, it's important to also acknowledge the efforts of staff and my fellow Council members to make this budget process one of the most open and accessible we've had since she has been a part of City Council. We had seven public meetings on the budget that were all televised live and rebroadcast on the city's government channel. We made all of our budget documents and supporting information available on our website and through the city's e-newsletter. And we've gone to great lengths to explain what tax bills will look like and how Asheville's tax rate will impact citizens.

As Mayor, she can look each of you in the eye and say that Asheville went above and beyond to make the budget process transparent and, most importantly, to hold the line on taxes.

It's important to the entire City Council to conduct business in the open, particularly when it comes to financial matters. As soon as we receive quarterly financial reports, they are also made available to the public. When we have questions about the city's financial performance, we ask those questions during televised meetings. We are dedicated to working with citizens at the table.

When she was sworn in as Mayor, she made a promise to the people that the City's business was their business. And she believes every member of Council and every member of staff has lived up to that same promise during our budget process. It was not easy to dig ourselves out of a $2.5 Million hole, but we did. And it was not easy to hold the line on taxes, but we did when you take into consideration the City's entire revenue base. And every citizen in Asheville deserves to hear that part of the story.

Finally, she wrapped up by encouraging citizens to sign up for the city's e-newsletter, where they can get City Council's agenda, supporting documents and other city information every week. Citizens who would like to obtain budget documents or DVDs of past Council meetings can request those by calling our City Clerk Keisha Lipe.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING SEPTEMBER 11, 2006, AS "GLOBAL DAY OF MUSIC FOR PEACE"

Mayor Bellamy read the proclamation proclaiming September 11, 2006, as "Global Day of Music for Peace" in the City of Asheville. She presented the proclamation to Mr. Richard Hall, President of the Asheville Sister Cities Inc. who briefed City Council on some activities taking place during the day.

II. CONSENT AGENDA:

At the City Manager's request, Consent Agenda Items "L" and "N" will be removed from the agenda entirely.

Mayor Bellamy asked that Consent Agenda "R" be removed from the agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 25, 2006; THE SPECIAL MEETING HELD ON JULY 31, 2006; AND THE WORKSESSION HELD ON AUGUST 15, 2006

B. RESOLUTION NO. 06-141- RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT AN OFFER TO PURCHASE PROPERTY LOCATED AT 8 CEDAR STREET FROM R & G PROPERTIES

Summary: The consideration of a resolution authorizing the Mayor to accept an offer to purchase property located at 8 Cedar Street from R & G Properties, in the amount of $158,600.

On July 25, 2006, City Council authorized advertising for upset bids pursuant to a bid from R & G Properties for house and land at 8 Cedar Street in the amount of $158,600. The advertisement was published on July 28, 2006, and no upset bids were received.

The property is located at the intersection of Fairview Road and Cedar Street in the Oakley community. It is improved with a circa 1926 two story Dutch Colonial with white clapboard siding on a 0.1745 acre lot with typical residential landscaping, fencing, etc. It needs some repairs in order to obtain a Certificate of Occupancy.

The bid from R & G Properties is equal to the minimum price of $158,600.

Pros:

- The bid is equal to the appraised value and the upset bid method of sale has ensured a competitive process.
- The sale of the property will generate revenue for the City.
- It will place the property back on the tax rolls.
- It is an efficient use of resources, because un-needed property will return to private ownership.
- It will make available moderately priced housing in a fully serviced neighborhood.

Con:

- Future growth and development in the area could require street improvements that could result in the need to reacquire the property, but that is not likely in the foreseeable future due to the residential character of the neighborhood and the number of inter-connecting neighborhood streets which provide alternative routes. Additionally a portion of the property along Fairview Road is being retained by the City to provide an improved turning radius and sidewalk.

Economic Development staff recommends adoption of the resolution which will authorize the Mayor to accept an offer to purchase property located at 8 Cedar Street from R & G properties in the amount of $158,600.

RESOLUTION BOOK NO. 30 - PAGE 70

C. RESOLUTION NO. 06-142- RESOLUTION APPOINTING MEMBERS TO THE POLICE OFFICERS AND FIREFIGHTERS DISABILITY REVIEW BOARD

Summary: This is the consideration of appointing members to the Police Officers and Firefighters Disability Review Board.

The terms of Stephanie Cooper, Alexander Maitland and James Lewis, as members of the Police Officers and Firefighters Disability Review Board expired on July 19, 2006.

On June 20, 2006, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Ms. Cooper and Mr. Lewis to each serve an additional two-year term respectfully, terms to expire July 19, 2008, or until their successors have been appointed.

In addition, at the July 18, 2006, worksession, it was the consensus of City Council to wait for a recommendation from the Buncombe County Medical Society for the licensed physician vacancy.

RESOLUTION BOOK NO. 30 – PAGE 71

D. RESOLUTION NO. 06-143 - RESOLUTION AUTHORIZING THE CITY MANAGER TO AMEND AN AGREEMENT WITH THE N.C. STATE RURAL ECONOMIC DEVELOPMENT CENTER IN CONSIDERATION OF A GRANT FOR THE PURPOSE OF IMPLEMENTATION OF THE REDEVELOPMENT PLAN FOR THE REDEVELOPMENT AREAS

Summary: The consideration of a resolution authorizing the City Manager to amend the original agreement dated 4/26/05 with the North Carolina Rural Economic Development Center for adjustments to the approved budget and for the extension of the termination date of the agreement from 8/31/06 to 7/31/07.

The City was successful in obtaining grant funds totaling $820,000 for planning and implementation of the River Redevelopment Plan. Over the past year the City has worked with the merchants and property owners in Biltmore Village to refine and prioritize the use of the grant funds. Based on this effort, staff proposes the following adjustments, which have been accepted by the Merchant's Association and the NC Rural Economic Development Center. The Biltmore Village Merchants have requested that the infrastructure improvements be put on hold until after January 1, 2007, resulting in a need to extend the termination date. The floodway buyout program appears to be able to be accommodated through other state funding sources.

Existing Allocation	
Loan Program	$375,000.00
Floodway Property Buyout	$200,000.00
Tax Increment Finance Study	$50,000.00
Biltmore Village Infrastructure	$75,000.00
Planning Grant Remainder to be Reallocated	$40,000.00
Storm Sewer Improvements All Souls	$80,000.00
Total	$820,000.00

Proposed Reallocation	
Loan Program	$467,965.00
Unallocated Loan Funds	$74,035.00
Floodway Property Buyout Appraisals	$4,500.00
Tax Increment Finance Study	$25,000.00
Biltmore Village Infrastructure/Streetlights/Wiring	$125,500.00
Storm Sewer & Sidewalk Improvements/All Souls	$123,000.00

Total	**$820,000.00**

PROS:

- Fosters "Community Building" through citizen involvement in the identification of priority needs for use of the funding within the community.
- Improves the public infrastructure in Biltmore Village

CON: None noted.

The Planning and Development Department recommends adoption of the resolution authorizing the City Manager to execute an amended grant agreement with the NC Rural Economic Development Center.

RESOLUTION BOOK NO. 30 - PAGE 72

E. RESOLUTION NO. 06-144 - RESOLUTION AUTHORIZING DAWSON PLACE IN EAST ASHEVILLE TO BECOME A PUBLICLY MAINTAINED STREET

Summary: The consideration of a resolution to accept Dawson Place in East Asheville as a publicly maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Dawson Place is a developer-constructed street that has an average paved width of 22 feet and a length of 0.14 miles. Engineering Department staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Dawson Place will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

Pro:

- The City will receive Powell Bill funds from the NCDOT to maintain the roadway.

Con:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council accept Dawson Place in East Asheville as a City maintained street.

RESOLUTION BOOK NO. 30 – PAGE 73

F. RESOLULTION NO. 06-145 - RESOLUTION AUTHORIZING MOSER'S PLACE IN WEST ASHEVILLE TO BECOME A PUBLICLY MAINTAINED STREET

Summary: The consideration of a resolution to accept Moser's Place in West Asheville as a publicly maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Moser's Place is a developer-constructed street that has an average paved width of 25 feet and a length of 0.16 miles. Engineering Department staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Moser's Place will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

Pro:

- The City will receive Powell Bill funds from the NCDOT to maintain the roadway.

Con:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council accept Moser's Place in West Asheville as a City maintained street.

RESOLUTION BOOK NO. 30 – PAGE 75

G. RESOLUTION NO. 06-146- RESOLUTION AUTHORIZING THE MAYOR TO SIGN A CONTRACT WITH COOPER CONSTRUCTION COMPANY FOR THE PROJECT KNOWN AS GROVESTONE AREA WATER SYSTEM IMPROVEMENTS

Summary: The consideration of a resolution authorizing the Mayor to sign a contract in the amount of $557,915 with Cooper Construction for the project known as Grovestone Area Water System Improvements Project; and the associated budget amendment, in the amount of $74,234 which will provide the additional funding needed to complete the project.

The Water Resources Department is installing a new water pump station, water storage tank, various connections and modifications to the water system along Lake Eden Road and abandoning approximately 8,000 LF of the more than 100 year old twin 16 inch water lines that run through the Grovestone quarry.

Three bids were received for this project, (1) Cooper Construction Company- $557,915.00; (2) McCall Brothers, Inc. - $618,917.00; and (3) McCarroll Construction Company - $965,450.00. Recommendation from our consulting engineering firm of McGill Associates was to award the construction contract to Cooper Construction Company, an area company located in Henderson County. Because of increased prices for materials, the total cost of the project is $74,234 more than the current budget appropriated for the project. Staff recommends that budget savings in the 2003 Annexation project and the Sweeten Creek Phase I NCDOT project be used to cover this $74,234 cost increase.

PROS:

- This project will enhance the water system by enabling the Water Resources Department to abandon approximately 8,000 LF of 100 year old problematic 16 inch cast iron lines that break regularly causing customer water outages in the Swannanoa valley area.
- These water lines have also been a safety concern due to the depth of the lines in many places throughout the quarry of more than 70 feet deep.

CON:

- The cost of the project is more than the original engineering estimate done in 2004 but with the rise in material pricing the past two years the bid price is in line with other area projects as determined by the consulting engineer.

City staff recommends City Council approval of the Mayor signing contract agreement with Cooper Construction Company for the installation of a new pump station, storage tank and other connections to enable the abandonment of 8,000 LF of the old twin 16 inch water lines as well as approval of a budget ordinance amendment to provide adequate funding.

RESOLUTION BOOK NO. 30 – PAGE 77

H. ORDINANCE NO. 3382 - BUDGET AMENDMENT FOR THE PROJECT KNOWN AS GROVESTONE AREA WATER SYSTEM IMPROVEMENTS

Summary: See Consent Agenda Item "G" above.

ORDINANCE BOOK NO. 23 – PAGE 67

I. RESOLUTION NO. 06-147 - RESOLUTION AUTHORIZING THE MAYOR TO APPROVE A GRANT OFFER FROM THE FEDERAL AVIATION ADMINISTRATION

Summary: The consideration of a resolution authorizing the Mayor to approve a Grant Offer from the Federal Aviation Administration (FAA) in the amount of $1,093,870.

The FAA has offered a grant agreement to the Asheville Regional Airport. This grant, in the amount of $1,093,870, is for the Airport Improvement Program Project No. 3-37-0005-31. This project consists of acquiring aircraft rescue and fire fighting vehicle and modifying the terminal building (design).

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Project No. 3-37-0005-31.

RESOLUTION BOOK NO. 30 – PAGE 81

J. RESOLUTION NO. 06-148- RESOLUTION MODIFYING THE 2006 CITY COUNCIL MEETING SCHEDULE TO CANCEL THE AUGUST 29, 2006, COMMUNITY MEETING

RESOLUTION BOOK NO. 30 – PAGE 82

K. RESOLUTION NO. 06-149 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN A CONTRACT WITH McGILL ASSOCIATES FOR ENGINEERING SERVICES ASSOCIATED WITH THE NEIGHBORHOOD WATER SYSTEM IMPROVEMENTS PROJECT - PHASE III

Summary: The consideration of a resolution authorizing the Mayor to sign a contract with McGill Associates, PA for engineering services in the amount of $108,250 for Neighborhood Enhancement Water System Improvements.

With the assistance of McGill Associates, the Regional Water Authority received a $3 Million grant for Critical Needs Water System Improvements. These projects are now called Neighborhood Enhancement Water System Improvements. Following completion of the original projects, approximately $750,000 of the grant proceeds was not spent due to favorable contract

pricing. Grant funding projects have to be identified prior to requesting construction bids and the low bid was $750,000 less than the available grant funds. McGill Associates assisted the Water Resources Department with obtaining N.C. Dept. of Environment and Natural Resources (NCDENR) approval to utilize the remaining funds for additional projects. This was a 24 month process with recent approval to expend the remaining funds with the deadline for the expenditure of these funds being July 2007. McGill Associates has completed the majority of the design work associated with the additional Neighborhood Enhancement projects. Approval of this Engineering Services Contract will ensure that the much needed water system improvements occur within the time limits imposed by NCDENR.

McGill Associates prepared the Preliminary Engineering Report that was the basis of the NCDENR's approval of the original $3 Million grant. McGill Associates also did the engineering design and contract administration on the original Critical Needs Water System Improvements projects. McGill Associates did another Preliminary Engineering Report which resulted in NCDENR's approval to expend the remaining $750,000 grant proceeds and have completed the design of the additional Neighborhood Enhancement water system improvement projects.

PROS:

- These projects will enhance the water system by enabling the Water Resources Department to replace approximately 13,120 linear feet of existing 2-inch waterline with new 8-inch ductile iron waterline.
- These new waterlines on 8 roads will dramatically improve water service to existing customers, provide fire protection for the adjoining properties and reduce maintenance and operation expenses.
- Continuation of the contract with McGill Associates will ensure that the remaining grant funds are expended within the time constraint established by NCDENR.

CON:

- Failure to move forward with the engineering services contract with McGill Associates would jeopardize completion of the projects within current time constraints and could lead to forfeiture of $ 750,000 of grant proceeds.

City staff recommends City Council approval of the Mayor signing contract agreement with McGill Associates for Neighborhood Enhancement Water System Improvements.

RESOLUTION BOOK NO. 30 – PAGE 83

L. RESOLUTION DIRECTING THE CITY CLERK TO PUBLISH NOTICE OF INTENT REGARDING EXECUTION OF A LEASE WITH THE UNITED STATES OF AMERICA FOR THE ARMY RESERVE CENTER AT 224 LOUISIANA AVENUE

This item was removed from the Consent Agenda.

M. RESOLUTION NO. 06-150 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHSAE PROPERTY OFF OF CLEMMONS STREET

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property off Clemmons Street.

A bid has been received from Russell Keith in the amount of $2,600 for the purchase of land off Clemmons Street.

The land off Clemmons Street was acquired by the City as part of the East End/Valley Street Community Improvement Program. It is a rectangular shaped fragment lot comprising 0.03 acre±. It has no access and was intended to be sold to an adjoining property owner. It is zoned RS8, and it is not suitable to build on. The bid from Russell Keith is in the amount of $2,600. We have in file an appraisal letter prepared by Gordon F. Lucks dated March 30, 2006, estimating the market value of the property at $2,600. Mr. Keith proposes to acquire the subject parcel for assemblage with the property he owns next door.

PROS:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.

There is no negative impact.

The proceeds from the sale of this parcel will be Community Development Block Grant Program income.

Economic Development staff recommends adoption of the resolution which will initiate the sale of the property through the upset bid process.

RESOLUTION BOOK NO. 30 – PAGE 84

N. RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AND CONVEY AN EASEMENT OVER A PORTION OF CITY OWNED PROPERTY AT 224 LOUISIANA AVENUE TO BELLSOUTH TELECOMMUNICATIONS INC.

This item was removed from the Consent Agenda.

O. RESOLUTION NO. 06-151 - RESOLUTION AMENDING RESOLUTION NO. 01-118 AUTHORIZING A LICENSE AGREEMENT WITH MOTIENT COMMUNICATIONS INC.

Summary: The consideration of a Resolution amending Resolution No. 01-118 authorizing a License Agreement with Motient Communications, Inc. (Motient) for an antenna at 36 Reservoir Road.

Motient has operated an antenna and related equipment at 36 Reservoir Road since October, 1995. The current lease with Motient was authorized by Resolution No. 01-118. As a result of a recent review of the file a technical error was discovered in the authorizing resolution. The term of the license agreement was defined as "3 years with 2 one year renewal terms at an annual license fee of $5,400". The intended definition of the term, as presented in the Staff Report, was "three years at an annual license fee of $5,400, with 2 three year renewal terms with a 10.5% increase in the annual license fee at the beginning of each renewal term". The license agreement is consistent with the latter definition of the term.

Approval of the resolution will amend Resolution No. 01-118 to correct the technical error.

Economic Development staff recommends adoption of the Resolution amending Resolution No. 01-118 authorizing a License Agreement with Motient Communications, Inc. (Motient) for an antenna at 36

RESOLUTION BOOK NO. 30 – PAGE 85

P. **RESOLUTION NO. 06-152- RESOLUTION REAPPOINTING MEMBERS TO THE PLANNING & ZONING COMMISSION**

Summary: The consideration of appointing members to the Planning & Zoning Commission.

The term of Tom Byers and Steven Sizemore, as members on the Planning and Zoning Commission, expired on August 14, 2006.

At the City Council worksession on August 15, 2006, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. Byers and Mr. Sizemore to each serve an additional three-year term respectively, terms to expire August 14, 2009, or until their successors have been appointed.

Staff recommends City Council appointing members to the Planning & Zoning Commission.

RESOLUTION BOOK NO. 30 – PAGE 86

Q. **RESOLUTION NO. 06-153 - RESOLUTION REAPPOINTING A MEMBER TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY**

Summary: The consideration of a resolution appointing a member to the Buncombe County Tourism Development Authority.

The term of Herman Turk, as a member of the Buncombe County Tourism Development Authority, will expire on August 30, 2006.

At the City Council worksession on August 15, 2006, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. Turk, representing the owner or operator of a hotel, motel or other taxable tourist accommodation with more than 100 rental units, to serve an additional three-year term, term to expire August 30, 2009, or until his successor has been appointed.

Staff recommends City Council adopt a resolution appointing a member to the Buncombe County Tourism Development Authority.

RESOLUTION BOOK NO. 30 – PAGE 87

R. **RESOLUTION MAKING PROVISIONS FOR THE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ROCKIN' THE RIVER RAFT RACE FESTIVAL ON AUGUST 26, 2006; AND THE RIVER SCULPTURE FESTIVAL OPENING AND CLOSING EVENTS ON SEPTEMBER 1 AND OCTOBER 28, 2006**

This matter was removed from the Consent Agenda for an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR AN INDIVIDUAL VOTE

RESOLUTION NO. 06-154 - RESOLUTION MAKING PROVISIONS FOR THE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ROCKIN' THE RIVER RAFT RACE FESTIVAL ON AUGUST 26, 2006

RESOLUTION NO. 06-155 - RESOLUTION MAKING PROVISIONS FOR THE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE RIVER SCULPTURE FESTIVAL OPENING AND CLOSING EVENTS ON SEPTEMBER 1 AND OCTOBER 28, 2006

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at The Rockin' The River Raft Race Festival on August 26, 2006, and at the River Sculpture Festival Opening and Closing Events on September 1 and October 28, 2006.

The below listed groups have requested, through the Asheville Parks and Recreation Department, that City Council permit them to serve beer and/or unfortified wine at the following events and to allow for consumption at these events.

- The Rockin' The River Festival, which is a benefit for RiverLink, Inc., has requested that City Council permit them to serve beer and/or unfortified wine at their event and allow for consumption on August 26, 2006 in the infield area of Carrier Park.

- The River Sculpture Festival, which is an Asheville Area Arts Council event, has requested that City Council permit them to serve beer and/or unfortified wine at their opening and closing events and allow for consumption on September 1, and October 28, 2006, in the French Broad River Park.

The Asheville Parks and Recreation Department recommends City Council adopt the resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at The Rockin' The River Raft Race Festival on August 26, 2006, and also at the River Sculpture Festival Opening and Closing Events on September 1 and October 28, 2006.

Councilman Newman moved for the adoption of Resolution Nos. 06-__ and 06-__. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Mayor Bellamy voting "no."

RESOLUTION NO. 06-154 - RESOLUTION BOOK NO. 30 – PAGE 88
RESOLUTION NO. 06-155 - RESOLUTION BOOK NO. 30 – PAGE 91

III. PUBLIC HEARINGS:

A. **PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL USE PERMIT AND ASSOCIATED MASTER PLAN FOR MILLS CREEK CONDOMINIUMS, LOCATED OFF MILLS GAP ROAD AND SWEETEN CREEK ROAD FOR A CHANGE IN ACCESS**

ORDINANCE NO. 3383 - ORDINANCE AMENDING THE CONDITIONAL USE PERMIT AND ASSOCIATED MASTER PLAN FOR MILLS CREEK CONDOMINIUMS, LOCATED OFF MILLS GAP ROAD AND SWEETEN CREEK ROAD FOR A CHANGE IN ACCESS

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 5:17 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Assistant Planning & Development Director Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of an amendment to the conditional use permit and associated Master Plan for Mills Creek Condominiums located off Mills Gap Road and Sweeten Creek Road for a change in access.

The ***Asheville City Development Plan 2025 (ACDP 2025)*** describes a number of reasons why properties within the City limits remain underdeveloped or vacant, including topographical or other physical problems with the property resulting in prohibitive development costs under existing market (or zoning) conditions. The ***ACDP 2025*** encourages a Smart Growth development pattern that accommodates realistic, market based alternatives to promote infill development of vacant or underdeveloped property to meet the increasing housing needs of the City of Asheville's work force population. This property, located on a major corridor, is already zoned to allow for a high-density residential development and is one of many development projects proposed for this growing area of the City.

While the proposed plan and amendment still appears to achieve one of the City's social goals of providing reasonably priced work force housing, the ***ACDP 2025*** also discusses the need for transportation and development to meet other physical and economic goals. The proposed amendment eliminates the secondary entrance onto Sweeten Creek Road resulting in a less desirable road layout that does not meet the City of Asheville's physical technical standards and does not provide the interconnectivity desirable for positive economic development.

The applicant, Stan Robinson, is requesting an amendment to a previously approved Master Plan and conditional use permit (CUP) for a 76 unit condominium development. The proposed development is located on 9.75 acres off of Mills Gap Road (City Exhibit 3 - Aerial Map). The new residential construction will all be 2 story, attached condominiums clustered in groups of 2, 3, and 4 units. The property is within City limits and is zoned RM-16 (Residential Multi-family, High Density). This property is subject to Hillside Development Standards and the total number of units is well within the allowable density for RM-16.

The original review of this Master Plan also included the consideration of a new public road that would provide a valuable connection between Sweeten Creek Road and Mills Gap Road (City Exhibit 3 - Old Master Plan). Since approval by the City Council in January 2006, the adjacent property owner who had previously agreed to the road connection through their property is no longer supporting this proposal. The applicant, in an effort to keep the residential

development moving forward, is proposing an alternative emergency access through the parking area of the adjacent apartment complex; this secondary access, like the primary, will also exit onto Mills Gap Road (City Exhibit 3 - New Master Plan). Because the secondary connection is not public road and gated for emergency access only, the second connection is not considered a full access point and does not meet the City of Asheville's maximum cul-de-sac length of 1000 feet and is exceeding it by 600 feet (60%). A recent ordinance amendment approved in June 2006 allows the City Council to vary dimensional and other technical standards applied to Conditional Zonings and Conditional Use Permits.

The original proposal was approved in January of 2006 with the added condition that the applicant work with the City traffic engineer on developing some appropriate traffic calming measures to discourage cut-through traffic on the new road.

From a technical standpoint the applicant has several options: (1) provide a second full access point, if not on Sweeten Creek then somewhere else; (2) reduce the road length and the number of units; (3) redesign the site and perhaps consider a different housing product that wouldn't rely on a public road; or (4) request an amendment to the approved Master Plan and CUP along with a request to vary the City's maximum cul-de-sac length requirement – which the Council now has the authority to do as a result to an Ordinance amendment approved in June of this year.

It's also important to note that the applicant is proposing a gated emergency access point as an alternative that would route emergency traffic through the parking area of the adjacent apartment complex. Although staff recognizes appreciates the alternative proposed, this option fails to meet our minimum technical standards and cannot be supported by staff primarily due to (1) anticipated problems with traffic stemming from providing only a single point of access; (2) delayed emergency response times; and (3) problems with providing service and maintenance.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed Master Plan amendment has been reviewed by City Planning, Engineering, and Asheville Fire Department staff which finds that the proposed amendment does not meet all public health and safety related requirements by not meeting the technical standards set forth in the Standards and Specifications Manual for maximum cul-de-sac length. The following concerns have been cited by the City Fire Marshal and Traffic Engineer: (1) a single point of access provides very poor traffic access and circulation, requiring all site traffic to access via one driveway. This substantially increased the possibility of future traffic challenges. Mills Gap Road is a busy road that will only get busier; (2) A single point of access also makes maintenance a major challenge. As the only access the road is very difficult to repave or construct, utilities cannot be reasonable accessed or reconstructed, and common maintenance activities are complicated; (3) Any number of occurrences can and do close streets or intersections around the city; crashes, tree fallings, water line breaks, debris spills; leaving residents with no alternative; (4) Dead-end streets discourage activities such as walking and bicycling because streets are not interconnected; and (5) Emergency access is reduced as responders have to have proper equipment ready for gated accesses in the city limits. The gate also imparts delay on responders.

it is important to note that both the Fire Marshal and Traffic Engineer feel that the secondary access proposed is a better alternative than providing no alternative.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   As described in the original report, the proposed amendment remains reasonably compatible with natural features of the site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   As described in the original report, the proposed amendment will not result in a negative impact to adjacent property values.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The proposed amendment does not affect the massing or home layout that had been previously considered and approved.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The ***Asheville City Development Plan 2025 (ACDP 2025)*** describes a number of reasons why properties within the City limits remain underdeveloped or vacant, including topographical or other physical problems with the property resulting in prohibitive development costs under existing market (or zoning) conditions. The ***ACDP 2025*** encourages a Smart Growth development pattern that accommodates realistic, market based alternatives to promote infill development of vacant or underdeveloped property to meet the increasing housing needs of the City of Asheville's work force population. This property, located on a major corridor, is already zoned to allow for a high-density residential development and is one of many development projects proposed for this growing area of the City.

   While the proposed plan and amendment still appears to achieve one of the City's social goals of providing reasonably priced work force housing, the ***ACDP 2025*** also discusses the need for transportation and development to meet other physical and economic goals. The proposed amendment eliminates the secondary entrance onto Sweeten Creek Road resulting in a less desirable road layout that does not meet the City of Asheville's physical technical standards and does not provide the interconnectivity desirable for positive economic development.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The project area is located in clear and close proximity to major road facilities, interstate connections, service centers, and easily accessed employment centers; however, the compromised access can delay emergency response.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

As described in Standard No. 1, the proposed single access point results in very poor circulation and access and can result in undesirable traffic congestion or blocks due to emergency street closings.

For the reasons outlined above, staff finds the proposed site plan amendment to be unreasonable.

Considerations

- Amendment to proposed road does not meet City's technical standard for maximum cul-de-sac length and provides a single point of access for a high density development.
- Gaining a second full public access requires the cooperation of adjacent property owners and may not be feasible.
- Maximum cul-de-sac length has been waived by the City Engineer on previous occasions but all instances involved a very limited number of single family homes where full access would require an excessive amount of earth moving.
- Under the current building form, meeting the maximum cul-de-sac length would reduce the total number of units from 76 to 50 (approximately).
- Public right-of-way to adjacent property is still proposed allowing for a future connection if feasible.

Planning staff defers to the recommendation of the City Fire Marshal and Traffic Engineer that the proposed amendment be denied and the applicant pursue a full public access easement with the adjacent apartment complex owner and/or other design or development options for this property.

Planning staff recommends denial of the Master Plan amendment for the Mills Creek Condominium development project. However, should City Council move to approve the proposed amendment, staff would recommend the following conditions: (1) A full right-of-way to vacant property to the south to allow for future connections; and (2) Full compliance with all other technical standards identified by the TRC as a result of the final detailed review.

Mr. Craig Justus, attorney representing the applicants, explained that all the good reasons this project was approved for back in January are still there - infill development, housing prices are modest (average price is $159,000), lower density, etc. He said that the road's shape is dictated by the shape of the properties. One option that they have is to cut 20 units, bringing the total to 54 units but 54 units would not make the project feasible. In reviewing the January staff report, the second access was necessary for emergency purposes. Because they were unable to acquire the property in the original Master Plan for the second access, they met with City staff to talk about other options. The best option available to them was through Mr. George Morosani's adjoining property through his apartment complex, and he asked that it be for emergency access only. Therefore, they feel that they have met the intent of providing a second access. Mr. Justus pointed out that Council has approved a project in the past that had only one full access, with a requirement for an emergency access (which is gated). He urged Council to approve the amendment to the Master Plan for a change in access and to also waive the 1,000 feet maximum cul-de-sac length requirement.

Mr. Ken Putnam, traffic engineer with Mattern & Craig, said that when this project is fully built out, it is expected to generate about 500 trips a day. After an analysis, we get acceptable levels of service indicating that there should be no problems with the intersection functioning from a traffic standpoint. Regarding the emergency access, emergency vehicles are already accessing the adjacent apartment complex by existing access points and there seems to be no problem there. It is reasonable that the emergency vehicles should go into the new project just as easily (Applicant Exhibit 1).

After rebuttal, Mayor Bellamy closed the public hearing at 5:37 p.m.

Upon inquiry of Councilman Davis, Fire Marshall Wayne Hamilton explained the different devices used for gates. His recommendation would be a 20-foot wide gate and that the access road be 20-foot wide. It is the intent of the State Fire Code that emergency access points allow emergency vehicles to pass one another in the event of an emergency. The lowest we have allowed is 16-feet which meets the City's alley standards.

Mr. Chris Eller, with Civil Design Concepts, said that the proposed access road will be 16-feet (with shoulders) and they have a 20-foot easement reserved. He feels the 20-foot gate could be accommodated, along with the 16-foot of access. He said that he would work with Fire Marshal Hamilton to agree upon a common gate that would be acceptable. The road in Mr. Morosani's parking lot is at least 24-feet in width.

Upon inquiry of Councilwoman Cape, Fire Marshal Hamilton said that they always encourage the use of sprinklers and if they sprinkler the units, that would alleviate his concern of two access points. He would still support the connectivity issue, even with sprinkler protection.

Upon inquiry of Councilman Mumpower, Fire Marshal Hamilton said that if they have a 16-foot width for the emergency access road, they can negotiate that. In addition, they would reduce the gate width to accommodate the road width.

When Councilman Mumpower asked about the cost of sprinklers, Fire Marshal Hamilton said that the statewide average is about $2.40 a square foot and that does not take into account any infrastructure needs.

Mr. Justus spoke against the sprinklering because it will drive the cost of the project out of their price range. He noted that they are preparing a cross-easement to the Morosani property so that they have a second point of access, which will be through this property.

There was a brief discussion about the other projects that have been approved with similar circumstances as this project.

Upon inquiry of Councilwoman Cape, City Traffic Engineer Anthony Butzek said that the City would enforce the sight triangles at Mills Gap Road similar to any project and at the final review we will check to make sure that sight triangle is abundantly clear.

Councilman Mumpower moved for the adoption of Ordinance No. 3383, granting an amendment to the conditional use permit and Master Plan for the Mills Creek Condominiums, subject to the following conditions: (1) a minimum 16-foot paved surface for the emergency access road with gate; (2) waiver of the 1,000 feet maximum cul-de-sac length requirement; (3) if the applicant develops the property on Sweeten Creek Road, that it would be a point of access as well; and (4) full compliance with all other Technical standards identified by the TRC as a result of the final detailed review. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 23 – PAGE 69

D. PUBLIC HEARING TO REZONE PROPERTY LOCATED AT 45 TOMS ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RESORT DISTRICT

ORDINANCE NO. 3384 - ORDINANCE TO REZONE PROPERTY LOCATED AT 45 TOMS ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RESORT DISTRICT

Mayor Bellamy opened the public hearing at 6:02 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to rezone 7+ acres at 45 Toms Road from RM-16 Residential Multi-Family High Density District to Resort District. This public hearing was advertised on August 11 and 18, 2006.

As this site is located near the western edge of the extraterritorial jurisdiction (ETJ) area, much of the property around it is not zoned. Additionally, it is worth noting that the property lies within the Manufactured Housing Overlay District as well as the Manufactured Housing Community Overlay District.

The *Asheville City Development Plan 2025* lists the "Smart Growth Land Use Policies" adopted by the City Council in 2000. The plan also recognizes the "New Urbanism" concept and includes as an appendix this movement's charter, which mentions tenets such as the promotion of neighborhoods with a variety of land uses and increased land use intensity. Beyond that, there are no specific goals of the plan that this project would be furthering, but neither can it be said that the project is out of compliance with the plan.

With the exception of perhaps encouraging a small business, approval of the proposed plan would neither support nor hinder the goals and tasks of the Strategic Operating Plan.

On October 12, 2005, City Council voted to approve a rezoning of roughly 31 acres off of Dogwood Road from Industrial to RS-4. The rezoned area is approximately one-half mile north-northwest of the Toms Road site.

On January 24, 2006, City Council voted to deny a rezoning of several properties along Smoky Park Highway and Rutherford Road from RM-16 and CBII district to HB district. That area is approximately one-half east-northeast of the Toms Road site.

On January 24, 2006, City Council voted to approve a rezoning of properties located at 16 Forsythia Lane from CBII and RM-16 to entirely RM-16. The properties are slightly more than half a mile east-northeast of the Toms Road site.

On June 7, 2006, City of Asheville staff issued a notice of violation to the applicant (Suzanne DeJohn and Dale Lane) for operating a bed and breakfast homestay without having obtained a permit for the change of use from a single family residence. The bed and breakfast homestay use is a use by right subject to special requirements under the existing zoning; the applicant can bring the property into compliance for this use without the approval of this rezoning request

The subject site is located near the western edge of the City's ETJ area, about 200 yards south of Smoky Park Highway on Toms Road (the property also has a significantly smaller frontage on Short St). The property consists of just over 7 acres and is currently zoned RM-16. The majority of the property is vacant with the exception of a single-family residence, a barn and some smaller outbuildings. Railroad tracks cross Pallet Road between the applicant's property and Smoky Park Highway. Surrounding land uses include manufactured housing, vacant land, a quarry, and a pallet manufacturing operation. Large properties to the south and west of the site are outside of the City's Zoning Jurisdiction.

The larger area in which the subject site is situated has a variety of uses represented. The mix of the commercial area fronting Smoky Park Highway, the presence of a 36-acre mobile home park about 100 feet east of the property, and the aforementioned quarry and manufacturing operations make the area difficult to classify with a single label. The current low-intensity use of this property is in contrast with the neighboring high-intensity uses, though it should be noted that the site cannot be intensively developed owing to the substantial fraction which lies in floodway and floodplain hazard areas.

The applicant has applied for a rezoning of the lot from RM-16 (Residential Multi-family High Density District) to Resort District. The residential density allowed within the Resort district is essentially the same as that of the existing RM-16 district; the applicants wish to have the flexibility to use the property for future tourism-related businesses. The Resort zoning district was established to provide an area for the development of resort oriented uses and conference/retreat facilities and the development and expansion of facilities which serve primarily tourists and vacationers.

The intent of the RM-16 Residential Multi-Family High Density District (the existing zoning) is to permit a full range of high density multi-family housing types along with limited institutional, public and commercial uses appropriate within high density residential areas.

The Resort District does require a minimum lot size of 5 acres, a requirement which this property meets. The district also has design and operation standards specifically added to protect adjacent residential areas. Given the limited extent of developable land on the site (due to flood hazard areas) and the design and operation standards, staff does not see the potential impact of development under the proposed zoning to be significantly different from that which could be pursued under the existing zoning. Further, staff is of the opinion that, given the presence of varied high-impact uses nearby, a seven-acre resort district provides opportunities for appropriate land uses.

As of this writing, staff has received one communication from a neighbor who was seeking more information but voiced no opposition to the proposed rezoning.

On August 2, 2006, the Planning and Zoning Commission voted unanimously to recommend approval of the rezoning.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Maximum residential density for the proposed zoning is essentially the same as that for the existing zoning.
- Flood hazard areas on the subject site would prevent high-intensity development of much of the property.
- The site's proximity to quarrying and industrial uses make it well suited for small-scale non-residential activities.
- The Resort District requires compliance with standards specifically designed to ensure compatibility with neighboring residentially zoned areas.

Staff views the proposed zoning district to be equally appropriate for the site as the existing zoning and recommends approval of the request.

Mr. Dale Lane, applicant, said that this zoning gives them a great deal of flexibility to create a variety of micro-businesses.

Mr. Fred English felt that Asheville has to stop allowing people to cut trees down.

Mayor Bellamy closed the public hearing at 6:09 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3384, to rezone 7+ acres at 45 Toms Road from RM-16 Residential Multi-Family High Density District to Resort District, and find the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 23 – PAGE 73

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 06-157- RESOLUTION APPOINTING MEMBERS TO THE CIVIC CENTER COMMISSION

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of a resolution appointing members to the Civic Center Commission.

The terms of Jerri Goldberg and George Keller, as members of the Civic Center Commission, will expire on June 30, 2006. In addition, Jean Ann Taylor has resigned as a member, thus leaving an unexpired term until June 30, 2006.

At the City Council worksession on June 20, 2006, the City Council instructed the City Clerk to prepare the proper paperwork to reappoint George Keller to serve a three year term, term to expire June 30, 2009, or until his successor has been appointed.

Also at the June 20, 2006, worksession, City Council instructed the City Clerk to re-advertise for the vacancies another month.

At the July 18, 2006, worksession, City Council instructed the City Clerk to arrange interviews Joseph Malki, Chip Hood, Tebbe Davis and Timothy Laughlin.

After Council spoke highly of the candidates, Joseph Malki received 0 votes; Chip Hood received 1 vote; Tebbe Davis received 7 votes; and Timothy Laughlin received 6 votes. Therefore, Tebbe Davis and Timothy Laughlin were appointed as members of the Civic Center Commission to each serve a three-year term respectively, terms to expire June 30, 2009, or until their successors have been appointed.

In addition, George Keller was reappointed to serve a three year term, term to expire June 30, 2009, or until his successor has been appointed.

RESOLUTION BOOK NO. 30 – PAGE 95

B. RESOLUTION NO. 06-158 - RESOLUTION APPOINTING MEMBERS TO THE COMMUNITY & ECONOMIC DEVELOPMENT ALLIANCE

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Community & Economic Development Alliance.

Pursuant to Resolution No. 06-100 adopted by the City Council on May 9, 2006, endorsing the HUB Project's governing structure, City Council needs to appoint five members to this board.

At the July 18, 2006, worksession, City Council instructed the City Clerk to re-advertise the vacancies.

On August 15, 2006, City Council instructed the City Clerk to arrange interviews for Joyce Dorr, Cheryl McMurray, Ty Hallock and Steve Cochran. In addition City Council will consider the following candidates, but no interview was necessary: Greg Walker-Wilson, Chuck Tessier, David McConville, Becky Anderson and Kim MacQueen. Ms. McMurray is unable to attend the interview.

Also at the August 15, 2006, worksession City Council instructed the City Clerk to prepare the proper paperwork to appoint Scott Dedman to serve a term to be established once the entire board has been convened.

After Council spoke highly of the candidates, Joyce Dorr received 4 votes; Cheryl McMurray received 5 votes; Ty Hallock received 1 vote; Steve Cochran received 5 votes; Greg Walker-Wilson received 3 votes; Chuck Tessier received 1 vote; David McConville received 4 votes; Becky Anderson received 1 vote; and Kim MacQueen received 4 votes. Because of a tie, City Council re-voted on the 3 or 4 vote-getters: Joyce Dorr received 4 votes; Greg Walker-Wilson received 3 votes; Kim MacQueen received 4 votes; and David McConville received 3 votes. Therefore, Cheryl McMurray, Steve Cochran, Joyce Dorr and Kim MacQueen were appointed as members to the Community & Economic Development Alliance to serve a term to be established once the entire board has been convened.

In addition, Scott Dedman was appointed to serve a term to be established once the entire board has been convened.

RESOLUTION BOOK NO. 30 – PAGE 96

C. RESOLUTION NO. 06-159 - RESOLUTION APPOINTING A MEMBER TO THE RIVER DISTRICT DESIGN REVIEW BOARD

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the River District Design Review Board.

Ms. Maureen Grozier has resigned from the River District Design Review Board, thus leaving an unexpired term until September 1, 2007.

On July 18, 2006, City Council instructed the City Clerk to arrange interviews for Wendy Kussrow, William Langdon and Martha Jane Peiser.

After Council spoke highly of the candidates, Wendy Kussrow received 6 votes, William Langdon received no votes and Martha Peiser received 1 vote. Therefore, Wendy Kussrow was appointed as a member of the River District Design Review Committee to serve the unexpired term of Ms. Grozier, term to expire September 1, 2007, or until her successor has been appointed.

RESOLUTION BOOK NO. 30 – PAGE 97

At 6:20 p.m., Mayor Bellamy announced a 25-minute recess.

D. THIRD PARTY REVIEW BY PROFESSOR DAVID W OWENS OF DEVELOPMENT PLANS

Mayor Bellamy said that at Council's request, Professor David W. Owens, professor of Public Law and Government at the UNC-CH School of Government, conducted a review of three recent development projects. His expertise in the areas of law and zoning and his familiarity with other cities' practices made his review to us very valuable. We asked for this review to take an objective look at the projects and application of Asheville's Unified Development Ordinance (UDO). Professor Owens and the School of Government are well-respected and credible authorities on this subject, and we appreciate their time and expertise.

The report has been available to Council and the public since late June and Professor Owens is here to formally present his report to City Council.

Mayor Bellamy said that this review will help us - as a community - work to clarify our goals and to amend the UDO to more closely reflect those shared goals. She asked for both the participation and the patience of our citizens as we continue this process. Only by coming together and trusting one another can we achieve the community's vision for Asheville. She said that after Professor Owens makes his presentation, the City Manager will give a brief status report on actions and milestones related to the UDO, both those that have already taken place and those that are upcoming. Then Council will take public comments on the report, after which City Council will have an opportunity to ask Professor Owens any questions related to his report.

Professor Owens said that City Council asked for his review of three controversial development decisions - Staples and Greenlife on Merrimon Avenue and Prudential on College Street. He noted that he submitted a letter with his findings on June 23, 2006, and at this time he will summarize his findings and address any questions:

"I. Purpose and Scope of Review: I examined the files of these three cases to address the question of whether the permit approvals were consistent with the terms of the Asheville Unified Development Ordinance. In addition to technical and legal adherence to the standards, I was also particularly mindful of two points raised by Mayor Bellamy in requesting this study. She noted there must be a "basic level of trust in our ordinances, staff and city officials" and that it was paramount to have ordinances that are "clear and understandable." Therefore I was particularly watchful for any indications of intentional wrongdoing on the part of those charged with ordinance implementation and for areas where improvements in ordinance clarify were needed.

It is important to emphasize that the purpose of this review was an examination of three past controversial decisions in order to learn how the city's ordinances and decision-making process can be improved in the future. This review was not an adjudication of the ongoing legal disputes in these cases nor was it a mediation to achieve resolution of these particular cases.

2. Comments on the Individual Decisions:

(a) Prudential Realties Sign. This case was the least complicated of the tree in that there was only one central issue - the number, placement, and size of signs allowed - but even it was far from simple.

I concluded that one of the two signs - the sign on the north side over the entrance - was within the ordinance requirements. I found it was properly characterized as a "wall sign" and that it was within the height and size limits of the ordinance.

The second sign, however, as acknowledged early on by the staff, does not comply with the ordinance. How far out of compliance it is depends on several factors. First, the ordinance only allows a second tenant identification sign for a side of the building with an "exterior public business entrance." It was not clear to me that the east side of the building had a public entrance. Second, if a sign is allowed on that side, it is limited to a total area of one square foot per lineage footage of that side of the building. The second sign that was permitted far exceeds this size.

(b) Staples. Two principal issues were raised by the Staples case - (1) the size and location of the four signs along the top of the building; and (2) the location and design of the building along its street frontage.

The key issue with the sign size is how much of the red background behind the lettering should be considered part of the "sign." The ordinance provides that the background is included if it is "an integral part of and related to the sign." A reasonable argument can be made that the entire red rectangle is a standard part of the corporate logo and should be included, thereby making the permitted sign too large. While I am inclined to agree with that view, a reasonable argument can also be made that this area is not "integral" and can be characterized as an architectural detail rather than a part of the sign. A secondary issue is the applicability of the sign height limitation. As an attached sign, I found the height limit for freestanding signs would generally not apply. The exception would be if the area to which the sign is attached is a "parapet," in which case the ordinance does limit the height. I was not inclined to view this as a parapet, but that would not be unreasonable, and if so, the signs are too high (particularly if the background area is included.)

A building in this zoning district is allowed to have a zero street setback based only if it is a "pedestrian oriented design." I found such a characterization of this building to be problematic. While it has some of the elements that meet this definition in the ordinance, its lack of street side entrances and street level windows leave me questioning whether it is consistent with the council's intent for pedestrian interaction. Also, the ordinance provision does not clearly allow this same setback exemption for side streets and it is imprecise in defining the reference points for calculation of the required sight triangle (particularly regarding whether the sidewalk can be included.)

(c) Greenlife Grocery. A key issue raised by the Greenlife project was the location and operation of loading facilities on the Maxwell Street side of the project. Resolution of this question involves consideration of ordinance provisions on nonconformities, renovations, loading docks, buffers, landscaping, driveways, sight triangles, and street use.

In my review I found the interrelationship of these various provisions to be complicated and somewhat confusing. Even though the building had once housed a grocery store, its nonconforming status for zoning purposes had been long abandoned. The application inadequately addressed the scope of additions and the cost of renovations. The ordinance standards for use of alternative compliance with buffer requirements likely delegate undue discretion to staff. While the ordinance provisions can be read to allow use of the buffer area for "operation" of the loading dock, I would question whether that is consistent with the intent of the buffer requirements. Similarly, allowing a dock entrance to adjoin a driveway may not technically violate driveway width requirements, but it does raise questions of adherence to the intent of access point separation requirements in the ordinance. Also, it appears truck traffic should not have been allowed to use Maxwell Street for access, but whether the street can be used for truck maneuvering is much less clear.

3. Conclusion. I did not find any evidence of intentional wrongdoing by the staff nor any flagrant disregard of the clear provisions of the ordinance. The staff did make several mistakes, which is not uncommon when reviewing the many dimensions of complicated projects and applying the multiple provisions of a complicated ordinance. My sense of the overall staff performance was that there was a good faith effort to carry out the terms of the ordinance. Several judgment calls were made to the benefit of the developers and to the considerable dismay of neighborhood advocates, but I found no conscious effort to subvert the ordinance's intent. At the same time, I found a number of instances where key parts of the ordinance are unclear, confusing, and ambiguous.

4. Recommendations.

(a) Consider modifications to the development review process

(1) *Improve the application form and the review for completeness at the initiation of permit review.* The application forms must elicit all of the information necessary to review compliance. Examples of problems in these projects include imprecise building frontages and entrances in the Prudential case and inadequate information on additions and renovations cost in the Staples case.

(2) *Clearly address the impact of application modifications during the permit review process.* Multiple changes are often made over the course of a permit review, as with the Staples façade and the Greenlife loading area. It is important for all involved - the applicant, neighbors, and staff - to have a clear and common understanding of exactly what the project actually is. At some point modifications are significant enough to warrant a re-start to the process. It should be clear when that is required.

(3) *Consider opportunities for meaningful public comment at key stages of important permitting determinations.* A wide variety of tools are available, including for example pre-application neighborhood meetings, community advisory councils, expanded public notices, listserves, internet postings of application materials, comment by advisory boards, formal hearings, and many others. It is important to carefully tailor the public review process to the particular decisions being made.

(4) *Review the process and standards for some critical preliminary determinations.* Some preliminary determinations are critical, as with the alternative buffer and landscape election in the Greenlife project and the pedestrian oriented design determination for Staples. The ordinance should be clear as to when the applicant is requesting these determinations, the criteria for and process for approval need to be clearly delineated, and careful thought should be given to the nature and timing of public review. Any delegation to staff for these determinations must be accompanied with adequate guiding standards for decision. If the council wants to include standards that involve judgment and discretion, a quasi-judicial review process is required. An administrative review process can be used only if objective standards are used.

(b) Clarify council intent on critical issues

(1) *Improve the standards and review process for projects along major corridors and other sensitive areas.* Several significant policy issues were raised by these projects. Is the Staples project within what the council considers pedestrian oriented design? Should the signage guidelines for the downtown and adjoining areas continue to be advisory only? Are the design and location standards for developments along major corridors clear and adequate and what the council intends? As the recent Merrimon Avenue study report illustrates, creation and maintenance of a vibrant, attractive, and successful corridor requires attention to a

number of issues beyond the UDO, but the development code plays a critical role in the overall success of these efforts.

(2) *Clarify the standards for infill development.* Redevelopment of existing neighborhoods poses significant opportunities and challenges, as the Greenlife project amply illustrates. Clear standards and decision-making procedures are necessary to address traffic, noise, buffering, landscaping, appearance, scale, and a variety of other factors. Where flexibility is allowed, clear goals and ample opportunity for participation by affected parties is very important.

(3) *Establish a regular process for ordinance clarification and improvement.* Project reviews invariably identify unanticipated questions on an on-going basis. Novel sign placements and design, calculation of mandatory sight lines, and the interplay of separate ordinance provisions are examples in these projects. It is reasonable to ask staff to collect these, develop potential solutions, secure review of affected persons and the planning board, and to regularly bring options for clarifications and solutions to the council for action. I understand from Gary Jackson that staff work is already underway to address a number of the specific difficulties raised in the June report. It will be important for Council to not only follow through with the corrections, clarifications, and refinements identified through review of these projects, but to also establish an on-going process for ordinance clarification."

Mr. Chris Pelly, President of the Coalition of Asheville Neighborhoods, thanked City Council, Professor Owens and City staff on this review process.

Regarding the Prudential sign, Mr. Joe Minicozzi asked Council (1) to amend the confusing table that has led some to interpret that sign height standards apply to attached sign, or at least a moratorium be placed on sign permits until the table is amended; and (2) if it's determined that there is not a legitimate business entrance on the east side of the building, that the sign be removed on that side; or if it does constitute a business entrance, we ask that they come forward for a variance.

Regarding the Staples sign, Mr. Minicozzi recommended Council (1) to amend the same sign table as requested for the Prudential sign; (2) calculate the red area in the background of the Staples sign as part of the logo which would make the permitted sign too large; (3) all the signs be brought down to the 25 feet height; and (4) have the parapets match by a green screen or some sort of landscaping to soften the building.

Regarding the Greenlife Grocery, Mr. Minicozzi recommended Council (1) require the owner to apply for a variance on the driveway cut or that the project be amended to meet the 36-feet requirement; (2) screening brought to Maxwell Street; (3) buffer separation between the commercial use and residential use; (4) retract the letter by Police Chief Hogan about exception of delivery vehicles blocking the rights-of-way; (5) apply a moratorium on the standards of alternative compliance until we find a better way to articulate the policies and procedures for alternative compliance.

Mr. Fred English commented about truck delivery in the Greenlife issue.

Mr. John Swann, one of the owners of Greenlife Grocery, passed out to City Council a report regarding Greenlife. He explained the beneficial efforts of Greenlife on the neighborhood and City, noting that tax revenues generated from July 17, 2004 - August 8, 2006 was $1,127,312. He pointed out that Greenlife employs approximately 150 people and had a 2005 weekly payroll of approximately $43,000. He said they have taken a lot of steps to try to mitigate the neighborhood concerns, including, but not limited to: memos and maps to the truck drivers regarding traffic; putting up chains across the loading dock after 6:00 p.m. until 6:00 a.m.; overlaid

asphalt in the gutter swale at the Maxwell Street to eliminate the problem of trucks hanging up; replaced dumpsters with roll-off trash compactors; screened the loading and compactor area from adjoining streets; installed a groundwater processing system to eliminate runoff from compactor area; installed a sound absorption panel and fencing to help block the sound generated by refrigeration compressors; and entered into mediation with Mr. Reid Thompson but it ended with no resolution. As of today, Greenlife has spent $107,000 to try to take the neighborhood needs into account, none of which were required by the City. The three closest grocery stores to Greenlife do not have any screening and several of them are visible to nearby residential houses, noting that Greenlife is willing to go well beyond what is being required of other grocery stores. He then reviewed with Council the proposals considered by Greenlife to mitigate the impact on the neighborhood and the reasons why those actions were not taken.

Mr. James Judd, resident in Chunns Cove, felt that the area to which the Staples sign is attached is a parapet, resulting in the signs being too high.

Mr. Hugh Bradburn, General Manager of Greenlife Grocery, said that many Greenlife employees are residents of the surrounding area and it is their intent to mitigate the situation as much as possible. They do work with the truck drivers making their deliveries a safe and quick process. He feels like Greenlife is an asset to the community and they are making their best effort in keeping the community in mind.

Mr. Benjamin Gilliam felt there was no question that the red area in the background of the Staples sign is part of the Staples logo, opposed to just the text lettering. He asked that the City work with Staples to reduce their sign size. He also asked that Council take under consideration that the side street setback on the Staples building is not allowed by our ordinances. Regarding the Greenlife Grocery, he felt that they turned Maxwell Street into a commercial alley.

Mr. Walter Plaue felt that Council is spending their valuable time on minor issues such as the Staples and Prudential signs. However, he did feel that the neighborhood has legitimate concerns regarding the use of Maxwell Street by Greenlife Grocery.

A resident of Asheville thanked Council for taking time to review these issues. She felt that the visual integrity of the City is important.

City Manager Jackson said that there have been significant efforts by Council and City staff on the overall planning and development process and to the three projects specifically. Using a timeline, he showed how those efforts have been made and Council's commitment to community and economic development. He also noted that in November or December the Planning and Zoning Commission will be reviewing proposed amendments to the UDO and those amendments will be presented to Council. City staff is committed to continuous improvement. Specifically with regard to Greenlife, a presentation was made to Council on August 15, 2006, regarding the traffic issues on Maxwell Street. Council challenged Greenlife to respond and Mr. Swann has presented to Council today some response to that challenge. He expected Council would want staff to continue discussions with Greenlife about their mid- and long-term plans to expand, improve and make that facility more capable with the existing neighborhood and their customers as well. Regarding Staples, Mayor Bellamy and Vice-Mayor Jones have sent a letter to re-open the dialogue regarding that issue. Regarding the Prudential sign, City staff has indicated to the property owner that they have until the end of August, 2006, to bring the City a modified sign plan that will be consistent with the ordinance.

Discussion surrounded Professor Owens' responses to various questions and/or comments from Council, some being, but are not limited to: can a UDO document be perfected; as you try to fix certain provisions of the Code, is there a tendency to break other provisions; can you cite some examples of better zoning models; in terms of our development process, how is

Asheville, a size of 70,000 people, doing; is there a shorter, more simplified way to guide our development process; is the Staples building pedestrian oriented; is Merrimon Avenue or Orange Street the front of the Staples building; does the entrance from the sidewalk on Orange Street meet the Americans with Disabilities Act (ADA) requirements; are the sight triangle requirements for the driveway leading to Orange Street met; is Maxwell Street residential in nature or commercial in nature; does the loading dock meet the alternative compliance requirements on buffering; explanation of when staff can be delegated to make alternative compliance determinations or when a quasi-judicial review process is required; does staff have the authority for sight triangle modifications in our existing UDO; and what actions do cities take when they find a discrepancy.

Councilwoman Cape spoke in support of not looking back on these issues, but moving forward. She felt that the red square is part of the corporate logo and that area is a parapet and the sign is too large. She also felt that the pedestrian oriented building amenities aren't there in the manner and intent the community expects out of the UDO. She proposed that the Downtown Commission be re-engaged in the process of working with Staples on some pedestrian oriented amenities that the community feels are acceptable. Regarding Greenlife, she feels the loading docks on Maxwell Street are non-conforming and the building was not a continuous use and therefore for those docks to be there is wrong. She felt that the buffer is inadequate. She appreciated Council is looking at these issues. She agreed that Greenlife and Staples are assets to our community, but they need to be done right. Our community needs to be more willing to incorporate those type businesses closer in. She said that she and Councilman Newman talked about giving the following direction to the City Manager and City Attorney. In terms of Maxwell Street, the purpose and goal of protecting the residential character of Maxwell Street means we need to eliminate the uses of the street by commercial loading trucks. We do not feel it is appropriate to use Maxwell Street for commercial loading trucks either to access the grocery store or for maneuvering to access the loading dock. We ask all parties to explore possible design solutions that would eliminate the need for the use of Maxwell Street at all. We are open to the idea that they meet short-term as well as long-term solutions to this issue. And open to even considering rezoning of adjacent properties as necessary to facilitate design solutions. Also would like to offer support to Greenlife should they make a choice to expand or incorporate design solutions. We believe the buffer on Maxwell Street should be improved and expanded as part of the design solution. In terms of the sign on Staples, the bright red background on the Staples building is part of their copywrited corporate logo and should be counted as part of the sign itself; and, pursuant to our Code the sign is not in compliance. We ask that our City Manager and City Attorney work with Staples to bring that signage into compliance with our sign ordinance. Landscaping is needed on Merrimon Avenue to achieve any semblance of compliance with pedestrian-oriented design, and the Downtown Commission might be a good group for doing this kind of negotiation. She hoped that City staff will work with the local property owners and businesses to achieve these goals within some kind of timeframe and if there are legal questions that need to be taken into consideration, she would like for Council to go into closed session for that purpose.

Councilman Davis felt the suggestions outlined by Councilwoman Cape and Councilman Newman were good. He feels that the letter from the Mayor and Vice-Mayor to Staples is good and felt they will try to mitigate some of the problems. He commended our staff in being pro-active and moving forward with amending the UDO for a better document.

Mayor Bellamy explained that it is now time to made decisions on these three issues; and staff has received direction on amendments to the UDO.

Regarding the Prudential sign, it was the consensus of Council that the second identification sign on the east side of the building should comply with the sign ordinance requirements. Mayor Bellamy said that she will write a letter on behalf of Council to the building

owner. City Attorney Oast said that our Code is fairly specific in terms of timelines for compliance with respect to notices of violation and his suggestion is that we follow that Code. This process was agreed to by Council.

Regarding the Staples sign, it was the consensus of Council that the red background behind the lettering should be calculated as part of the sign.

Upon inquiry of Councilman Mumpower, City Attorney Oast said that the difficulty you encounter with a situation like this is there is a split of opinion on whether the sign is too big or not. Mr. Shuford shared an interpretation earlier this year where that kind of interpretation would affect a number of other signs in this community and unless Council is prepared to take similar action against all of them, it could be a problem. It was therefore his suggestion that before we go down that road, is to do what Councilwoman Cape suggested and allow him and the City Manager to work with Staples to see if we can get some resolution to it.

Councilman Newman didn't envision the City sending them a notice of violation, but writing them and say something similar to "as you are aware, your sign has been the subject of significant community interest and controversy. We have had a third-party review and Council after Council discussion, the majority of Council does believe that the red background is part of the corporate logo. Therefore, we would like to see you reduce the size of the sign to what our Code allows." City Attorney Oast said that in the cases he has reviewed where this kind of action has occurred, it has been the staff's determination, not the Council's determination, that resulted in the mistake being recognized and steps being taken. That is exactly what we are doing in the Prudential sign. In this case, Council can direct that the investigation occur, but he was not sure if Council can direct the results of it.

In response to Councilwoman Cape about the plans being received in color or black and white, Mr. Shuford believed that the plans were in black and white. She felt that Staples knew what their colors were and made a concentrated effort to have as large of recognizable identifiable logo.

Mr. Shuford gave Council examples of other signs that you can make the argument that the background is either part of the corporate logo or something that would cause the sign to stand out. They range from a number of chain businesses to other circumstances. He thinks the issue Council has is that they would like to see some resolution of the concerns regarding Staples. The easiest way is that we seek some voluntary reactions. Staples was very responsive when the community raised objections early on and spent a significant amount of money finding out what people wanted - only to be faced with an appeal which caused them to lose interest in working with the City. But, he thinks there is an opportunity for us to explore their willingness to proceed and seek their interest to be rekindled. He suggested that as a first step.

Regarding the pedestrian orientation of the building, he heard one Council member suggest landscaping as an alternative to help soften the building and one presentation made included that. That is something we can work with Staples at a fairly minimal cost and big public relations benefits. If Council would like staff to do that, they will start with that and move into another arena should we not meet with success. He said we need to see what their reaction is first and then engage Council's interest at that time.

Councilman Mumpower questioned the reality of the next step. Mayor Bellamy said the next step as a policy-making body would not only be for Staples, but a letter sent out to all other signs that Mr. Shuford has alluded to that would fall into this category. She said that Council is taking over the ownership of the process from here on out with the City Manager, City Attorney and Staples. The first step in this process will be a letter from City Council asking Staples to come to the table in a good faith effort and get to a good point on the sign, the height of the sign,

28

the pedestrian oriented amenities, and the assurance that the access from the sidewalk on the Orange Street side is ADA accessible. If Staples is not willing to work with the City, then City Council will go into closed session to discuss their next option, which will include writing a letter to all non-conforming signs that fall into the category mentioned by Mr. Shuford.

Regarding Greenlife Grocery, it was the majority of Council's decision that screened fence does not meet the buffering requirements.

Upon inquiry of Councilman Mumpower, Professor Owens said that the ordinance says that if you have an access from a commercial road, use that. Do not use a residential street for access to a commercial building. That is the basis of his conclusion that it would be inappropriate to have Maxwell Street as an access route to the building. What he thought the ordinance did allow was the use of Maxwell Street (if you entered from Merrimon Avenue and you had to pull onto Maxwell Street to back into the loading dock) for maneuvering. There is another ordinance provision that says design of all loading docks, including maneuvering room, on sight. He believes those two provisions are somewhat in conflict, but it seemed to him that the intent of the ordinance is relatively clear that a commercial truck should not be using a residential street to get to the store.

Councilwoman Cape said that part of the reason Maxwell Street was used is because City staff considered the grocery store use was continuous. But it seems very clear here that Professor Owens' opinion is that, even though the building had once housed a grocery store, its non-conforming status for zoning purposes had long been abandoned. So it did go back to a new use and then all our standards came into play to not use Maxwell Street. It's clear to her that in the UDO it says that if there are several street accesses, then the residential street cannot be used, and there are several street accesses.

With regard to the buffering, Mayor Bellamy said that Council deals with buffering all the time and none of the buffering ever completely shields anything we are asking it to shield because the buffering isn't mature. She didn't think buffering is required to completely shield, but to create some distance between uses. Mr. Shuford said that even if there was a fully compliant buffer and setback, the unloading truck would still be located relatively near Maxwell Street and would certainly be above whatever buffer would be installed, certainly at the time of the installation, and only the trees spaced in that buffer would create any sort of visual blockage. He did suggest the possibility of using a landscape material not often used for buffers, but has the potential to fairly quick get to a height that would get to the issue of screening the trucks. That would be the use of some sort of bamboo that grows thickly and tall enough to shield a 12-13 foot tall truck. It's not a perfect solution, but a landscape solution that would ultimately be more effective than a fence, along with some effort to get some small shrubs in at that location.

Councilwoman Cape said that the issue is that about 8-12 feet of the truck sticks out of the buffer onto the sidewalk. The key issue is that the loading dock should have been built somewhere else.

Upon inquiry of Councilman Freeborn, Professor Owens said that it was his opinion that the buffer on Maxwell Street does not meet the intent of the ordinance in the sense that the delivery truck, during its normal operation, is sitting in the buffer area and that seems to be the basic problem. From a legal standpoint, however, the ordinance does allow alternate compliance and the question is does that alternate compliance extend so far as to allow them to regularly put a part of the operational portion of a loading dock within the buffer area. One of the difficulties is that the alternate compliance provision in or ordinance is that it be equal to or better than regular compliance and it's difficult for him to see how the current configuration is equal to or better than the regular compliance.

Mayor Bellamy asked if on the buffering issue does Council need to have a quasi-judicial review to really address this issue. Professor Owens responded that for future projects, if Council wants to retain the alternate compliance that you now have in the ordinance with comparable standards, then you need to convert it to a quasi-judicial procedure rather than a staff level approval.

Councilman Davis felt that the buffer doesn't offer the intent of the buffer, but we have an operating business that is doing a good job of infill development. He feels that we can address future issues with the quasi-judicial review. He felt we would be opening Pandora's Box if we say we are going to step beyond what experts say is a compliant situation. The courts will decide those issues. The truth of the matter is that the other grocery stores and other uses that have this same situation. He does understand the feelings of the residents on Maxwell Street but he felt that maybe a renewed effort of mediation might be worth pursuing.

Mayor Bellamy said that if we ask Mr. Swann to come to the table, it will not be with the neighborhood, but with her, if okay with Council, the City Manager and the City Attorney to talk about opportunities. Since we are accountable to the community, after we meet with Greenlife we will report back to the community.

Councilman Newman felt that Council would like to explore some possible design ideas to try to make it better, rather than simply managing making an existing situation better.

City Manager Jackson said that the direction received from Council last week was to pursue interim and long-term strategies and that is a level of discussion that hasn't occurred before.

Councilman Mumpower was concerned that we are taking risks with the future of Asheville to pursue these kinds of policy approaches and was especially concerned that we are second-guessing our staff in an area that is not clear to any of us. If we ask our staff to function perfectly in an imperfect world with an imperfect document, we risk paralyzing them. And when we paralyze them, then we affect the development and growth of the city adversely from this point forward. He fears we will be taking some steps that represent second-guessing and he doesn't want to participate in that.

Mayor Bellamy said that Council is following through with what they recommended last week about asking what Greenlife's future plans are, how can we address some concerns of the surrounding neighborhood, and if there are opportunities for a positive response to some of the concerns.

At the request of Mayor Bellamy and after a brief discussion, it was the majority of Council's decision to ask the City Manager to bring forward to Council at the next formal meeting a budget amendment for additional planning staff to address the growing demands of our community.

At 9:02 p.m., Mayor Bellamy announced a 5-minute break.

E. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CONVENTIONAL WISDOM TO DEVELOP A COST ANALYSIS FOR REFURBISHMENT AND UPGRADING THE CURRENT CIVIC CENTER FACILITY

Councilman Jan Davis said that this is the consideration of a resolution authorizing the City Manager to enter into a contract with Conventional Wisdom to develop a cost analysis for refurbishing and upgrading the current Civic Center facility.

On May 9, 2006, the Civic Center Task Force presented its report to the Asheville City Council. The report recommended two options for consideration; the first included building a new arena, and the second called for building a new performing arts center next to City Hall. A third option, estimated at approximately $17 million, was also discussed. This third option would only cover repairs of deferred maintenance items and would not improve service to customers, nor conditions for event performers and producers. The majority of the Task Force felt that money being spent on refurbishment alone is not a satisfactory desire.

During the May 9 Council meeting, there was a request from members of Council that a "fourth option" be developed. This option consists of refurbishing and upgrading the current facilities so that the Civic Center can continue operations into the future successfully. In pursuit of this option, staff contacted Ian Vingoe, a consultant with Conventional Wisdom, who wrote much of the Heery Report. Mr. Vingoe is intimately familiar with the Civic Center and has the capability to develop realistic and detailed estimates for improvements in a short time frame.

Mr. Vingoe has indicated that the fee for the costs estimates report will be up to $10,000 plus expenses. There is additional cost if City Council would like him to attend a City Council meeting to discuss the results. Staff is confident that the total cost of these items would not exceed $20,000.

Councilman Davis said that at the May 9 meeting, Councilman Newman expressed a desire to look at incremental repairs in order to keep the building functioning and producing. It is his personal opinion that if we do that there is a white paper in existence that was done by the Civic Center Commission that gives us an outline of what we can do. He feels we know what we need to do to keep the building functioning, without entering into this agreement. At the same time, Councilman Mumpower suggested the "fourth option" of refurbishing and upgrading the current facility to allow the facility to continue and operate with improved, functional ability for a significant amount of time. We have Civic Center staff that has identified these needs. Regarding marketability of the building, we do acknowledge that there is a conflict with some of the uses in the building at the same time. To alleviate that conflict, we would probably build another entrance, as outlined in the Heery Report. That, however, is something we cannot do ourselves. But, should we want to go in that direction, we should retain experts like Conventional Wisdom. Contrary to all the studies spent on the Civic Center to this point, taxpayer dollars have been fairly minimal. His personal feeling is that we move forward and do the incremental repairs that are necessary and step forward and look at things that will carry this good operating building into a longer term future. And, at the same time we are pursuing the option of a stand-alone performing arts center.

Mr. Bill Lack, member of the Civic Center Commission, had a lot of confidence in the Civic Center staff and thought the $20,000 would be a good investment.

Mr. Fred English said that we need to get help from our state legislators for assistance with the Civic Center.

Councilman Freeborn moved to deny the resolution authorizing the City Manager to enter into a contract with Conventional Wisdom to develop a cost analysis for refurbishing and upgrading the current Civic Center facility. This motion was seconded by Councilman Newman.

Councilman Newman felt that if the majority of Council thinks that the option of building a new performing arts center on the Parkside property is the preferred choice, then he doesn't think it would make sense to spend a lot of money exploring other options. He feels that it will take several years to work that option out and the success of it will depend on the level of private sector money that will be necessary to make that happen. If we go that route, then we do need to do things to our existing Civic Center to take care of it and we already know what needs to be

done. If ultimately the new performing arts center doesn't work, then the "fourth option" is probably what we need to pursue. He is supportive of following the direction that the majority of Council wants to go in with the new performing arts center and focusing the dollars we have to take better care of the facility we have today.

Councilman Davis felt a better motion could have been what the City is going to do with the Civic Center, since we have clearly identified the steps. He moved to amend the motion to contract with Ms. Sasha Vrtunski (who the City has worked with in the past on this issue) on a short-term basis to have her work with Civic Center staff on a priority list of things that need to be done.

Upon inquiry of Councilman Freeborn, City Manager Jackson said that he feels we can benefit from the additional staff support. If Council gives him the flexibility, he didn't think Council would need to give him formal direction other than to supplement existing staff as needed through contracting to get the work done. The money would not rise to the amount of money Council would need to authorize.

Councilman Davis withdrew his motion to amend the resolution since City Manager Jackson said that he would not need formal direction to contract with Ms. Vrtunski.

Councilman Mumpower said that while he likes the idea, his hesitancy is that the only realistic thing is fixing what we have. We need to get this issue focused on by itself.

The motion made by Councilman Freeborn and seconded by Councilman Newman carried unanimously.

Councilwoman Cape is excited about moving forward. She asked Council to direct staff to bring back opportunities for Council to look at changes to the Civic Center illustrative and reflective of our community and look at energy-efficient measures, green-building techniques (including, but not limited to, a green roof on the Civic Center) and other options as we make changes. As we direct people to move forward with these key issues, let's take the opportunity of taking the stigma of this 1950 high school auditorium and turn it into an example for something we can be proud of.

Mayor Bellamy instructed the City Manager to do a better job of promoting the Civic Center on our website and what good things are happening there.

Councilman Mumpower asked that the Civic Center issue be brought back to Council on a regular basis. Mayor Bellamy said that the City Manager will work with Ms. Vrtunski on this.

F. RESOLUTION NO. 06-156- RESOLUTION IN SUPPORT OF IMMIGRATION REFORM

Councilman Mumpower read the following reasonable, balanced resolution: "Whereas, historically, the cities and towns of the United States are a melting pot of multiple cultures and nationalities based on our nation's history of welcoming immigrants, and the City of Asheville in particular has benefited from the contributions of immigrant communities; and Whereas, Asheville reaches out to immigrant communities in a number of ways, including through the Sister Cities program, and cultural festivals such as Fiesta Latina and the Greek Festival; and Whereas, when admitted through a well-regulated system, immigrants strengthen the City by creating economic opportunities, increasing scientific and cultural resources, strengthening the City's ties with other nations and cultures, fulfilling humanitarian commitments, and supporting family ties and family values that are necessary to build strong communities; and Whereas, failure on the part of the

federal government to secure the borders, track visa recipients in the interior, or enforce worksite laws allows illegal immigration to thrive, with record numbers of persons entering the country illegally or overstaying their visas; and Whereas, the National League of Cities on July 21, 2006, adopted a "Resolution in Support of Comprehensive Immigration Reform," which called upon the federal government to strengthen and reform immigration laws, and to undertake consistent and comprehensive enforcement of them. Now, therefore, be it resolved by the City Council of the City of Asheville that the City Council does hereby recognize the substantial contributions that immigrants have made to the City of Asheville, and requests that action be taken at the federal level to enforce immigration laws, and to devote sufficient resources to enforce those laws, as set out in the above-referenced National League of Cities resolution. In addition, the City Clerk is hereby directed to transmit a copy of this Resolution to Senators Elizabeth Dole and Richard Burr, and to Congressman Charles Taylor."

The following individuals spoke in support of the resolution for various reasons:

Mr. Tim Peck
Mr. Carlos Gomez
Mr. Shawn Presnell
Mr. H. R. Carlyle
Ms. Kathie Lack, President of the Action Club
Rev. Christopher Chiaronmonte
Mr. Bill Lack
Ms. Loretta Reynolds
Mr. Walter Plaue

The following individuals spoke about the positive points of immigration:

Mr. Bill Cavallaro, west Asheville resident
Ms. Jerri Soloman
Dr. Steve Buser
Ms. Minnie Jones

Councilman Mumpower moved to adopt Resolution No. 06-156. This motion was seconded by Vice-Mayor Jones.

Councilwoman Cape wanted to include language that not only addressed the punishment aspects, but also encouraging the opportunities for legal immigration. The language she asked to add is as follows: "Be it further resolved that the federal government must provide an appropriate, legal means of immigration, as is determined to be necessary and effective for the United States, for foreign nationals that want to work here temporarily, become legal permanent residents, or gain citizenship; and that this process would include the ability for those undocumented immigrants who currently live here and who have proven themselves by their consistent work history, absence of criminal activity and integration into our communities, to attain legalized status and should also be able to apply for citizenship through additional process, as appropriate and practical in a manner that is fair to all applicants." However, she said that Councilman Newman was under the impression that the resolution Councilman Mumpower read essentially supported the comprehensive immigration reform resolution that the National League of Cities passed. If that is so and if we can change the wording in such a way to say that we support the National League of Cities resolution then she would be fine to not add the language she recommended above.

Councilman Mumpower said that he supported the resolution without the suggested change read by Councilwoman Cape. He thinks that the language staff has drafted provides

some flexibility and perspective but does not specifically endorse the National League of Cities recommendations.

Upon direction of the majority of Council, City Attorney Oast said that resolution read by Councilman Mumpower does not say that City Council does hereby endorse the National League of Cities resolution, but he didn't think there was any question that it does not disagree with it. If directed, he would be glad to amend the resolution to reflect Council's intent.

Councilman Newman moved to amend the motion made by Councilman Mumpower and seconded by Vice-Mayor Jones by asking the City Attorney to include language clarifying that we are supporting the National League of Cities resolution. This motion was seconded by Councilwoman Cape.

City Attorney Oast said that he can amend the resolution as follows: " ... and requests that action be taken at the federal level to enforce immigration laws, and to devote sufficient resources to enforce those laws, as set out in the above-referenced National League of Cities resolution, which the City Council does hereby endorse." (underlining denotes amendment)

When Mayor Bellamy called for a vote on the motion to amend the main motion, said motion carried on a 6-1 vote, with Councilman Mumpower voting "no."

After a brief discussion, Councilman Mumpower moved to withdraw his main motion.

Councilman Freeborn moved to approve the language in the resolution as presented with the additional language suggested by City Attorney Oast. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 -- PAGE 94

VI. OTHER BUSINESS:

Councilman Mumpower thanked the Breakfast Rotary Club for their efforts in building two Top A Stop bus stops.

Mayor Bellamy encouraged residents to drive safely, especially since the school year has started.

Mayor Bellamy said that the Asheville-Buncombe Coalition System is in need of volunteer mentors and tutors to assist our young people in both school systems.

The following claims were received by the City of Asheville during the period of Steve Slagle (Water), Suzanna Baum (Sanitation), Margaret Carol Godefroi (Fire), Sheila Shearon (Streets), Jacqueline Brown (Water), Stephen P. Thompson (Sanitation) and Angela Fisher (Transit Services.) In addition, the following claims were received by the City of Asheville during the period of August 4-17, 2006: Oalma Hazel Norton (Sanitation), Kendra Edgerton (Streets), BellSouth (Fire), Janice Redfern (Water), BellSouth (Water) and Colis J. Muchemu (Transit Services). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Rev. Christopher Chiaronmonte was disappointed that food vendors after Bele Chere were told not to give the left-over food to the homeless. He urged Council to move quickly on providing public restrooms in the downtown area.

Mr. Gene Hampton, founder of Asheville-Buncombe Citizens for Quality Government, spoke to Council about the quality of life in Asheville and the need for quality education.

Mr. Adam Ripley asked that his ministry be allowed to serve grilled cheese sandwiches at Pritchard Park on Friday nights when The Drum circle is present.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:55 p.m.

Kisha Lipe
CITY CLERK

MAYOR

Tuesday – September 12, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Assistant City Manager Jeffrey B. Richardson; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Kelsha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Fire Captain Mike Quinones led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF ASHEVILLE FIRE DEPARTMENT CAPTAIN MIKE QUINONES AS FIREFIGHTER OF THE YEAR FOR THE STATE OF NORTH CAROLINA

Mayor Bellamy proudly recognized Asheville Fire Department Captain Mike Quinones as Firefighter of the Year for the State of North Carolina.

Fire Chief Greg Grayson was also pleased to announce that Gary Cornett and Scott Burnette have been promoted as Assistant Fire Chiefs.

B. PROCLAMATION PROCLAIMING SEPTEMBER 18-22, 2006, AS "MINORITY ENTERPRISE DEVELOPMENT WEEK"

Mayor Bellamy read the proclamation proclaiming September 18-22, 2006, as "Minority Enterprise Development Week" in the City of Asheville. She presented the proclamation to Ms. Brenda Mills, Minority Business Coordinator, who briefed City Council on some activities taking place during the week.

C. PROCLAMATION PROCLAIMING THE FOURTH MONDAY IN SEPTEMBER 2006 AS "FAMILY DAY – A DAY TO EAT DINNER WITH YOUR CHILDREN"

Mayor Bellamy read the proclamation proclaiming the fourth Monday in September of 2006, as "Family Day – A Day to Eat Dinner with Your Children" in the City of Asheville. She presented the proclamation to Ms. Allison Jordan with Children First, who briefed City Council on some activities which will take place on that date.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "C," "D," and "E", were removed from the Consent Agenda for separate votes.

At the request of Councilman Newman, Consent Agenda "G" was removed from the Consent Agenda for a separate vote.

At the request of Mayor Bellamy, Consent Agenda "H" was removed from the Consent Agenda for a separate vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 22, 2006

B. RESOLUTION NO. 06-160 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT AN OFFER TO PURCHASE PROPERTY LOCATED OFF OF CLEMMONS STREET FROM RUSSELL KEITH

Summary: The consideration of a resolution authorizing the Mayor to convey land off of Clemmons Street to Russell Keith, in the amount of $2,600.

On August 22, 2006, City Council authorized advertising for upset bids pursuant to a bid from Russell Keith for land off Clemmons Street in the amount of $2,600. The advertisement was published on August 25, 2006, and no upset bids were received.

The land off Clemmons Street was acquired by the City as part of the East End/Valley Street Community Improvement Program. It is a rectangular shaped fragment lot comprising 0.03 acre±. It has no access and was intended to be sold to an adjoining property owner. It is zoned RS-8, and it is not suitable to build on. The bid from Russell Keith is in the amount of $2,600. We have in file an appraisal letter prepared by Gordon F. Lucks dated March 30, 2006, estimating the market value of the property at $2,600. Mr. Keith proposes to acquire the subject parcel for assemblage with the property he owns next door.

Pros:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.

Cons:

- There is no negative impact.

The proceeds from the sale of this parcel will be Community Development Block Grant Program Income.

City staff recommends adoption of the resolution which will authorize conveyance of the property off Clemmons Street to Russell Keith, in the amount of $2,600.

RESOLUTION BOOK NO. 30 – PAGE 98

C. RESOLUTION ACCEPTING THE U.S. DEPT. OF HOMELAND SECURITY'S SAFER GRANT FOR THE PURPOSE OF HIRING THREE FIREFIGHTERS

This matter was removed from the Consent Agenda for a separate vote.

D. RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A GRANT FROM THE U.S. DEPT. OF HOMELAND SECURITY GRANT FOR MOBILE EMERGENCY RADIOS FOR THE FIRE AND RESCUE DEPARTMENT

This matter was removed from the Consent Agenda for a separate vote.

E. BUDGET AMENDMENT ACCEPTING A GRANT FROM THE U.S. DEPT. OF HOMELAND SECURITY FOR THE PURCHASE OF MOBILE EMERGENCY RADIOS

This matter relates to Consent Agenda "D" above and was removed from the Consent Agenda for a separate vote.

F. RESOLUTION NO. 06-163 - RESOLUTION ADOPTING THE NATIONAL INCIDENT MANAGEMENT SYSTEM (NIMS) IMPLEMENTATION PLAN AS THE CITY OF ASHEVILLE'S INCIDENT COMMAND SYSTEM

Summary: The consideration of a resolution adopting the National Incident Management System (NIMS) as the City of Asheville's Incident Command System.

On February 28, 2003, the President in Homeland Security Directive (HSPD)-5, directed the Secretary of Homeland Security to develop and administer a National Incident Management System (NIMS). This system will provide a consistent nationwide approach for Federal, State, and local governments to work effectively and efficiently together to prepare for, respond to, and recover from domestic incidents, regardless of cause, size, or complexity. To provide for interoperability and compatibility among Federal, State, and local capabilities, the NIMS will include a core set of concepts, principles, terminology, and technologies covering the incident command system; multi-agency coordination systems; unified command; training; identification and management of resources (including systems for classifying types of resources); qualifications and certification; and the collection, tracking, and reporting of incident information and incident resources.

The Incident Command System components of NIMS are already an integral part of various incident management activities throughout the City of Asheville, including current Public Safety training programs. The NIMS provides a consistent, flexible, and adjustable national framework within which government and private entities at all levels can work together to manage domestic incidents. This flexibility applies across all phases of incident management: prevention, preparedness, response, recovery, and mitigation.

This Incident Command System will assist the City of Asheville in effectively and efficiently preventing, preparing for, responding to and recovering from domestic incidents, regardless of cause, size or complexity.

The NIMS provides a set of standardized organizational structures—such as the Incident Command System (ICS), multi-agency coordination systems, and public information systems—as well as requirements for processes, procedures, and systems designed to improve interoperability among jurisdictions and disciplines in various areas, including: training; resource management; personnel qualification and certification; equipment certification; communications and information management; technology support; and continuous system improvement.

Pros:

- NIMS is required under HSPD-5 and a Proclamation dated May 11, 2005, by Governor Easley.
- Use of NIMS is tied to eligibility of a host of US Dept. of Homeland Security grant programs.
- Increases efficiency and effectiveness of operations during daily and emergency events.
- Increases ability to work with other local, state and federal agencies during times of disaster, using the same operational management platform.

Cons:

- None identified at this time.

City staff recommends approval of a resolution adopting the National Incident Management System as the City of Asheville's Incident Command System.

Ms. Leslee Kulba was of the opinion that the City is accepting money from the federal government for what used to be a local government issue. She did not think that state and local issues should be federalized.

Fire Chief Grayson explained how the Incident Command System components of NIMS are already an integral part of various incident management activities throughout the City of Asheville, including current Public Safety training programs. He explained that local governments are required to adopt the NIMS on or before September 31, 2006.

RESOLUTION BOOK NO. 30 – PAGE 101

G. RESOLUTION OF INTENT TO CLOSE A PORTION OF AN UNOPENED ALLEY OFF OF MONTFORD AVENUE AND SCHEDULING A PUBLIC HEARING ON OCTOBER 10, 2006

This item was removed from the Consent Agenda for a separate vote.

H. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE PIERZ FAMILY REUNION ON OCTOBER 14, 2006, AT CARRIER PARK CORPORATE PAVILION

This item was removed from the Consent Agenda for a separate vote.

I. ORDINANCE NO. 3386 - BUDGET AMENDMENT TO ASSIST WITH THE DOG PARK AT AZALEA PARK

Summary: The consideration of a budget amendment in the amount of $5,000 contributed by Mr. Chuck Cloninger to assist with the construction of a Dog Park at Azalea Park.

The City of Asheville is in the process of building its second "Dog Park" at the Azalea Park property in East Asheville. This contribution is to help cover the expense of this project.

Pro

- This will allow the City to construct another enclosed "off-leash" area for dogs to use while their owners socialize. The first such area was built with private donation at the French Broad River Park in West Asheville and is extremely successful, to the point that it is overused. The dog park at Azalea will help with this overcrowding and provide an area across town for additional convenience. Currently, the Dog Park at Azalea is nearing completion with the fencing installed and the gravel parking area completed. Once the mulch ground cover is spread for the "off-leash" area, the park will be ready for use.

Con: None noted

City staff recommends City Council approve the budget amendment in the amount of $5,000 to increase the budget for development of the Azalea Park Dog Park.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR SEPARATE ACTIONS

RESOLUTION NO. 06-161 - RESOLUTION ACCEPTING THE U.S. DEPT. OF HOMELAND SECURITY'S SAFER GRANT FOR THE PURPOSE OF HIRING THREE FIREFIGHTERS

Summary: The consideration of accepting the U.S. Dept. of Homeland Security's (DHS) SAFER Grant, in the amount of $558,143, for the purpose of hiring three firefighters for the Asheville Fire and Rescue Department.

After gaining approval from City Council, the City of Asheville Fire and Rescue Department (AFR) requested $558,143.00 from the U.S. Dept. of Homeland Security for the purpose of hiring additional personnel. The AFR was successful in obtaining those funds. The funds will be utilized to pay the salaries, wages and benefits of 3 additional full time firefighters. The grant total is $558,143. This is a matching grant. In the first year of the five year performance period, DHS will fund $94,616 (90%) of the cost of compensation and benefits for three firefighters. The City's match is $10,513 (10%) for the first year. The first year's grant revenue, matching funds and additional FTE allocation are already included in AFR's adopted Fiscal Year 2006-07 budget; therefore no budget amendment is needed. The federal match decreases and the City's match increases over the span of the performance period. The funding ratios for subsequent years are:

Year	Federal Share	City Share	Total
2	$86,626 (80%)	$21,657 (20%)	$108,283
3	$55,766 (50%)	$55,765 (50%)	$111,532
4	$34,463 (30%)	$80,414 (70%)	$114,877
5	$0 (0%)	$118,323 (100%)	$118,323

PROS:

- The U.S. Dept. of Homeland Security is funding a total of 49% ($286,672) of the costs of salaries, wages and benefits for three additional firefighters over a five year period.
- The additional firefighters are needed in order to maintain the City's emergency services overall standard of cover.
- The percentage of time companies are taken out of service due to staffing shortages will be reduced.
- Firefighting capabilities will be enhanced with the additional personnel.
- Emergency medical response, rescue services and fire prevention and education capabilities will benefit from additional personnel.
- Firefighter safety will improve.

CON:

- The City's matching funds are 51% ($286,672) of the total grant.

City staff recommends City Council accept the U.S. Dept. of Homeland Security's (DHS) SAFER Grant, in the amount of $558,143, for the purpose of hiring three firefighters for the Asheville Fire and Rescue Department.

Ms. Leslee Kulba was of the opinion that the City is accepting money from the federal government for what used to be a local government issue. She did not think that state and local issues should be federalized.

Fire Chief Greg Grayson said that this program is intended to strengthen our firefighter fighting force in our community. We seek to maintain and improve our standard of cover within the City of Asheville and the two new fire stations are intended to do just that. It is his recommendation that we continue to staff all our units with two personnel and this grant will allow us to hire firefighters to do that.

Councilman Mumpower felt that this is a stretch of the Homeland Security dollars at a time of unprecedented federal deficits. Even though we need firefighters, he could not support the resolution on the basis of the Homeland Security source for those revenues.

Councilman Newman moved for the adoption of Resolution No. 06-161. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 99

RESOLUTION NO. 06-162 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A GRANT FROM THE U.S. DEPT. OF HOMELAND SECURITY GRANT FOR MOBILE EMERGENCY RADIOS FOR THE FIRE AND RESCUE DEPARTMENT

ORDINANCE NO. 3385 - BUDGET AMENDMENT ACCEPTING A GRANT FROM THE U.S. DEPT. OF HOMELAND SECURITY FOR THE PURCHASE OF MOBILE EMERGENCY RADIOS

Summary: The consideration of (1) a resolution authorizing the City Manager to accept a grant from the U.S. Department of Homeland Security for the purchase of mobile radios for Asheville Fire and Rescue; and (2) a budget amendment, in the amount of $120,000 to accept these funds.

After gaining approval from City Council, the City of Asheville Fire and Rescue Department (AFR) requested $120,000 from the U.S. Department of Homeland Security for funding the purchase of mobile radios for apparatus and staff vehicles. The AFR was successful in obtaining those funds. The funds will be utilized for the purchase of 30 mobile radios which will be permanently mounted in fire apparatus. The grant total is $120,000 with the US Dept. of Homeland Security providing $96,000 (80%) of the total amount and the City providing $24,000 (20%) in matching funds. The $24,000 city match will be drawn from the $184,500 that was budgeted in the manager's contingency account for Fiscal Year 2006-07.

PROS:

- The US Dept. of Homeland Security is funding 80% ($96,000) of the costs of the radios.
- The radios will replace our existing, soon to be obsolete radios.
- If not for obtaining this grant, the City would be required to fund 100% of the mobile radio replacement.
- The radios will be used on a daily basis for emergencies in the City of Asheville.
- The radios are a required component of the City's new mixed mode (analog/digital) Smart Zone 4.1 communications system.
- The radios in conjunction with the new digital platform will provide overall better coverage of the City.

- The mobile radios will provide an additional margin of safety during fires and emergency operations.
- The radios are compatible with the state-wide communications system known as Voice Interoperability Program for Emergency Responders (VIPER).
- The radios will allow personnel to communicate directly with mutual and automatic aid departments and with fire and other public safety agencies across the state if needed.
- Asheville Fire and Rescue will be able to work more effectively with a variety of public safety agencies from across the state (in addition to other fire departments).

CONS:

- The City's matching funds are 20% ($24,000) of the total grant.
- The City will incur full maintenance and replacement cost of the radios. However, we will not maintain more radios than we already are maintaining.

City staff recommends City Council adopt (1) a resolution authorizing the City Manager to accept a grant from the U.S. Department of Homeland Security for the purchase of mobile radios for Asheville Fire and Rescue; and (2) a budget amendment, in the amount of $120,000 to accept these funds.

Ms. Leslee Kulba was of the opinion that the City is accepting money from the federal government for what used to be a local government issue. She did not think that state and local issues should be federalized.

Councilman Mumpower felt that even though the grant is from the Department of Homeland Security he did think that an argument could be made that communication in terms of local security is a Homeland Security effort.

Councilman Freeborn moved to adopt Resolution No. 06-162 and Ordinance No. 3385. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 100

ORDINANCE BOOK NO. 23 – PAGE 76

RESOLUTION NO. 06-164 - RESOLUTION OF INTENT TO CLOSE A PORTION OF AN UNOPENED ALLEY OFF OF MONTFORD AVENUE AND SCHEDULING A PUBLIC HEARING ON OCTOBER 10, 2006

Councilman Freeborn moved to recuse Councilman Newman from participating in this matter. This motion was seconded by Councilwoman Cape and carried unanimously.

Summary: The consideration of a resolution of intent to close a portion of an unopened alley off of Montford Avenue and set a public hearing for October 10, 2006.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Mr. Brownie Newman has requested the City of Asheville permanently close to the public a portion of an unopened alley way off of Montford Avenue as shown as "alley (unopened)" on the plat recorded in Plat Book 79, Page 87 in the Buncombe County Register of Deeds.

Public Works Department staff has researched and determined that this unopened alley is not a City maintained street. Closure of this unopened alley will not deny any of the abutting

properties a reasonable means of ingress or egress. The two parcels that abut this section of alley are identified as PIN Nos. 9649-13-03-2964 and 9649-13-04-2004. Both abutting property owners have joined in signing the petition for the closure.

Pros:

- The closure allows the property to be used to its maximum potential.
- There will be no future compromise of ingress/regress to other property

Cons:

- In consideration of the location of the unopened alley, staff can find no potential challenges regarding the closure of the alley.

City staff recommends that City Council adopt the resolution setting a public hearing for October 10, 2006, to close a portion of the unopened alley off Montford Avenue.

Councilman Mumpower moved for the adoption of Resolution No. 06-164. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 102

RESOLUTION NO. 06-165 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE PIERZ FAMILY REUNION ON OCTOBER 14, 2006, AT THE CARRIER PARK CORPORATE PAVILION

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Pierz Family Reunion at Carrier Park Corporate Pavilion on October 14, 2006.

The Pierz Family has requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their Pierz Family Reunion on October 14, 2006, at the Carrier Park Corporate Pavilion.

City staff recommends City Council adopt the resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Pierz Family Reunion at the Carrier Park Corporate Pavilion on October 14, 2006.

Councilman Newman moved for the adoption of Resolution No. 06-165. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Mayor Bellamy voting "no."

RESOLUTION BOOK NO. 30 – PAGE 103

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO REZONE PROPERTY LOCATED AT CARIBOU ROAD AND ARDMORE ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 5:32 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to rezone 6+ acres at Caribou Road and Ardmore Road from RS-4 Residential Single-Family Medium

Density District to RS-8 Residential Single-Family High Density District. This public hearing was advertised on September 1 and 8, 2006.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property.

Ms. Cogburn said that Harry and Linda Giezentanner, property owners, have requested 6+ acres at Caribou Road and Ardmore Road from RS-4 Residential Single-Family Medium Density District to RS-8 Residential Single-Family High Density District. The subject properties are located off of Forest and Ardmore Streets which run parallel to each other off of Caribou Road in the Shiloh community. The property is vacant and abuts railroad tracks to the east.

The property is bordered by properties all used residentially but at varying densities. The property to the east (past the railroad tracks) contains manufactured housing (parks and single-family homes), the property to the south contains an elderly housing facility, and the properties to the north and west contain single-family homes. The zoning is also varied: to the east, Commercial Industrial; to the south, RM-8; to the north, RS-4 and RS-8; to the west, RS-4. The single-family lots in the area are mostly larger than would be allowed in RS-8 (allows minimum 5,000 square foot lots); however many have very narrow lot widths which are more in keeping with RS-8.

The development of this property for a single-family subdivision would be subject to review by the City's Technical Review Committee (TRC). Infrastructure extensions/upgrades and road connections would be examined depending on the number of lots proposed.

At a meeting on August 2, 2006, the Planning and Zoning Commission reviewed this rezoning application and recommended approval (6-1). Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- The property is bordered by a variety of residential densities and a railroad corridor.
- The access to the property may need to be improved to handle increased density.
- The rezoning supports the interests set forth in the City's comprehensive plan of promoting higher density infill development in existing areas while maintaining the single-family development pattern of much of the Shiloh community.

Ms. Cogburn said that here have been some questions about slope in the area as well as wetlands. Using a map, she showed how the property is sloping on some portions and more gently sloping on the edges. With respect to the wetlands, there is a drainage area and it is mucky. She spoke with the Buncombe County Office of the Corp of Engineers and they said to be a 100% certain that something is or is not a wetlands would require a consultant or someone from their office to confirm it. However, they did indicate that it was highly unlikely that this particular area would be a wetlands that they would regulate because it is not tied to any specific steam or any other water course.

Mr. Harry Giezentanner, property owner, said that his family has owned this property for 40 years and is now requesting a rezoning. The development of the property will require Ardmore Street to be widened to 18 feet and paved at his expense. He will be upgrading a street that is zoned RM-8 on the south side. He will be putting in infrastructure as required by the Unified Development Ordinance. His plan is to bring affordable housing to this community and based on past development experiences he cannot do that with the present zoning. He has built 15 affordable homes in the Shiloh community in the past 3.5 years and presently he is building 6 homes on Iris Street. Regarding the wetlands concern, he said that on the east side of the

property there is a drain basin for all of the property above it. This basin runs into a drainage system underneath the railroad tracks. There is not a water stream on the property. He has had two meetings with members from the Shiloh community and had made every effort to meet with the community to respond to questions. He does not have a development plan available at this time. The cost for the plan is approximately $50,000. If Council approves the rezoning, any project on this property will have to be approved for major subdivision approval.

Ms. Norma Baynes, liaison for the Shiloh Community Association, said that they have been continuing to strive for their historical status and keeping the neighborhood in tact. They presently struggle with issues of all kinds, including commercial development, all types of development, traffic calming, safety, and infrastructure. To rezone the property to RS-8, it means more houses on the land. They feel that the developer can develop affordable housing in the present RS-4 district. With all the other developments in their neighborhood, there is now an over-population in Shiloh. It is hard on our infrastructure and safety of the neighborhood, with not much recreation in the area. They would like to see specific plans for the neighborhood and how the houses will fit in. She presented Council with pictures of homes in the area.

Mr. Scott Duncan, resident on Forest Street, felt like the Planning & Zoning Commission was given inaccurate and incomplete information in that the planner did not walk on the property and did not have first-hand knowledge of the site's topography. He believes in affordable and housing and infill development, but not in this case because of the topography of the property and the nature of the neighborhood.

Ms. Freda Nash, resident of the Shiloh community, spoke against the rezoning in that their concern is density and safety of the existing residents. She echoed some of the comments from Ms. Baynes and preferred to see a development plan for the property.

Mayor Bellamy moved to close the public hearing at 5:53.

Councilwoman Cape moved to deny the rezoning of 6+ acres at Caribou Road and Ardmore Road from RS-4 Residential Single-Family Medium Density District to RS-8 Residential Single-Family High Density District. This motion was seconded by Councilman Freeborn.

Ms. Cogburn said that the developer has requested that his rezoning petition be withdrawn so that he wouldn't have to wait a year to come back with something a little more detailed.

When City Attorney Oast said that it would be appropriate for the motion to be withdrawn since the developer has asked that his rezoning petition be withdrawn, Councilwoman Cape withdrew her motion.

Upon inquiry of Councilman Mumpower, Planning & Development Director said that we are projecting a need for about 10,000 additional dwelling units over the next 15-20 years and the City has approximately 37,000 now.

Councilman Mumpower felt that we have ordinances covering stormwater run-off. In addition, he could not recall a time when a neighborhood authentically, without qualification, embraced any project and if we echo that "not in my backyard" he doesn't think we serve our city well. He felt we need to look for positive, constructive ways to create more housing. This developer has had the property in his family for 40 years and is trying to do something positive with it. It concerns him that we ask the developer to spend $50,000 for a plan where the

neighbors can trump him with a protest petition. In addition, our filtration system of the Planning & Zoning Commission voted in support of this project on a 6-1 vote.

Councilwoman Cape felt that we have seen where our stormwater ordinances don't always work and we have a situation here where the property has been RS-4 for a long time. In addition, we should support the Army Corp of Engineers when they say they would have to do a study to understand the condition of the land.

Councilman Newman felt that there have been good developments in this community that have been actively supported by neighborhoods.

Councilman Davis felt that protest petitions are difficult to work with regardless of which side you support.

B. PUBLIC HEARING TO AMEND THE APPROVED CONDITIONAL USE PERMIT TO REVIEW CHANGES TO THE BUILDING DESIGN AND ORIENTATION AT 27 CATAWBA STREET

ORDINANCE NO. 3387 - ORDINANCE AMENDING THE CONDITIONAL USE PERMIT FOR 27 CATAWBA STREET

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:03 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing. In addition, Mayor Bellamy and Councilman Newman disclosed that they are Metropolitan Sewerage District (MSD) Board members.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of an amendment to the conditional use permit and associated Master Plan to review changes to the building design and orientation for 27 Catawba Street.

He said that on June 13, 2004, the City Council approved a Conditional Use Permit for a quadraplex in an RS-8 district, located off of Catawba Street (City Exhibit 4 - Location Map). The project was approved by Council subject to the Technical Review Committee (TRC) conditions, and required a detailed site plan review to ensure compliance with the approved site plan and building elevations submitted with the application (City Exhibit 5 - Approved Site Plan).

On March 29, 2005, the applicant, Mr. Rusty Hunter, submitted final detailed site plans for review that received Level One site plan approval and issuance of the zoning permit on July 14, 2005. On June 19, 2006, the Planning Department received a request for a zoning final inspection of the project in order to gain a Certificate of Occupancy. Upon that inspection, it was noted that the structure had changed in orientation from what was approved by Council (the more narrow part of the building was approved facing the street in order to appear more like a single-family structure; the structure that was now built had been reversed so that the longer, more visible part of the building now faced the street). (City Exhibit 6 - As Built Survey with Proposed Change; and City Exhibit 7 - Conceptual Elevation Approved by City Council). Staff, upon this discovery, contacted the applicant and informed them that the built structure did not comply with the approved conditional use master plan, and that the project would have to return to Council for review and approval.

The owner and building contractor met with staff and explained that the orientation of the building was changed due to a relocation of a sewer line by the MSD. During the initial planning stages of the project, the owners worked with MSD to establish where the sewer line would be installed, thus the building's original location. When the line was ultimately replaced, MSD had shifted the sewer line to run diagonally across the lot making it virtually impossible to orient the building the way it was approved without encroaching into the sewer easement.

The applicant, in an effort to make the built structure appear more in character and in line with the original approval, has submitted an elevation for adding a porch to the new "front" of the building (City Exhibits 8, 9, 10 and 11 - Pictures of Quadaplex; and City Exhibit 12 - Proposed Elevation). The porch is proposed on the east side of the façade in order to stay clear of the MSD sewer easement which crosses just outside of the handicap ramp. In addition to the porch extension additional foundation plantings and preservation of the vegetation on site is proposed. He noted that there is an existing tree that will need to be removed for the handicapped parking area so that the parking does not encroach into the front setback and landscape buffer areas.

The Asheville City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case:

1. That the proposed use or development of the land will not materially endanger the public health or safety. The project is still being inspected for compliance with the State Building Code. A certificate of occupancy will not be permitted until full compliance with all City regulations and standards are achieved.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant. The property is already developed and is in compliance with the grading and erosion control permits. The applicant, as part of the original approval, has preserved much of the existing perimeter vegetation and will complete the installation of the required landscaping around the parking area.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property. The porch addition and foundation planting proposed on the front of the new façade appears to soften and balance the scale of the structure. This, along with the existing vegetation on site reduces the visible impact of the structure from Catawba Street assuring that the building fits within the single-family neighborhood that surrounds it.

   The project is still expected to be an asset on this street and not expected to injure the value of adjoining or abutting properties.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located. As was noted in the original staff report for the approval of the quadraplex, the surrounding neighborhood provides a range of different building footprint sizes. The footprint of the proposed building falls within this range. The proposed building is two stories in height as are some of the homes in the area. Because the long side of the building has been shifted and is now the front of the structure, the project is being reviewed for a conditional use permit amendment. The proposed porch will improve the residential character of the building and existing vegetation will reduce the perceived scale.

5. That the proposed use or development of the land will generally conform with the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City. The Asheville City Development Plan 2025 encourages infill development in areas where the infrastructure is in place to support the use. Projects with greater density along corridors and near bus lines have also been noted as a positive approach to infill development.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities. The project has already been built and complies with the majority of TRC conditions including detailed reviews of the plans by representatives of the Water Resources Department, Engineering, the Fire Department and Public Works.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard. The project scope has not increased from its original application in which it was determined that the existing roadway and capacity were sufficient to handle any increase generated by the proposed use.

In consideration of the above findings, the adjoining zoning and land uses, and the City adopted planning documents, the proposed conditional use permit can be conditioned to be reasonable and consistent with the intent and purpose of the Unified Development Ordinance (UDO).

Staff feels that the proposed porch extension and additional foundation plantings will soften and balance the appearance of the structure from the street making it more compatible and in character with the neighboring area. Staff recommends approval of this amendment subject to the following conditions: (1) The porch is added to the façade as shown on the drawings provided (City Exhibit 6 and City Exhibit 12); (2) Foundation plantings shall be installed behind the handicap ramp to soften the height of the wall; (3) Parking area shall be revised so that parking does not encroach into the front setback and landscape buffer areas; (4) Existing vegetation shall be maintained and supplemented as needed to meet all landscape requirements; (5) The building shall comply with all State Building and Fire Code requirements; and (6) The subject properties shall be recombined into a single parcel prior to the issuance of the Certificate of Occupancy.

Mr. Bob Spears, builder, explained that they started the project with the understanding that the building would fit on the lot. When they discovered where MSD installed the line, they found that they could not put the building on the lot as proposed. They thought they informed the right people about turning the building and the change in location was not done maliciously in anyway. At the end of the project, they found they were in violation. Their mistake was not coming back to City Council requesting an amendment once they knew MSD was causing the building location to be changed. We have spent quite a bit of money to rectify the error and make the building more pleasing. We did try to save as many trees as possible but there is an old 100-

year old tree that might have to be cut to meet the UDO. We are happy to make the necessary change to move the project forward.

Mr. Charles R. Worley, attorney for the developer, acknowledged that an error was made and they have worked on a remedy for that error. Not only is this an embarrassment of having to come back to City Council, but there is a financial penalty as well - the estimated $30,000 cost for the façade to fit into the neighborhood.

After rebuttal, Mayor Bellamy closed the public hearing at 6:17p.m.

Councilman Davis moved for the adoption of Ordinance No. 3317, amending the conditional use permit for 27 Catawba Street by adopting the amended Master Plan and the building elevations illustrating a porch addition and foundation plantings along the front of the structure, subject to the following conditions: (1) The porch is added to the façade as shown on the drawings provided (City Exhibit 6 and City Exhibit 12); (2) Foundation plantings shall be installed behind the handicap ramp to soften the height of the wall; (3) Parking area shall be revised so that parking does not encroach into the front setback and landscape buffer areas; (4) Existing vegetation shall be maintained and supplemented as needed to meet all landscape requirements; (5) The building shall comply with all State Building and Fire Code requirements; and (6) The subject properties shall be recombined into a single parcel prior to the issuance of the Certificate of Occupancy. This motion was seconded by Councilman Mumpower.

In response to Councilwoman Cape, Planning & Development Director Scott Shuford explained what was missed in the process and how that will be remedied in the future.

When Councilwoman Cape inquired about the probability of removing the 100-year old tree for parking, Mr. Glines explained that they are required by the State Code to have one handicapped space and there is a provision in the UDO that states that parking cannot encroach into the front setback.

Vice-Mayor Jones wanted to let people know that it okay to make a mistake and was pleased in the way they tried to remedy that mistake. City Council is very serious about the conditions imposed on conditional use permits and feels like this was a very constructive process.

Councilman Mumpower questioned the $30,000 mitigation cost and whether those mitigation measures are necessary.

Councilwoman Cape said that the conditions imposed by Council on conditional use permits are important. It's also important that the process has honor and consistency. It's unfortunate that the developer had to go through more hoops and financial expense, but this Council spends a lot of time on conditional use processes and it's only right that this kind of mitigation (which he has accepted) offers some respect to the process.

Councilman Davis wondered if we could amend the motion that the developer make efforts to save the 100-year old tree if City Council can waive the Code provision about parking in the front.

City Attorney Oast said that there is a provision in our Code with regard to quadraplexes, that parking shall be located in the rear and shall be screened with vegetation from adjacent single-family uses. It goes on to say that on-street parking or parking in front or on the side of the lot may be approved by the City Council provided that any off-street parking can be adequately screened from adjacent residential uses. It appears that the parking in the front is the issue and

not in the setback so it appears that Council may permit this, although we do not have a specific site plan showing where that parking space is going to be.

Mr. Shuford said that it appears we have a zoning requirement that Council does have some authority to adjust and it sounds like the motion would give staff the ability to make those adjustments. He did indicate that it may be the parking space is a handicapped parking space and there are some specific requirements about the grade to which the site has to conform to in order to allow adequate handicapped access under the State Building Code, and that would not be something that we can seek a variance on. We will do what we can to save the tree based upon what appears to be the direction from Council, but it may turn out that it will have to be cut to meet the State Building Code requirement. If that is the case, we will let you know whether it has to go or not.

Upon inquiry of Councilman Mumpower, Dr. Jim Wells, principal in the company that owns the property, said that the $30,000 will be reflected in the cost of the rent. He does want the site to look attractive and is willing to make the modification.

At 6:37 p.m., Councilman Freeborn called the question.

Councilman Mumpower withdrew his second to the motion.

Councilwoman Cape then seconded the motion made by Councilman Davis with said motion be carried on a 6-1 vote, with Councilman Mumpower voting "no."

Councilman Mumpower continued to be concerned that this Council is at risk for indulging neighborhoods and indulging ourselves in exercises of control and that if we aren't more careful with our polices and our efforts to control almost everything that comes before us, we risk choking the city and the people who live here.

Mayor Bellamy felt that the developer acknowledged he made a mistake and we accepted the change allowing the project to be better. To say we are sending the wrong message is inappropriate. For us to work for a better community there has to be give and take on both sides.

ORDINANCE BOOK NO. 23 – PAGE 80

C. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED AT 7 GRANDVIEW PLACE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT AND COMMUNITY BUSINESS I DISTRICT TO COMMUNITY BUSINESS I DISTRICT/CONDITIONAL ZONING TO CORRECT A NON-CONFIRMING PARKING LOT

City Attorney Oast said that he received a letter on September 12, 2006, from Mr. Steven Aceto, attorney representing the applicant Mr. Nicholas E. Papanastasiou and/or Pegasus Holdings, LLC, requesting that the public hearing be continued since they would not be able to complete the required Letter of Credit in the form appropriate for submission to City Council. Therefore, Councilman Davis moved to continue this public hearing until September 26, 2006. This motion was seconded by Vice-Mayor Jones and carried unanimously.

D. PUBLIC HEARING DIRECTING THE HOUSING CODE COORDINATOR OF THE BUILDING SAFETY DEPARTMENT TO VACATE THE DWELLING LOCATED AT 128 ALABAMA AVENUE

City Attorney Oast said that after speaking with Robert Griffin, Director of Building Inspections, Mr. Griffin advised him that all issues have been resolved and City Council will not need to hold a public hearing on this matter.

E. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED AT 301 E. CHESTNUT STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/ CONDITIONAL ZONING FOR RE-ESTABLISHMENT OF A HOTEL

ORDINANCE NO. 3388 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 301 E. CHESTNUT STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/ CONDITIONAL ZONING FOR RE-ESTABLISHMENT OF A HOTEL

Mayor Bellamy opened the public hearing at 6:40 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to conditionally zone property located at 301 E. Chestnut Street from RM-16 Residential Multi-Family High Density District to Institutional District/ Conditional Zoning for re-establishment of a hotel. This public hearing was advertised on September 1 and 8, 2006.

The subject property is located within the city limits, at the corner of Furman Avenue and E. Chestnut Street. The Princess Anne Hotel was originally built as a hotel and is on the National Register of Historic Places (as a contributing building in a National Register District – the Chestnut-Liberty District). In the 1970s this building was converted to a residential apartment building and has been used as a boarding house, retreat center, and apartments since that time. It is unclear if every use conversion of this building in the past was done in accordance with local regulations. The current owners, Howard and Janet Stafford, have completed the restoration of this building to its original use as a small hotel. In order to make certain that all aspects of their operation are legal, the owners are seeking conditional zoning to Institutional for the purpose of operating their hotel as renovated.

Surrounding properties are largely residential in use. To the north there is an apartment complex (zoned RM-16) and to the west and south there are individual apartment buildings. East of this site the land use is predominately single-family in nature (zoned RS-8). A variety of uses are found in the broader area including offices along Furman and commercial uses along Charlotte Street.

The property owners propose that the conditional zoning allow the operation of a 16 room hotel on this property. Additionally, there are 3 staff apartments and a small (32 seats) dining area. The owners do request that the use permit small functions (receptions, fundraising events, etc.) to be held at the hotel.

At a meeting on July 17, 2006, the Technical Review Committee (TRC) reviewed the conditional zoning request and made a positive recommendation (with conditions) that the project be forwarded to the Planning and Zoning Commission. In addition to the conditions stated in the staff report, the TRC added the following conditions:

- That a more detailed description of all proposed uses is provided for the Planning and Zoning Commission and City Council review.
- That more detail be provided on the parking – numbers; location; dimensions; handicapped parking.
- That access is clarified.

At a meeting on August 2, 2006, the Planning and Zoning Commission recommended unanimously (7-0) the conditional zoning request subject to the TRC conditions and with the following description of permitted uses:

- Sixteen (16) room hotel.
- Three (3) apartments for hotel staff.
- 32 seat dining room to be used for hotel guests (breakfast; afternoon refreshments) and for restricted dining open to the public only on Friday and Saturday evening and for Sunday brunch.
- Special functions allowed, being restricted when the expected attendance is over 75 persons. There shall be no more than 4 such large functions per month and in those circumstances, special off-street remote parking arrangements would be required. There would be no limit on the number of special events involving fewer persons.

Prior to this Council meeting, the applicant had provided a more detailed drawing of the site plans and presented an opinion letter addressing the right to use the existing access route for access to the parking on site. Accompanying the detailed site plans was a request for alternative compliance for landscaping. It details the tree credits requested for existing vegetation and details additional plantings to be made. Council will need to approve, deny or modify the alternative compliance request if choosing to approve this rezoning request. Staff feels this request to be reasonable and in keeping with the intent of the ordinance and in the interest of preserving the considerable existing vegetation on site.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The project, if approved, must meet the technical standards set forth in the City's UDO. The existing site plan shows compliance with most all of the City's development standards and the applicant is working with staff on full compliance.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** There are no real topographic or natural issues on this site. The applicant has done considerable landscaping on the site to date, in addition to leaving all existing tree cover, and is working with the City to further enhance the landscaping.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The use of the property immediately surrounding the site is residential (multi- and single-family). The small hotel (16 rooms) is compatible with the higher density residential and with the office and commercial uses found in the surrounding area. The renovation of this hotel to its original use from an apartment building/boarding house should enhance the values of abutting properties

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** This use is a use that was developed as part of a historic community in the 1920s and thus is in harmony with the character of the Chestnut-Liberty District. Though larger than many structures in the area, there are considerable large single-family and multi-family structures found throughout the neighborhood.

52

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The proposed use supports the 2025 Plan in that it promotes the traditional diversity of uses found in historic neighborhoods, and that it assures that redevelopment of structures is of high quality, adding to the character of the City.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** The Princess Anne is within close proximity to transportation facilities and other utilities appear adequate. The parcel on which the hotel is located is near major road facilities and other service centers.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The hotel is a very small property (16 rooms) and should not cause significantly greater traffic issues than the previous use as an apartment/boarding house. The traffic engineer did not express traffic concerns for the operation at the TRC review.

Considerations:

- The rezoning makes certain that all aspects of the renovation of the Princess Anne Hotel are in conformance with City regulations.
- The renovation returns a historic property in an historic neighborhood to its original use.
- Parking on the street may be necessitated for some functions held at the hotel.

Mr. W. Louis Bissette Jr., attorney representing the petitioners, briefed Council on one of Asheville treasurers - The Princess Anne Hotel, which opened in 1924. He said the Hotel is on the National Historic Registry and is a real asset for the City of Asheville. He spoke in support of the conditional zoning and presented City Council with a petition containing 45 signatures and 14 letters of support. He said the application meets all the criteria necessary and the petitioners are willing to work with any conditions imposed by City Council.

Ms. Barber Melton, Vice-President of the Coalition of Asheville Neighborhoods, said that they support the conditional zoning; however, they raised a question regarding parking for the special functions. When there is parking on the side streets in a neighborhood, safety is an issue. She suggested perhaps a method of parking permits be utilized between Mr. Stafford and the neighbors.

A resident who resides on Chestnut Street said that she does support the conditional zoning and loves that the building was restored. She does fear, however, that there will be problems with parking on the special events. She feels that the existing apartments on Chestnut Street will be moving toward the direction of non-residential property.

The following individuals spoke in support of the conditional zoning for the Princess Anne Hotel for several reasons:

Mr. Jody Whitehurst
A resident on Furman Avenue
Ms. Julie Brandt, member of the Board of Directors of Asheville Preservation Society of Asheville and Buncombe County (not speaking on behalf of the Board)
Mr. Mark Allison, resident on Furman Avenue
Ms. Erin McLoughlin, resident on Oak Park Road
Mr. Shannon Fields
Mr. Craig Tiller, resident on Oak Pak Road

Mayor Bellamy closed the public hearing at 7:06 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3388, to conditionally zone property located at 301 E. Chestnut Street from RM-16 Residential Multi-Family High Density District to Institutional District/ Conditional Zoning for the purposes of operating a small hotel subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) The permitted uses on the property shall be limited to the following: (a) Sixteen room hotel; (b) Three apartments for hotel staff; (c) 32 seat dining room to be used for hotel guests (breakfast; afternoon refreshments) and for restricted dining open to the public only on Friday and Saturday evening and for Sunday brunch; and (d) Special functions allowed, being restricted when the expected attendance is over seventy-five (75) persons. There shall be no more than four (4) such large functions per month and in those circumstances, special off-street remote parking arrangements would be required. There would be no limit on the number of special events involving fewer persons; (3) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department; and (5) At the direction of the Planning Director, this Project will be reviewed by the TRC prior to issuance of any permits. In addition, his approval includes acceptance of the request for alternative compliance as stated in the letter provided by the applicant. This motion was seconded by Councilwoman Cape.

When Councilman Mumpower asked if the last condition was necessary, Ms. Cogburn said that the condition is worded that it is at the direction of the Planning Director that the project will be reviewed by the TRC prior to issuance of any permits.

Councilman Mumpower asked if Councilman Freeborn would be willing to amend his motion to delete that last condition. Councilman Freeborn felt that if staff felt it was a necessary condition, he would not change his motion. Councilman Mumpower responded that this is an example of that unnecessary level of control.

The motion made by Councilman Freeborn and seconded by Councilwoman Cape carried unanimously.

ORDINANCE BOOK NO. 23 – PAGE [redacted] 81

At 7:09, Mayor Bellamy announced a short recess.

F. **PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL ZONING OF 103 N. BEAR CREEK ROAD (COMMERCIAL INDUSTRIAL CONDITIONAL ZONING) FOR A TEMPORARY CLASSROOM STRUCTURE**

ORDINANCE NO. 3389- ORDINANCE AMENDING THE CONDITIONAL ZONING OF 103 N. BEAR CREEK ROAD (COMMERCIAL INDUSTRIAL ZONING) FOR A TEMPORARY CLASSROOM STRUCTURE

Mayor Bellamy opened the public hearing at 7:18 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to amend the conditionally zone property located at 103 N. Bear Creek Road (Commercial Industrial Conditional Zoning) for a temporary classroom structure. This public hearing was advertised on September 1 and 8, 2006.

Ms. Cogburn said that the subject property is located within the City Limits on North Bear Creek Road, just north of the intersection of N. Bear Creek and Deaverview Road. Two parcels totaling 2.28 acres were included in the original conditional zoning application and are also the subject of this modification. Access to the property is off of N. Bear Creek. Surrounding properties to the north and west are zoned residentially (RS-8, RM-8, RM-16) and the properties to the south and east are zoned Commercial Industrial. The land use pattern in the area follows the zoning. To the north are single-family homes; to the west, both single-family and multi-family housing. A self-service storage facility is located immediately south of the property. MB Haynes construction/contracting/electronics operation is located to the east.

The applicants, Amica Venturi and Ken Huck, recently received rezoning approval and final Technical Review Committee (TRC) approval for their plans to rezone the property from RM-8 to Commercial Industrial/Conditional Zoning for the purpose of establishing a preschool. The property currently contains a single-family home. It is proposed that the single-family home be preserved and used as a residence for staff until the building is removed. (This is a clarification from the initial approved plans and needs to be approved along with the modification concerning the temporary modular classroom). The original development plan showed, in addition to the preservation of the existing home, the construction of two buildings approximately 3,744 square feet in size. A sidewalk along Bear Creek is proposed along with one-way entrance and exit drives to facilitate drop off and pick up of children.

The applicants are now seeking modification of their original plans to show phased development of this property. They propose the use of a temporary modular classroom on the southern end of the property (where parking will be located upon project completion) during the construction of the first classroom on the site. The proposed classroom would be licensed for up to twenty-five children and two staff members. The proposal is that the building would remain on site no more than one year with the ability to renew for an additional year, with good cause shown, upon approval of a written request to the Director of Planning and Development.

At their meeting on August 21, 2006, the TRC reviewed the modification to the conditional zoning and made a positive recommendation (with conditions) that the request be forwarded to the Planning and Zoning Commission. The TRC required that all improvements still be in place prior to the receipt of a Certificate of Occupancy for the modular classroom.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The temporary placement of a modular classroom on the site, if approved, must meet the technical standards set forth in the City's UDO. The proposed site plan shows compliance with many of the City's development standards; the applicant is working with City staff on full compliance. The applicants are also working with the appropriate childcare-licensing professionals on the development of this site.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or**

measures proposed by the applicant. The applicant is proposing little grading for either of the two phases of the development of the child care facility. They are utilizing a portion of the eventual parking area for the temporary classroom. The majority of the existing trees on site are proposed to be maintained.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The use of the property surrounding this site is varied. There exist commercial, industrial, and residential uses on various sides of the subject property. The applicants propose to save as much of the existing vegetation on the site as is possible. Compliant buffering is proposed in appropriate locations. Self-service storage facilities are immediately adjacent to the portion of the property on which the temporary classroom will be placed.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The character of the area in which this development is proposed is not easily defined due to the varied nature of uses found. The scale of the proposed modular building (approximately 800 square feet) to be utilized for the preschool is not out of character with the residential area. The area has a fairly dense residential population for which the preschool would be a convenience.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The proposed development (and phasing) supports the 2025 Plan regarding permitting appropriately scaled non-residential uses that serve residents of neighborhoods in appropriate residential locations.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** Asheville Transit Route 15 services the Deaverview Apartments immediately southwest of the proposed development. All technical aspects of the project have or can be met by the applicants.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The applicants are working with the City of Asheville Engineering Department to provide appropriately for the automobiles that will enter and exit this property for the drop off and pick up of children attending the facility. The provisions will be reviewed for both phases of the development.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Proposes appropriate phasing for a nonresidential use in a transition area between residential and commercial/industrial uses.
- Landscape plan indicates the preservation of considerable existing vegetation.

Staff recommends approval subject to the original conditions placed on the development by the TRC and with the following provisions: (1) That the first phase (placement of the modular classroom) is approved for no more than one year with the ability to renew for an additional year, with good cause shown, upon approval of a written request to the Director of Planning and

56

Development; and (2) That the existing home will be used for a residence for staff until it is removed from the site.

Mr. Gerald Green, representing the applicants, said that due to the demand for the facility, the applicants wish to provide the services for the members of the community and for those who work in the area.

Mayor Bellamy closed the public hearing at 7:23 p.m.

Upon inquiry of Councilwoman Cape, Ms. Cogburn said that one of the requirements of the TRC is that all of the requirements of the entire project, including the landscaping, driveway and sidewalks, be put into place so they will have to have the appropriate safe ingress and egress.

Mayor Bellamy suggested the applicants look at the MacAbee School that is over by the Beth Israel Synagogue as it is an excellent model of a temporary structure.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3389, to amend the conditionally zone property located at 103 N. Bear Creek Road (Commercial Industrial Conditional Zoning) for a temporary classroom structure, subject to the original conditions placed on the development by the TRC and with the following provisions: (1) That the first phase (placement of the modular classroom) is approved for no more than one year with the ability to renew for an additional year, with good cause shown, upon approval of a written request to the Director of Planning and Development; and (2) That the existing home will be used for a residence for staff until it is removed from the site, noting that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 – PAGE 86

G. **PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO ALLOW TATTOO PARLORS AS A PERMITTED USE IN THE COMMUNITY BUSINESS I DISTRICT, COMMUNITY BUSINESS II DISTRICT, COMMERCIAL INDUSTRIAL DISTRICT, THE HIGHWAY BUSINESS DISTRICT, THE REGIONAL BUSINESS DISTRICT, THE CENTRAL BUSINESS DISTRICT AND THE RIVER DISTRICT**

ORDINANCE NO. 3390 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO ALLOW TATTOO PARLORS AS A PERMITTED USE IN THE COMMUNITY BUSINESS I DISTRICT, COMMUNITY BUSINESS II DISTRICT, COMMERCIAL INDUSTRIAL DISTRICT, THE HIGHWAY BUSINESS DISTRICT, THE REGIONAL BUSINESS DISTRICT, THE CENTRAL BUSINESS DISTRICT AND THE RIVER DISTRICT

Mayor Bellamy opened the public hearing at 7:25 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance amending the Unified Development Ordinance to allow tattoo parlors as a permitted use in the Community Business I District, Community Business II District, Commercial Industrial District, the Highway

Business District, the Regional Business District, the Central Business District and the River District. This public hearing was advertised on September 1 and 8, 2006.

The City of Asheville's Unified Development Ordinance does not currently address "tattoo parlors" as a use within the City's jurisdiction. In the past, interpretations have allowed tattoo parlors to be permitted in various districts within the City.

The amendment clarifies this issue and provides for tattoo parlors as a permitted use in the Community Business I, Community Business II, Highway Business, Regional Business, Commercial Industrial, Central Business, and River Districts. It provides a definition for "tattoo parlors" as well.

The amendment has been routed to the Coalition for Asheville Neighborhoods, CREIA and CIBO for review and comment.

Considerations:

- The amendment provides for a use not currently provided for in the Unified Development Ordinance.
- The amendment clarifies the ordinance with regards to permitted uses.
- Tattoo parlors may be seen as inappropriate uses in certain districts enumerated.

At its meeting on June 7, 2006, and August 2, 2006, the Planning and Zoning Commission unanimously (6-0; 7-0) recommended approval of this wording amendment. Staff recommends approval as well.

City staff recommends City Council amend the Unified Development Ordinance to allow tattoo parlors as a permitted use in various zoning districts.

Mayor Bellamy closed the public hearing at 7:26 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3390. This motion was seconded by Councilman Newman:

ORDINANCE BOOK NO. 23 – PAGE 90

H. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL USE PERMIT MASTER PLAN FOR INGLES ON HENDERSONVILLE ROAD FOR ALLOWANCE OF A THIRD DRIVEWAY TO ACCESS AN OUT-PARCEL TYPE USE OF A GAS STATION

Urban Planner Alan Glines requested a continuance in this matter since City staff is waiting on a revised Master Plan for the project that will illustrate compliance with site issues required in the Unified Development Ordinance. Therefore, Councilman Mumpower moved to continue this public hearing until September 26, 2006. This motion was seconded by Councilwoman Cape and carried unanimously.

I. PUBLIC HEARING TO CONSIDER RENAMING THE EXISTING STREET OF "HOLIDAY INN DRIVE" LOCATED OFF HIGHWAY 240 EAST TO "RESORT DRIVE"

58

Mayor Bellamy said that the petitioners have again requested the public hearing be continued to November 28, 2006, in order to address the cost of highway signs in their budget. Therefore, Councilman Mumpower moved to continue the public hearing until November 28, 2006. This motion was seconded by Vice-Mayor Jones and carried unanimously.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. UPDATE FOR RICHMOND HILL PARK PROJECT

ORDINANCE NO. 3391- BUDGET AMENDMENT FOR RICHMOND HILL PARK PROJECT

Parks & Recreation Director Irby Brinson updated City Council on the recent occurrence of erosion control issues at Richmond Hill Park and apologized for any embarrassment this was caused the City of Asheville.

The City of Asheville received notification from the N.C. Dept. of Environment and Natural Resources (NCDENR) on August 23, 2006, of erosion control violations related to the clearing and grading work at Richmond Hill Park to prepare the site for an entrance road, parking lot, disc golf course and future restroom facility. The clearing and grading work is being performed by the National Guard as part of its agreement with the City of Asheville.

Immediately following notification, Parks and Recreation staff met with consulting engineer McGill and Associates to begin taking steps to clean up and stabilize the site. Parks and Recreation staff also began an internal review of the work on the project.

As the managing department, the Parks and Recreation Department takes full responsibility for the erosion issues that have occurred at Richmond Hill Park. The clearing and grading portion of the project proved to be too large and complex, and required more significant resources, expertise and quality control than had been allocated to complete the work in a timely manner.

Below is a summary of the immediate actions that began on August 25, 2006, to rectify the current situation at Richmond Hill Park.

Priority 1: Create new barrel riser sediment basin below existing sediment trap #2. Re-direct diversion ditch to front of existing sediment trap. Correct weir on existing sediment trap. Remove debris from draw, smooth out and install erosion control matting down length of draw. Seed matting and secure with rip rap. Install straw bale checks over matting down length of draw.

Priority 2: Cut in new sediment trap on south side of site to replace existing trap #1, which was installed in the wrong location.

Priority 3: Cut in a second sediment trap on south side of the site behind the debris pile. Relocate the debris pile after trap constructed to allow water flow to basin. Remove debris from disturbed area in front of trap and smooth down. Install erosion control matting. Seed matting and secure with rip rap. Install straw bale checks over matting down length of disturbed area.

Priority 4: Create two permanent barrel riser sediment basins on either side of future restroom area.

Priority 5: Clean debris out of toe of south slope. Re-grade slope to gradually taper into edge of clearing limits. Stabilize with seed.

Priority 6: Remove debris from valley on north side of site where silting has occurred near the new disc golf course. Smooth out area and seed.

Priority 7: Clean-up silt from the south side of site near Smith's Creek tributary. NCDENR will prescribe a clean-up plan.

Ongoing Priorities:

- Clean out all silt fencing and replace section(s) where necessary.
- Chip debris piles. Use mulch for soil stabilization in place of seed where feasible.
- Hydro-seed the entire area when notified by the consulting engineer.

Additional equipment was secured from the Public Works Department to assist with the work. The top priorities were accomplished by September 1, 2006. A contract for hydro-seeding is expected to be in place by the first of September; the most effective way to eliminate erosion and runoff from a project site is by re-establishing ground cover.

City staff also requests that City Council approve a budget amendment that will appropriate the funds from the timber sales totaling, $29,300 and $50,000 from the City Manager's contingency fund to address the issues from the notice of violation. It should be noted that $23,300 of the funds collected from the timber sales will go to the National Guard for trees removed from their site, minus costs associated for security on site.

Pros
- Sedimentation damage was discovered early and staff took immediate action to minimize impact on the site. The NCDENR report classified the damage as "slight."
- Site grading as part of the agreement with the National Guard has saved the City between $750,000 and $1 million.

Cons
- There was minor damage due to sediment runoff.
- Grading by National Guard is not the most effective and efficient resource to complete work due to time constraints they have available to support the project.
- Parks and Recreation staff failed to adequately stabilize the site in the absence of the National Guard crew.

Future Considerations:

National Guard:
- As part of the agreement, the National Guard will be responsible for armory construction and the surrounding site which has been approved by the Technical Review Committee
- There will be no formal interaction between the City and the National Guard as it relates to the construction of both sites once the grading in Richmond Hill Park is complete.
- The National Guard is responsible for armory site compliance and will be monitored by NCDENR regarding erosion and sedimentation control measures.

Proposed Ball Fields:

- Construction of the ball fields has been on hold since May 2006. No clearing and grading work has been performed for the ball fields.
- We have learned from the current erosion situation that construction of the ball fields will require more time and resources than originally anticipated. Because of the site sensitivity, a consulting engineer might be required to oversee that construction.

Based on current issues surrounding development Richmond Hill Park, staff recommends securing the services of a professional engineering firm for the duration of the project to oversee the administration and compliance as required by NCDENR. Also, staff recommends that Council consider proceeding with the park development as planned, with the exception of the ball fields, and evaluating alternative locations for ball field development which would include land cost, accessibility, traffic impact and environmental impact. This analysis will be completed by January, 2007. Staff also recommends approval of the budget ordinance revision.

Mr. Brinson then reviewed with Council the project history, project construction, project sediment issues, examples of the violations, project compliance, examples of compliance, next step and asked for policy direction and considerations: (1) pursue park plan with ball fields at Richmond Hill Park (community concerns: cost of additional project management resources); (2) continue existing Richmond Hill Park Plan - with ball fields on hold (funding to pursue alternative location - land, grading, etc. and/or partnerships); or (3) remove ball field from the Richmond Hill Park Plan (need in North Asheville for ball fields).

The following individuals were opposed to City Council proceeding with ball fields at Richmond Hill Park for various reasons and supported alternative designs that work with the landscape and scenery. They felt the Park should be used for a wildlife refuge, an environmental education center, plant refuge, protection for streams, reduction of noise, reduction of flood damage, filtering urban water sources, urban greenspace recreation, air pollution reduction and urban climate modifier, mountain biking, hiking, jogging, dog walking, bird watching, and just seeking serenity:

Mr. Craig Young, Asheville resident

Mr. James Wood (used a PowerPoint presentation and presented 10 letters and petition containing over 700 names). Recommendations: (1) cease all disc golf construction activities immediately; (2) conduct environmental assessment of the disc golf course by a local conservation group; and (3) fairways be relocated into other areas. Ultimately requested City to adopt a vision for Richmond Hill Park for education, recreation and conservation.

Ms. Julie Brandt, Weaverville resident and City of Asheville property owner

Dr. Dee Eggers, Professor in the Environmental Studies Department at UNC-Asheville

Ms. Elaine Lite, Beaverdam resident

Mr. Jim Drummond, member of the Recreation Board, said that the ball fields at Richmond Hill Park would serve a large group, not just North Asheville. He hoped City Council would continue with the ball fields, noting that mistakes were made and history can teach us how to move forward.

Mr. John Gillam, member of the Board of WNC Disc Golf Club, felt that there are three issues involved: the ball fields; the disc golf course and the Armory. He felt the City has done a good job in working on the disc golf course in a responsible manner. There are some issues in erosion from the equipment that was used to put the infrastructure in. That infrastructure is now in and the equipment is not needed anymore. He believes that with some simple measures we can address any kind of erosion that will happen on the site with seeding, stormwater collection devices, etc. He also felt that the golf course should not be grouped in with the other two issues.

Rev. Christopher Chiaronmonte felt that the City should determine who is liable for the damages - the City or the National Guard Armory.

Upon inquiry of Vice-Mayor Jones, Mr. Brinson said that of the $50,000 requested, the piece for the engineering services (approximately $5,000) is above and beyond what we would have to do anyway. The hydro-seeding would have to have occurred; the rock and materials that are necessary for sediment basins would have had to occur; and the contingency is for planning ahead if we needed additional funds (additional grading that may be necessary).

Mr. Brinson said that this was actually in our Capital Improvement Plan (CIP) request, but was not funded. The reason we need the budget amendment now is because there was a 30-day Notice of Violation and we have to make these improvements within that 30-day period.

Upon inquiry of Councilman Freeborn, Mr. Brinson said that the commitment in the contract with the Armory was only the rough grading.

Councilman Newman questioned if we don't proceed with the ball fields at the Richmond Hill Park site and find an alternative site that will require some grading, could the City ask the National Guard to partner with us in doing that, since we will be saving them grading at the Richmond Hill site. Mr. Brinson responded that he does think they would be open to that, but doesn't know what their schedule would be. From the legal standpoint, we would need to look closely at the agreement to make sure that in some way we are receiving that benefit, whether that is through them or through another contractor.

Councilwoman Cape was under the impression that $50,000 was remediation work from the memorandums we received. Now she is hearing this money is what we needed to spend anyway. She feels we are being forced into spending money that we didn't want to approve in the budget process because we went ahead with a project and now have to come back and fund. It doesn't feel like it honors our ability to be involved in the budget. She said she owes the community an apology because when she was elected to City Council, she accepted what she was told by staff about the way we were going to move on this project. One of the first times she met with the City Manager and Mr. Brinson, we walked down at Azalea Park and she mentioned her concern with our sedimentation control out there. It was nominal compared to the Richmond Hill Park. Then on June 1 she had some concerns about what was going on with sedimentation control at the Richmond Hill site and was told that she was over-reacting and we were talking care of it, and this was the highest environmental concern. She has some concerns about how the whole process works. She didn't doubt that we have to do this at this point, but was definitely disturbed about how it is being presented to Council.

City Manager Jackson said that he would like to have an opportunity to meet with the Chief Financial Officer to go through the CIP request and visit with Mr. Brinson before giving City Council a detailed answer.

Mr. Brinson explained that the 30-day Notice of Violation is driving this budget request at this point. We were anticipating the deployment of the Armory to be on site for the two weeks for their period of work and not to be back every other weekend to address this particular issue. We got into the position of where we were beyond the budget and we knew we were going to have to address the issue at some particular point and then when the violation occurred, the 30-day time period started.

Upon inquiry of Mayor Bellamy, Mr. Brinson explained that there was $40,000 in our budget to deal with this particular issue. We knew it was not going to be enough to get us to where we needed to be to have the whole park completed. We had requested in the 2006-07

62

budget process $100,000 for us to go to the next phase. That was not approved in the budget process. Knowing we had $40,000 to spend, we felt like we could get beyond this particular point and we wouldn't have to do some of the things we are having to do now (because of the violations), but the additional funds for the hydro-seeding we felt like we could pay that out of existing funds. Because we did two environmental assessments for $8,000 and had to hire additional security on site because of vandalism issues, that depleted the $40,000 down to the point where we didn't have the money to address these issues.

Councilwoman Cape wondered why we went ahead with the project if Council didn't appropriate the money. City Council's role in this process is to determine what to fund and what not to fund. She feels like we have switched how that works and has a concern as that being a staff decision.

Mayor Bellamy said that when staff comes to Council, traditionally, and requests money for a park or police cars and Council doesn't fund it, staff doesn't stop because Council didn't fund it. They continue to look for alternative ways to fund whatever their initiative is. But if Council stated a policy direction that they don't want staff to move forward, then staff stops. An example is the Civic Center - staff still paints the walls and continues to operate with what they have.

Councilwoman Cape said that Council didn't fund the $100,000 and there were heads up. She has been informed that on June 28 there was a breach discovered. She didn't hear until September that the contract with the Armory was that they got the privilege of learning on the site. She was told that it would be handled with the utmost environmental care and that this would be a park that would show the environmental sensitivity used. To her frustration, she then finds out that we used it as a training ground for people in a very sensitive area. She thinks that there is some disconnect on how we inform Council about process and how we listen to concerns. She did not know what she needed to do at the time was to get the majority of Council to tell City staff stop. She was trying to work with the public process and knew that this has been worked on for a long time. She had expressed concerns of environmental care and was being given assurance. We can't continue to say we don't have the money to do the job well, so let's do the job and then make up for it later. If we have a project that we can't afford to do well without money, let's as an organization not do it and let's have that discussion. It is not okay to not have oversight. A two-week project turned into a four-month project which happens to every developer in our community. We are the ones that set the example and the standard. She was very upset by the process and wants to move forward. She questioned if there is any ability for the Armory to accept any responsibility in this budget amendment since they were the ones in their learning process who drove over the silt fences. There seems like there could be some participation we could explore.

Councilman Mumpower believed the impact has been dramatically exaggerated. In a complicated world, everyone makes errors and Mr. Brinson has demonstrated ownership and a willingness to learn. He felt Council's job is to assist Mr. Brinson with that and help him move on. Every concern that he heard raised about environmental concerns were raised by people trying to kill this project. From his exposure, the body of the people that he has encountered were not people who came forward and said they know some things and who offered to help, but people who didn't want this park to happen and who wanted control over the land they didn't own and were not concerned about the City as a whole. If you look at the average person who has by-pass surgery and you take pictures of them in the middle of that surgery, you won't have a sense of success or what the potentially good can come of that. You will be scared and feels the pictures shown represent the middle of the surgery on that property when it's at its worst. This is a complex project. He believed this is an operational issue and we gave you policy guidance. He was glad that we have the staff that has the courage and professionalism to try to take policy guidance and be creative and forward-thinking and dynamic and try to bring things to life.

In response to Councilman Mumpower's question about detailed information on how much actual damage was done by some of these mistakes that were made, Mr. Brinson said that he didn't want to minimize the issue, because it is an issue that deserves the attention it is getting. The inspection report that is done by DENR classified this as "slight" damage. DENR's classifications are "slight," "moderate," and "severe." On the cleaning of the sediment areas towards the creek were about 12 wheelbarrow loads of dirt, debris and silt that was removed. Water Quality was back on site today and basically has given us a clean slate. Therefore, the water quality issue, according to their terms, has been taken care of. He is not here to say that is acceptable, because it's not. One bit of sediment off that site is not acceptable. If there is any good thing out of this, we did not impede on anyone else's property - it was all contained on site. The standard grass is coming in exceptionally well and we feel confident that the site will totally be re-seeded by 2 weeks.

Councilman Newman said that Richmond Hill is a public park and many people were warning Council about the wisdom of taking very rough topography and turning it into a large flat area for ball fields. He recommended we give direction to staff to aggressively look for alternative sites for the ball fields.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3391. This motion was seconded by Councilman Davis.

Vice-Mayor Jones echoed Councilwoman Cape's comments. She does have concerns about incurring a lot of debt before we identify the source of the revenue. She would be supportive of the budget amendment, but would not be supportive of this process until we have a Council discussion about how we can do it better and be better stewards of taxpayer money. She is mainly concerned about new projects opposed to maintaining what we have.

City Manager Jackson said that all points are well taken. We have worked with Council very closely in reengineering the operating budget and we will begin with the retreat discussing how we can improve the CIP budget process. He is confident that the same success we had with the operating budget can be translated into success in the CIP budget process.

Councilman Davis is supportive of moving along with the budget amendment. He questioned if we have pursued asking the National Guard for some help in the problem they have exacerbated. He also senses that we spent a great deal of money because of some obstruction efforts on the part of the community to stop the project earlier and that's some of the reason why we are here.

Mr. Brinson said that he will be exploring the liability option with the City Attorney. He felt sure that the National Guard would be seeking advice from their legal counsel as well.

Councilman Davis also noted that we did two surveys of the wetlands for $6,000 and the results of those studies were that it is not a jurisdictional wetland and we have not found anything to change our course because of what has been found there. This still continues to be an issue here. Mr. Brinson noted that we were not required to do an environmental assessment study on the property. The federal government was required to do one (total of three studies on this property) and they found no significant impact.

Councilman Davis felt we should correct the mistake and it's notable that DENR said our difficulties were "slight." He does feel that there are a lot more layers that we are dealing with here today but was pleased to move forward and fix what we have.

In response to Councilwoman Cape, Mr. Brinson said that if Council doesn't approve the budget amendment, we could not meet the requirements of the violation.

Councilman Mumpower pointed out that there were 12 wheelbarrows of dirt in a place they shouldn't have reached over 16 acres disturbed.

When Councilman Mumpower asked if there is a pattern of mistakes for the Parks & Recreation Department, Mr. Brinson said there was a violation of Azalea Park and it dealt with a decision that we had to make it quickly in regard to saving the wetland area.

City Manager Jackson said that our Parks & Recreation Department is a nationally recognized department and has a track record of competence in delivering programs as well as facilities. This is the exception to the rule and we want to deal with this forthright and aggressively to get this on the right track the Department has been on for years under Mr. Brinson's leadership and direction.

Councilman Newman said that there may have been 12 wheelbarrows of mud taken out of the creek, but it's obvious that there were a lot more wheelbarrows of mud taken off that site.

Councilwoman Cape said that Mr. Brinson's history with the Parks & Recreation Department is not under review. We are collecting money from the citizens of Asheville for stormwater control and we need to be the stewards and example of this. She feels this is different than looking at heart surgery because the problem with siltation in rivers is one of the major causes of much environmental degradation and is nothing to take lightly.

The motion made by Councilman Mumpower and seconded by Councilman Davis carried unanimously.

Councilman Freeborn felt there was ample property along the riverway for ball fields and would support staff looking in those areas. He does feel that grant dollars would be available. He did not want to continue with ball fields at Richmond Hill Park.

Councilwoman Cape moved to remove ball fields from Richmond Hill Park Plan. This motion was seconded by Councilman Freeborn.

Councilman Mumpower said that we are a city of hills with the little flat lands being taken up by other things. The City maximized what they had using existing resources. This is about our children needing a place to play ball. A tremendous amount of thought, money, energy, staff time and Council deliberations went into this plan and to walk away from it, he felt would be a mistake.

Upon inquiry of Councilman Davis, Mr. Brinson said that he will explore partnerships with other municipalities, other governmental agencies and other providers to see if there is a possibility to maybe collaborate on these issues.

Councilman Davis felt North Asheville deserved ball fields like other parts of town. He felt that removing salvage yards on the riverway is an expensive proposition and not a reality at this point. He asked that we continue to explore other partnerships. We have had some setbacks but also we have invested a lot of time and energy in great plans to bring this forward. He doesn't want to see us abandon ball fields at Richmond Hill Park before we explore the other alternatives.

Councilwoman Cape supported ball fields in North Asheville, but looking at a flat piece of paper is different than being on the site. Now we have recognized how difficult the transfer of these plans will be and she thinks there are other areas for ball fields other than at Richmond Hill Park.

Councilman Newman asked if we could amend the motion to make sure that we have looked at every other possible places for ball fields in North Asheville.

Upon inquiry of Councilman Freeborn, Mr. Brinson said that it would cost approximately another $700,000 to complete the ball fields. Originally the plan called for 5 fields and was toned down to 2 fields to address many of the issues brought forth in discussions.

In response to Councilman Freeborn about appropriating the $700,000, Mr. Brinson said that staff will have to come back to Council many times for requests to continue development of ball fields; whether they are at Richmond Hill or somewhere else. It may be a land acquisition cost, grading costs, infrastructure costs, etc. That will be a multiple-year request process, if the decision is made to build ball fields anywhere.

City Attorney Oast said that we do have a contractual arrangement with the National Guard. He has not reviewed the contract in advance of this meeting and whichever policy direction Council gives staff, we need to explore the contractual implications of that contract. If there are further specific actions that need to be taken, like amending the contract, we might need to come back to Council.

Councilwoman Cape moved to amend her motion to remove ball fields from Richard Hill Park Plan forever and pursue alternative locations and partnerships. The amended motion carried on a 5-2 vote, with Councilman Davis and Councilman Mumpower voting "no."

After walking the site in June, Vice-Mayor Jones didn't realize the huge amount of grading required for disc golf. She felt we should look for alternative ways to make the fairways less intense, which might be cheaper to build and maintain. She felt we need to discuss this with the disc golf group first and ask them to look for some alternative ways to accomplish this.

Mr. Brinson clarified that there was no grading for the disc golf course, only clearing. He said that the disc golf course has been moved on two occasions, really at the request of Mr. James Wood, to stay out of the wetland area. Mr. Nichols, who is doing the design for the City, has done a great job of trying to appease that issue. He has moved a number of holes away from the wetland area to keep them from being disturbed. The course is about 90% complete. If we go back and look at re-locating, we might be doing more disturbance in other areas. However, he said that he would be happy to work with Mr. Nichols on Vice-Mayor Jones' request.

Councilman Freeborn said that the National Guard did the work for the City that led us to this point and he felt they should have to pay for the cost of the clean-up regarding the violation. If they are unable to do this, he would not feel comfortable in seeing the Armory portion of the project moving forward. This was a well-intended project and he does support more ball fields in North Asheville. He admires our staff and former Councils for looking at avenues to build park

facilities. He then moved ask the City Attorney's Office to review the contract to see if the National Guard's inability to provide adequate grading work (or their unwillingness to pay for the cost of clean-up) on the site is a breach of contact. This motion died for a lack of a second.

Councilman Davis said that it is not the National Guard's fault that we are not going to build ball fields at Richmond Hill Park. They may not have timely provided the grading as we would like and it created a problem for us. But, in good faith, they were performing grading. Now we are not going to be needing them to complete what we expected them to do in this contract, so we need to have staff talk to the National Guard about what opportunity we have with perhaps transferring this grading to another site at a later date.

City Attorney Oast said that he was going to review the contract in terms of what level of responsibility the National Guard has regardless of whether Council gave him direction or not.

Councilwoman Cape asked staff to clarify whether the National Guard would be willing to grade in another location.

Councilman Mumpower said that even though he spoke against the disc golf course from the beginning, we have made a commitment to them and we should proceed, especially since 90% of it is complete.

In response to Councilman Newman, Mr. Brinson said that the previous disc golf course was pretty rough due to the amount of play. We have learned a lesson and have worked with Mr. Nichols on the design. We have looked for ways of putting in steps in places where we know there is going to be traffic, we have put mulch in places where the area won't be degraded, and we have seeded areas where we know we may have erosion problems. In addition, we have formed the t-boxes and put gravel in the bottom of them and then put synthetic turf on the top so they won't erode the particular area. There are things we are trying to do. Asheville is the envy of a lot of people because of that disc golf course. Most disc golf courses are in open areas and they are not very challenging. There is a benefit for having a unique course there, but there is also an issue of dealing with the sensitivity of the site.

Councilman Mumpower moved to support the disc golf course moving forward. This motion was seconded by Councilman Davis.

Councilman Newman moved to amend the motion, noting that he did support the disc golf course at Richmond Hill, that we ask the disc golf course people to pause and review the plans to see if there may some adjustments before final build-out. If we are not going to proceed with the plans to immediately build out the ball fields, there may be some really positive changes that could be made to the golf course to the benefit of disc golf and to the benefit of the park. This motion was seconded by Councilwoman Cape.

Councilman Mumpower felt the amendment to the motion is more of an effort to micro-manage the process that is already 90% complete. He would not support the amendment.

The amended motion made by Councilman Newman and seconded by Councilwoman Cape carried on a 5-2 vote, with Councilman Davis and Councilman Mumpower voting "no."

In response to Mayor Bellamy, Mr. Brinson said that his staff works with the disc golf course people all the time and they do not need to get formal direction from Council to do that.

Councilman Mumpower felt Council is micro-managing and he withdrew his original motion, which was amended.

Councilman Davis moved to have staff collaborate with the disc golf course people and come back with a final plan giving City Council an opportunity to have a final look at it. This motion was seconded by Councilman Mumpower.

Mr. James Nichols, representing the WNC Disc Golf Club, said that they are committed to working with the Parks & Recreation Department staff.

Councilwoman Cape would like to include some other people, other than City staff and the disc golf club. She felt it was only fair that people who are sharing concerns with this location be included in that conversation as well. Mayor Bellamy instructed City staff to advertise this meeting, specifically placing a notice on our website and in our eNews.

The motion made by Councilman Davis and seconded by Councilman Mumpower carried unanimously.

Mr. Brinson shared with Council that they have learned many lessons from this and staff will be more diligent in addressing the projects in the future. He thanked former Councils and the seated Council for the following projects that you have assisted us with: (1) approving the development of the French Broad River (FBR) Park system, especially Carrier Park, which is a showcase for water quality improvements by retaining and filtering the runoff from West Asheville prior to reaching the FBR and which will also become part of the curriculum for the city schools; (2) partially funding the Reed Creek greenway project which will again serve as a learning lab for our community on collecting runoff from over 1/3 of the stormwater in Asheville; (3) support of Azalea Park, which has become the showcase for a soccer complex in the southeast, the envoy of communities who use to laugh at Asheville because of our poor collection of soccer fields; (4) allowing us to build Food Lion Skatepark for an underserved group of children and which also allowed us to successfully solve a major problem downtown with destruction of property; (5) allowing us to feed over 100 seniors in our community Monday-Friday with the only hot meal they sometimes receive; (6) allowing us to bring in the wonderful staff who were transferred from Buncombe County. Through their efforts we: (a) Reduced the deficit in the first year of operation at the golf course from 135,000 to less than 25,000; (b) Completed over 750,000 worth of improvements at McCormick Field for a cost of less that 80,000 for the city taxpayer; (c) Completed the Covington clubhouse at Aston Park at no cost to the city taxpayers; (d) Exposed over 20,000 school children to the wonderful world of nature and living things at the accredited Nature Center; and (e) For allowing Recreation Park pool to have its most successful year financially that it has ever had; (7) allowing us to provide supervised Afterschool care to over 250 children each day at little or no cost to those who need it the most; (8) allowing me to work with a dedicated maintenance staff who have inherited over 350 acres of additional park land and 14 new parks and facilities with fewer people that we had ten years ago; (9) allowing us to provide an outdoor recreation program that has allowed inter city children their first real experience in being in the outdoors through caving, canoeing, camping, hiking and mountain biking; (10) the opportunity to work with the Junior League of Asheville at the Reid Center for providing our youth a way to express their feelings on social problems through drama, dance and creative music; (11) allowing us to renovate Stephens-Lee Center when there were so many saying it would never happen; (12) allowing us to participate in the "top of stop" program that provides shelter for those needing a place to get out of the sun or rain at our bus stops; (13) allowing our staff "on our own time" to work on habitat for humanity projects, adopt a street, support two families through Eblen each year at the holiday season and the other hundreds of hours they spend giving back to the community they so love; (14) allowing us the flexibility and resources to secure over 15 million in out side funding, non-city taxpayer dollars, for projects and programs over the last ten years; (15)

for your support of the many festivals, special events, and activities, that brings in over 25 million dollars in economic impact for this community; (16) allowing us to provide an award winning wellness program that has reduced the sick leave by city employees dramatically; (17) supporting the youth and adult athletic programs for this community which provide positive outlets for many who would be doing other negative activities; (18) assisting in the funding of renovations to 15 playgrounds and parks over the last ten years that allow for equal access by all; (19) allowing us to support the over 100 building, several which are historic that the city owns as part of our on-going maintenance operations with 3 dedicated staff members; (20) support of public art, which can be sometimes controversial, but adds so much to the culture, historic fiber of our community and celebrates our diversity; (21) the opportunity to nurture relationships with such great people like Jake Rusher who, through his will gave the City almost 1,000,000; (22) supporting our therapeutic recreation program which serves over 2800 youth and adult who frankly would go un-served if not by our wonderful staff; (23) allowing us to teach on an average 350 people to learn to swim each year at no cost, increasing the likelihood that they could save someone else's life or their own; (24) allowing us to provide logistic support to those returning home and recreation opportunities to the families of those serving in our armed forces through the Citizen Soldier Program; (25) allowing us to provide hundreds of unique programs and activities at our 10 recreation centers, many at little or no costs; (26) allowing us to continue to provide a summer playground program that gives so many youth and teens a place to socialize, learn and play while out of school; and (27) the 135,000 hours over 2,500 volunteers give to our programs each year. This alone saves well over $500,000 each year thanks to their commitment.

VI. OTHER BUSINESS:

Vice-Mayor Jones thanked UNC-Asheville and their freshmen for volunteering at Azalea Park. She spoke about how the relationship with the student body and the City of Asheville is mutually beneficial.

The following claims were received by the City of Asheville during the period of August 18 - 31, 2006: David Meek (Sanitation), Wit Jakutowicz (Streets), Dorothy Countryman (Sanitation), Kelvin Benjamin (Water), Everette Hardy (Water), Nichole Compton (Transit Services), Angela Smith (Transit Services), Bjorn Larson (Police) and Stephene Dury (Transit Services). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Rev. Christopher Chiaronmonte performed a survey which revealed that 99% of the people don't mind being asked for money. He understands that the banning ordinance from parks is for those drinking in the parks, noting it says nothing about smoking pot or having it in your possession.

Mr. Chris Weeks said that appearances are deceiving.

CLOSED SESSION

At 9:36 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville, State of North Carolina, County of Buncombe. The statutory authorization is contained in G.S. 143-318.11 (a) (3); (2) to discuss matters relating to the location or expansion of industries or other businesses in the area served

by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorized the payment of economic development incentives will occur in open session. The statutory authorization is contained in G.S. 143-318.11 (a) (4); (3) to consider the qualifications, competence, performance, character, fitness, conditions of appointment of an individual public officer or employee. The statutory authorization is contained in G.S. 143-318.11 (a) (3); and to prevent the disclosure of information that is confidential pursuant to GS. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11 (a) (2); and (4) to establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property on Brevard Road by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 143-318.11 (a) (5). This motion was seconded by Councilman Freeborn and carried unanimously.

At 11:25 p.m., Councilman Mumpower moved to come out of closed session. This motion was seconded by Councilman Freeborn and carried unanimously.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 11:25 p.m.

Kristin Lipe
CITY CLERK

Jerry M Bellamy
MAYOR

Tuesday – September 19, 2006 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: Councilman Brownie W. Newman

VISITORS FROM SISTER CITY VLADIKAVKAZ RUSSIA

Mayor Bellamy said that the City of Asheville and Asheville Sister Cities are proud to welcome our friends from our first Sister City of Vladikavkaz, Russia, to Asheville. The visit was sponsored by the Open World Leadership Program of the Library of Congress as an Arts and Culture tour. She hoped that their visit is both profitable and memorable. She was particularly happy to see our long-dormant relationship with Vladikavkaz being revived. The citizens of Asheville look forward to continued exchanges between our two cities. She asked that our visitors extend our best wishes to their fellow citizens of Vladikavkaz upon their return home. She presented them each with a small gift. In turn, Akhsar Yesenov, senior instructor/art professor from the North Ossetia State University, presented Mayor Bellamy with a medallion and a painting, which he painted, showing a view of Vladikavkaz.

Mayor Bellamy was then pleased to introduce Ms. Valeria Watson-Doost who has just returned from Osogbo, Osun State, Nigeria. Ms. Watson-Doost briefly spoke about the trip to Osogbo and how she hoped that Osogbo, Osun State, Nigeria, will be able to establish a relationship with the Asheville Sister Cities Program. She presented Mayor Bellamy with a letter from the Honorable Chairmen of Olorunda Local Government and Osogbo Local Government and a beautiful piece of fabric.

BUNCOMBE COUNTY MENTAL HEALTH CRISIS CLINIC

Ms. Mandi Stone, representing Buncombe County, outlined Buncombe County's current plans a Crisis Stabilization Facility in Buncombe County. She said that the purpose is to provide medical, non-hospital detoxification and facility based crisis services to individuals. It is located at 277 Biltmore Avenue, Asheville, NC. This is a county owned building that currently houses the Neil Dobbins Detoxification Center. The facility will be operated by ARP-Phoenix. They currently manage the detox program and have managed other crisis facilities in North Carolina. It is a locked facility providing mental health crisis stabilization services from 23 hours to 15 days. The individual will meet criteria for involuntary commitment. There is a reasonable expectation of stability and step-down to a lower level of care in less than 24 hours. There will be clinical programs for rapid stabilization; aggressive medication or crisis counseling. The facility will have on-site capacity for "first responder team" to begin developing step down plan: Crisis plan including safety plan; Immediate community support (ACT Team, CBS Services); Discharge medication, refill arrangements, and MD follow-up appointment; Residential plan; and Transportation. There will be 24/7 law enforcement presence on site. This facility will have 16 beds as defined by licensure regulations Division of Facility Services.

- County Investment Crisis Facility:

  $1.2 M Building Renovations
  $ 71,640 Annual Rent Subsidy
  $500,000 Projected Operating Shortfall
  $250,000 24/7 Law Enforcement Presence (4 FTE) + 1 Vehicle

- Additional County Investment In Crisis Services

Integrated Care
- Western North Carolina Community Health Services ($130,000)
- ARP-Phoenix ($150,000)

Detention Center
- Behavioral Health Staff: $110,000 (therapist, psychiatric consultation, pharmacy)
- Community Based Services (total is $84,000 combined with Substance Abuse Services)
- Substance Abuse Services

Ms. Stone responded to various questions/comments from Council, some being, but are not limited to: how will this facility help the pressures in the jail; is the facility only for those intoxicated or does it include other mental heath crises; are the hospitals supportive of this facility;

Councilman Mumpower thanked the County for their leadership and tax dollars to make this facility happen. He said that typically cities don't get involved in direct services, but questioned how the City help. Ms. Stone responded that the City is helping via this forum as they are still working to get the word out that this is one area we are trying to develop. Also, she said that they will be challenged around the 24/7 law enforcement presence and the City may want to look at the amount of time they are currently spending related to transporting people to out of town hospitals and whether this, at some point, might allow the City to reallocate some resources to help with that piece. Clearly understanding though, that the delivery of mental health services is the County's responsibility.

Mayor Bellamy also thanked Ms. Stone who is also supporting families in crises.

There was a majority of Council's support to direct the City Manager to see if there are any opportunities for cost-sharing to assist with the 24/7 police presence.

PROGRESS REPORT ON THE HOMELESS (10-YEAR PLAN)

Ms. Amy Sawyer, Affordable Housing Coalition, said that the he Homeless Initiative coordinates community planning and action to implement the 10-Year Plan to End Homelessness, adopted by the City of Asheville and Buncombe County in January 2004. The overall goals of the plan are: reduce the number of people who become homeless; increase the number of homeless people placed into permanent housing; decrease the length and disruption of homeless episodes, and provide community-based services and supports that prevent homelessness before it happens and/or limit opportunities for homelessness to reoccur. Regular updates are provided through the website (www.abchomeless.org), a newsletter, and quarterly stakeholder meetings. Six workgroups meet monthly to plan and coordinate actions in the areas of: Oversight, Feedback, Prevention, Housing, Services, and Discharge. Membership in the workgroups includes business and community representatives, service agencies, advocates, and homeless individuals.

The coordinator for the Homeless Initiative participates in community groups that have shared interests, including the Homeless Coalition, the Drug Treatment Subcommittee of the Buncombe County Drug Commission, the Adult System of Care Group, and BEACON (the network of emergency assistance providers). She also sits on the state's Interagency Council on Homeless Programs. This minimizes duplication and provides for broader community collaboration.

Point-in-time counts record the number of people experiencing homelessness on a single day. The most recent count was conducted on July 26, 2006:

Date	Total # Experiencing Homelessness	Experiencing Chronic Homelessness	Formerly Homeless in Permanent Housing
Jan 2003	700 estimate	293 estimate	n/a
April 2004	689	n/a	n/a
Jan 2005	502	169	n/a
Jan 2006	486	127	55
July 2006	598	134	78
Difference Jan-July '06	+112	+7	+23

Notes:

1) Chronic homeless individuals are those with a disabling condition who have been homeless for a year or more, or have had four episodes of homelessness in the last three years.
2) A seasonal increase in people experiencing homelessness is expected in the summer in our area; however, the number of chronically homeless has not significantly increased this year.
3) Most of the increase in the July count was in the number of people in families. This is due in part to better measurement of this group with almost 100% agency participation.
4) The Point In Time evaluation tool is now used uniformly across North Carolina and should remain consistent from this point forward.
5) Formerly homeless people in permanent supportive housing are not counted as homeless, but would likely face homelessness again without this support.

Six mandated agencies have been using the Homeless Management Information System (HMIS) since May, 2006. The Homeless Initiative is working closely with state-wide HMIS administrators to address technical problems and start to track data, including, eventually, an unduplicated count of people experiencing homelessness over a period of time. A group HMIS training is planned within the next two months, but the cost of joining the system is a major barrier to smaller agencies. The State has applied for additional HUD funding to mitigate some of these costs.

Housing First, the placement of chronically homeless people in permanent supportive housing as a first step in addressing their problems, is one of the key strategies adopted in the 10-Year Plan. The increase in numbers this year has been largely due to expansion of WNC Community Health Services' Shelter Plus Care program.

In addition to the existing units noted in the table above, 18 units at the rehabilitated Woodfin Apartments are currently being filled, with full lease-up expected over the next few weeks. Applications are also being accepted for the new Griffin Apartments, where 15 units will be available for homeless people by the end of October.

Representatives listed below have been meeting to plan the implementation of the Housing First program at the Griffin and Woodfin apartments.

- Mountain Housing Opportunities (Developer)
- Hospitality House (Case Management)

- Western North Carolina Community Health Services (Case Management - AIDS)
- Clay Properties (Property Management)
- Harris Brown (Property Management)
- The City's Community Development Division

A doctoral student from the University of North Carolina will be gathering research data on the cost effectiveness of supportive housing for persons who are chronically homeless.

Barriers:

- **Public Will:** There is a great deal of community support for the Homeless Initiative, as seen in the list of partners. However, ongoing clashes in downtown accentuate a piece of the problem and frustrate many community members. The answer is continued education, stakeholder collaboration, and community-wide events that show the positive work that is being done.

- **Mental Health Services:** Mental Health and Substance abuse treatment are essential. While the 10-Year Plan sets a goal of expanding mental health treatment, specifically with two interdisciplinary ACT Teams, this has not occurred. Recent state mental health reforms have had the opposite impact. Strict criteria, long waiting lists, and struggling service providers make accessing the mental health system a challenge felt across the community, including by those who are experiencing homelessness, or at risk of experiencing homelessness.

- **Funding:** Direct funding of services by the federal government is declining.

Some upcoming events include:

- **October: An Annual Report** will be presented to the community in the first week in October. Philip Mangano, Director of the United States Interagency Council on Homelessness will attend, along with local and state representatives. It would be an honor to have City Council members in attendance.

- **December: Project Connect** is a day-long national event planned for early December, with over 30 cities from across the country participating. Project Connect will provide a safe, friendly place where individuals experiencing homelessness can access a wide array of services, including health checks and housing options. We are very grateful to Mayor Bellamy for the support she has given to this event.

Ms. Sawyer and Ms. Charlotte Caplan, Community Development Director, responded to various questions/comments from Council (and those they were unable to respond to they would obtain that information and share it with Council), some being, but are not limited to: what is the total budget for Housing First, including housing, food, treatment, medical care, supervision, case management, etc.; is the target group still the core chronic homeless group downtown; what percentage of the people moving into the Griffin Apartments are working or have substance abuse or mental health problems; is treatment for substance abuse a requirement those who want to live in the apartments; what was the capital investment for Woodfin Apartments; are criminal background checks performed; is the Asheville-Buncombe Community Christian Ministries (ABCCM), Western Carolina Rescue Ministries and the Salvation Army been a part of the process; are the agencies participating in the Plan comfortable with the process; have you seen the number of chronic homeless decrease; is Asheville still amongst one of the largest cities that has the largest chronic homeless population in the state; and is the Housing Authority

involved and have they provided or will they participate in providing any units in some of the housing developments.

Councilman Mumpower didn't personally agree with some of the initiatives, but they are shining a light on the problem. He asked for detailed budget information if we are going to participating in this initiative going forward. He is concerned about the dollars and the effectiveness when we are dealing with a chronic population of substance abusers. He said we are talking about 33 people out of 134 and there is certainly a concern that after we get the 33 off the street they will be replaced with another 33. He personally has a hard time with the amount of money we will be putting into this for the limited number of people. When we look at all the people in the community who are working hard trying to make ends meet and then to set people up with limited requirements for behavioral maturity in an apartment of their own for free, doesn't seem right.

Vice-Mayor Jones said that Rev. Scott Rogers with the ABCCM did meet with the Housing & Community Development Committee and they had a constructive interchange. It is her understanding that he is committed to working with the City on this initiative in moving forward. In term of the 10-Year Plan, the chronic homelessness initiative is only one part of the Plan. She was very encouraged to hear how Buncombe County has integrated strategies straight out of the 10-Year Plan in their planning of the detox facility.

Councilwoman Cape said that the detox facility will have 16 beds and noted they are paying $350 per person per night for those beds for a total of about $10,000 per month per person. If we can get those 16 people into a stabilized situation through this initiative, that would be a lot of money freed up to do a lot of other things in our community on a larger scale. She felt this is a good step to addressing this problem and would be interested in seeing how it moves forward.

Mayor Bellamy said that there are some people who are homeless and some people who just like to hang out. One thing that has impacted the visibility is A-Hope's hours of operation. The day reporting center that was in place is one element missing. Mental health has a direct impact on our homeless issue, and we should write a letter to our legislators and congressmen asking them to assist with this issue now because it is going to be a huge burden on our resources. She asked for Council's support in sending the letter.

At the suggestion of Councilman Mumpower, it was the consensus of Council to instruct the City Attorney to draft a very specific resolution in response to recent events and that it be placed on Council's next formal meeting agenda.

On behalf of City Council, Mayor Bellamy thanked Ms. Sawyer for this update. She said that City Council will look for further updates in the future.

I-26 AESTHETICS ADVISORY COMMITTEE

Mayor Bellamy informed the public of three citizen information workshops being held by the N.C. Dept. of Transportation for the purpose of showing all preliminary designs for the I-26/240 widening project. Public input from these meeting will be included in the draft environmental impact statement and will be used in the decision making process.

Ms. Alice Oglesby, designer representing the I-26 Aesthetics Advisory Committee, updated Council on their progress over the past two years noting that they will be participating with the N.C. Dept. of Transportation at the public workshops.

She reviewed with Council some of the overview items and then showed them some focus areas they are targeting.

What they based everything on was what the Community Coordinating Committee had set up as design criteria, approved by Council. We are looking at matching the skill of the project to the character of the community. We are looking at reunification and connectivity of the community in various ways; recommend neighborhoods and downtown connectivity; compatibility with community's existing design vision and future plans - compatibility with river front; and designed with recognizable community character and included local artists. She reviewed with Council the areas of focus, i.e., river crossing bridges, overpasses/underpasses, etc.

She briefly discussed the I-4401 section sound barrier walls and showed Council examples of other walls across the country.

She then showed Council and explained some targeted areas using examples of other cities and how they addressed the aesthetics: Amboy Road, medium sound barrier walls in the center section, State Street underpass, Haywood Road overpass and bridge.

They will be looking for public comment from the community and then they will come back to Council at a later date with a recommendation.

On behalf of City Council, Mayor Bellamy thanked Ms. Oglesby for this update and looked forward to the next report.

STATUS OF UDO AMENDMENTS

Planning & Development Director Scott Shuford said that at Council's direction, Planning and Development staff members are hard at work on making significant revisions to the Unified Development Ordinance (UDO). These revisions include stand-alone ordinances and a comprehensive UDO re-write based on Council priorities. For example, Council concern about steep slope development warrants a stand-alone ordinance, whereas changes in UDO layout and formatting can be covered as part of the comprehensive re-write.

Stand-Alone Ordinances – These ordinances are among the more significant that Council will likely see prior to the comprehensive UDO update.

Steep Slope and Ridgetop Overlay/Retaining Walls/Open Space Ordinances – These separate ordinances are grouped together because of their interrelationship. Staff convened a focus group of design professionals to provide advice and guidance on a comprehensive steep slope and ridgetop ordinance that addressed the public safety and appearance issues in a comprehensive fashion. The associated retaining wall ordinance recognized that less grading on steep slopes will result in the construction of additional retaining walls, prompting an ordinance that primarily deals with the appearance of such walls. The open space ordinance has been revised to reflect current staff research on how this issue is handled in other communities and to ensure that Council Strategic Operating Plan direction concerning fees-in-lieu of open space and greenway development are adequately covered in the ordinance. On September 6, the Planning and Zoning Commission considered these amendments and continued action until their November 1 meeting to allow staff an opportunity to communicate more fully with stakeholder groups and the public.

Mixed Use District – This ordinance is being prepared for application on the Merrimon Avenue corridor as part of the zoning study for the corridor. It is anticipated to eventually replace two existing mixed use zoning districts (Neighborhood Corridor and Urban Place).

Comprehensive UDO Re-Write – These general categories of the update are currently being reviewed with the Planning and Economic Development Committee and the Planning and Zoning Commission for policy guidance.

Zoning Districts – Staff is not planning on substantive changes to residential zoning districts but does hope to be able to consolidate existing nonresidential and mixed-use districts into a smaller number of districts by classifying the districts by development type. For example, the following table provides examples of how this can be accomplished.

Category	New District	Would Replace	Comments
Suburban			
	Commerce	RB, HB, OB, CI, CB-I, CB-II	Floor Area Ratio Design standards
	Office	OI, OII, OB	
Urban			
	CBD	N/A	No substantive changes to existing CBD
	Urban Village	N/A	No substantive changes to existing UV district
	Mixed Use	NCD, UP, CB-I, CB-II	Allows "tailoring" of requirements for different areas
	Neighborhood Infill	NB, URD	
Specialty			
	Industrial	I, LI	No substantive changes
	Institutional	N/A	No substantive changes
	Resort	N/A	No substantive changes
Overlays			
	Existing Overlays	N/A	No substantive changes to existing overlay districts
	Mixed Use	New	Allows choice of suburban or urban development styles
	Adaptive Re-Use	New	Increases flexibility of use while retaining existing buildings
	Steep Slope, Ridgetop	New	Regulates slope and ridgetop development

Vulnerable Areas: These are areas where existing zoning is problematic for a variety of reasons. The following table describes the problem situation for each area.

Area	Problem	Proposed Resolution
Haywood Road	Zoning (CBD and CB-II) doesn't match desired development	Zoning study underway
Merrimon Avenue	Zoning doesn't match desired development	Zoning study underway
WECAN	Zoning doesn't match plan	UDO revision process
Large lot areas	Zoning doesn't match development pattern	Residential Estate zoning
Chestnut, Arlington, etc.	Potential for suburban development	Adaptive Reuse district
RM-16 areas	Zoning doesn't match development pattern	UDO revision process

Development Incentives – Council has requested staff create additional development incentives intended to encourage the following desired development types:

- Compatible infill development
- Higher density development
- Development that is Healthy-Built or LEED certified
- Development that is transit-oriented
- Development that promotes affordable housing
- Development that preserves historic or character-defining structures

Each category of development type (urban, steep slope, suburban, residential, etc.) lists existing or proposed incentives. Additionally, there is a listing of procedural incentives that may apply in a variety of development type situations.

Urban Development Incentives (Mixed Use Districts)

Density Incentives

Density standards - Maximum residential density shall be 32 units per acre but may be increased up to a maximum of 48 units per acre if at least 25% of the total number of dwelling units meet City of Asheville affordability standards or at least 10% of the total number of dwelling units meet City of Asheville affordability standards and at least 25% of the total number of dwelling units contain 700 square feet or less of gross floor area.

Other Incentives

Community Incentive Table - In order to promote community goals of energy efficiency, mixed use development, and historic preservation, the following gross floor area and height incentives may be applied provided the requisite goals are met. For the purpose of applying this table, each incentive is available for each goal achieved (e.g., a building that is LEED-certified can take advantage of both the gross floor area incentive and the height incentive).

Community Incentive Table			
Incentives	**Energy Efficiency**	**Mixed Use**	**Existing Historic Structures**
Total gross floor area up to 48,000 square feet	LEED or Healthy Built Certification or Green Roof	Ground floor is 100% nonresidential and a minimum of 50% of the gross floor area of the upper floors are residential	Compatible adaptive reuse and/or additions to historic structures provided the architectural character of the principal structure, including fenestration (i.e., door and window openings), is maintained with regard to any facade that faces a street or is prominently visible from adjoining properties

Maximum four story height (max. height of 55 feet; min. 70% of total gross floor area above ground floor)	LEED or Healthy Built Certification or Green Roof	Ground floor is 100% nonresidential and a minimum of 50% of the gross floor area of the upper floors are residential	Compatible adaptive reuse and/or additions to historic structures provided the architectural character of the principal structure, including fenestration (i.e., door and window openings), is maintained with regard to any facade that faces a street or is prominently visible from adjoining properties

Conditional Use Permit Incentives

Urban Place Conditional Use Permit - This proposed conditional use permit would allow up to Urban Place-level mixed use development to occur on urban properties of sufficient size to accommodate stand-alone urban development like the development proposed on Haywood Road at the St. Joan of Arc site.

Steep Slope Development Incentives

Density Incentives

Density bonus - A density bonus of 10% may be granted for each of the following items at the discretion of the planning and development director. A total density bonus of up to 50% of the allowable density may be achieved under this provision.

a. Buildings, parking, and other improvements are clustered on less steep and sensitive areas of the site to reduce the amount of grading.
b. Grading is limited to 10% or more under the maximum allowed under subsection (e) above.
c. Buildings and parking areas are screened by vegetation to minimize the visual impact from key viewing areas, which include the downtown central business district, the Blue Ridge Parkway, public parkland and recreational areas, and major streets and highways.
d. Grading of roads and access drives is located outside of slopes exceeding 20%.
e. Grading for principal structures is located completely outside of slopes exceeding 20%.

Intensity Incentives

Intensity bonus - An intensity bonus of 10% may be granted for each of the following items at the discretion of the planning and development director. A total intensity bonus of up to 50% of the allowable intensity may be achieved under this provision. No intensity bonus shall allow a structure of greater size than allowed under the underlying zoning district.

a. Buildings, parking, and other improvements are clustered on less steep and sensitive areas of the site to reduce the amount of grading, including placing parking in or under the principal structure(s).
b. Grading is limited to 10% under the maximum allowed under subsection (e) above.

c. Buildings and parking areas are screened by vegetation to minimize the visual impact from key viewing areas which include the downtown central business district, the Blue Ridge Parkway, public parkland and recreational areas, and major streets and highways.
d. Grading of roads and access drives is located outside of slopes exceeding 20%.
e. Grading for principal structures is located completely outside of slopes exceeding 20%.

Suburban Development Incentives

Density incentives
Residential density "bonuses" will be developed to promote affordable housing. An example is provided below; the density allowance will vary based on the zoning district (e.g., the Commerce District would likely have a 24 unit per acre "base" density while the Office District would likely have a 16 unit per acre "base" density).

> **Density standards** - Maximum residential density shall be __ units per acre but may be increased up to a maximum of __ units per acre if at least 25% of the total number of dwelling units meet City of Asheville affordability standards or at least 10% of the total number of dwelling units meet City of Asheville affordability standards and at least 25% of the total number of dwelling units contain 700 square feet or less of gross floor area.

Intensity Incentives
Floor Area Ratio (FAR) bonuses – These can be used to encourage developments that the City would like to see for nonresidential suburban development. An example is provided below (numbers used are for illustration purposes only).

Site Design	FAR	Building size (1 acre lot)
One-story building(s)	0.2	8,712
Multistory building(s)*	0.35	15,246
LEED-Certified	0.3 (one-story)	13,068
	0.5 (multi-story)	21,780
150% landscaping	0.3 (one-story)	13,068
	0.5 (multi-story)	21,780
Green roof	0.3 (one-story)	13,068
	0.5 (multi-story)	21,780
Mixed use (50% or more residential)	0.3 (one-story)	13,068
	0.5 (multi-story)	21,780
Structured parking (50% or more spaces)	0.3 (one-story)	13,068
	0.5 (multi-story)	21,780

Maximum Allowable FAR = 0.5

*40% or more of total building GFA provided on second floor for a 2-story building and 60% or more of total building GFA provided on floors 2 and above for buildings 3-stories and taller

Conditional Use Permit Incentives
Mixed Use Conditional Use Permit – This proposed conditional use permit would allow up to Urban Place-level mixed use development to occur on

suburban properties of sufficient size to accommodate stand-alone urban development like Gerber Village.

Procedural Development Incentives

Fee Structure and Permit Processing Incentives
Building Safety Director Robert Griffin is developing fee structure and permit processing incentives for Green Building projects that will be shared in a separate memorandum.

Level III Thresholds
Proposed Level III exemptions and threshold adjustments:
Exemption for development in the downtown CBD. Development located in the downtown central business district shall be exempt from the Level III review requirements provided such development is in compliance with the downtown design guidelines as determined by the downtown commission in accordance with the applicable review procedures.

- **Exemption for development in a local historic district.** Development located in a local historic district shall be exempt from the Level III review requirements provided such development is in compliance with the applicable design guidelines as determined by the historic resources commission in accordance with the applicable review procedures.
- **Threshold adjustment for development in the NCD, URD and UPD districts.** The Level III threshold for residential development in the neighborhood corridor and urban residential districts shall be more than 100 dwelling units. The Level III threshold for residential development in the urban place district shall be more than 150 dwelling units.
- **Threshold adjustment for long-term housing affordability.** Dwelling units that meet City of Asheville requirements for housing affordability for a period of ten years or longer shall not be counted toward the Level III threshold requirement.
- **Threshold adjustment for smaller residential units.** Dwelling units that contain 450 or fewer square feet in gross floor area shall not be counted toward the Level III threshold requirement. Dwelling units that contain one or more bedrooms and 600 or fewer square feet in gross floor area shall not be counted toward the Level III threshold requirement. Dwelling units that contain two bedrooms and 850 or fewer square feet in gross floor area shall be counted at 0.5 unit toward the Level III threshold requirement. Dwelling units that contain three or more bedrooms and 1,000 or fewer square feet in gross floor area shall be counted at 0.5 unit toward the Level III threshold requirement.
- **Threshold adjustment for transit-oriented development.** The Level III threshold for residential developments located on a transit route and that significantly integrate transit into their site design and operation shall be more than 100 units. The Level III threshold for nonresidential developments located on a transit route and that significantly integrate transit into their site design and operation shall be more than 150,000 square feet of gross floor area provided such developments also meet the minimum requirements for approval of large scale commercial projects using the applicable checklist review by the planning and development department. (**NOTE:** There is a proposal for certain types/scales of developments to pay into a transit fund; this may be one way to allow developments to meet the transit-orientation requirement for a threshold adjustment.)
- **Threshold adjustment for LEED or Healthy-Built Certified developments.** The Level III threshold for residential developments certified as Healthy-Built shall be shall be more than 100 units. The Level III threshold for nonresidential

developments that are LEED-Certified shall be more than 150,000 square feet of gross floor area provided such developments also meet the minimum requirements for approval of large scale commercial projects using the applicable checklist review by the planning and development department.

Residentially-Zoned Properties Development Incentives

Density Incentives (Existing)

Development Standard Bonuses -There is an existing conditional use permit process that allows densities to be increased by up to 150% in single family districts and 200% in multifamily districts for developments that contribute to meeting City goals such as affordable housing, environmental protection, infrastructure provision, and public transit. The process also allows taller structures to be constructed in multifamily zoning districts to accommodate the increased density. Setbacks are established by the conditional use permit process. (**NOTE**: As part of the UDO update, staff will evaluate whether this bonus provision should be expanded to cover additional goals and whether the density incentives are sufficient to entice their use.)

Duplex Uses In Single Family Zones - Duplexes meeting certain design requirements are uses by right subject to special requirements in single family zoning districts.

Duplex, Triplex and Quadraplex Uses in Single Family Zones -These small-scale multifamily uses are allowed with a conditional use permit in single family zoning districts.

Density and Development Incentives (Proposed)

Adaptive Re-Use Overlay District - This proposed code amendment is intended to implement several infill development, community compatibility, and economic development goals and strategies of the ***Asheville City Development Plan 2025*** through the creation of an overlay district that allows for and provides incentives for adaptively reusing valuable buildings. Asheville has a stock of fine older buildings that greatly contribute to the City's quality of life and urban character. Due to design, location, and/or condition, these buildings may become functionally obsolete for use under their current zoning. An example of this is might be a very large older home on a large lot in a single family zoning district; the home may be too large for continued use as a single family home and the only value it may have for the owner is through demolition of the house and subdivision of the site into several lots. Adaptively reusing the building and lot in their current arrangement for multifamily and/or limited office uses may well be a much better option for the owner, neighborhood, and City relative to the subdivision option. The overlay district would "overlay" a selected portion of an existing zoning district, allowing supplementary incentives and requirements to apply to the property covered by the overlay district.

Cottage Development – Staff is working on a cottage development overlay district or conditional use permit process that would allow the clustering of single family homes on parcels of a certain size pursuant to a "cottage development" plan. Typical "cottage development" concentrates parking in one location and organizes home arrangement around a green or park area.

82

Landscaping -- Staff has been working with a focus group of design professionals and Tree Commission members to significantly revise the landscaping and buffering sections of the UDO. These revisions will propose to:

- Simplify the requirements for greater clarity and compliance
- Resolve the conflict between loading and buffering in favor of buffering
- Assign buffering requirements by zoning district rather than use
- Establish a new fee structure for landscaping violations

Nonconformities – Staff has received policy direction from the Planning and Economic Development Committee concerning nonconformities. This direction is resulting in a proposed ordinance that will contain:

- Simplified language
- One key substantive change – still require site upgrades for renovations greater than 50% in value but define "renovation" as leaving the walls and roof structures intact; additions or expansions greater than 50% in value must bring building location, design into compliance for the expansion/addition area.

Standards and Specifications Manual – Planning staff is coordinating with other departments to move certain UDO standards into the updated Standards and Specifications Manual. These standards are primarily engineering standards such as parking and loading space size, width of parking lot travel aisles, and sight distance triangle requirements.

Enforcement – Planning staff is coordinating with the City Attorney's office to develop streamlined and more effective enforcement provisions into our zoning regulations.

Owens' Report Follow-up – Staff will be including the following specific adjustments to the UDO in response to the Owens' Report:

- **Sight distance triangle** - Staff will eliminate the confusion between the UDO and the Standards and Specifications Manual regarding application and enforcement of sight distance triangle standards. We will use traffic engineering "best practices" as the standard, rather than the somewhat arbitrary, non-site-specific standards in the UDO. These requirements will be placed in the Standards and Specifications Manual.
- **Sign height** - As part of the UDO update, we will correct the confusing table that has led some to interpret that sign height standards apply to attached signs.
- **Sign area/placement/background** - Staff will bring alternatives for sign area calculations, sign placement and sign background issues (and their consequences relative to existing signs) to the PED Committee for policy direction. The direction received will be incorporated into the UDO update.
- **Pedestrian-oriented uses/setbacks** - Planning staff has already implemented a "team" approach to the application of the ped-oriented setback allowances. Two or more planners must review ped designs and make a recommendation to the Planning Director as to whether the design meets the standards. Staff will also include clarifying language in the UDO update, such as clearly applying the design standards to corner side setbacks and providing greater direction as to what constitutes ped-oriented design. Lastly, the proposal to address urban and suburban design issues more explicitly in the UDO update will favorably affect how this code provision is implemented.
- **Loading vs. buffering** - Planning staff is currently working with a focus group of Tree Commission members and landscape design professionals to revise buffer standards as part of the UDO update. It is our intention to resolve the buffer/loading conflict in favor of buffering to the greatest extent practical.

- **Landscaping issues** – The focus group mentioned above is also addressing general landscaping issues with an eye to increasing both the simplicity of the regulations and their effectiveness. Included in this effort will be changes to the alternative compliance process to better identify and specify the situations in which that process may be used.
- **Driveways/residential streets** - This section of the UDO requires significant revision to reflect a variety of factors, including community expectations, case law on property rights, and application. These factors will be resolved in the coming amendments to the UDO. Staff will seek policy direction from the PED Committee if needed.
- **50% Improvement Issue** – Staff has discussed this matter with the PED Committee and has received direction to: (a) continue the site upgrade requirements already existing in the UDO; and (b) strengthen the requirements for what constitutes building "renovation" so that a greater degree of façade and building floor area preservation is a component of overall site upgrades when the nonconforming building location is to remain. This direction will be included in the upcoming UDO amendments. Additionally, Building Safety staff have instituted a new process for double-checking improvement values using standard construction valuation techniques.

Mayor Bellamy explained her concern with the exemption for development in the downtown CDB district being exempt from the Level III review requirements in relationship to mandatory review, but not mandatory compliance. Mr. Shuford said that if this exemption is in place, we would expect that the design guidelines to be mandatory at that point in time. However, there are proposed developments that are currently underway in our downtown that are in such scale that it may be appropriate for Council to look at them.

Mayor Bellamy also said that in the threshold adjustment for transit-oriented development and in the threshold adjustment for LEED or healthy-built certified developments, the threshold is 100 units, which is essentially doubling the threshold for current Level III review projects. She asked what rationale was used in the 100 units. Mr. Shuford said that the 100 units was a number put out for policy consideration, noting that none of the thresholds are to some degree arbitrary, but they represent sizes of projects that people can conceptualize and understand and that gives Council some way of determining whether that number is an appropriate one or not. Mayor Bellamy suggested a threshold between 50 and 100 units to first see if we get developers who are interested in these types of incentives and not move the community too far too soon.

Mr. Shuford said that we also want to make sure the development community has a chance to review these incentives to see if they will actually encourage the type of development we are looking for. He said that he would come back to Council with some rationales on any unit numbers they arrive at.

Councilwoman Cape said that she and Councilman Newman have been talking about a few things and essentially the idea is the development of a cafeteria-style point system that might identify what the strategic goals of our community are. And then a range of incentives based on how many of those goals they meet. It would be like earning incentives by the number of strategic goals that are met, whether it is a combination of green-building, affordability, transit-oriented or site selection, then all of them add up to make the threshold rise and fall accordingly.

Mayor Bellamy was concerned that in the cottage development incentives if we ask people to go through the conditional use permit process, it may deter people from pursuing this type of development because it will add more cost and time to the project and she understood our goal was to simplify the process. Mr. Shuford responded that the process by which cottage developments can be approved is an important policy issue for Council because they have the potential to be in areas that don't necessarily have to be on a major corridor. Perhaps there is

some way that in certain areas it is a use by right, subject to special requirements; in other areas, it might be better suited as a conditional use permit; and in other areas, it could be achieved as an overlay district. We may be able to come into this in a variety of ways being cognizant in making it a simpler process.

Councilman Mumpower said that with the need of approximately 10,000 new housing units needed in the next 10-15 years, we need to try to take away any hurdles for cottage, accessory or auxiliary housing developments.

In response to Councilman Freeborn, Mr. Shuford said we are looking at each of our zoning districts and what their purposes are and whether the list of uses are ones that support those purposes. We have done a fair amount of advanced planning in the River District from the Wilma Dykeman Plan to the River Redevelopment Plan. We are going through a public process to further refine the viewpoints of the major stakeholders, mainly the property owners that have invested in the river. He feels Council will see a shorter list of allowed uses in the River District after the process is complete. As far as the mixed use overlay, we noticed corridors in the City that seemed to be urban corridors and they need to have an urban development pattern; other corridors were suburban in nature; and some corridors are in areas of transition. One thing they have suggested in the past would be to have a parallel code so that you could have both a suburban development opportunity and a mixed use opportunity. That is what the mixed use overlay would attempt to do - give you the choice of whatever development pattern you felt was appropriate.

Upon inquiry of Councilman Freeborn, Mr. Shuford explained the vision of the new Neighborhood Infill District.

In response to Councilwoman Cape, Mr. Shuford explained why City staff thinks it may be appropriate to look at some of the areas zoned RM-16 Residential Multi-Family High Density District to identify whether the RM-16 District is really what the City's goal is. There are areas of the community that it would be appropriate to change the zoning to a single-family designation.

City Manager Jackson said that City staff is also taking a pro-active look at how we can stimulate job creation and capital investment. They are preparing a similar type of review and presentation for the Council Planning & Economic Development Committee and the Sustainable Economic Development Committee to talk about innovative ways we can really make an impact and take our economic development efforts to the next level.

At 5:07 p.m., Councilman Mumpower moved to go into closed session for the following reason: To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The locations include: Swannanoa River Road and Asheville Commerce Park. The statutory authorization is contained in G.S. 143-318.11(a)(5). This motion was seconded by Councilman Freeborn and carried unanimously.

At 5:42 p.m., Vice-Mayor Jones moved to continue the closed session to the end of the regular meeting. This motion was seconded by Councilman Freeborn and carried unanimously.

At 5:42 p.m., Councilwoman Cape moved to go out of closed session and return to the regular meeting. This motion seconded by Vice-Mayor Jones and carried unanimously.

BROADBAND PLANNING

Information Technology Director Jonathan Feldman briefed council on broadband planning for our community.

The City of Asheville has significant operational requirements for high speed data networks. Ongoing operational costs of these networks is quite high even without stipulations for highly reliable service, so infrastructure builds are appropriate for internal usage.

It is unclear at this time whether cities should become involved in the provisioning of citizen networks. It is clear that cities who are participating in the great municipal experiment of providing broadband services to citizens are cities that are able to shoulder the risk of litigation and potential resource loss. However, there is potential economic development impact of having adequate or inadequate reasonably priced high speed data communications within a city, and Council may wish to re-examine municipal involvement in citizen broadband as conditions change. The history of cooperative/municipal electric utilities is instructive when considering this issue.

Current assets currently include fiber optic through the Charter Cable franchise agreement as well as the ERC (Educational Research Consortium) franchise agreement. Telecommunication towers are also a significant asset when considering future infrastructure planning for the City.

Policy direction for broadband at the City of Asheville essentially consists of choices between intended uses of the broadband infrastructure and how aggressively the City wishes to build its own infrastructure. Staff's recommendation is to be collaborative with other agencies when it comes to use; and to be strategic, rather than aggressive or minimal, when it comes to building infrastructure for future needs.

He reviewed a summary of current activities and projects, which included leveraging the current and future AFR fire station build-out to achieve a fault tolerant topology for City services.

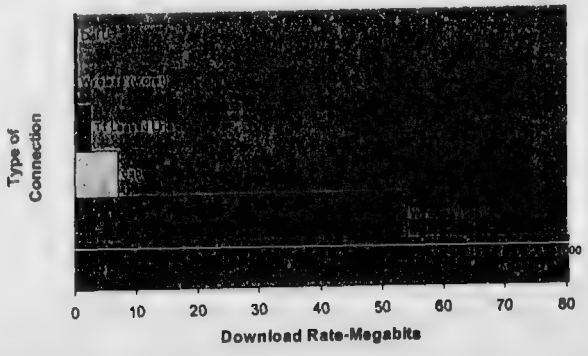
Next steps would include creating metrics to track success in activities as well as more exploration into how upcoming City department projects can be leveraged in order to provide more strategic broadband infrastructure for future use.

- **Data Rates & Operational Needs**

When making decisions about broadband, it is very helpful to know in general terms what is possible with which types of technologies, and it is also helpful to know where the limits are set as to what type of data speed constitutes "broadband."

Data speeds are generally measured in the industry as megabits (1000 bits) or gigabits (1000 megabits). The FCC (Federal Communications Commission) defines broadband as speeds greater than 2/10ths of a megabit. On the other hand, the ITU (International Telecommunications Union) defines broadband as speeds greater than 1.5 megabits.

The following chart shows a comparison of types of connectivity. It is worth noting that fiber optic connectivity has far greater capacity than any of the types shown. In fact, if the chart were to show the entire capacity of fiber optic, the other types would essentially show as zero because of the significant scale difference. It is also worth noting that wireless at its worst offers



86

approximately the same data rate as the maximum speed of dial-up access. Even forthcoming higher-speed cellular based wireless such as EVDO (EVolution Data Optimized) only offer effective rates at approximately a half a megabit.

Without being paired up to real world needs, data rates remain an abstraction. So it is worth considering that the effective requirements for acceptable real-time GISerformance at remote fire substations is certainly well above the 10 megabit rate; and that this type of computing requires in the range of 100 megabits to perform without undue delay. It becomes obvious very quickly that any effective data network must integrate both wired and wireless data networking technologies in order to combine mobility capabilities with desired data rates in buildings.

However, acquiring high speed connectivity in North Carolina (and indeed in the United States in general) remains a costly exercise. Essentially, incumbent telecommunications organizations are in a very difficult, competitive, and low-margin business currently. Reasons for this are varied, but some cite the Federal Telecommunications Act of 1996 (which regulated the telcos) in combination with significant sunk costs in expensive-to-maintain infrastructure technologies. When last pricing high speed connectivity for City usage, rates were $1040/month for a 100 megabit link.

From a wireless perspective, it is difficult to say when cellular providers will deploy higher speed wireless data. Some industry insider estimates have EVDO reaching Asheville in late 2007, but this may be optimistic.

Ultimately, ongoing operational costs of institutional high speed network services remain quite expensive even without service level agreements (contracts with financial clauses for failure that tend to be more expensive, but that help to ensure that the provider has incentive for reliability). Preparing broadband infrastructure in a sensible way for city functions both now and in years to come is definitely a staff priority.

- **Citizen Broadband Perspective**

Clearly, it is of benefit for citizens to have a city services that have a robust and cost-effective data network. Whether it is for mundane purposes such as telephones or for critical emergency response purposes, city business happens more effectively for citizens if the city has an effective broadband network. It is less clear whether cities should become involved in the end-user provisioning of citizen networks. From staff's perspective, at this time, a city would need significant surplus resources and a mandate from citizens to embark upon such a task. From staff's perspective, these conditions do not now exist in Asheville.

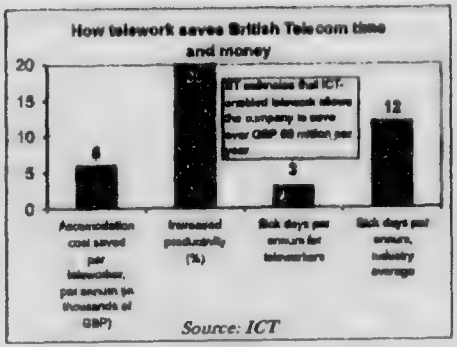
It is not a unique attribute of Asheville that consumer-grade high speed connections remain relatively expensive and sometimes tied to "bundling" practices where there is a punishment/reward discount for consumers choosing bundled services (such as cable or telephone services) along with data services. Bundling has the effect of creating a barrier to customers switching providers, and therefore gives citizens less choice.

Moreover, it also appears that carrier (telecomm / cable) data speed technologies are evolving at a far less dramatic rate than commodity wireless and wired technologies. Asheville is also not the attractive high-density data market that Atlanta or Charlotte is. Using history as a guide, there is a possibility in the future that citizens in Asheville may not have the connectivity choices that citizens of larger cities do. Since there is a potential economic development impact of having adequate/inadequate data communication in a given city, Council may wish to re-examine the role of the municipality in filling this need at a future time. (As a real example of how data network availability has translated into cash savings, see example figure showing how

British Telecom has quantified the savings of having adequate bandwidth available for workers to telecommute/telework.)

Again, history – not of data networking, but that of electric utility – can bring an interesting perspective to the matter at hand.

> *A century ago, private electric utilities ... insisted that that rural areas would be too costly to serve. In response, more than 3,000 communities formed their own utilities, arousing corporate charges of unfair competition, and "un-American" and "Bolshevik" tactics. Today, ¼ of the country's electricity is still generated by the remaining municipal and rural electrical cooperatives."*
> –Neal Pierce, Nation's Cities, 4/24/2006.



While cities such as St. Cloud, Florida, and Philadelphia, Pennsylvania, have constructed WiFi data networks for citizens, such constructions have shown that WiFi in a municipal context is a relatively slow technology that is fraught with radio frequency complications. Moreover, the model deployments (if they are done by the cities themselves rather than by private industry) have been shown to be legally challenged. In the case of municipally-done deployments that went forward (such as St. Cloud), legal challenges were obviously successfully overcome, but staff believes that most if not all municipal deployment to citizens will be legally challenged by the incumbent telecoms and cable companies. However, for longer term planning purposes, it is possible that conditions may change in Asheville or on a national level such that it may be in citizens' best interest for the City to get involved in such a deployment.

- **Current City Assets**

The City enjoys substantial connectivity not experienced by other agencies in Buncombe County. In particular, both the Charter Cable franchise agreement as well as the ERC (Educational Research Consortium, a 501-c3 started by Congressman Taylor) franchise agreements have had the effect of markedly expanding Asheville's truly high-speed data network. Many remote sites, including all fire stations and police sub stations are connected by this fiber, and Asheville citizens enjoy better service from personnel as a result of the high-speed (100 megabit) network.

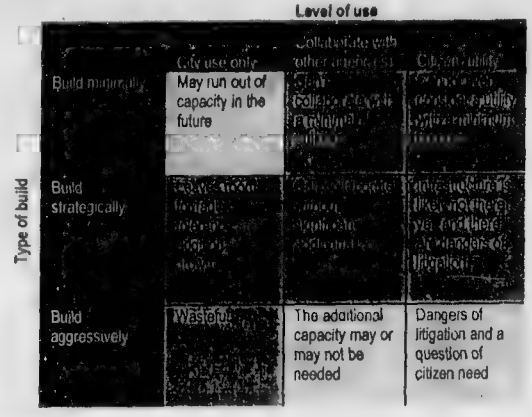
There are contractual restrictions on use for the Charter fiber, specifically that third party (e.g. non-City) traffic cannot travel on this network. Given the changing telecommunications climate, this may be something that the Council may wish to revisit when the franchise agreement is up for renewal in July of 2010.

Asheville has also been fortunate in building & utilizing its own telecommunications towers over the years. These towers are a significant strategic asset, not only for their current usage as public safety radio transmission/reception points, but also for future expansion of the City's data network. Any wireless networking is a challenge, given Asheville's mountainous topography, so the elevation and strategic locations of these towers are significant assets when considering any type of infrastructure planning.

- **Risks & Approach to Broadband Planning**

Staff would suggest that there are two areas of consideration when thinking about the City's approach to broadband planning. First, Council may wish to consider the level of infrastructure building that we engage in. Second, as mentioned previously, types and level of utilization is certainly an important aspect of how staff moves forward with tactical decisions.

Whatever Council's policy on use of the City's broadband infrastructure is (both now and in the future), an approach to infrastructure build-out that is that is too passive may leave us with significant future costs. Specifically, staff believes that when we build infrastructure, if it is not cost-prohibitive, we should be very mindful of future growth, City strategy, and Council policy direction. Of course, it is also desirable to avoid the risk of building out too aggressively, as this would not be a good use of public dollars. The following table summarizes each policy choice, showing green for low risk, yellow for some risk, and red for considerable risk. The checkmark indicates staff's current recommendation – collaboration and strategically building.



Staff's specific thoughts regarding this position are:

- Use Geographic Information System (GIS) analysis to understand where collaboration with local entities makes sense in order to explore cost-sharing and better communications between agencies.
- Build strategically so that cost is not prohibitive – but plan for some excess capacity for potential collaboration
- Maintain current direction of owning radio tower infrastructure; investigate further investment in infrastructure as City grows
- Actively investigate & implement "win-win" collaboration scenarios

- **Current actions/projects being undertaken:**

With the philosophy of "meet current short-term needs, and leverage existing projects to plan for future long-term needs," the following is a status update on tactical actions being taken to address broadband infrastructure needs:

- **Cellular Data Project for Patrol Cars.** Moves data services from sub-dialup speeds (.01 megabit) to speeds slightly better than dialup (.05-.12 megabit). Moving forward on this project as a pragmatic move to ensure that basic needs of APD Patrol are met. While this does not provide adequate bandwidth for future enhanced services, basic services such as reasonably responsive in-car mug shots and access to records management systems are supported.

- **Wireless HotZone Pilot.** An unfunded project for FY07 that would have built 11-54 megabit capabilities around fire and police stations as a proof of concept for covering a

larger area and providing enhanced data services to all city mobile operators (i.e. Building Safety, Fire, Police, etc). Staff intends to re-visit this as a CIP project for FY08.

- **Tower Site – Public Safety Radios.** To commence as a proposal for FY 2009-2010 CIP. As the City annexes out towards the West, it is apparent to staff that more radio coverage will be needed in order to enable Public Safety communications in these areas. Staff is currently in the process of (1) looking at 10-year plans for annexation; (2) assessing current city-owned land sites that are available as potential appropriate sites; (3) performing coverage analysis; and (4) obtaining estimated equipment costs. We pay $26,000 per year in rent on the current Westside tower (with an annual increase of 4%), which may not cover the full area needed by public safety in the future. Current risks of rental include no cost control and the potential for a carrier to deny us access to the tower in the future. Future benefits of strategically placed city-owned towers include potential to be used for broadband infrastructure for mobile users as well as tower rental income potential.

- **Fire Station Fault Tolerant Fiber Ring.** In the past, new site connectivity has been planned on a short-term individual site basis. Recently, AFR and IT Services have partnered on both the current and upcoming fire station construction in order to plan infrastructure in a more strategic manner.

  Instead of building more direct lines from fire stations to City Hall, staff has started the process of building a fault-tolerant fiber optic "ring". This layout utilizes links from existing stations, and requires less new construction via the Charter franchise agreement.

  The City Attorney and IT Services are currently investigating the possibility of performing industry-standard "fiber swap" agreements with other governmental and quasi-governmental agencies in order to complete the AFR ring without additional construction costs. In addition to providing a high level of service to both new and existing stations on the ring, this project will also open up exiting opportunities for better Continuity of Operations and potential Disaster Recovery for all City services.

- **ERC Relationship.** As previously mentioned, the ERC is a not-for-profit organization originally set up by Congressman Charles Taylor. In its mission statement it states that it seeks to "further economic development in the Western Carolinas through education, infrastructure and capital development." If contractually possible through the Charter agreement, ERC is one candidate for a potential fiber swap to complete the AFR fault tolerant fiber ring.

  Additionally, IT Services is pursuing a memorandum of understanding between ERC and the City in order to collaborate on centralizing storage of fiber optic data points. This will allow the City real-time access to ERC build-out points -- and thus, better planning capabilities.

- **EDC (Economic Development Coalition for Asheville-Buncombe County) Participation.** IT Services has been participating in the Technology subcommittee of the EDC (Cliff Dodson, Chair). The salient question has been "can we collaborate to build out broadband infrastructure similarly to other communities?" We are currently investigating which parts of the WNC EdNET project are appropriate for possible implementation here in Asheville.

- **Next Steps**

Clearly, broadband development is a cross-functional discipline involving City Information Technology, Planning, and Economic Development, among others.

Staff is very receptive to Council ideas regarding policy direction on these issues, and would suggest that policy direction be based on the "level of use" and "type of build" model outlined above.

Further next steps will certainly include creating metrics to track success in the various broadband infrastructure activities engaged in as well as more exploration into how upcoming City projects can be leveraged in order to better provide broadband infrastructure for the future.

When Councilman Mumpower noted that Council wanted to see how the City could take a leadership role in WiFi, but with the unreliability of some of the technology and fast-changing pace of the technology we may be stepping in over our heads to process forward. Mr. Feldman felt we would need a lot of resources and the will to see some of those resources at risk.

Councilman Mumpower wondered if there will be opportunities for us to take a leadership role in 2010 when we renegotiate our contract with Charter Communications. Mr. Feldman said that there are restrictions on how we can use the fiber that we are allowed to use under that agreement. If it is Council's wish to do any kind of operations other than collaborating with other agencies, we would need different language in that contract.

Councilman Mumpower spoke in support of receiving Mr. Feldman's report but not taking any direct action at this time, beyond those specific collaborative possibilities mentioned.

Vice-Mayor Jones didn't want to limit the collaborations to just other agencies, but to look for other opportunities as they unfold and collaborate with them as well.

In response to Councilman Freeborn, Mr. Feldman explained the citizen utility and the statement that our infrastructure is not there yet.

Councilman Davis said that he hoped the City is not being compared to Buncombe County as they providing WiFi services in the downtown area. What the City is talking about is very serious operations of the City business and the possibility of providing that service to the citizens. He understands that it is not practical at this time and supported collaboration in the future.

Councilwoman Cape noted that the kind of infrastructure we are talking about to serve our community would be massive.

In response to Mayor Bellamy, City Attorney Oast was instructed to prepare a memorandum to Council on what parts of the Charter Communications contract we can negotiate and what parts of the contract is under State control, when the contract expires in 2010.

WATER CAPITAL PROGRAM

City Manager Jackson said that this will be an overview of the (1) Capital Improvement Plan Rate Adjustment (residential customers); (2) Condo Associations; (3) Financial Plan Analysis (police direction); and (4) Uniform Rate Analysis (providing information only).

At the suggestion of Councilman Mumpower and after a brief discussion, it was the consensus to not discuss the uniform rate analysis at this time since Councilman Newman is not present.

Water Resources Director David Hanks reviewed with Council the residential customer overview: (1) 44,000 meter (customer base); (2) 99% have less 1 inch meter size; (3) less than 1% or approximately 150 customers have one inch or more meter size; and (4) analysis: oversized residential meters may have adverse impact on residential water bill - One inch meter: $48.00 per month; - 5/8 inch meter - $3.50 per month.

He recommended: 1 inch residential meter of $5.00 month; 1.5 inch residential meter of $6.00 month; and 2 inch residential meter of $7.00 month. He asked it be retroactive effective date of July 1, 2006. The affect on annual revenue is approximately $77,000. His alternative would be $3.50 per month for all single family residential customers: $80,000 revenue impact.

Regarding the Condo Associations' concerns, they have discussed (1) working with individual associations to reduce cost; (2) changing to combination fire protection/domestic meters have less than one year return on investment; (3) reduced domestic meter sizes will result in significant savings; (4) backflow/cross connection concerns being addressed; and; (5) recommend stay on course with fee structure. The condos (except one person) wanted to change to combination fire protection/domestic meters.

Regarding the uniform rate structure staff has provided information concerning uniform rates separately. In addition, staff recommends this issue be discussed at a future Council worksession for further policy direction.

In response to Councilwoman Cape, Mr. Hanks said the reason why some people choose a bigger than 5/8 meter is because of a service issue. Since the meters are at the road and the houses are several hundred feet away from the meter, a smaller 5/8 meter will not serve that unit.

Councilwoman Cape wondered if there is a consideration for people to pay a little more money because it costs more to get water to their homes. Mr. Hanks said that the cost variables for the City is actually the meter size as far as maintenance and replacement.

In response to Councilwoman Cape, Mr. Hanks said that the condos would have to change out their fittings in the near future because most have been in place for 20-30 years or more and they don't meet the current State requirement for backflow protection.

In response to Councilman Mumpower, Mr. Hanks explained the cost of replacing the different size meters.

Councilman Mumpower said we don't want to gouge anybody and are trying to find a point of fairness, but questioned if these amounts will compensate for the additional costs of repairing these meters. Mr. Hanks said that he did some analysis about how often are we having to replace these meters, and typically the larger meters last longer than the smaller meters. He does believe the $5, $6 and $7 adequately addresses the needs of replacement because of the longevity of those meters. If we are looking for equity across this whole class, the $3.50 could be considered also.

Mr. Hanks responded to Councilman Freeborn's question about why we are not looking at a CIP fee based on consumption.

After a brief discussion surrounding the residential fee and the publicity on that fee, it was the consensus of Council that for all single-family residential customers the rate be $3.50 per month and that this change be reflected at the next formal Council meeting.

Mayor Bellamy said that she has received a letter from the Buncombe County School Board in effect stating that they have to pay an additional $180,462 annually for the CIP water fee and were notified of this after they adopted their annual budget. Mr. Hanks said that he has had some discussion regarding this with the City Attorney's Office and has been advised that all State law doesn't allow us to differentiate within classes of customers and schools (City schools, County schools, UNC-Asheville, Warren Wilson, private schools, etc.) are a separate class for us.

Mayor Bellamy said that City schools have a supplemental tax and they have a little more flexibility than Buncombe County schools. She would like to see City staff see if there is something we can do for that class.

Councilman Freeborn understands the County School Board's concern, however, no one else in their class has complained and they are using our water system like everyone else. He felt that all organizations that face tough budget choices can always find a place to cut without sacrificing quality of service.

Councilman Mumpower supported Mayor Bellamy's suggestion and felt that large dramatic increases aren't fair to anyone, especially outside of the normal budget cycle, and if we have done that inadvertently, then we should look for alternatives.

City Manager Jackson said that he will look at the financing plan because the educational institutions are large users and to exempt them would be pretty significant adjustments without considering the large range impact. He suggested Council allow the Chief Financial Officer to look into the financing plan because that might be the better alternative than looking at a pay-as-you-go plan.

Vice-Mayor Jones is a strong advocate for education, however, Asheville has so much off the tax rolls that she thinks the CIP water fee is fair and this is one way water and water infrastructure can pay for themselves. She could not be supportive of looking at a way to make adjustment for that class because it is more complex that this.

In response to Councilman Mumpower, Mr. Hanks said that this has been discussed for 5 years and at many of the open forums and open meetings Buncombe County schools were represented. In addition, there has been a lot of coverage on this issue by the media.

Councilman Davis felt that even though the discussion has been going on for several years, the County schools are a large water customer and another governmental agency, we maybe we should have sent them a letter stating that this was going to happen soon. He suggested the Mayor write a letter apologizing the suddenness of the increase, but noting it has been very open discussion for several years.

In response to Councilman Mumpower, Chief Financial Officer Ben Durant said that he would have to report back to Council on what percentage did the CIP raise the County school's budget.

Chief Financial Officer Ben Durant said that key capital financing strategies/practices of where we are: (1) maintain adequate operating fund balance; (2) commit annual revenues to fund capital; (3) determine and remain within debt capacity; (4) maintain or improve bond ratings (A1); and (5) prepare multi-year forecast for operating/capital budget. Where we need to go is (1)

balance pay-as-you-go and debt financing; and (2) adopt governing board policies to guide capital finance.

He then explained five measures to calculate water system debt capacity.

The pay-as-you-go and debt financing includes earmarked revenues, cash reserves, grants or contributions, etc. It is similar to private sector use of equity to finance business capital needs. Debt financing is borrowing money to finance capital needs and making periodic debt service payments back to the lender.

We must achieve a balance of pay-as-you-go vs. debt. Over-reliance on pay-as-you-go creates project delays. Over-reliance on debt builds up fixed costs and limits operating flexibility. Capital needs are financed most effectively by striking the "right" balance.

Factors affecting debt vs. pay-as-you-go include: rate of community growth; rate of revenue growth; age of infrastructure; size of operating fund balances; size of capital reserves; operating budget's to fund recurring capital needs with annual revenue; rate of revenue growth; and who should pay, the current or future rate payers.

He then explained the current financing structure of (1) debt vs. pay-as-you-go ratio over a five-year period; (2) water capital improvement plan pay-as-you-go plan; (3) alternative financing structure of debt vs. pay-as-you-go ratio (assumes a $35 Million revenue bond issued at 5% coupon rate for major infrastructure needs); and (4) water capital improvements plan ($35 Million bond issue).

His general recommendations include (1) build capital reserves; (2) minimize future rate increases; (3) consider CIP fee rebates or other; (4) restructure residential CIP fee; and (5) provide specific recommendations in October pending further Council direction.

Throughout discussion, Mr. Durant responded to various questions/comments from Council, some being, but are not limited to: does operating reserve equal fund balance; what would our annual debt payment be on $35 Million; will we be realizing our goals of capital improvements more quickly by this process; will this preclude us in looking at bond issues for other projects; why would we stage this for three years as interest only; what is the percentage of interest; are we treating the revenues we were getting prior to Sullivan Acts II and III as Fund Balance now and are they included in what we are doing, or is there an opportunity to treat that differently; what is the cost for capital improvements over the next few years; how do we determine if bonds are fixed opposed to adjustable; and do bonds have to be voted on by the citizens.

City Manager Jackson said that we would have to look at a project list and see what we can realistically manage. If Council wanted to see that, staff would develop some alternative schedules that would produce less balance of funds in those out years and get more projects done in the earlier years.

Councilman Mumpower's hoped we don't press on with this anytime soon until we get the legalities of the Sullivan Acts resolved. Mr. Durant said that he spoke with bond rating agencies who said that regardless of what happens with the Sullivan Acts, we have strengthen our position just from taking over our water system. In response, Councilman Mumpower said that he was concerned that even though it may enhance our position, it will not enhance the community's understanding of the complex realities of water.

At 7:25 p.m., Mayor Bellamy announced a short break.

ESTABLISHMENT OF SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT

Councilwoman Cape said that this is the consideration of a resolution establishing a Sustainable Energy and Environment Advisory Committee for the City of Asheville. This will follow up discussions by Council at the meeting of June 12 and July 18 of this year where she and Councilman Newman were asked to continue to work on the committee structure and return to Council for final review. This committee has been advertising for applications and is currently accepting them through an October 14 deadline.

The President's Council for Sustainable Development (PCSD) was established in June 1993 to develop a national strategy for meeting the needs of the present without compromising the opportunities of future generations. One of the implementation recommendations from the President's Council (PCSD) was to assist in the development of local councils as a way to strengthen communities and enhance their role in decisions about environment, equity, natural resources and economic progress. Cities throughout the United States have created committees and or departments on the environment, energy and sustainability to address the concerns of their communities about these issues.

In August of 1994, San Jose's City Council adopted San Jose 2020 as its general plan. Included within the plan was a new Strategy entitled the "Sustainable City Major Strategy." In Germantown, Pennsylvania, the Environmental Commission, an eleven member commission chosen from among the residents of the City, convenes to establish and support the *Sustainable Germantown Plan* which sets the example for Germantown's citizens and those of other municipalities through programs that conserve natural resources and promote energy efficiency. In 1993, the San Francisco Board of Supervisors established a Commission on San Francisco's Environment, charged among other things with drafting and implementing a plan for San Francisco's long-term environmental sustainability. The sustainability plan, now a City document, was drafted by a community collaboration in which City staff contributed on equal footing with members of other sectors of the community. From Port St. Lucie, Florida, to Seattle, Washington, cities across the country are employing stakeholder committees, in the dialogue about community energy, environment and sustainability issues.

The City of Asheville has a history of employing the expertise and interests of its Citizens by the implementation of Boards and Commissions. Currently 34 active, standing boards and commissions serve in this capacity addressing the diverse and complexities inherent in our vibrant city.

She suggested the Sustainable Energy and Environment Advisory Committee's powers and duties include: (1) Develop rules and by laws for the conduct of its business; (2) Develop an Energy and Environment Vision Plan; (3) Develop Benchmarks and standards by which progress toward the Vision Plan Elements can be measured; (4) Develop a program for increasing community awareness of energy and environmental sustainability issues through activities including outreach, education and publicity; (5) Work on special or one-time projects that are consisted with the goals of the Committee; and (6) The Committee shall generally advise council as to the above listed items and such other matters as may from time to time be referred to it by Council.

It is important to emphasize that an Energy and Environment Vision plan should be recognized as a *means*, not an *end*. The plan is a means by which we evaluate our current energy and environmental profile, and set goals and measures for future action. To proceed in a sensible way to change long-standing environmental and energy use practices, it's necessary to come up with practical goals, actions, and objectives to be achieved. To begin to address current

and future adaptation to the existing and emerging energy and environmental realities is to act responsibly for our own futures and the futures of our children.

She suggested the membership of the committee be nine members: One member with demonstrated expertise in the field of energy management (i.e. production, conservation, application; one member currently involved in a substantial way in the operation of a business with the City of Asheville; one member currently employed in the construction industry within the City of Asheville; one member currently employed in the real estate development industry with the City of Asheville; and five remaining seats shall be at large appointments.

She suggested the term of office shall be three years all of which shall be deemed to commence as of the date of appointment of the ninth member. Three of the initial terms shall expire on year from the date of commencement, three of the initial terms shall expire two years from the date of commencement and three shall be full terms, expiring three years from the date of commencement. Council shall designate the initial terms in its resolution of appointment.

Regarding reporting to Council, she suggested the Committee shall within 180 days from the date of commencement of their initial terms, provide a written report to Council setting forth is plan for carrying out its powers and duties and a timeline fore their goals. After this initial report, the Committee shall provide a report to Council on an annual basis or more frequently as directed by Council.

With regard to assistance, she suggested the City Manager shall upon request, make space available within city facilities for said committee to conducts its meetings, and shall provide clerical assistance in fulfilling the legal requirements for said meeting pursuant to Open Meetings Law of North Carolina and such other assistance as is customary for boards and commissions.

In summary, she felt that with the creation of the Sustainable Energy and Environment Advisory Committee, the City of Asheville publicly acknowledges that it has joined other cities in becoming energy and environmentally sustainable. Embarking on the path toward sustainability marks this council as one who is willing to make a commitment with our community partners to recognize the importance of current actions for future generations. It recognizes the importance of issues of the environment and energy within their jurisdictional purview and accepts the responsibility in participating this community dialogue.

She felt the pros of this Committee would be (1) The involvement of community stakeholders with the City in issues of energy and environment; (2) Support for the City in education, publicity and community dialogue on these issues; and (3) Initiation of a Vision plan for the community on these issues of community concern. Two cons she noted would be (1) Another committee; and (2) Staff resources will be needed for support as in all Committees.

Councilwoman Cape recommends adoption of the resolution establishing a committee to be known as the Sustainable Advisory Committee on Energy & the Environment.

Councilman Freeborn spoke in support of the Committee and felt the annual report would be good to tie in with the budget process if there are any recommendations that have budget implications for the City.

She is not proposing that the Committee takes on all roles concerning environment and energy and the dialogue of this Council. She thinks that staff and Council both have an interest in initiating some of that. She wants to be careful about giving them too much. The Committee's job is not to be the policy directors for energy and the environment, only convening the dialogue. She wants us to be careful to note that everything doesn't have go to through this Committee before it comes to Council.

Councilman Davis felt that the intent of the Committee is good, but had some concerns about how much power ultimately goes to the Committee. He can see this one having the room for a lot of latitude that some of the other boards don't have. Councilwoman Cape said that we didn't have that role to the Committee. She is not suggesting that this Committee be a policy directive agency. She envisions this Committee similar to the 2025 Plan Committee where they helped roll out a vision for us and we can refer to it.

Councilman Davis said that he would have a problem if the Committee becomes an oversight committee where Department Directors have to reconcile what they are doing with their activities. He is, however, okay with the Committee being just an advisory committee.

Councilman Mumpower thanked Councilwoman Cape for her leadership; however, he could not support this effort. He sees the potential for abuse and misinterpretation. He felt that the two issues of energy and environment should be a part of all Council decisions and should be incorporated in all that we do. He didn't think we needed another level of bureaucracy and control to do that.

Mayor Bellamy said that as a matter of procedure, we will place this resolution on the agenda for the next week's Council meeting.

BOARDS AND COMMISSIONS:

It was the consensus of City Council to arrange the following interviews for a vacancy on the Crimestoppers Board of Directors: William Price and David Herbert. Regarding the City Council appointment on Crimestoppers, Councilman Mumpower said that he has modified his schedule and can continue in that seat unless another member of Council would like to participate on that Board. After a short discussion, City Attorney Oast was instructed to research the reasoning why one member has to be a City Council member (since Buncombe County's appointments did not have such a requirement). Depending on the outcome of such research, it was the consensus of Council to (1) continue with the two interviews for the one vacant at-large seat, and if the seat must remain a City Council member that Councilman Mumpower would remain on the Board; or (2) appoint William Price and David Herbert to the Board, if the Council member seat can be opened for an at-large member. If the Council member seat can be opened for an at-large member, the City Attorney was instructed to prepare the proper resolution making that change.

At 7:55 p.m., Councilman Mumpower moved to go back into closed session. This motion was seconded by Councilman Freeborn and carried unanimously.

At 8:15, Councilman Mumpower moved come out of closed session. This motion was seconded by Councilman Freeborn and carried unanimously.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:15 p.m.

Kristra Lipe
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday – September 26, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Ms. April Alexander's 3rd Grade Class from Oakley Elementary School led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Freeborn requested two minutes of silence.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING SEPTEMBER, 2006, AS "NATIONAL ALCOHOL AND DRUG ADDICTION RECOVERY MONTH"

Mayor Bellamy read the proclamation proclaiming September, 2006, as "National Alcohol and Drug Addiction Recovery Month" in the City of Asheville. She presented the proclamation to Councilman Mumpower, who is actively involved in the Asheville Drug Commission. Councilman Mumpower thanked Council for their support and showed Council the month of September Drug Commission poster.

B. PROCLAMATION PROCLAIMING SEPTEMBER 25-30, 2006, AS "DOLLAR WISE WEEK"

Mayor Bellamy read the proclamation proclaiming September 25-30, 2006, as "Dollar Wise Week" in the City of Asheville. She presented the proclamation to the Executive Director of the Consumer Credit Counseling, who briefed City Council on some activities taking place during the week.

C. PROCLAMATION PROCLAIMING OCTOBER, 2006, AS "SISTER CITIES MONTH"

Councilman Davis read the proclamation proclaiming October, 2006, as "Sister Cities Month" in the City of Asheville. He presented the proclamation to Mr. Richard Hall, President of Asheville Sister Cities Inc, and members of Asheville Sister Cities Inc. who briefed City Council on some activities taking place during the month. Mr. Hall was pleased to show the award they received for the best humanitarian program, a hand-carved pen used to sign an agreement with a new Sister City, and a book given out by the Sister Cities International at the 50th anniversary conference.

D. PROCLAMATION PROCLAIMING OCTOBER 21, 2006, AS "AIDS AWARENESS DAY"

Vice-Mayor Jones read the proclamation proclaiming October, 21, 2006, as "AIDS Awareness Day" in the City of Asheville. She presented the proclamation to representatives from

Western North Carolina AIDS Project and the Western North Carolina Community Health Services who briefed City Council on some activities taking place during the day.

II. CONSENT AGENDA:

Councilman Mumpower asked that Consent Agenda "B" be removed from the consent agenda for individual discussion.

At staff's request, Consent Agenda Item "D" was removed from the consent agenda until further notice.

Mayor Bellamy asked that Consent Agenda "E" be removed from the consent agenda due to a conflict of interest.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 12, 2006, AND THE WORKSESSION HELD ON SEPTEMBER 19, 2006

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A THIRD PARTY ADMINISTRATOR AGREEMENT WITH PRIMARY PHYSICIANS CARE INC. FOR THE PURPOSE OF PROVIDING ADMINISTRATIVE, DISEASE MANAGEMENT AND WELLNESS AND RELATED SERVICES FOR ELIGIBLE CITY EMPLOYEES, RETIREES AND THEIR DEPENDENTS

This item was removed from the Consent Agenda for individual discussion.

C. RESOLUTION NO. 06-167- RESOLUTION DIRECTING THE CITY CLERK TO PUBLISH A NOTICE REGARDING THE EXCHANGE OF A PORTION OF REAL PROPERTY LOCATED AT 749 FAIRVIEW ROAD FOR A PORTION OF REAL PROPERTY LOCATED AT 723 FAIRVIEW ROAD

Summary: The consideration of a resolution authorizing the City Clerk to publish a notice regarding the exchange of a portion of real property located at 749 Fairview Road for a portion of real property located at 723 Fairview Road.

The City and Dan Zorn, principal of Famprop LLC (Famprop) have negotiated an exchange of a portion of City owned real property at 749 Fairview Road for a portion of property Famprop is purchasing at 723 Fairview Road.

The proposed exchange is to correct a long standing encroachment and provide a more consistent property line between the City's property and the Famprop property.

The City's property (PIN 9657.97-58-1784) is on the south side of Fairview Road at its intersection with Liberty Street, zoned RS8 and improved with a Fire Station, Public Library and Community Center. The portion to be exchanged is a 0.12 acre± parcel at Fairview Road on the west side of the City's parcel as it adjoins the Famprop property. This part of the property is on the outside of the City's fence and has never been utilized by the City. It is this portion of the property where one of the buildings on the Famprop property has encroached for a number of years.

The property being purchased by Famprop (PINs 9657.07-58-0712; 0682) on Fairview Road is on the south side of the street about 315' west of its intersection with Liberty Street. It is zoned RS8 and is improved with a large residential structure. The portion to be exchanged is a 0.12 acre± parcel located at the rear of the property adjoining the City's property.

A review of the tax assessments for the properties indicate broad variations between per acre values of parcels in the area that would be attributed to the size differential between parcels. Comparable lot values range from 21,500 for 0.16 acre to 27,400 for 0.42 acre The values of the parcels to be exchanged are estimated to be roughly equal based on shared characteristics including location, size, shape and topography. The value for each exchange parcel is estimated to be about $20,000± each for 0.12 acre.

Pros:

1. The exchange will be a fair exchange of value for value.
2. It will be revenue neutral returning property to the tax rolls in exchange for property being taken off the tax rolls.
3. It will correct the long standing structural encroachment.
4. It will provide a better more consistent property line.

Cons: There are no negative aspects to this proposal.

Approval of the resolution will initiate the exchange of the properties through the process provided in N. C. G. S. 160A-271.

Economic Development, Fire Department and Parks & Recreation staff recommends adoption of a resolution authorizing the City Clerk to publish a notice regarding the exchange of a portion of real property located at 749 Fairview Road for a portion of real property located at 723 Fairview Road.

RESOLUTION BOOK NO. 30 – PAGE 107

D. RESOLUTION DIRECTING THE CITY CLERK TO PUBLISH A NOTICE REGARDING THE EXCHANGE OF REAL PROPERTY LOCATED ON RESERVOIR ROAD FOR STREET CONSTRUCTION

This item was pulled from the consent agenda to be considered at another date.

E. RESOLUTION AUTHORIZING NEGOTIATIONS WITH MOUNTAIN HOUSING OPPORTUNITIES AS THE QUALIFIED DEVELOPER FOR TWO PARCELS IN EAST RIVERSIDE AND REMARKETING OF TWO PARCELS IN EAST RIVERSIDE

This item was removed from the Consent Agenda due to a conflict of interest.

F. RESOLUTION NO. 06-169 - RESOLUTION DIRECTING THE CITY CLERK TO PUBLISH A NOTICE OF INTENT REGARDING A PROPOSED LEASE OF CITY-OWNED REAL PROPERTY AT 224 LOUISIANA AVENUE

Summary: The consideration of a resolution directing the City Clerk to publish a Notice of Intent regarding execution of a Lease with the United States of America (USA) for the Army Reservoir Center at 224 Louisiana Avenue.

The property at 224 Louisiana Avenue known as the Army Reserve Center is an 8.857 acre tract on the West side of Louisiana Avenue about 200' from its intersection with Patton Avenue. Although most of the property is generally level, there is a steep slope with rock outcroppings covering the Southeast quadrant of the property. This presents a formidable challenge to further grading of the property, so the useable area is about 6+ acres. The property is currently zoned Institutional. Due to its location and size the highest and best use for the property would be an institutional use, such as a nursing home, assisted living facility or high density residential. The single story building and other improvements located on the property

were built by the Army Reserve and remain the property of the Reserve with the right of removal for the duration of the lease. The property was leased to the USA in 950 at a rent of $1.00 for the entire 50 year term. The most recent lease for six years was signed in 2000 at an annual rent of $60,000.

The USA lease expired at the end of June and the Army Reserve has offered to enter into a new lease for the property for a term of three (3) years at an annual rent of $112,000. Although the lease does not contain an annual escalation clause the rent is at the high end of the rent range and the term was reduced to three (3) years. The Reserve Center has been a good caretaker of the property and no complaints have been received regarding any condition or activities at the site.

This item was pulled from the August 22, 2006, agenda in order for staff to assess the proposed lease in connection with the potential redevelopment of the property. It is the opinion of staff that the long term best use for the property would be a use capable of producing economic return consistent with the close proximity to Patton Avenue; however, such conversion of the property would require an appropriate amount of public discussion and sufficient planning of the project and marketing of the property. A short term lease as proposed with the USA maintains a significant revenue stream for the City while allowing considerable flexibility should an opportunity for redevelopment arise.

Pros:

- The rent revenue for this property will be significantly increased.
- The rent is at the high end of the rent range for this property.
- The shorter term will allow re-evaluation of the lease sooner.
- The Army Reserve Center provides a valuable public service.

Cons:

- The property does not generate tax revenue, but this is offset by the rent revenue.
- The current use does not add measurably to the economic activity in the area.

Economic Development staff recommends City Council adopt the resolution directing the City Clerk to publish a Notice of Intent regarding execution of a Lease with the USA for the Army Reserve Center at 224 Louisiana Avenue.

RESOLUTION BOOK NO. 30 – PAGE 109

G. RESOLUTION NO. 06-170- RESOLUTION AUTHORIZING THE CITY MANAGER TO AMEND THE EXISTING AGREEMENT WITH GREEN LIGHT ELECTRIC INC. TO CONTINUE PREVENTIVE MAINTENANCE ON TRAFFIC CONTROL EQUIPMENT OWNED AND OPERATED BY THE CITY OF ASHEVILLE

Summary: The consideration of a resolution authorizing the City Manager to amend the existing agreement with Green Light Electric, Inc. located in Weaverville, North Carolina, to continue preventive maintenance on traffic control equipment owned and operated by the City of Asheville through September 30, 2008, in the amount of $68,000.

In 2001, City staff determined that maintenance activities for traffic signals including preventative maintenance could be more efficiently accomplished through a combination of in-house activities and work contracted to the private sector.

The contract for traffic signal maintenance includes:

- Preventative maintenance consisting of annual inspection of all traffic signals and replacement or repair of deficient components;
- Maintenance activities to ensure compliance with federal and state requirements, and to protect public safety with the provision of a safe, dependable traffic signal infrastructure;
- Periodic replacement of signal components including poles, span wire, and signal heads;
- Upgrades to existing signals such as replacement of signals with LED technology to reduce burned out bulbs and power consumption, or the addition of pedestrian signals;
- Emergency response and timely repairs in cases of equipment damaged by crashes, weather, or other unforeseen occurrence.

Bids were solicited in 2002 for the contract. Green Light Electric, Inc.'s bid was the lowest, with the 2nd lowest bidder approximately 67% higher. Green Light Electric, Inc. was authorized for the work in 2003, and reauthorized in 2004, 2005, and 2006, and has performed acceptably during each contract period.

Ongoing maintenance of traffic signals is required to comply with State and federal standards and to maintain a safe and efficient infrastructure. Annual preventative maintenance identifies issues before they become problems and endanger the traveling public.

Pros:

- Maintenance of traffic signals is necessary to ensure public safety.
- Green Light Electric, Inc.'s fees are very competitive.

Cons:

- There are costs associated with maintenance of traffic signals.

Staff recommends adoption of the resolution authorizing the City Manager to amend the existing agreement with Green Light Electric, Inc., to continue preventive maintenance on traffic control equipment owned and operated by the City of Asheville.

RESOLUTION BOOK NO. 30 – PAGE 110

H. ORDINANCE NO. 3392 - BUDGET AMENDMENT TO ALLOW STAFF TO UTILIZE THE MONEY ALREADY RECEIVED AND TO PROCEED WITH THE GROVE PARK TRAFFIC CALMING AND SIDEWALK PROJECTS

Summary: The consideration of a budget amendment to transfer $375,000 already received from the Grove Park Inn into an expenditure account.

In 2004, City Council requested that the Grove Park Inn convey $375,000 for traffic calming and sidewalks to the City before starting any work on their site. A portion of this was dedicated to administrative costs of the work, including hiring of an engineering consultant to develop the projects. The Grove Park Inn has conveyed the required amount to the City which has already been received. The consultant's contract calls for a 6-month timeframe from notice to proceed for public involvement, engineering, and design. Upon completion of this contract, the City will release the project for bidding.

This budget amendment is technical requirement that allows for the inclusion of these funds in the annual budget in accordance the local government fiscal control act.

Staff requests that City Council approve a budget amendment in the amount of $375,000 to allow staff to utilize the money already received, and to proceed with the Grove Park traffic calming and sidewalk projects.

ORDINANCE BOOK NO. 23 – PAGE 94

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR SEPARATE VOTES

RESOLUTION NO. 06-166- RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A THIRD PARTY ADMINISTRATOR AGREEMENT WITH PRIMARY PHYSICIANS CARE INC. FOR THE PURPOSE OF PROVIDING ADMINISTRATIVE, DISEASE MANAGEMENT AND WELLNESS AND RELATED SERVICES FOR ELIGIBLE CITY EMPLOYEES, RETIREES AND THEIR DEPENDENTS

Summary: The consideration of a resolution authorizing the City Manager to enter into a Third Party Administrator agreement with Primary Physician Care, Inc., for the purpose of providing administrative, disease management and wellness and related services for eligible City Employees, retirees and their dependents.

A Benefits Committee, comprised of Human Resources, Health Services, Finance, Risk and line department representatives, was formed in 2004 to provide a balanced and broad overview of the health plan, wellness programs, and other benefits offered to City employees.

In January, 2006, the Benefits Committee began the process of looking for a third party administrator for the health plan. By March, the Committee had reviewed past performance of the health plan and made some initial determinations about what was needed from an administrator to continue and expand upon the City's nationally-recognized successes in cost control and improved employee health.

Working with Ferguson Employee Benefits Consultants, a detailed Request for Proposal (RFP) was developed and reviewed. By late April, the RFP was sent out to all companies providing these services that were registered in North Carolina and head-quartered in North Carolina or a contiguous state. In addition, the RFP was sent to the five largest TPA services providers. Forty-two companies received the RFP.

Fourteen companies' submitted responses, nineteen companies declined, and the remainder did not respond. Ferguson prepared cost comparison and service comparison matrices from the responses and in early July the Committee reviewed the submissions and narrowed the field to the top four candidates. The Committee considered rates for various services, disease management, large case management, wellness programs, and levels of customer service among other criteria.

The final four candidates were invited in for interviews and presentations during late July and early August, references were checked, and the Committee subsequently narrowed the field to three companies that were asked to shop stop-loss reinsurance for the program. The Committee reviewed all the responses in early September, considering both cost of services and the scope of services that would allow the City to continue and expand upon its nationally recognized disease management programs and its successful cost containment strategies, and by a unanimous vote selected Primary Physician Care to be the new Third Party Administrator.

Considerations:

- Primary Physician Care offers services that should enhance the City's successful health and wellness initiatives, provide data to evaluate the success of these initiatives, integrate the various aspects of the health care plan, reduce administrative burdens on the City, and provide excellent customer service to City employees, retirees and their

dependents, including a Customer Service Representative located in Asheville to service those needs.

- The comparative cost for the services needed was lowest among the finalists.

City staff recommends adoption of a resolution authorizing the City Manager to enter into a Third Part Administrator agreement with Primary Physician Care, Inc., for the purpose of providing administrative, disease management and wellness and related services for eligible City Employees, retirees and their dependents.

Upon inquiry of Councilman Mumpower, Chief Financial Officer Ben Durant explained the extensive open process the City used in looking for a third party administrator.

Councilman Mumpower moved for the adoption of Resolution No. 06-166. This motion was seconded by Vice-Mayor Jones and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 108

RESOLUTION NO. 06-168 - RESOLUTION AUTHORIZING NEGOTIATIONS WITH MOUNTAIN HOUSING OPPORTUNITIES AS THE QUALIFIED DEVELOPER FOR TWO PARCELS IN EAST RIVERSIDE AND REMARKETING OF TWO PARCELS IN EAST RIVERSIDE

Councilman Newman moved to excuse Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Freeborn and carried unanimously.

At this point, Mayor Bellamy turned the meeting over to Vice-Mayor Jones.

Summary: The consideration of a resolution authorizing negotiations with qualified developer for two parcels in East Riverside and remarketing of two parcels in East Riverside.

One Statement of Qualifications (SOQ) was received prior to the deadline for response to the East Riverside Request for Qualifications (RFQ). The SOQ was from Mountain Housing Opportunities and the Green Family. Of the four (4) parcels offered, the submittal pertained to two (2): Ralph Street and Choctaw Street. An additional response was received after the deadline that was determined not to be acceptable due to failure to comply with the deadline. The Request for Qualifications (RFQ) was issued for an exclusive right to negotiate a contract for private sale and redevelopment as provided in NCGS 160A-457.

The SOQ was reviewed by the Developer Selection Team on September 5, 2006, who determined that it was responsive to the RFQ and recommended acceptance to the Planning and Economic Development (PED) Committee of City Council. On September 13, 2006, the PED Committee accepted the recommendation of the Selection Team and referred the SOQ to City Council for acceptance of qualifications and authorization to initiate negotiations.

The SOQ describes the development team consisting of: MHO; the Green Family; Mathews Architecture, PA; Sitework Studios; Carolina Cornerstone Construction, Inc and Roberts & Stevens, Attorneys at Law. The project vision set forth in the SOQ includes, involving and respecting the existing community, providing home ownership opportunities, good design, affordability and environmental stewardship. The SOQ includes evidence of experience, financial capacity and insurance along a number of references.

Consideration: Approval of the resolution will authorize staff to initiate negotiations with MHO as the qualified developer for the parcels on Ralph Street and Choctaw and issue a new RFQ or RFP or advertise for bids with conditions for the parcels on Asheland Avenue and Old Asheland Avenue.

Economic Development staff recommends adoption of the resolution authorizing negotiations with qualified developer for two parcels in East Riverside and remarketing of two parcels in East Riverside.

Councilman Davis felt that even though we only had two responses and one late response, the MHO response was a good model.

Councilman Newman was excited about the proposal and encouraged people to get involved in the process. He also hoped that the City doesn't make the process so complicated so as to discourage people from getting involved.

In response to Councilman Mumpower, Real Estate Manager Ed Vess explained why he felt more developers did not submit proposals. He said that some developers had a lot of other projects going on and some developers felt this was not the kind of project they were interested in doing. The desired plan included clustered housing and maximizing the density and some developers were generally in the single-family type development. We also found that we just didn't provide them enough information on the front end, even though we thought we had conveyed to them it was available and could be provided to them. We do want to stay very public with this process and will be placing the MHO proposal on the internet for those to see what it takes to be a winning proposal. In addition, we will be noting the lessons learned in this process and how the City plans to do a better job.

In response to Councilman Mumpower about the criteria, Mr. Vess said that after City Council heard the City-owned property report, Council indicated to staff that there was a desire to make this property available for work force housing.

Councilman Freeborn moved for the adoption of Resolution No. 06-168. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no".

At this time, Vice-Mayor Jones turned the meeting back over to Mayor Bellamy.

RESOLUTION BOOK NO. 30 – PAGE 108

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED ON 2 IRIS STREET FROM COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY/CONDITIONAL ZONING FOR 84 RENTAL UNITS

Mayor Bellamy said that the developer has requested that this public hearing be continued until October 24, 2006, because of some last minute financial issues. Therefore, Councilman Davis moved to continue this public hearing until October 24, 2006. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Freeborn voting "no."

City Attorney Oast said that a valid protest pet'tion has been filed and that the petition will remain valid.

B. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED AT 7 GRANDVIEW PLACE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT AND COMMUNITY BUSINESS I DISTRICT TO COMMUNITY BUSINESS I DISTRICT/CONDITIONAL ZONING TO CORRECT A NON-CONFIRMING PARKING LOT

Mayor Bellamy said that this public hearing was originally scheduled for September 12, 2006, however, Mr. Steven Aceto, attorney representing the applicant Mr. Nicholas E. Papanastasiou and/or Pegasus Holdings, LLC, asked that the public hearing be continued since they would not be able to complete the required Letter of Credit in the form appropriate for submission to City Council. That public hearing continuance request was granted until September 26, 2006.

Mayor Bellamy opened the public hearing at 5:49 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance to conditionally zone property located at 7 Grandview Place from RS-8 Residential Single-Family High Density District and Community Business I District to Community Business I District/Conditional Zoning to correct a non-conforming parking lot. This public hearing was advertised on September 1 and 8, 2006.

In late 2000, the parking lot located to the south of the East Village Grill was constructed without permits and found to be in violation of the existing RS-8 residential zoning. To correct the violation, the property owner pursued a Conditional Use Permit for an "ancillary parking lot" in a residential district. This request was approved in March 2001; however, ancillary parking lots were later removed from the Unified Development Ordinance (UDO) as a Conditional Use (2002).

In September of 2004, the same property owner requested a rezoning of 4 lots located at Tunnel Road and Grandview Place. The existing restaurant use (East Village Grill + parking) was rezoned from Highway Business/RS-8 to Community Business I, and the adjacent American Legion building, along with a separate residential lot to the south, was rezoned from RS-8 to Community Business I. This request was approved in November of the same year. This rezoning corrected the non-conforming parking lot approved in 2001 and also provided the opportunity for the renovation of the American Legion building for a new business use.

Subsequent to the rezoning approval issued in November 2004, property owner Nick Papanastasiou submitted application for a level 1 site plan review for a new parking lot to be located at 2 Grandview Place and designed to support the newly established bakery housed in the former American Legion building. Site plans to develop this parking lot were approved in September of 2005.

Once construction of this parking lot was completed, staff was contacted to investigate a zoning violation that revealed the parking lot had been constructed to specifications larger than what had been approved, the new parking lot was found to be encroaching into residentially zoned property to the south of the site (7 Grandview Place), which had recently come under the ownership of the applicant. To bring this site into compliance would require either, (1) the partial demolition and reconstruction of the new parking lot, including a moderately sized retaining wall, or (2) rezoning of the portion of the residential property occupied by the non-residential use. The applicant has chosen to pursue a conditional zoning application to correct the violation. A Notice of Violation was issued on June 28, 2006; the applicant filed application to correct the violation before the expiration of the specified 30 day time period so no fines have been assessed at this time. The applicant is also seeking to secure a permanent Certificate of Occupancy (CO) which is being withheld at this time.

The parcel is located in the Asheville city limits with frontage on both Tunnel Road and on Grandview Place in East Asheville. The subject properties are the result of a lot recombination and total approximately .41 acres, of which approximately 2/3 of this lot is occupied by parking and 1/3 is occupied by the building.

The proposed project area is surrounded by other Community Business I zoned property to the east across Grandview Place which supports a separate parking lot that serves an adjacent restaurant use, RS-8 zoned property to the south supporting single family homes, and Highway

Business zoned property to the west supporting other larger commercial uses. Although the subject property has frontage on Tunnel Road, all vehicular access is from Grandview Place. A type 'B' landscape buffer is required between the low impact bakery use and the low density residential, as well as additional landscaping required for the parking area and street frontages.

As a result of the changes to the parking lot, the formerly approved plan is no longer valid and the site is now non-conforming for landscaping and stormwater. Landscaping may be made conforming through the application of alternative compliance and/or a lot recombination that could allow more room for the required buffer area. Additionally, the engineer for the project is currently working with the City's engineering staff to improve the stormwater issues.

The Technical Review Committee (TRC) reviewed this project at their July 17, 2006, public meeting and approved the project with conditions. A revised plan has been submitted addressing a number of those technical comments.

The Planning & Zoning Commission also reviewed this project at their August 2, 2006, public hearing where there was a moderate amount of deliberation over the history and circumstances of the violation. Ultimately, the Commission made a positive recommendation (7-0) that the project be approved with the following conditions: (1) Compliance with all technical review conditions; and (2) A performance bond in an amount to cover site landscaping and fencing must be submitted prior to City Council consideration.

Section 7-7-8(d)(2) of the UDO states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The site does present some topographical challenges that, when combined with the changes in the site plan, have contributed to some stormwater issues on site. The topography has been largely addressed with the construction of a moderately sized retaining wall and the engineer for the project has been working with the City's engineering staff on correcting the stormwater issue.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   This development is not expected to create a negative impact on adjacent property values; the proposed parking lot is required a 20' type B landscape buffer (or its equivalent) between it and the adjacent residential use which would mitigate light and noise. Changes in topography also contribute to the physical separation between the different uses, similar to what has occurred on the opposite side of Grandview Place.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

Mayor Bellamy said that this public hearing was originally scheduled for September 12, 2006, however, Mr. Steven Aceto, attorney representing the applicant Mr. Nicholas E. Papanastasiou and/or Pegasus Holdings, LLC, asked that the public hearing be continued since they would not be able to complete the required Letter of Credit in the form appropriate for submission to City Council. That public hearing continuance request was granted until September 26, 2006.

Mayor Bellamy opened the public hearing at 5:49 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance to conditionally zone property located at 7 Grandview Place from RS-8 Residential Single-Family High Density District and Community Business I District to Community Business I District/Conditional Zoning to correct a non-conforming parking lot. This public hearing was advertised on September 1 and 8, 2006.

In late 2000, the parking lot located to the south of the East Village Grill was constructed without permits and found to be in violation of the existing RS-8 residential zoning. To correct the violation, the property owner pursued a Conditional Use Permit for an "ancillary parking lot" in a residential district. This request was approved in March 2001; however, ancillary parking lots were later removed from the Unified Development Ordinance (UDO) as a Conditional Use (2002).

In September of 2004, the same property owner requested a rezoning of 4 lots located at Tunnel Road and Grandview Place. The existing restaurant use (East Village Grill + parking) was rezoned from Highway Business/RS-8 to Community Business I, and the adjacent American Legion building, along with a separate residential lot to the south, was rezoned from RS-8 to Community Business I. This request was approved in November of the same year. This rezoning corrected the non-conforming parking lot approved in 2001 and also provided the opportunity for the renovation of the American Legion building for a new business use.

Subsequent to the rezoning approval issued in November 2004, property owner Nick Papanastasiou submitted application for a level 1 site plan review for a new parking lot to be located at 2 Grandview Place and designed to support the newly established bakery housed in the former American Legion building. Site plans to develop this parking lot were approved in September of 2005.

Once construction of this parking lot was completed, staff was contacted to investigate a zoning violation that revealed the parking lot had been constructed to specifications larger than what had been approved; the new parking lot was found to be encroaching into residentially zoned property to the south of the site (7 Grandview Place), which had recently come under the ownership of the applicant. To bring this site into compliance would require either, (1) the partial demolition and reconstruction of the new parking lot, including a moderately sized retaining wall, or (2) rezoning of the portion of the residential property occupied by the non-residential use. The applicant has chosen to pursue a conditional zoning application to correct the violation. A Notice of Violation was issued on June 28, 2006; the applicant filed application to correct the violation before the expiration of the specified 30 day time period so no fines have been assessed at this time. The applicant is also seeking to secure a permanent Certificate of Occupancy (CO) which is being withheld at this time.

The parcel is located in the Asheville city limits with frontage on both Tunnel Road and on Grandview Place in East Asheville. The subject properties are the result of a lot recombination and total approximately .41 acres, of which approximately 2/3 of this lot is occupied by parking and 1/3 is occupied by the building.

The proposed project area is surrounded by other Community Business I zoned property to the east across Grandview Place which supports a separate parking lot that serves an adjacent restaurant use, RS-8 zoned property to the south supporting single family homes, and Highway

The proposed parking lot use is in character with the majority of surrounding land uses which are non-residential, along with the majority of the uses located along Tunnel Road. The parking lot itself is less compatible with the adjacent single family uses to the south of the site but will be buffered per the requirements of the UDO. Should the Planning & Zoning Commission find it necessary, additional conditions may be considered to further improve the compatibility of this project.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The Asheville City Development Plan 2025 encourages the (re)development of vacant or underutilized properties with compatible uses that provide citizens the opportunity to live and work in the same area. This rezoning request is to provide opportunity for the redevelopment of a parking lot that would support the adaptive re-use and renovation of an old American Legion building into a new bakery.

The ACDP 2025 also calls for the protection, preservation, and enhancement of existing neighborhoods. The unapproved parking lot expansion could be viewed as encroachment into a residential neighborhood that is unnecessary for a limited business use, particularly when shared parking opportunities exist.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The subject property is well positioned in respect to transportation facilities with easy access to major thoroughfares and a regular bus line operating on Tunnel Road. The project has also been reviewed by the TRC which did not indicate any problems with providing service to the property.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project has been reviewed by the City's traffic engineering office who determined that the project would not cause undue traffic congestion or create a traffic hazard due to the relatively modest scale of the project. In addition, the project is proposing the creation of additional off-street parking that is expected to meet the needs of the visitors, thereby reducing the likelihood for on-street parking.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Shared parking opportunities exist that could reduce the need for the additional spaces created by the illegal expansion.
- A portion of the parking lot (including the retaining wall) could be removed and rebuilt to result in a conforming parking lot.
- A minimum of 15 spaces are required, a maximum of 22 spaces are allowed. The former approved plan accommodated 17 spaces, the as-built plan shows 22 spaces.
- Existing illegal parking lot is currently inadequately buffered. Alternative compliance and/or a lot recombination would be required.
- Residential lot and structure would have to remain conforming if request was granted.
- Approval of this request would correct the existing violation.

The parking lot work and resulting violation have already occurred; had the applicant come forward with this proposal initially, staff would have supported the request with conditions. Should the Council consider this request, staff would recommend the conditions below: (1) The

project shall comply with all applicable technical standards; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with full cut-off fixtures and directed away from adjoining properties and streets; (3) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department; and (4) A lot recombination shall be completed to allow for a conforming buffer; recommend against alternative compliance.

The bakery is currently operating a Temporary Certificate of Occupancy (TCO) and should this request be denied, the applicant will have to renew the TCO and will have to submit revised plans that would address the zoning violation as well as the stormwater violation, so there is potential for that TCO not being renewed in a timely fashion.

Mr. Steven Aceto, attorney representing the applicant Mr. Nicholas E. Papanastasiou and/or Pegasus Holdings, LLC, spoke in support of the conditional zoning noting that the applicant has posted a bond to make sure that all improvements are complete.

Mayor Bellamy closed the public hearing at 5:56 p.m.

In response to Councilman Newman, Mr. Dennis Ponder, engineer for the applicant, said that the owner was acting as his own contractor and made a field decision, now realizing it was an unfortunate one. He explained why the owner tried to keep the parking lot away from the lower masonry wall. He said that the owner thought that since he owned the property in the area of encroachment, he could move the parking lot over slightly. In the field, it was hard to determine where the corners are located, without an accurate survey, which now had been performed.

Upon inquiry of Councilman Newman, Ms. Tuch explained that the East Village Grill, owned by the same property owner, had a similar incident regarding their parking lot.

Councilman Newman moved to deny the conditional zoning request. He could not support rewarding developers who do not comply with our ordinances. He would, however, support the bakery continuing to operate while the property is brought into compliance. This motion was seconded by Councilman Freeborn.

Councilman Mumpower felt that sometimes people don't understand our ordinances, but for this to happen twice to the same person is unfortunate. The owner should have learned from his first error and proceeded with caution. However, this represents a fairly minimal intrusion on that neighborhood and he does own the property being intruded on. He asked if staff could work with the developer to address the concerns and explore ways to fix this without causing a catastrophic impact.

Ms. Tuch showed the original plan approved in 2005 which accommodated 17 spaces and then the as-built plan which shows 22 parking spaces.

In response to Councilman Mumpower, Mr. Aceto noted that when the plan was approved, it said 15-22 spaces.

Discussion surrounded options to bring the parking lot into compliance and how the stormwater issue is related to this site.

Councilwoman Cape can understand how this happened but we often have a sense that people are ignoring the process. She would like for Council to consider what policy options are available for us, even to the point of a fine per day for being out of compliance. Sometimes consequences are the things that make people think twice about their actions. She wondered if there are factors that could be added in to the benefit of this neighborhood.

Councilman Mumpower felt that fines represent a heavy, authoritative and punitive approach that he would speak against.

Councilman Newman withdrew his motion to explore if there are other ways to get at a solution for this.

Vice-Mayor Jones noted that not only is there a cost for the developer for a solution, there is a cost to our City taxpayers as well which consists of staff hours involved.

Mayor Bellamy felt that we need to adopt good policies so when something is done wrong, there are penalties. However, we need to make sure that our zoning ordinances are clear and understandable.

Councilman Mumpower moved to continue this matter until October 10, 2006. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Freeborn voting "no."

C. **PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL USE PERMIT MASTER PLAN FOR INGLES ON HENDERSONVILLE ROAD FOR ALLOWANCE OF A THIRD DRIVEWAY TO ACCESS AN OUT-PARCEL TYPE USE OF A GAS STATION**

Mayor Bellamy said that City staff has requested this public hearing be continued to October 10, 2006, as the petitioner was unable to make adjustments to the site plan in enough time to have City staff review them. Therefore, Councilman Mumpower moved to continue the public hearing until October 10, 2006. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Freeborn voting "no."

D. **PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF 430 MCDOWELL STREET IN ORDER TO MAINTAIN THE EXISTING INSTITUTIONAL/CONDITIONAL ZONING ON APPROXIMATELY .81 ACRE IN ORDER TO UTILIZE THE EXISTING BUILDING FOR A DAYCARE FACILITY**

ORDINANCE NO. 3393 - ORDINANCE CONDITIONAL ZONING PROPERTY LOCATED AT 430 MCDOWELL STREET IN ORDER TO MAINTAIN THE EXISTING INSTITUTIONAL/CONDITIONAL ZONING ON APPROXIMATELY .81 ACRE IN ORDER TO UTILIZE THE EXISTING BUILDING FOR A DAYCARE FACILITY

Mayor Bellamy opened the public hearing at 6:39 p.m.

Urban Planner Kim Hamel said that this is the consideration of an ordinance to conditionally zone property located at 430 McDowell Street in order to maintain the existing Institutional/Conditional Zoning on approximately .81 acre in order to utilize the existing building for a daycare facility. This public hearing was advertised on September 15 and 22, 2006.

Ms. Hamel said that the subject property is located off of McDowell Street across from Asheville High School. The parcel, in its current configuration, is considered both a through lot and a corner lot with street frontages on McDowell Street, Grindstaff Road and St. Dunstans Road. The topography is steeply sloped from the top of the property towards the west (McDowell Street). The property currently houses a vacant building that was historically used as a daycare Center. Access to the site and parking area is located off of Grindstaff Road.

In April 2006, the Asheville City Council approved a Conditional Zoning request to rezone a portion of this property from RS-8 to Institutional/Conditional Zoning with approval to establish

an office use. The residual portion of the lot fronting St. Dunstans Road remained RS-8 and is to be subdivided into two or three residential parcels. The applicant, Mr. Dan Waldman, is now requesting approval to maintain the Institutional District/Conditional Zoning and to also receive approval to change the proposed use of the building from an office use to a child daycare center.

Surrounding land uses and zoning include the Asheville High School zoned Institutional to the west across McDowell Street; retail business zoned Institutional and a single-family dwelling zoned RS-8 to the north across Grindstaff Road; single family dwellings zoned RS-8 to the east; and vacant property owned by NCDOT zoned RS-8 to the south fronting McDowell Street.

The new conceptual site plan proposes an up-fit of the existing 3, 700 square foot building for the proposed child daycare facility that will provide service for up to 50 children and 4 employees. The site plan illustrates use of the existing parking area off of Grindstaff Road that consists of 7 spaces. Modifications to the existing drive entrance and parking area will be necessary in order to comply with several conditions required by the Technical Review Committee including required driveway widths, parking lot maneuvering and pedestrian connections from the building to the street.

The ordinance requires a 20-foot, Type B landscape buffer around the east and south sides of the property where adjacent to residential uses. The plan is meeting this requirement, except along the eastern side and portions of the south side of the property where the buffer width has been reduced to install a privacy fence and other plantings; the ordinance permits a fence to be installed to reduce buffer width and that is what is proposed in this case. The mature vegetation shown along the west and north sides of the property will be maintained and credited towards the street tree requirements.

On Monday, August 21, 2006, the Technical Review Committee (TRC) approved the project subject to the conditions outlined in the staff report. The majority of these conditions will be addressed in a more detailed review of the project by the TRC pending approval from City Council.

The applicant is requesting a modification of Section 7-8-15(f)(9) of the Unified Development Ordinance (UDO) that prohibits parking to be located within the setbacks. The conceptual site plan shows a 2-3-foot encroachment of two parking spaces into the side setback (10-feet) along the eastern side of the project. This project proposes use of the existing parking area in order to avoid additional grading on the western slope and to avoid land disturbance that could affect the mature vegetation along the property line. Although staff agrees with this reasoning, the applicant does have an option that would eliminate the need for the variance. This option involves increasing the width of the proposed modification area along the west side of the parking lot (that was required by the TRC for additional maneuvering room) by an additional 3-feet. This, however, could result in the need for construction of a larger and more visible retaining wall in order to stabilize the slope from the disturbance around the parking area.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Section 7-7-8(d)(2) of the UDO states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed project has been reviewed by the Technical Review Committee and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the

Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The overall development and disturbance on the property will be minimal, as the applicant is only proposing modifications to the existing parking area. The amount of disturbance in this area is necessary in order to provide for additional maneuvering area within the parking lot and to also provide a pedestrian connection from the building to the street. Since there is a rather steep slope from the parking area towards McDowell Street, the disturbance will necessitate a retaining wall to stabilize the parking lot. The only other land disturbing activity associated with the project will be the construction of the sidewalk along McDowell Street, and the installation of the privacy fence and other landscape buffer materials. Any renovation needed to bring the current structure up to code will be confined to the interior of the structure.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** This property was historically used as child daycare facility but was considered a non-conforming use under the prior RS-8 zoning classification. A child daycare facility is a permitted "low impact" use in the proposed Institutional District. The project is not expected to injure the value of adjoining or abutting properties as the site will be enhanced through the installation of privacy fencing and landscape buffers where adjacent to residential uses. This will assist in mitigating any potential negative impacts.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** This project proposes a rezoning only on the portion of the lot that is currently developed. The daycare facility will utilize the existing building, parking lot and play area on the site. The remaining portion of the property will remain RS-8 and be subdivided from the main tract in order to create two to three residential infill lots that will be located and have access off of St. Dunstans Road.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The project is supported by several goals and strategies in the plan relating to adaptive reuse, infill development, and smart growth policies. The project supports pursuit of compatible redevelopment and adaptive reuse of an existing structure with a low impact use. Traditional neighborhood development patterns are also recognized through the creation of several residential infill lots located within the core of the neighborhood.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** This project site is located within the City Limits and has access to all City services including water, fire and police protection and waste disposal. The project site is located on McDowell Street that is serviced by public transportation, including a transit stop located on the corner of McDowell Street and Grindstaff Road.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** This project has been reviewed by the City's Traffic Engineer who indicated that the proposed use would not cause undue traffic congestion or create a traffic hazard.

Considerations:

- The former use of the building as a daycare center was considered a non-conforming use under the previous RS-8 zoning and has been used commercially since 1956. Previous commercial up-fits to the building make it an unlikely candidate for the use to convert back to residential. A rezoning to Institutional district will allow a conforming use to occupy the lot.
- The proposed split zoning on the lot and creation of several residential parcels off of St. Dunstans Road assists in protecting the integrity of the neighborhood by preventing access to the commercial portion of the existing parcel; and adds to the character of the neighborhood by creating additional single-family infill lots.
- Adaptive reuse of an existing structure.
- The conditional zoning process allows neighbors an opportunity to have a clear idea of how the property will be used.
- Additional traffic may occur along St. Dunstans Road in order to utilize the traffic signal at the corner of St. Dunstans Road and McDowell Street.
- The rezoning could be viewed by some as an encroachment of nonresidential uses into a residential area.

On Wednesday, September 6, 2006, the Planning and Zoning Commission reviewed the conditional zoning request and the request for modification to the setback encroachment and voted unanimously to approve the conditional zoning request subject to the TRC staff report, staff's recommended conditions and the following condition: A sidewalk shall be provided in accordance with the requirements of the City of Asheville Engineering Department with consideration given to a physical barrier affording reasonable protection to pedestrians on the McDowell Street side.

Subsequent to the meeting, the applicant contacted the Engineering Department in an effort to determine if a safety railing would satisfy the P&Z condition noted above. Engineering staff determined that in order to install a safety railing the applicant would need a total of 6-feet in width; the plan currently calls for a 4-foot wide sidewalk in this area in an effort to avoid blasting. The only means of gaining the additional 2-feet in width would be to blast through the rock outcropping that is being avoided. Staff feels that the applicant has made a good faith attempt in trying to provide a physical barrier for pedestrian safety. It, however, does not appear that without significant blasting of rock that this condition can reasonably be achieved.

Staff recommends approval of the project subject to the conditions outlined in the staff report and with the following conditions: (1) That all site lighting be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and that a lighting plan be submitted to the City for approval; (2) All existing vegetation to be preserved and credited towards the landscape requirements be clearly dimensioned and delineated on the plans; (3) Foundation plantings shall be installed along the proposed retaining wall in order to soften the visual appearance of the structure from the street; (4) Applicant shall complete the subdivision of the land within 60 days of City Council approval; and (5) The applicant shall return to the Technical Review Committee with detailed site plans for review of compliance with all conditions.

Mr. Gerald Green, representing the developers, spoke in support of the conditional zoning.

Mayor Bellamy closed the public hearing at 6:48 p.m.

Vice-Mayor Jones encouraged the developer to consult with the N.C. Child Care Division to make sure that Council doesn't have to revisit the Master Plan. She also encouraged them to be open to children who are supported by the voucher system. Mr. Ricky Graham, co-owner of the Academy of Asheville, responded that they do understand the process as they have opened multiple daycare centers and have a lot of experience in this area.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3393, to conditionally zone property located on located at 430 McDowell Street to maintain the existing Institutional/Conditional Zoning on approximately .81 acre in order to utilize the existing building for a daycare facility, noting that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation, subject to the following conditions: (1) all conditions being met in the TRC staff report; (2) That all site lighting be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and that a lighting plan be submitted to the City for approval; (3) All existing vegetation to be preserved and credited towards the landscape requirements be clearly dimensioned and delineated on the plans; (4) Foundation plantings shall be installed along the proposed retaining wall in order to soften the visual appearance of the structure from the street; (5) Applicant shall complete the subdivision of the land within 60 days of City Council approval; and (6) 5. The applicant shall return to the Technical Review Committee with detailed site plans for review of compliance with all conditions. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 23 – PAGE 96

At 6:59 p.m., Mayor Bellamy announced a short recess.

E. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ALLOW CELL TOWERS IN RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT AS A CONDITIONAL USE AND TO AMEND THE CONDITIONAL USE STANDARDS

Mayor Bellamy opened the public hearing at 7:22 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to allow cell towers in RM-16 Residential Multi-Family High Density District as a conditional use and to amend the conditional use standards. This public hearing was advertised on September 15 and 22, 2006.

The UDO currently allows telecommunication towers as a Conditional Use in a number of non-residential districts including: Office/Business; Community Business II; Resort; Institutional; Highway Business; Regional Business; Commercial Industrial; River; Industrial; and Light Industrial.

Additionally, telecommunication towers can be considered as a conditional use in residentially zoned property that is occupied by non-residential uses such as libraries, fire/police stations, community centers, schools, and public housing developments. The "conditions" of the Conditional Use Permit are extensive and deal largely with the unique technical features of a telecommunication tower and the support documentation needed to limit their unnecessary proliferation.

As the demand for cellular service increases in the Asheville area, so does the need for more complete coverage. Providing an additional district in which a tower may be located enhances the ability for a service provider to appropriately locate in the most optimal area for complete coverage, while limiting unnecessary overlap.

This amendment would add an additional condition for towers located in residential districts to blend in with the natural environment through placement and disguise; although towers could be located within a residential area, this condition does specify a minimum separation from residential uses and adjacent properties in order to maintain a separation of uses. In addition, the

Conditional Use process allows for the site specific review of the ability for an application to address compatibility concerns.

The Planning & Zoning Commission reviewed the proposed amendment at their meeting on September 6, 2006. During the meeting, staff recommended adding a condition that a minimum lot size of 5 acres be required for all proposed sites in the RM-16 zoning district. The Commission voted to approve the amendment (6-1) with the added condition.

Considerations:

- This amendment increases the amount of real estate that could be considered for the development of a telecommunication tower.
- This amendment improves the ability for towers to be more evenly distributed throughout a service area.
- This amendment could be considered to reduce the injustice of permitting towers in areas of low income housing while prohibiting them in other residential developments.
- Compatibility of a telecommunication tower in a residential area could prove challenging.

City staff recommends approval of an ordinance amending Chapter 7 of the Code of Ordinances of the City of Asheville to add telecommunications towers as a conditional use in the RM-16 Residential Multi-Family High Density District and to amend the conditional use standards.

Mr. Bill Ammon, employee with Chase Real Estate Services, spoke in support of the text amendment and said that by the time you get to the conditional use permit, the carrier has really exhausted in most cases every opportunity for an alternative to a new structure, that would include church steeples, water towers, etc. The conditional use process has built within it a list of safeguards and the specific text amendment goes beyond that and has additional criteria that will ensure that if a tower is constructed, it would be appropriate for the site.

Mayor Bellamy closed the public hearing at 7:30 p.m.

Ms. Tuch responded to various questions/comments from Council, some being, but are not limited to: was this text amendment in the process prior to an application being filed; was there anything in particular that brought forth this text amendment; are there any maps showing where the gaps are located in the City; why did we choose RM-16 as the zoning district; explanation of the conditional use process for cell towers; can you build something else on the property with a cell tower; do cell phone companies buy land or lease it; have there been any amendment to the cell tower provisions since adoption of the UDO; why can't we have cell towers in all districts as a conditional use permit process; what is the rationale for the 100-foot buffer if they are allowed on church steeples, etc.; and is it inappropriate to put a structure on a residential building opposed to a commercial, office or institutional building.

Vice-Mayor Jones was concerned of losing potential developable land for multi-family housing and urged City staff to work with the companies to make it possible for housing to also be developed on that property.

Councilman Mumpower felt that the technology has improved so vastly and many more people rely on cell phones.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved to adopt the ordinance amending the UDO to allow cell towers in RM-16 Residential Multi-Family High Density District as a conditional use and to amend the conditional use standards. This motion was seconded by Councilman Davis.

Councilman Davis said that with the new technology, including the stealth technology, there is not so much opposition to cell towers and there is still the opportunity of building on the property. In addition, this is a conditional use permit process and Council will have the opportunity to craft any other conditions.

Councilman Newman wondered dif there was a way to be more proactive about this approach to this changing technology, like looking at the places in the community where we know there are gaps in coverage. The goal is we want good quality and as few cell towers built in our community as possible. Ms. Tuch responded that is a good idea and a very big project. We have been trying to put that responsibility on the applicant to do that research and demonstrate to us that they are filling in one of those gaps.

City Attorney Oast said that the providers are frequently in contact through our Real Estate Manager to try to identify appropriate sites for these facilities and we have a number of cell phone antennas co-located on towers that we operate and maintain.

Mayor Bellamy was not convinced that this is the best use for our RM-16 zoning. She was concerned that public housing is not considered a residentially zoned place and asked for staff to review our ordinances to make sure that change is made.

The motion made by Councilman Mumpower and seconded by Councilman Davis failed on a 3-4 vote, with Councilman Davis, Councilman Mumpower and Councilman Newman voting "yes" and Mayor Bellamy, Vice-Mayor Jones, Councilwoman Cape and Councilman Freeborn voting "no."

F. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ADD TOWNHOUSES AS A USE BY RIGHT, SUBJECT TO SPECIAL REQUIREMENTS IN THE URBAN RESIDENTIAL ZONING DISTRICT AND TO AMEND THE TOWNHOUSE STANDARDS

ORDINANCE NO. 3394- ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO ADD TOWNHOUSES AS A USE BY RIGHT, SUBJECT TO SPECIAL REQUIREMENTS IN THE URBAN RESIDENTIAL ZONING DISTRICT AND TO AMEND THE TOWNHOUSE STANDARDS

Mayor Bellamy opened the public hearing at 7:57 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an amendment to the Unified Development Ordinance to add townhouses as a use by right, subject to special requirements (USSR), in the Urban Residential Zoning District and to amend the townhouse standards. This public hearing was advertised on September 15 and 22, 2006.

The City of Asheville's Unified Development Ordinance (UDO) currently defines "townhouses" as: "*Dwellings, townhouse* means two or more single-family dwelling units having a common wall or zero setback separating units where land underneath each dwelling unit is sold with that unit."

Townhouses are permitted as a USSR in several residential districts including: RM-6, RM-8, RM-16, Office, Office II, Office/Business, Community Business II, Resort, Highway Business, Central Business, Regional Business, Commercial Industrial and provide opportunity for home and real estate ownership in areas appropriately located to existing infrastructure, transportation, employment, and goods and services. Townhouses can also be used to provide a more affordable housing product where building materials and other resources are shared in order to keep costs down. This amendment increases the variety of housing options that would

be available in the Urban Residential zoning district, while allowing for the efficient use of real estate to increase the total number of units allowed under the current density requirements.

Unlike condominiums, townhouses exist on individual lots and require a subdivision review to ensure that the lots comply with the City's subdivision and USSR standards. Currently, the special requirements of townhouses allows for flexibility in setbacks and waives minimum lot sizes provided that some amount of undeveloped (green) space is kept in common ownership to keep the overall density compliant.

This amendment would still require that density be met in the same manner but allows townhouse developments in the higher density districts to use commonly owned property for purposes other than undeveloped green space. Particularly in urban areas where high density is desired and space is limited, the ability to use commonly owned property for other features such as swimming pools, clubhouses, and parking areas would afford developers more flexibility and opportunity to optimally develop the site. It also allows for distinction between individually owned lots and property that may be maintained by a homeowner's association. Providing undeveloped green space would still remain an option to meet density requirements in an Urban Residential townhouse development.

The Planning & Zoning Commission reviewed this amendment at their September 6, 2006, public hearing where the amendment was approved unanimously.

Considerations:

- This amendment increases the variety of housing types allowed in the Urban Residential zoning district.
- This amendment provides opportunity for the construction of a more affordable housing option in urban areas appropriately located for access to infrastructure, transportation, employment, and a variety of goods and services.
- This amendment encourages maximizing the development options of a site while providing flexibility for more sensitive design.
- This amendment requires the preservation of undeveloped open space in the lower density residential district (RM-6).
- An amendment to the City of Asheville's Open Space requirements (not yet adopted) would allow for open space requirements to be met through other means.

City staff recommends approval of an ordinance amending Chapter 7 of the Code of Ordinances of the City of Asheville to amend the townhouse standards and to add townhouses as a use by right, subject to special requirements in the Urban Residential Zoning District.

Mayor Bellamy closed the public hearing at 7:58 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3394. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 – PAGE 101

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 06-171 - RESOLUTION ESTABLISHING THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY AND THE ENVIRONMENT

Councilwoman Cape explained that she reviewed this proposed resolution at the September 19, 2006, worksession and recommended adoption of the resolution establishing a committee to be known as the Sustainable Advisory Committee on Energy & the Environment.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower felt we didn't need another layer of bureaucracy to serve as a filtering agent when it comes to energy and the environment and it should be a component of all of our decisions. He felt we have adequate representation by City staff and others to cover these areas. He was also concerned about abuse. He was pleased to see Councilwoman Cape take the leadership on this issue and creating new initiatives, but this is not one he could support.

Councilman Davis agreed with Councilman Mumpower in that we are creating another layer of bureaucracy that we really don't need.

Vice-Mayor Jones felt that this is an act of leadership to take our community to a place we need to go. We are a long way off from reaching our goals, but are excited that our community has this type of vision.

Councilwoman Cape felt that our community has been going in this direction for a long time and part of being a good leader is being receptive and attentive to that.

Mayor Bellamy believed we are moving in the right direction, but stressed that this is an advisory committee and their recommendations will not be automatic. She said that City Council sets policy direction for the community, not committees.

Councilman Newman moved for the adoption of Resolution No. 06-171. This motion was seconded by Vice-Mayor Jones and carried on a 5-2 vote, with Councilman Davis and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 111

B. RESOLUTION NO. 06-172 - RESOLUTION REQUESTING SUPPORT OF LOCAL MENTAL HEALTH AND SUBSTANCE ABUSE ISSUES

City Attorney Oast said that this is the consideration of a resolution requesting support of local mental health and substance abuse services.

This resolution grows out of the report received at Council's worksession of September 19, 2006, from Buncombe County, regarding the Crisis Stabilization Facility, and is also in response to the closing of a local facility providing substance abuse and mental health services to economically marginalized individuals.

The City of Asheville and Buncombe County are experiencing an increase in the need for services and facilities to assist persons, especially low income persons, who suffer from mental health and substance abuse problems. Existing facilities and services are being affected by closings and reductions in funding. The Governmental Affairs Task Force of the Asheville Chamber of Commerce identified support of mental health reform as a State legislative priority for the area for 2006. The need for such support has recently grown more acute, especially within the City of Asheville, which is the center for mental health and substance abuse services in Buncombe County and the region. The City Council hereby supports local mental health and

substance abuse facilities and services in Asheville and Buncombe County, through funding and other means, is urgently needed, and action to provide such support is strongly encouraged. The City Clerk is directed to transmit a copy of the resolution to each member of the North Carolina General Assembly whose district includes the City of Asheville.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

At the request of Vice-Mayor Jones and the consensus of City Council, City Attorney Oast said that he would amend the resolution to include that the City Clerk be directed to also transmit a copy of the resolution to our United States Congressional representatives, including our two Senators and Congressman Taylor.

Councilwoman Cape moved for the adoption of Resolution No. 06-172, as amended pursuant to the City Attorney. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 113

C. RESOLUTION NO. 06-173 - RESOLUTION AUTHORIZING THE CHANGE IN SCHEDULE I OF THE FEES AND CHARGES OF THE WATER FUND TO REFLECT CHANGES IN THE CAPITAL IMPROVEMENT PROGRAM FEE FOR SINGLE-FAMILY RESIDENTIAL WATER CUSTOMERS

Water Resources Director David Hanks said that this is the consideration of a resolution authorizing the change in Schedule I Fees and charges of the Water Fund to reflect changes in the capital improvement program fee for single family residential water rate customers (SFR).

City Council at its September 19, 2006, worksession directed staff to change the CIP fee structure for single family residential customers from its current meter size base rate a more equitable cost structure for this customer class.

The CIP fee rate structure was established using a meter size basis for the monthly charges. Most single family residential customers have a 5/8 inch meter. Approximately 150 single family residential (SFR) customers have larger domestic meters from one (1) inch to two (2) inch with significantly higher monthly fees. The monthly fee structure for one (1) inch meter is $48.00; one and one-half (1.5) inch meter is $80.00; two (2) inch meter is $140.00. The fee structure was established to help reduce the water utility cost on SFR customers and this small group of customers is paying much more than the average SFR customer. Staff presented Council with options to reduce the fee to either $5.00 per month (1 inch meter SFR customer); $6.00 per month (1.5 inch meter SFR customer); and $7.00 per month (2 inch meter SFR customer); or all residential customers paying the same monthly fee of $3.50.

PRO:

- A reduced meter fee for SFR customers is fair and equitable based upon the current tiered rate structure where SFR customers pay more than other classes of customers for consumed water.

CON:

- Each meter reduction scenario decreases water fund revenue. A flat fee of $3.50 per month has an $80,000 annual revenue impact. The reduced fee structure has a $77,000 annual revenue impact on the water fund.

City staff recommends adoption of the resolution authorizing the change in Schedule I Fees and Charges of the Water Fund to reflect changes in the capital improvement program fee for single family residential water rate customers.

City Manager Jackson said that in addition to this adjustment to the residential rate structure, City staff will be providing City Council with a response back from the Chief Financial Officer at the October worksession wherein he will provide more specific recommendations on how to use debt financing to apply toward alternative rate structures and establishing a capital reserve and provide for potential off-setting future rate increases as well.

In response to Councilwoman Cape's inquiry about the condo association issues, Mr. Hanks said that we have been working with the various condo associations in the area. Some are going to a combination meter, where they will be paying the fee scheduled based on the smaller size not only for water but for sewer. This actually a tremendous reduction in fees they will be paying, based on the number of units in those condos. Those that didn't want to go that route were offered a contract where they are actually treated as single-family residential customers paying the $3.50 per unit.

City Manager Jackson said that this is an adjustment for residential accounts only. A condominium is not a residence with one customer, but it is a grouping under one billing structure.

Mr. Hanks said that we have condo associations from as few as 32 units to close to 200 units. Basically we offered up the same thing to all of them. Some have some really old meters that do not meet the current state requirement for back flow and cross connection so they were going to have to look at replacing their meters anyway. This was just an opportune time for them to do it and save money on their return on investment. Most of them will have a savings of approximately $1,200-$1,400 a year based on the reduced sewer charges and the CIP for water.

At the request of Mayor Bellamy, City Manager Jackson said that he would provide Council with information on how many residences are not served directly by the City because we sell water to condo associations, apartment complexes, mobile home parks, etc. He felt it would also be helpful for Council to receive background information about the complexities and difficulties in establishing that relationship with condo associations, apartment complexes and mobile home parks. The action today is making adjustments to where we have a direct contractual account with the residents.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 06-173. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 114

VI. OTHER BUSINESS:

Councilwoman Cape encouraged the community to participate in the Energy Star Change a Light bulb, Change the World Campaign.

Mayor Bellamy encouraged citizens to attend the N.C. Dept. of Transportation public hearings on October 9 and 10, 2006, to learn about the I-26 Connector.

Councilwoman Cape announced the first meeting of the Community & Economic Development Alliance and was excited about seeing plans begin to move forward with the inclusion of the public.

The following claims were received by the City of Asheville during the period of September 1-14, 2006: LaRhonda Moss (Parks & Recreation), William E. Smith (Transit

Services), Joyce Swann (Water), Frances B. Taylor (Water), Mary Frances Miller (Water), Arribelle Bolden (Streets), Michael Caldwell (Water), William Anixter (Water) and BellSouth (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton was of the opinion that we must stop supporting a culture which encourages our children to deny the truth that we are one and teach spiritual education.

Mr. Jeff Sheppard spoke to Council about his concern over the crime and violence he has experienced.

Ms. Liz Oldre asked for Council's consideration of allowing BMX bikes on the Food Lion Skate Park. She cited many cities/counties skate parks that allow BMX bikes, many of which are concrete. She asked that they be allowed to use the Skate Park at designated times and dates. Mayor Bellamy referred this request to City Manager Jackson and the Recreation Board and asked for the recommendations to be brought back to Council.

Mr. Chris Johnson, owner of a small mobile home park, spoke about the 140% increase in his water bill from the water CIP fee. After a brief discussion, City Manager Jackson said that he will be reporting back to Council at the October worksession with some details outlining what Mr. Yalson is experiencing and relate that to how other multi-family and multi-residential locations are affected by the CIP fee. He will share with Council an analysis on how the City is working with various different accounts and lay out for them what, if any, other practices there are in the State of North Carolina for treating those types of customers. He said we will present Council with alternatives and seek direction.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:37 p.m.

Kristina Lipe
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday – October 10, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Ms. Susan Lifchez' 4th Grade Class from Ira B. Jones Elementary School led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Mumpower gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING OCTOBER 24, 2006, AS "ACUPUNCTURE AND ORIENTAL MEDICINE DAY"

Councilman Newman read the proclamation proclaiming October 24, 2006, as "Acupuncture and Oriental Medicine Day" in the City of Asheville. He presented the proclamation to Ms. Beth Anne Grant, Operations Manager for Atlantic University of Chinese Medicine, who briefed City Council on some activities taking place during the day.

II. CONSENT AGENDA:

At the request of City staff, Consent Agenda Items "G" and "H" were pulled from the Consent Agenda until a later date.

At the request of Councilman Mumpower, Consent Agenda Items "B", "D" and "F" were removed from the consent agenda for individual discussions.

At the request of Mayor Bellamy, Consent Agenda Items "K" and "L" were removed from the Consent Agenda for individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 26, 2006

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A LEASE WITH THE UNITED STATES OF AMERICA FOR THE ARMY RESERVE CENTER LOCATED AT 224 LOUISIANA AVENUE

This item was pulled from the Consent Agenda for individual discussion.

C. RESOLUTION NO. 06-175 - RESOLUTION AUTHORIZING THE MAYOR TO EXCHANGE A PORTION OF REAL PROPERTY LOCATED ON 749 FAIRVIEW ROAD FOR A PORTION OF REAL PROPERTY LOCATED AT 723 FAIRVIEW ROAD

Summary: The consideration of a resolution authorizing the exchange of a portion of real property located at 749 Fairview Road for a portion of real property located at 723 Fairview Road.

The City and Dan Zorn, principal of Famprop LLC (Famprop), have negotiated an exchange of a portion of City owned real property at 749 Fairview Road for a portion of property Famprop is purchasing at 723 Fairview Road.

The proposed exchange is to correct a long standing encroachment and provide a more consistent property line between the City's property and the Famprop property.

The City's property (PIN 9657.97-58-1784) is on the south side of Fairview Road at its intersection with Liberty Street, zoned RS8 Residential Single-Family High Density District and improved with a Fire Station, Public Library and Community Center. The portion to be exchanged is a 0.12 acre± parcel at Fairview Road on the west side of the City's parcel as it adjoins the Famprop property. This part of the property is on the outside of the City's fence and has never been utilized by the City. It is this portion of the property where one of the buildings on the Famprop property has encroached for a number of years.

The property being purchased by Famprop (PINs 9657.07-58-0712; 0682) on Fairview Road is on the south side of the street about 315' west of its intersection with Liberty Street. It is zoned RS8 Residential Single-Family High Density District and is improved with a large residential structure. The portion to be exchanged is a 0.12 acre± parcel located at the rear of the property adjoining the City's property.

A review of the tax assessments for the properties indicate broad variations between per acre values of parcels in the area that would be attributed to the size differential between parcels. Comparable lot values range from 21,500 for 0.16 acre to 27,400 for 0.42 acre. The values of the parcels to be exchanged are estimated to be roughly equal based on shared characteristics including location, size, shape and topography. The value for each exchange parcel is estimated to be about $20,000± each for 0.12 acre.

Pros:

1. The exchange will be a fair exchange of value for value.
2. It will be revenue neutral returning property to the tax rolls in exchange for property being taken off the tax rolls.
3. It will correct the long standing structural encroachment.
4. It will provide a better more consistent property line.

Cons: There are no negative aspects to this proposal.

Economic Development, Fire Department and Parks & Recreation staff recommends adoption of the resolution authorizing the exchange of a portion of City owned real property located at 749 Fairview Road for a portion of real property located at 723 Fairview Road.

RESOLUTION BOOK NO. 30 – PAGE 116

D. RESOLUTION FOR INTERNATIONAL COUNCIL FOR LOCAL ENVIRONMENT INITIATIVES (ICLEI) AND CITIES FOR CLIMATE PROTECTION CAMPAIGN PARTICIPATION

This item was pulled from the Consent Agenda for individual discussion.

E. RESOLUTION NO. 06-177 - RESOLUTION AUTHORIZING PINES PROPERTIES INC. TO CONVEY PROPERTY LOCATED AT 128 MCENTIRE

ROAD IN RUTHERFORDTON, N.C., TO BRAD FORD IN THE AMOUNT OF $398,800

Summary: The consideration of a resolution authorizing Pines Properties, Inc. to convey 128 McEntire Road.

Pines Properties, Inc. advertised for upset bids pursuant to a bid from Brad Ford for real property at 128 McEntire Road, Rutherfordton, North Carolina, in the amount of $398,000. The advertisement was published on September 29, 2008, and no upset bids were received.

128 McEntire was bequeathed to the City as by Jake Rusher. It is an irregular shaped parcel comprising 23.79 acres±. It is improved with a three bedroom log house, a barn, several outbuildings and fencing. It is located in a rural area of Rutherford County. The offer from Brad Ford is in the amount of $398,800. The offer was submitted through the listing agent, Scott Jackson of Odean Keever & Associates. The property was listed at $389,500 based on a market analysis at the time of listing. A previous offer of $370,000 was advertised and upset by the current offer. The real estate commission on the sale will amount to 6% or $23,928.

Pros:

1. The sale will be at fair market value as established by the upset bid process.
2. The sale will generate revenue from the disposition of an un-needed asset.
3. It will return property not needed for public use to private ownership.
4. It will transfer responsibility for maintenance to the private sector.

Cons: There is no negative impact.

The proceeds from the sale of this parcel will be General Revenue Income.

Economic Development staff and Parks & Recreation staff recommend adoption of the resolution authorizing Pines Properties, Inc. to convey 128 McEntire Road.

RESOLUTION BOOK NO. 30 – PAGE 119

F. **BUDGET AMENDMENT FROM THE FEDERAL EMERGENCY MANAGEMENT AGENCY TO COVER DAMAGES TO AZALEA PARK RESULTING FROM HURRICANE IVAN**

This item was pulled from the Consent Agenda for individual discussion.

G. **RESOLUTION AMENDING THE INTERLOCAL AGREEMENT FOR REGIONAL AIR QUALITY CLEAN AIR PROGRAM - COMMUNITY TRUST**

This item was removed from the Consent Agenda until a future date.

H. **RESOLUTION ACCEPTING THE RIGHT-OF-WAY OF GERBER ROAD AS A CITY MAINTAINED RIGHT-OF-WAY**

This item was removed from the Consent Agenda until a future date.

I. **RESOLUTION NO. 06-178 - RESOLUTION ACCEPTING THE U.S. DEPT. OF JUSTICE GRANT FOR THE WEST RIVERSIDE OPERATION WEED AND SEED CRIME INITIATIVE**

Summary: The consideration of (1) a resolution to accept the U.S. Department of Justice Grant for the "West Riverside Operation Weed and Seed" Crime Initiative; and (2) a budget amendment, in the amount of $175,000, to accept these funds.

On July 12, 2006, the U.S. Justice Department announced the designation of Asheville as an "Officially Recognized" site for the federal Weed and Seed program aimed at reducing crime. This process began in October of 2004 when a number of concerned elected officials, city staff, community residents and Asheville citizens mobilized to develop comprehensive strategies to address issues of law enforcement, neighborhood restoration, and prevention/intervention/treatment programs and activities in the target area.

As per the requirements of the U.S. Department of Justice application process, a series of "Public Input Meetings" were held to determine the concerns of residents of the target area. The Weed and Seed Program concept was also introduced to the community and was received favorably with the understanding that residents would be integrally involved in the planning and implementation of the program. The West Riverside Operation Weed and Seed Steering Committee, residents and several community based resource proving agencies such as the Housing Authority, Asheville City Schools, Children First, YMCA/YWCA, NAACP, Mission Hospital, A-B Technical Community College, UNC-Asheville and others will collaborate to improve quality of life for the residents of the Pisgah View, Burton Street and Asheville.

On August 15, 2006, Attorney General Alberto Gonzales formally announced the approval of the City of Asheville's application for funding as a new site in the amount of $175,000. Fifty percent of the funds will be used to support community police programs; and 50% will be used to support neighborhood initiatives such as youth services, parenting programs, health and nutrition programs, vocational programs, neighborhood clean up, housing services, and to hire a Weed & Seed Site Coordinator that will work out of the Parks & Recreation Department. No City funding will be required to support this first-year grant. The grant may potentially be a multi-year grant that will require an application each year.

Pros:

- Significantly reduce violent crime and drug activity in the area of the city that highest number of criminal activity
- Provide a comprehensive plan to address law enforcement, neighborhood restoration and preventive/intervention/treatment programs for the residents of the target area
- Mobilize community residents to collective improve the conditions of the target area
- Provide resources for residents as a means of personal growth and development
- Multi-agency collaboration relative to addressing social, education, economical, cultural problems in the target area.
- Leverage resources to sustain the program and replicate the strategies in other problem areas of the city

Cons:

- Resistance and fear of change in the target area.

This recommendation is keeping with the City of Asheville Strategic Plan by contributing to the:

- "Livability" of Asheville by improving the safety and wellbeing of residents of the target area
- "Sense of Place" of Asheville and the need to educate citizens about the importance of working together as a community to improve the conditions of the community
- "Participation" of Asheville citizens in the process of program development as programmatic and strategic contributors

The Parks and Recreation Department on behalf of the West Riverside Operation Weed and Seed Steering Committee recommends adoption of (1) the resolution to accept the U.S.

Department of Justice grant in the amount of $175,000 for the "West Riverside Operation Weed and Seed" Crime Initiative; and (2) a budget amendment, in the amount of $175,000, to accept these funds.

RESOLUTION BOOK NO. 30 – PAGE 120

J. **ORDINANCE NO. 3396 - BUDGET AMENDMENT TO ACCEPT THE U.S. DEPT. OF JUSTICE GRANT FOR THE WEST RIVERSIDE OPERATION WEED AND SEED CRIME INITIATIVE**

Summary: See Consent Agenda "I" above.

ORDINANCE BOOK NO. 23 – PAGE 105

K. **RESOLUTION NO. 06-179 - RESOLUTION ACCEPTING LAND KNOWN AS OWENS-BELL PARK FROM MOUNTAIN HOUSING OPPORTUNITIES AND APPROVING THE NAME OF OWENS-BELL PARK**

This item was removed from the Consent Agenda due to a conflict of interest.

L. **RESOLUTION NO. 06-180- RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE LEAGUE SOCIAL AS A PART OF THE ASTON PARK-TENNIS CENTER**

This item was removed from the Consent Agenda for a separate vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS PULLED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

RESOLUTION NO. 06-174- RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A LEASE WITH THE UNITED STATES OF AMERICA FOR THE ARMY RESERVE CENTER LOCATED AT 224 LOUISIANA AVENUE

Summary: The consideration of a resolution authorizing execution of a Lease of City-owned real property at 224 Louisiana Avenue to the United States of America.

The property at 224 Louisiana Avenue known as the Army Reserve Center is an 8.857 acre tract on the West side of Louisiana Avenue about 200' from its intersection with Patton Avenue. Although most of the property is generally level, there is a steep slope with rock outcroppings covering the Southeast quadrant of the property. This presents a formidable challenge to further grading of the property, so the useable area is about 6+ acres. The property is currently zoned Institutional. Due to its location and size the highest and best use for the property would be an institutional use, such as a nursing home, assisted living facility or high density residential. The single story building and other improvements located on the property were built by the Army Reserve and remain the property of the Reserve with the right of removal for the duration of the lease. The property was leased to the USA in 1950 at a rent of $1.00 for the entire 50 year term. The most recent lease for six years was signed in 2000 at an annual rent of $60,000.

The USA lease expired at the end of June and the Army Reserve has offered to enter into a new lease for the property for a term of three (3) years at an annual rent of $112,000. Although the lease does not contain an annual escalation clause the rent is at the high end of the rent range and the term was reduced to three (3) years. The Reserve Center has been a good caretaker of the property and no complaints have been received regarding any condition or activities at the site.

This item was pulled from the August 22nd agenda in order for staff to assess the proposed lease in connection with the potential redevelopment of the property. It is the opinion of staff that the long term best use for the property would be a use capable of producing economic return consistent with the close proximity to Patton Avenue; however, such conversion of the property would require an appropriate amount of public discussion and sufficient planning of the project and marketing of the property A short term lease as proposed with the USA maintains a significant revenue stream for the City while allowing considerable flexibility should an opportunity for redevelopment arise.

It is the opinion of staff that the long term best use for the property would be a use capable of producing economic return consistent with the close proximity to Patton Avenue; however, such conversion of the property would require an appropriate amount of public discussion and sufficient planning of the project and marketing of the property. A short term lease as proposed with the USA maintains a significant revenue stream for the City while allowing considerable flexibility should an opportunity for redevelopment arise.

Pros:

a. The rent revenue for this property will be significantly increased.
b. The rent is at the high end of the rent range for this property.
c. The shorter term will allow re-evaluation of the lease sooner.
d. The Army Reserve Center provides a valuable public service.

Cons:

a. The property does not generate tax revenue, but this is offset by the rent revenue.
b. The current is not the ideal, long-term development.

Economic Development staff recommends adoption of the resolution authorizing execution of a lease of City-owned real property at 224 Louisiana Avenue to the United States of America.

Upon inquiry of Councilman Mumpower, Real Estate Manager Ed Vess explained why the rent escalated from $1 to $60,000 to $112,000 annually.

Councilman Mumpower wondered if the reason why the lease was only $1 annually in the 1950's is because there was some community spirit to support our Army Reserve. He feels like we are gauging the Army Reserve and felt $112,000 annually was too high.

Mayor Bellamy asked the Army Reserve is using all the property or is there a portion of property available for development. Mr. Vess said that if the slope were graded down, we could probably add another 25% to the total usable area; however, the lease is for the entire property. Even though the reservists are not there all the time, when they are there, they do need the entire property.

Mayor Bellamy said that the Social Security Office has a lease for $33,000 a month for rent in their current location and at that location, we cannot serve them with bus service. She asked if Council would be interested in directing City staff to see if there is any opportunity for

these two federal programs to co-exist on that property, which would save the federal government some money.

Councilwoman Cape felt that the property sets in an area that is part of our core development plans and there could be other higher and greater uses for the property in the long run. She felt we should look into this idea further.

Councilman Freeborn felt that if that location is not suitable, it might be a possibility to offer the Social Security Officer another piece of city-owned property that is on the bus line.

Vice-Mayor Jones would be interested in beginning conversation on this possibility, however, was not as interested in looking at City-owned property.

It was the majority of Council's decision to direct City staff to see if there is any opportunity for the Army Reserve and the Social Security Office to co-exist at 224 Louisiana Avenue.

Vice-Mayor Jones moved for the adoption of Resolution No. 06-174. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 115

RESOLUTION NO. 06-176 - RESOLUTION FOR INTERNATIONAL COUNCIL FOR LOCAL ENVIRONMENT INITIATIVES (ICLEI) AND CITIES FOR CLIMATE PROTECTION CAMPAIGN PARTICIPATION

Summary: The City of Asheville will join ICLEI as a Full Member and participate in the Cities for Climate Protection Campaign and, as a participant that pledges to take a leadership role in promoting public awareness about the causes and impacts of climate change.

In addition, the City of Asheville will undertake the Cities for Climate Protections Campaign five milestones to reduce both greenhouse gas and air pollution emissions throughout the community and specifically; (1) Conduct a greenhouse gas emissions inventory and forecast to determine the source and quantity of greenhouse gas emissions in the jurisdiction; (2) Establish a greenhouse gas emissions reduction target; (3) Develop an action plan with both existing and future actions which when implemented will meet the local greenhouse gas reduction target; (4) Implement the action plan; and (5) Monitor and report progress.

Also, the City requests assistance from ICLEI's Cities for Climate Protection Campaign as it progresses throughout the milestones.

Councilman Mumpower was concerned about the language and the potential for abuse.

Councilman Davis confirmed that the membership fee of $1,200 is for software and staff support for the greenhouse gas emissions inventory for use by in-house staff.

Councilwoman Cape felt this is a good tool for us to use in-house because it is important to have a baseline understanding of where we are at and how we can improve and save money and energy at the same time.

Councilman Newman asked if the software tool would be available to other organizations in the community. City Manager Jackson said the software maybe copyrighted and we would not be able to reproduce or distribute the software, without their permission. However, what information the City does learn will be shared with the Task Force formed by Council.

City Manager Jackson said that this will be administered by his office. In addition Director of Public Works Mark Combs will be serving in the role of environmental manager.

Councilman Newman moved for the adoption of Resolution No. 06-176. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 117

ORDINANCE NO. 3395 - BUDGET AMENDMENT FROM THE FEDERAL EMERGENCY MANAGEMENT AGENCY TO COVER DAMAGES TO AZALEA PARK RESULTING FROM HURRICANE IVAN

Summary: The consideration of a budget amendment in the amount of $781,062 ($597,472 in anticipated reimbursements from Federal Emergency Management Agency ("FEMA") and $183,589 from fund balance) to cover damages to Azalea Park resulting from of Hurricane Ivan.

The City of Asheville sustained severe damage at Azalea Park from the hurricanes of September 2004. The damage included:

1) the destruction of soccer turf on 1½ of the fields
2) the accumulation of large amounts of debris and sediment at the Azalea Park site
3) the erosion of stream banks which serve as a protective barrier for wetlands

The City subsequently 1) replaced the damaged soccer fields; 2) removed the debris and sediment and; 3) rebuilt the stream banks to reduce the impact of future floods and to protect the existing wetlands. FEMA previously approved a reimbursement of $418,000 (which is already budgeted) to cover the initial estimated cost of clean-up and repairs. The actual cost for replacing the field replacement and clean-up the debris, however, ended up totaling $1,199,062, leaving a balance of $781,062 for which the City has requested an additional reimbursement.

The cost over run occurred in the following areas:

- The replacement of the artificial turf on the soccer field cost was almost double the original turf cost.
- Debris clean-up of the greenway was more extensive than originally planned.
- Protection of the wet land was not in the original estimate.

This budget amendment in the amount of $781,062 is necessary to replenish city funds that have already been spent for the additional debris clean-up and wet-land protection costs and to allow the City to pay the contractor (who has yet to be paid) for the replacement of soccer fields. FEMA site co-coordinators are recommending reimbursing the City for $597,473 of the total additional amount (pending proof of expenditure and final approval from FEMA) to cover the soccer fields and some of the additional clean-up costs, but are not recommending reimbursement for protection of the wetland; rebuilding river bank to help prevent damage from future flooding; and removing debris on the greenways and park which was not developed prior to the storm. They have concluded that these costs fell outside of the FEMA guidelines for reimbursement. An appeal will be prepared and sent to FEMA for reconsideration of the aforementioned denial. In the meantime, the balance not covered by FEMA ($183,589) will come from the City's fund balance.

Pros:

- This will allow the City to pay the contractor for the soccer field and replenish the Azalea road project budget for additional clean-up expenditures in incurred.

Cons:

- Failure to approve the amendment will prevent the completion of the original project.

Staff recommends approving the budget amendment in the amount of $781,062 to be funded with anticipated reimbursements from FEMA grant and a transfer of funds from fund balance.

Councilman Mumpower was personally frustrated by the amount of money involved and was concerned that it cost twice as much to replace the turf. He could not support this budget amendment.

Upon inquiry of Councilwoman Cape, Chief Financial Officer Ben Durant explained the process to date and the reasoning why the cost of the replacement turf was so high.

Upon inquiry of Councilwoman Cape, Mayor Bellamy explained that the City Manager has the authority to sign change orders up to $50,000; however, as a courtesy, City Manager Jackson brings change orders to Council when they are over $25,000.

Upon inquiry of Mayor Bellamy, Chief Financial Officer Durant said that he would provide Council with a written response regarding the FEMA housing assistance for Hurricane Katrina evacuees.

Councilman Freeborn moved for the adoption of Ordinance No. 3395. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 – PAGE 103

RESOLUTION NO. 06-179- RESOLUTION ACCEPTING LAND KNOWN AS OWENS-BELL PARK FROM MOUNTAIN HOUSING OPPORTUNITIES AND APPROVING THE NAME OF OWENS-BELL PARK

At the request of Mayor Bellamy, Councilman Freeborn moved to excuse Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Davis and carried unanimously.

At this time, Mayor Bellamy turned the meeting over to Vice-Mayor Jones.

Summary: The consideration of a resolution authorizing the Mayor to accept a donation of real property on Owens-Bell Lane and naming said park "Owens-Bell Park."

The City of Asheville is interested in establishing and maintaining parks and greenway systems throughout the corporate limits of the City of Asheville. Mountain Housing Opportunities, Inc. (MHO) has offered to donate an approximately 0.85± acre parcel on Owens-Bell Lane (PINs 9648.05-08-7526 and 9648.08-08-6523) to become part of the City's parks and greenway system.

The subject property lies between Clingman Avenue, Rector Street and Owens-Bell Lane. It is transverse by a constructed storm water wetland. Using a series of wetland pools and aquatic plants to slow and filter peak water flow, this system enhances water quality while providing an attractive amenity for the park. The wetland will present an opportunity for educating the community about the environment as well as storm water mitigation. The park has been improved with a paved trail and landscaping. It is sloping and grassy and the banks of the wetland area are planted with low maintenance plants. It is in a residential area making it an attractive location for passive recreation. The estimated value of the land is $29,700

Pros:

- The improvements to the park have been installed by the donor.
- The park will preserve green space and storm water wetland in perpetuity.
- It is an efficient use of resources both public and private, because the City will own only the property best suited to the greenway and storm water wetland.
- A park in this general area was shown in the WECAN Master Plan (published in 2001).

Cons:

- The City will incur the cost of maintaining the park at an approximate cost of $2,500 per year.

City staff has on file a Phase I Environmental Site Assessment which states: "Based on the results of our Phase I ESA, there is no documented evidence of any environmental incidents on the subject site." The Parks and Recreation staff have reviewed the proposed donation and found that the property is appropriate for the parks and greenways system.

City staff recommends adoption of the resolution authorizing the Mayor to accept a donation of real property on Owens-Bell Lane and naming said park "Owens-Bell Park."

Councilman Freeborn moved for the adoption of Resolution No. 06-179. This motion was seconded by Councilwoman Cape and carried unanimously.

At this time, Vice-Mayor Jones turned the meeting back over to Mayor Bellamy.

RESOLUTION BOOK NO. 30 – PAGE 121

RESOLUTION NO. 06-180- RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE LEAGUE SOCIAL AS A PART OF THE ASTON PARK TENNIS CENTER

Summary: The consideration of a resolution making provision for the possession and consumption of malt beverages and/or unfortified wine at a league social as part of the Aston Park Tennis Center Enhancement campaign on October 13, 2006, at the Aston Park Tennis Center.

The Asheville Parks and Recreation will produce the fundraising event to help raise funds to support the cost of renovations at Aston Park Tennis Center. The event will be held at the Aston Park Tennis Center.

The Asheville Parks and Recreation staff recommends adoption of the resolution making provision for the possession and consumption of malt beverages and/or unfortified wine at a league social as part of the Aston Park Tennis Center Enhancement campaign on October 13, 2006, at the Aston Park Tennis Center.

Councilman Newman moved for the adoption of Resolution No. 06-180. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Mayor Bellamy voting "no."

RESOLUTION BOOK NO. 30 – PAGE 122

III. PUBLIC HEARINGS:

A. ORDINANCE NO. 3397 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 1155 TUNNEL ROAD AND A PORTION OF 7 GRANDVIEW PLACE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH

DENSITY DISTRICT AND COMMUNITY BUSINESS I DISTRICT TO COMMUNITY BUSINESS I DISTRICT/CONDITIONAL ZONING TO CORRECT A NON-CONFIRMING PARKING LOT

Mayor Bellamy said that this public hearing was held on September 26, 2006, and continued to this date to see if the developer and City staff could work out a reasonable alternative to the existing parking lot violation.

Assistant Planning & Development Shannon Tuch said that on September 26, 2006, the City Council voted to continue consideration of the 7 Grandview Place Conditional Zoning request to allow the applicant and his engineer the opportunity to work with staff on a reasonable alternative to the existing parking lot violation.

In the intervening week, staff has spoken with the engineer for the project and has worked out an alternative that can be accomplished in conjunction with the work that must be completed to correct the current stormwater violation. The portion of the parking area directly behind the bakery must be demolished to allow access to a sub-standard stormwater pipe and for some other stormwater improvements. Staff has proposed to withhold repaving the area in question to allow for an attractive landscaped island that may also contain some small café tables for patrons of the bakery. This alternative will result in the loss of 4 parking spaces for a total of 18 spaces (1 space more than what was originally approved).

Some considerations that staff has identified include:

- ~~Reduces impermeable surface area of the parking lot~~
- Provides an attractive outdoor seating area for the patrons
- Does not require the reconstruction of any retaining walls or the parking lot
- Provides ample parking for the bakery
- Will require rezoning the portion of the parking lot that falls within the residential zoning

City staff does feel this alternative result in a more compatible and appropriate solution to the existing parking lot violation.

Mr. Steve Aceto, attorney representing the owner and developer, spoke in support of the alternative site plan and urged Council to support this conditional zoning request.

Upon inquiry of Councilman Mumpower, Mr. Dennis Ponder, engineer for the developer, said that the alternative plan will cost approximately $2-3,000 more, however, in his opinion, the bond to the City will cover these modifications. He did feel this will be an amenity to the neighborhood.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3397, to conditionally zone property located at 1155 Tunnel Road and a portion of 7 Grandview Place from RS-8 Residential Single-Family High Density District and Community Business I District to Community Business I District/Conditional Zoning, and approval of the alternative site plan, subject to the following conditions: (1) The project shall comply with all applicable technical standards; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with full cut-off fixtures and directed away from adjoining properties and streets; (3) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department; and (4) A lot recombination shall be completed to allow for a conforming buffer; recommend against alternative compliance, noting that the request is reasonable based on information provided in the staff report. This motion was

seconded by Councilman Mumpower and carried on a 6-1 vote, with Councilman Freeborn voting "no."

ORDINANCE BOOK NO. 23 – PAGE 107

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL USE PERMIT MASTER PLAN FOR INGLES LOCATED AT 1875 HENDERSONVILLE ROAD TO AMEND THEIR MASTER PLAN FOR ALLOWANCE OF A THIRD DRIVEWAY TO ACCESS AN OUT-PARCEL TYPE USE OF A GAS STATION AND CONSIDERATION OF MODIFICATIONS TO A FRONT SETBACK FOR A PROPOSED OUT PARCEL

Mayor Bellamy said that City staff has requested this public hearing be continued to November 14, 2006, as the petitioner was unable to make adjustments to the site plan in enough time to have City staff review them. Therefore, Councilwoman Cape moved to continue the public hearing until November 14, 2006. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Freeborn voting "no."

C. PUBLIC HEARING TO CONSIDER CLOSING A PORTION OF AN UNOPENED RIGHT-OF-WAY LOCATED OFF OF MONTFORD AVENUE

RESOLUTION NO. 06-181 - RESOLUTION PERMANENTLY CLOSING A PORTION OF AN UNOPENED RIGHT-OF-WAY LOCATED OFF OF MONTFORD AVENUE

At the request of Councilman Newman, Councilwoman Cape moved to excuse Councilman Newman from participating in this matter due to a conflict of interest. This motion was seconded by Vice-Mayor Jones and carried unanimously.

At 5:54 p.m., Mayor Bellamy opened the public hearing.

Assistant Director of Public Works Richard Grant said that this is the consideration of a resolution permanently closing a portion of an unopened right-of-way located off of Montford Avenue. This public hearing was advertised on September 15, 22, 29 and October 6, 2006.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Mr. Brownie Newman has requested the City of Asheville permanently close to the public a portion of an unopened alley way off of Montford Avenue as shown as "alley (unopened)" on the plat recorded in Plat Book 79, Page 87 in the Buncombe County Register of Deeds.

Public Works Department staff has researched and determined that this unopened alley is not a City maintained street. Closure of this unopened alley will not deny any of the abutting properties a reasonable means of ingress or egress. The two parcels that abut this section of alley are identified as PIN Nos. 9649-13-03-2964 and 9649-13-04-2004. Both abutting property owners have joined in signing the petition for the closure. There have been no objections to the closing.

There will be retention by the Metropolitan Sewerage District of a 20-foot wide permanent easement for the operation and maintenance of a public sewer line and also retention by the City of Asheville of a permanent 10-foot wide easement for the operation and maintenance of a public water line.

The closure of an unopened alley is a routine process performed by the Public Works Department.

Pros:

- The closure allows the property to be used to its maximum potential.
- There will be no future compromise of ingress/regress to other property

Cons:

- In consideration of the location of the unopened alley, staff can find no potential challenges regarding the closure of the alley.

City staff recommends that City Council adopt the resolution permanently closing a portion of the unopened alley off Montford Avenue.

Upon inquiry of Councilman Mumpower, Mr. Grant said that the two abutting property owners will split the ownership of the alley, each receiving 7.5 feet.

Upon inquiry of Councilman Mumpower, Mr. Grant explained the process by which petition closings are investigated by the City.

Mayor Bellamy closed the public hearing at 5:57 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 06-181. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 123

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 06-182 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO PROVIDE THE CITY WITH THE OPTION OF UPGRADING TO DECORATIVE TRAFFIC SIGNAL POLES

ORDINANCE NO. 3398- BUDGET AMENDMENT FOR THE UPGRADE OF THREE DOWNTOWN TRAFFIC SIGNALS WITH DECORATIVE POLES AND ARMS AS FOLLOWS: (1) BROADWAY AND COLLEGE STREET; (2) BROADWAY AND PATTON AVENUE; AND (3) COLLEGE STREET AND CHARLOTTE STREET

City Traffic Engineer Anthony Butzek said that this is the consideration of a resolution authorizing the Mayor to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) to provide the City the option of upgrading to decorative traffic signal poles; and the consideration of a budget amendment for the upgrade of three downtown traffic signals with decorative poles and arms.

In 2005, a public workshop was held in order to gather input regarding how our traffic signals should look. Options were presented for color, pole shape, and decorative base style, and strong feedback allowed us to designate a preferred style for signal poles. NCDOT is installing this preferred style in three locations near Broadway & Woodfin Street as part of the interchange construction currently underway.

Decorative poles are desirable at gateways, key locations or corridors of visual importance, as parts of a streetscape, and places with significant pedestrian activity.

The NCDOT is currently planning to replace traffic signal poles at three locations (College & Broadway, Patton & Broadway, College & Charlotte). They have given the City the option of upgrading the planned replacement of standard metal poles and arms to decorative poles and arms in our preferred style. The City would pay the cost differential of the decorative upgrades, estimated as $10,000-20,000 per intersection (full signal replacement costs are estimated at $100,000-150,000 per intersection).

The cost differential of the upgrades is being determined. It is initially estimated at:

• Broadway & College:	$10,200
• Broadway & Patton:	$22,000
• College & Charlotte:	$21,400
TOTAL:	$53,600

Patton & Broadway is our city's central intersection, and College & Broadway is a key downtown intersection. College & Charlotte is a key gateway intersection to our downtown. All three locations are important components of the look of our downtown. This is a one-time opportunity at each location to make major aesthetic upgrades at a relatively low cost.

This agreement defines the format for how such replacements will take place for these and all future replacements. The City will be given a specific cost estimate for the upgrade of each specific location. We will then have 30 days to decide whether to advance each specific project and reimburse NCDOT for the difference, or to allow NCDOT to proceed with standard poles.

Pros:

- Signing of this agreement provides a mechanism to consider decorative upgrades.
- Decorative upgrades are a key part of developing an attractive downtown environment.
- Decorative poles will match those going in at Broadway & Woodfin and those selected by the public.
- Decorative poles will improve downtown's streetscape and complement the new Pack Square Park and College Street projects.
- NCDOT has agreed to replace these poles in part to complement the other improvements we are making downtown, and this contribution supports this partnership.
- Decorative upgrades are a key part of developing an attractive downtown environment.

Cons:

- While the cost is minimized when upgrades are made as signals are replaced, the cost is still significant.

City staff recommends adoption of the resolution authorizing the Mayor to enter into an agreement with the NCDOT to provide the City the option of upgrading to decorative traffic signal pole and authorize a budget amendment for decorative traffic signal poles at these three key intersections.

Mr. Fred English felt that the City needs its roads paved and not decorative traffic signal poles.

Rev. Christopher Chiaronmonte urged Council to use this money to invest in two jail-style public restrooms in the downtown area.

Councilwoman Cape liked the decorative poles but was concerned with the additional cost. She suggested contacting some of our partners, e.g., Tourism Development Authority (TDA) to see if they would be interested in contributing to this since they are interested in supporting the gateway projects.

In response to Councilman Mumpower, Mr. Butzek explained why the traffic signal poles are being replaced and their time span.

Councilman Davis felt this is a good opportunity for a replacement with decorative poles. He agreed with Councilwoman Cape in that this is part of the aesthetics of downtown and there has been an interest in Wayfinding and signage by the TDA. He felt this is a good opportunity to use some dollars generated by tourism to help with citizens pay for that infrastructure.

There was a brief discussion, initiated by Councilwoman Cape, about having 30 days to decide whether to advance each specific project.

Vice-Mayor Jones, liaison to the TDA, said she would be happy to carry this request to the TDA at their next meeting. Her sense is that there is a lot of openness for investments in this, but there is a whole process for allocating dollars. She felt this might be a good sign of the City's small investment to show good faith to the TDA, who will be investing a lot of money in a lot of other needs.

At the suggestion of Mayor Bellamy, and the concurrence of Councilman Davis, Chair of the City Council Planning & Economic Development Committee, it was the consensus of Council to add an agenda item to the Committee's next meeting to develop a list of people and organizations who may have an interest in this effort and then send them a letter seeking contributions.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Davis moved for the adoption of Resolution No. 06-182. This motion was seconded by Councilman Freeborn and carried unanimously.

A brief discussion was held about postponing the budget amendment for two weeks to see if any individuals or organizations would like to contribute.

Councilwoman Cape noted the number of Wayfinding and city enhancements the City is doing regularly so we need to continue that conversation with other individuals and organizations for assistance. Mayor Bellamy also noted that the City isn't just waiting for assistance from the private sector but moving forward.

City Attorney Oast said that even if Council commits to spending the money, it doesn't stop the City from soliciting participation by other partners and then amending the budget to reimburse the City for any funds that are forthcoming.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Because City Council can adopt a budget amendment if other funds become available, Councilman Davis moved to adopt Ordinance No. 3398, with an emphasis on soliciting funds from other individuals and organizations. This motion was seconded by Councilman Freeborn.

Councilman Mumpower felt there was not urgency in this and felt Council should wait two weeks before considering the budget amendment.

Councilman Newman felt decorative traffic signals are nice, but when he thinks about the financial responsibilities and key infrastructure that we already have in terms of downtown, in particular the Civic Center, he thought that other people might need to lead on things of this nature.

The motion made by Councilman Davis and seconded by Councilman Freeborn carried on a 5-2 vote, with Councilman Mumpower and Councilman Newman voting "no."

RESOLUTION BOOK NO. 30 – PAGE 125

ORDINANCE BOOK NO. 23 – PAGE 110

C. RESOLUTION NO. 06-183- RESOLUTION APPOINTING A MEMBER TO THE CRIMESTOPPERS BOARD OF DIRECTORS

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Crimestoppers Board of Directors.

Ms. Nancy Ray Durham has not met the attendance requirements and therefore there exists a vacancy until June 30, 2008.

At the September 19, 2006, City Council instructed the City Clerk to arrange interviews for William Price and David Herbert. Mr. Herbert was unable to attend the interview.

In addition, at the September 19, 2006, worksession, City Council instructed the City Attorney to determine if the City Council seat could be changed to just an at-large member. City Attorney Oast reported that the by-laws of the Crimestoppers of Asheville-Buncombe Inc. specifically state that one member must be a member of City Council.

After Council spoke highly of the candidates, William Price received 4 votes and David Herbert received 3 votes. Therefore, William Price was appointed as a member to the Crimestoppers Board of Directors to fill the unexpired term of Ms. Durham, term to expire June 30, 2008, or until his successor has been appointed.

At the suggestion of the Boards & Commissions Committee and the consensus of City Council, City Attorney Oast was instructed to send a letter to the Board of Directors of Crimestoppers of Asheville-Buncombe Inc. asking them to revise their by-laws by amending the requirement that the City Council seat be an at-large City Council appointment and to report back to Council their response.

RESOLUTION BOOK NO. 30 – PAGE 126

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of September 14 - October 5, 2006: Sherlee Ward (Sanitation), N.C. Dept. of Administration (Streets), Janice Burleson (Streets), James Charles Oliver (Police), Jennifer K. Godfrey (Transit Services), BellSouth (Water), Ben Halligan (Parks & Recreation) and Ronnie Hoglen (Parks & Recreation).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton was of the opinion that we must stop supporting a culture which encourages our children to deny the truth that we are one and teach spiritual education.

Rev. Christopher Chiaronmonte urged Council to build two jail-style public restrooms in the downtown area.

Mr. Fred English stated that people want highways and they should not be toll roads since residents already pay numerous taxes and licenses.

Ms. Heather Rayburn, representing the Mountain Voices Alliance, presented City Council with research on the steep slope ordinance.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 6:37 p.m.

Kristra Lipe
CITY CLERK

Terry Bellamy
MAYOR

Tuesday – October 17, 2006 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

ECONOMIC DEVELOPMENT STRATEGY AND TOOLS

Economic Development Director Sam Powers said that many existing economic development programs have traditionally sought to emphasize growth, that is, expanding the number of jobs and increasing capital investment for the community. Each component of the three-pronged strategic approach of most communities – business recruitment, existing business retention and new business creation is important to bring new growth into the community. This is considered a "supply-side" strategy that will impart cost advantages to outside businesses and increase the likelihood of successful recruitment to the community and retention of business in the community.

Sustainability, as proposed by many writers, is a way for communities to sort through their development options and arrive at a strategy that is more balanced with respect to the full range of economic, environmental, and social characteristics that together comprise the community. Many economic development programs and communities are now seeking to incorporate sustainability into the practice of economic development.

Sustainability calls for an emphasis on *development* strategies that lead to an economy that is built from within and is more diverse and self-reliant and more socially and environmentally responsible.

A sustainability strategy can be built within a mainstream perspective. One way to integrate sustainability into the community's economic development strategy is to revise and expand the ways that existing development tools are used in the community.

There is a wide range of economic development tools that communities utilize to influence economic development.

Supply-side - attempts to influence business decisions by affecting the costs of production. Included among the variety of supply-side tools are low-interest loans, tax exemptions and abatements, subsidized employee training, and subsidized land. These are typically used by communities to attract new companies or retain existing ones.

Demand-side - this approach involves the active intervention of an "entrepreneurial state" in the identification and exploitation of business development opportunities. Demand-side tools are essentially designed to encourage the start-up of new companies or enhance the ability of existing ones to compete, and include incubators, seed capital funds, technology development partnerships, and small business development centers.

Economic development tools - can be organized info five categories: marketing incentives, infrastructure investment, regulatory and governance, land-based incentives, and financial incentives. He reviewed a chart which listed the tools by the different categories and

provided a description of each under the supply/demand perspective and the sustainability perspectives.

Using a flow chart, Mr. Powers reviewed with Council the Economic Development strategies of his department. He said that a year ago Council formalized the Sustainable Economic Development Advisory Committee (SEDAC) and they have been interested in taking the strategies and making recommendations. He recommended that Council authorize SEDAC to look at the existing Council goals and priorities, prioritize them, and bring back their recommendations to the Planning & Economic Development Committee and then to City Council.

Mayor Bellamy asked that SEDAC provide benchmarks that are measurable for the next 18-24 months.

In response to Mayor Bellamy, City Manager Jackson explained how the HUB Committee and the Chamber of Commerce's Economic Development Coalition will play a part in the recommendations.

Mayor Bellamy expected the outcome to be a specific program of activities.

Councilman Mumpower felt these are mostly secondary tools using taxpayer money to provide land or money, noting that there may be some value to that. He didn't see many primary tools that bring business to the community including public safety, regulatory taxes and fees, infrastructure, and an overall policy whether it encourages or discourages development.

The majority of Council supported SEDAC looking at the existing Council goals and priorities and bringing back the City's economic development plan with action steps including benchmarks.

The majority of Council supported SEDAC reviewing the core issues and giving Council some direct guidance on the core and secondary issues.

Mayor Bellamy initiated discussion relative to the City's relationship with the Economic Development Coalition. She and Councilwoman Cape felt they do support many of our goals and noted that in the last two fiscal years, we have not provided them any monetary support. After discussion and the recognition that City residents already contribute to the Coalition through their County tax dollars, the majority of Council supported the Economic Development Coalition providing the City with a specific proposal that focuses on an economic development project within the City.

After discussion initiated by Councilwoman Cape, as a member of the Film Commission, about providing an economic development incentive to a film production company due to begin filming in downtown Asheville, the majority of Council supported adding an item to the October 24, 2006, agenda waiving parking meter fees in specific downtown locations for 10 days of filming, which would be an approximate $1,600 waiver. She noted that they project they will be spending $800,000 in our region.

After discussion and request by Mr. Powers, it was the consensus of Council to support SEDAC looking at the issue of providing on-location assistance by City departments and film related incentives as part of the economic development plan. Councilwoman Cape clarified that the Film Commission will be moving forward at looking at what other cities are doing in terms of incentives to bring the film industry to their areas.

After a brief discussion initiated by Councilman Newman on a living wage policy, City Manager Jackson said that City staff is gathering some benchmark information on the legal

framework for a living wage policy. He said that we have gathered some information on initiatives that have been taken by other municipalities, along with input from the City's new Human Resources Director. We will have that completed by the end of the month and will seek Council's direction on when and how Council wants to schedule that policy discussion.

RETIREE HEALTH INSURANCE CONTRIBUTION RATES

Mr. John Ferguson, with Ferguson Benefits Agency, said that retirees with access to other health insurance coverage through their spouses (or through Medicare or their own post-retirement employment) are not subsidized by the City to the same extent as retirees who have no access to other coverage. This means that individuals with the same length of service to the City may pay different amounts for their health insurance. This is perceived as an inequity to retirees of the City. Council asked for options about how to approach this issue.

Resolutions passed by Council over the years have, since 1984, provided that retirees who have access to other coverage through their spouse could stay on the City health plan, but would not have their coverage subsidized by the City.

Recently, this provision was brought before Council as being unfair because two employees who worked for the City for the same amount of time paid different rates based on whether their spouses worked and had insurance coverage.

Following an initial meeting with Council, the Ferguson Benefits Agency undertook a review of the City's contribution strategy for retirees, especially those with access to other coverage.

He then reviewed the following consideration of changes in the contribution strategy for retirees with access to other health insurance.

The City of Asheville allows retires that do not have access to other health insurance to remain on the City's health insurance plan and subsidizes most of the monthly cost while the retiree cost is the same as an active employee. The current City of Asheville subsidy is nominally $346.01 for retiree only coverage. For the high option (selected by the vast majority of retirees) the actual cost to the City ranges from $419 (retiree only) to $1,398 for retirees electing family coverage. If a retiree has access to other health insurance through a spouse, his or her own employment, or Medicare or Medicaid, the full monthly cost is charged to the retiree.

The City of Asheville requested the estimated financial impact of subsidizing the cost of the retirees with access to spousal insurance at the same level as those without access to other health insurance. An initial calculation based on the nominal cost indicating a maximum annual cost of $266,452 was presented to Council on July 18, 2006. Council requested contribution alternatives that would be cost neutral to the City for current retirees and employees. Due to "condition of employment" legal concerns, some retiree policy changes may need to be applicable only for future employees hired after a specific date.

Based on the City of Asheville's actual claims experience, the claims for retirees under age 65 are 2.23 times more than those of active employee. Since the retiree past claims are not entirely predictive of future claims, the minimum recommended cost differential should be set at 1.5 retiree-to-active employee ratio. The estimated cost for retirees under 65 for 2007 is $444.03 per month, based on the high option.

The potential alternatives come down to five options outlined below. The below examples assume retiree only coverage for the sake of illustration:

1. Make no changes to the current retiree policy. Retirees with access to other insurance through his or her spouse would continue to pay $370.92 per month while retirees without access to other coverage through their spouse would pay $35.52 under 2007 rates.

    - Pros: No financial impact to the City of Asheville or the current covered retirees without access to other health insurance, other than the 1-1-07 scheduled increases.
    - Cons: The perceived inequity (emphasized by years of service) remains in place.

2. City of Asheville could subsidize the monthly cost of retirees with access to other insurance through his or her spouse at the same level as retirees without access to other insurance beginning with retirements on or after 1-1-07.

    - Pros: Eliminates perceived inequity.
    - Cons: Significant financial impact to the City of Asheville. Based on the 2007 projected cost of $444.03 (high option), the revised estimated annual cost is $4,902 per retiree per year. The City on average has 7 retirees each year under the age of 65 who decline health coverage. Assuming that all 7 of them had access to coverage through their spouse and declined due to the elevated cost, and assuming the addition of all 7 retirees, and with each retiree staying on an average of 9 years, the first year additional cost would be $34,314, going up by that same amount each year with an estimated additional maximum annual cost of $308,834 assuming an additional 63 retirees eligible for the subsidy. With such a high level of City contribution, we must assume all 63 would enroll.

3. The City of Asheville could change their contribution policy such that there is no contribution differential based on access to other coverage through a spouse. In order for this to be a revenue neutral option this will necessitate a significant increase to the 141 retirees who currently do not have other coverage available via a spouse. Conversely the 5 retirees who are on the plan now and who have access to other coverage through a spouse would see a significant reduction in their cost. Since a significant cost would remain for the retiree, not all would enroll, and calculating a cost neutral alternative contribution varies greatly depending upon the number who actually do so. Assuming that all 7 would enroll with increased City contribution, the High plan retiree contribution (for all retirees) would increase from the 2006 rate of $24.92 to $42.00 per month instead of the $35.52 that is currently scheduled for 2007. The Standard plan retiree cost would increase from the 2006 rate of $0 to $20.00 per month instead of $10.66 that is currently scheduled for 2007. However, since the average retiree stays on the plan 9 years, we can assume there will eventually be 63 total retirees (9x7) who might now wish to access the plan due to the increased City contribution. If all 63 did so, the High plan retiree cost would more than triple to $148.00 and the Standard plan go up to $68.00 for 2007. For planning purposes we must assume "worst case scenario" and would recommend using the $148 (high option) and the $68 (standard option) figures.

    - Pros: Eliminates perceived inequity for those retirees with access to insurance through his/her spouse and does not create a financial impact to the City of Asheville.
    - Cons: An increase of $123 per month would have a significant impact on fixed incomes which are as low as $500 per month, or even lower. Changing the policy for those retirees who have no other coverage available would create a new perceived inequity by retirees with no other options who then feel they are now paying the same amount as those who do have other options. This option could

also create "condition of employment" legal issues which would have to be addressed by legal counsel.

4. City of Asheville could create a separate partial subsidy schedule specific to retirees with access to other insurance through his or her spouse without changing the subsidy for current employees and retirees without access to other insurance. This new subsidy schedule would apply to all NEW employees hired on or after 1/1/07 so that access to other insurance through his or her spouse would not differentiate the City contribution. The City could offer this to employees who retire on or after 1/1/07 since it is an enhancement of their current position.

    - Pros: No financial impact to current retirees that do not have access to other insurance eliminating the possibility of a "condition of employment" issue.
    - Cons: The financial impact to the City of Asheville is significant. Unlike in option 3 above, the "revenue neutral" state would take a long time to develop, and in fact only be totally achieved once all current employees are both retired and off the plan. For example, the City could subsidize ½ of the monthly $444.03 (high option) for $222.02 per retiree. Assuming a minimum of 7 additional retirees, the annual cost would be $18,650. Assuming the development over 9 years of the maximum of 63 additional retirees, the annual cost would be $167,850. Compare this cost to option 2 at twice that cost.

5. The City of Asheville could implement a sliding contribution scale based on years of service to determine the amount the City will contribute towards current retirees (and current employees upon retirement) with access to other coverage through his or her spouse, and to all new employees hired after 1-1-07. Contribution would remain the same for current retirees (and current employees upon retirement) who do not have access to other coverage through a spouse. This alternative mirrors the strategy now being put in place by the State of NC. A percentage of the subsidy based on years of service would be applied to the 2007 City contribution of $408.51 for High and $344.57 for Standard as shown below:

25 or more years of service	100% of subsidy
20 but less than 25 years of service	80% of subsidy
15 but less than 20years of service	65% of subsidy
10 but less than 15 years of service	55% of subsidy
5 but less than 10years of service	50% of subsidy
Less than 5 years of service	0 (no contribution)

It should be emphasized that these are not percentages of the total cost of coverage, but of the "full" subsidy figures. An illustration is provided below.

Applying these percentages to 1-1-07 subsidy results in the following contributions:

	High-Option Plan		Standard Plan	
	COA	Retiree	COA	Retiree
25 or more years of service	$408.51	$ 35.52	$344.57	$ 10.66
20-24.99 years of service	$326.81	$117.22	$275.66	$ 68.91
15-19.99 years of service	$265.53	$178.50	$223.97	$120.60
10-14.99 years of service	$224.68	$219.35	$189.51	$155.06
5-9.99 years of service	$204.26	$239.77	$172.29	$172.28
Less than 5 years of service	$ 0.00	$444.03	$ 0.00	$355.23

- Pros: This option should eliminate any "condition of employment" issues. The sliding scale would help moderate the short term additional City cost. Assuming an additional 7 retirees, the annual City cost would increase approximately $24,000. Assuming the development over 9 years of the maximum 63 additional retirees, the estimated cost would be an additional $242,200 as compared to the cost without the sliding scale of $311,381; a savings of approximately 20%. Though the short term cost may increase, in the long term this will significantly reduce retiree costs and is consistent with recent changes in the State of NC plan.
  Cons: Short term costs will increase dependent upon enrollment because approximately 75% of all recent retirees had more than 15 years of service with The City of Asheville and retirees (including future retirees employed prior to 1-1-07) with no access to other coverage through their spouse retain the current subsidy. Who might feel another inequity has been created by this change? First, at retirement, employees hired prior to 1-1-07 with fewer years of service and with access through a spouse will still be receiving a smaller subsidy than similar situated employees without access through a spouse. While the perceived inequity that began this discussion will have been lessened, and in fact eliminated for retirees with 25 or more years of service, retirees with fewer years of service may still perceive an inequity. Second, because these options assume maintaining the current City policy of not allowing retirees to access the plan once off the plan, such retirees may complain that had this option been available at retirement they would have stayed on the plan, and they may feel that they should have been given a second opportunity at this time to enroll under the new subsidy.

NOTES:

1. For all other cases, i.e. Medicare or retiree's own employment, the current provision would not change.

He then summarized the five options reported:

Option	Pros	Cons
1. Maintain current practice	No financial impact to City	Perceived inequity
2. Subsidize same regardless of spouse coverage	Eliminates perceived inequity	Could cost City more than $300,000 per year over time.
3. Level payments for all retirees unless coverage through Medicare or own subsequent employment (revenue neutral)	a. No financial impact to City b. Eliminates perceived inequity	a. Substantial increase in cost to employees with **no access** to other coverage ($148 vs. $35) b. "Condition of employment" concerns
4. Partially subsidize coverage if spouse coverage is available	a. Reduces perceived inequity b. No impact on unaffected retirees c. No "condition of employment" issues	a. Could cost City more than $150,000 (for 50% subsidy) per year over time

5. Implement a new subsidy scale based on years of service – apply to a. current employees who retire on or after Jan. 1, 2007 who have access to coverage through spouse --- and --- b. all employees hired on or after Jan. 1, 2007 Continue no subsidy if coverage available through Medicare or own subsequent employment.	a. Reduces cost to the City for future employee's retiree health coverage by about 20% b. Fair approach to retiree health coverage for future employees c. No "condition of employment" issues d. Eliminates perceived inequity for current employees who retire with 25 or more years of service e. Reduces inequity for current employees who retire with 5 to 25 years of service	a. Could cost City as much as $24,000 for the first year and up to $240,000 per year after nine years, but that would end as employees leave or retire, and cost savings of approximately 20% of current rates would follow

City staff recommends adoption of a sliding scale for retiree health contribution that would apply to all employees hired on or after January 1, 2007, and that would apply to all individuals who retire on or after January 1, 2007, who have access to other coverage through their spouse. This sliding scale would be as follows:

YEARS OF SERVICE	PERCENT OF SUBSIDY (Not of Premium)
25 or more	100% of subsidy
20 but less than 25	80% of subsidy
15 but less than 20	65% of subsidy
10 but less than 15	55% of subsidy
5 but less than 10	50% of subsidy
Less than 5	No subsidy

Mr. Ferguson, Human Resources Director Lisa Roth, and Underwriter Cheryl Walker responded to various questions and/or comments from the concerned Council regarding the different options, the current policy, and COBRA.

Councilman Freeborn felt this would be good to survey our employees since this is a change on their employment package. City Manager Jackson said that he could solicit input from various levels of employees about what is proposed by City staff and report back to Council within 30 days so we can still fold this into the enrollment period.

When Ms. Roth said that this will only affect current employees if they retire January 1, 2007, going forward and all new hires effective January 1, 2007, Mayor Bellamy cautioned any current City employee thinking of retiring before January 1, 2007, to at least wait until January 1, 2007, to make the retirement effective, if Council makes this retirement policy change.

It was the consensus of Council to place this item on the next formal meeting agenda.

Upon inquiry of Councilman Newman regarding Option 3, City Attorney Oast said that there are legal implications to all of these options and depending on the direction from Council, he will look into those and report back to Council. The condition of employment issue raised is a matter of concern and he will look into that as well.

WATER CAPITAL IMPROVEMENT PLAN RATE UPDATE

Water Resources Director David Hanks said that per Council's direction, staff has 1) further examined the water system capital improvement (CIP) fee structure for condo associations, multi-family apartment complexes, mobile home parks and customer charges available to owners of sub-metered or master metered properties; and 2) developed an option for financing the water system capital improvement program that uses debt issuance to help lower the CIP fee.

Staff has been working with condo associations to change out their larger meters to a combination fire/domestic service with Water Resources providing installation and procurement of the new meters at cost. In consultation with the City Attorney's Office, staff has provided reduced fees to smaller associations, including condos and home owners, served through master meters via change in the fee structure through a contract basis, changing the status to single family residential. He reviewed examples of condo associations changing their meters and enhancing their backflow requirements while reducing their CIP fee charges. He also reviewed examples of mobile home parks and apartment complexes with same size meters serving a variety of living units.

Staff has also reviewed master metered customers that have sub-metered their tenants or charge for utility services through a pass on charge or built the charges into the rent. When a customer sub-meters and has more than 15 connections, it becomes a private utility that is governed by the State Utility Commission, which sets rates and charges. The private utility must submit their rate structure to the Commission for approval and any increase must be approved by the Commission before it can be charged. If a customer does not sub-meter, but wants to charge for utilities provided, then it becomes a private business transaction between the owner and the renter. There is no legal authority for a water system or municipal government to set utility rates that private owners of rental property that are not governed by the State Utility Commission can set.

The Finance Department has examined options for financing the water system capital improvement program, which includes the issuance of debt to help lower the CIP fee while allowing for the leveraging additional capital project funds. Staff has determined that that securing a $35 million revenue bond issue to supplement our on-going pay-as-go support of the water system capital improvements program will allow us to invest approximately $66 million into the Water System CIP over a 6 year period while lowering the current CIP fee by 20%.

Mr. Hanks responded to various questions/comments from Council.

Councilwoman Cape expressed equity concerns in that a few weeks ago Council discussed residences all paying the same rate of $3.50 and now we're charging some condo associations and mobile home parks lower rates. Councilman Freeborn felt this is a small incentive to encourage people to live in higher density.

Councilwoman Cape suggested Council explore how we as a City can approach the idea of mobile home parks as viable aspects to our community for consideration of inclusion in our overall infrastructure expansion and how the City can participate in the stabilization of those viable neighborhoods. At the suggestion of Mayor Bellamy, Vice-Mayor Jones, Chair of the Housing & Community Development Committee, said that her Committee would be happy to look into that.

Councilman Newman was concerned that the base rate for large water users are getting water at a tiny fraction of the cost that other families in Asheville pay. Another concern is that some of the bigger multi-family residential developments are being successful in looking at ways

to bring their costs down, but one of the reasons why we did the meter based fee was to provide some certainty about water revenues. He felt the revenue projections that we had will be dramatically reduced. Mr. Hanks responded that if all the condo associations the City is working with change their meters out, this will have about a $200,000 negative impact on the water fund.

Mayor Bellamy noted that there was no Council support for sub-metering, however, there was support for City staff moving forward with the reduced fees to smaller associations, including condos and home owners, served through master meters via change in the fee structure through a contract basis, changing the status to single family residential.

At 5:18 p.m., Mayor Bellamy announced a 20-minute recess.

Chief Financial Officer Ben Durant reviewed with Council the Water Capital Financial Plan.

Using charts, he reviewed the current CIP fee/pay-as-you-go plan; current CIP fee/$35 Million revenue bond; and the 20% CIP fee reduction/$35 Million revenue bond.

City staff's general recommendations are (1) Approve across-the-board 20% reduction in CIP fee and give direction on $35 million revenue bond issue; and (2) Build reserves for future projects and operating flexibility.

Throughout the presentation, Mr. Durant and Mr. Hanks responded to various questions and/or comments from Council.

Upon inquiry of Vice-Mayor Jones, Mr. Hanks said that we would spread the $35 Million over several years. If we were to do too many projects in one year, it would disrupt people's lives. We would develop a schedule of what the projects would be and the cost for each project. Then we would come back to Council for approval. We would then set up the debt financing to meet the schedules. It will take about 2-3 years to start the projects and if Council gives staff direction, they will start the bid process.

Councilman Mumpower explained that to make substantial changes on how we finance the water infrastructure before the legal issues are resolved is premature and felt that the City should wait until the initial ruling on the Sullivan Act lawsuits.

Councilwoman Cape said that we are running the water system under the same limitations if we lose the lawsuit. She felt we are trying to make decisions in the most fiscally sound way and with the extra piece of the revenue bond, we can repair the system quicker.

Councilman Davis felt there should be a list of what repairs will be made with on-going updates on the progress.

Vice-Mayor Jones wondered if Council should look at the $1.2 Million savings being allocated among the one-inch meters and higher, opposed to spreading the savings across the board. Councilman Davis agreed in that those businesses are employing people.

Councilman Newman felt that the current rate structure is pinching the small to medium size commercial customers; and if any adjustments are made, Council should look at the most fair way to do it.

Upon inquiry of Councilman Mumpower, Mr. Durant said that our consultant, Brown and Caldwell, recommended that the City borrow the funds to aggressively address the CIP. They

recommended we begin in 2-3 years from now; however, we are being more aggressive and are asking for Council to begin the process now.

Mayor Bellamy asked who would be responsible for the debt if our water system is taken out of our hands or a merger. Mr. Durant said that the bonds are guaranteed by the system's revenues which are the ratepayers, so whoever has the system has the liability. City Attorney Oast said that would be a point of negotiation. He felt that any arrangement would have to be subject to approval of the bond holders.

The majority of Council supported Mr. Durant talking with the bond counsel specifically about if there was a merger or the system is taken away how will that affect our obligation and also information about structuring the debt so we draw down the funds at the right time. He would be able to provide that information to Council in approximately 1-2 weeks.

Upon inquiry of Mayor Bellamy, Mr. Durant said that if Council votes on this matter at the first formal meeting in November, it would take approximately 5-6 months before we would get the money.

QUARTERLY FINANCIAL REPORT & CAPITAL IMPROVEMENT PROGRAM

Chief Financial Officer Ben Durant updated City Council on the Fiscal Year 2006-07 General Capital Improvement Program (CIP) and provided a preview of the City's long-range capital improvement needs.

Staff has identified $2.5 million in one-time funding that is available to augment the capital improvement budget that was approved for FY 2006-07. This $2.5 million in funding will come from two sources. At the time of budget adoption, there was approximately $1.5 million in property and sales tax revenue that was not included in the budget. Council directed staff to report back after the first quarter on the possibility of appropriating this funding for capital needs. Based on the City's financial performance through the first quarter, staff is recommending that the additional $1.5 million that was not budgeted in June now be appropriated for high priority capital needs.

In addition, the preliminary year-end audit figures for Fiscal Year 2005-06 show that the City's fund balance will be approximately $23.8 million or 31% of total expenditures. Based on these numbers and staff's projections that fund balance will grow to 34.1% in Fiscal Year 2006-07, we recommend that Council appropriate an additional $1.0 million from fund balance to help address capital needs; bringing the total available funding to $2.5 million.

He then briefly reviewed the highlights of the quarterly financial report. Objectives: (1) review first quarterly operating results; (2) receive Council direction on enhancing development review services; (3) present immediate high priority capital improvement needs and receive Council direction on funding; and (4) preview long-range capital needs. He said the amended budget is $78,377,543.

General Fund revenue highlights: (1) additional property tax revenue will total $1.27 Million; (2) strong economic growth is boosting revenues: (a) current sales tax base higher than anticipated; (b) sales taxes projected to exceed budget by $530,000; and (c) state utility taxes projected to exceed budget by $346,000; (3) higher investment earnings; and (4) overall, general fund revenues are projected to exceed budget by $2.76 Million.

General Fund expenditure highlights: (1) departments projected to save $877,000 through targeted savings plans and normal attrition; (2) these savings combined with $2.76

Million in excess revenue will more than offset the $1,039,269 in fund balance used to balance the budget; and (3) fund balance will increase by $2.6 Million.

He reviewed the chart for Fund Balance revised budget was 29.86%, and now based on year end is 34.13%.

Proposed operating amendment: development review services: (1) additional staff in Planning & Building Safety to enhance development review services: (a) better manager and track zoning violations, fines, etc.; (b) perform zoning field inspections throughout the construction process; (c) devote more resources to long-range planning; and (d) meet demand for plan review services; (2) implementation Date: January 1, 2007; (3) cost of enhancement package: $132,996; (4) funding proposal is to budget a portion of extra state utility tax revenue; (5) effect on Fund Balance is that it will be educed to 33.9%; and (6) staff recommendation is to put a budget Amendment on the October 24, 2006, agenda.

Budget Manager Tony McDowell reviewed with Council the capital improvement planning going over the current high priority projects and preview of long-term needs: The current year Capital Improvement Plan totals $13,360,401.

Highest priority capital needs include: (1) funding proposal: additional $2.5 Million ($1.5 Million in property and sales tax revenue that was not included in the adopted budget; and $1.0 Million in available fund balance); and (2) effect on fund balance - reduces fund balance to 29.9%.

He reviewed the capital project prioritization process, which is staff-identified the highest priority capital projects based on the following set of criteria: Council goal, deferred maintenance, risk management, maintain service, economic impact, energy efficiency, and quality of life.

Manager-Recommended highest priority capital projects: (1) land purchase for Fire Station 12 - $250,000; (2) Civic Center Arena Roof (the total cost of $1.5 Million. There is $600,000 in unused funding already in the Civic Center CIP) - $900,000; (3) Haw Creek Sidewalks (the amount represents the City match. Total cost is $700,000) - $370,000; (4) Patton Avenue Sidewalks (the amount represents the City match. Total cost is $450,000) - $300,000; (5) Fleet Replacement - $255,000; (6) street and sidewalk maintenance - $200,000; (7) Public Safety radio replacement - $100,000; and (8) Richmond Hill Entrance/Parking - $125,000. Totaling $2,500,000.

He reviewed the five-year capital improvement needs.

Long-term capital planning funding strategies include: (1) continue pay-as-you-go funding (5-Year financial forecast assumes a 3.0% annual increase; or (2) issue additional debt (current debt capacity/debt ratios).

He used charts to show the existing debt schedules.

Long-term capital planning next steps include (1) budget amendment to enhance development services on the October 24, 2006, agenda; (2) $2.5 Million budget amendment on the October 24, 2006, for a one-time capital funding; and (3) begin community process to establish a 5-year capital improvement program; including consideration of debt issuance.

Mr. Durant responded to various questions/comments from Council.

When Councilman Freeborn asked to see the analysis of what the cost savings would be for taking out debt for capital improvement projects, Mr. Durant said that he would perform that analysis and report back to Council at a later date.

City Manager Jackson responded to Councilwoman Cape regarding why the Richmond Hill Entrance/Parking is included on this list.

In response to Councilwoman Cape, City Manager Jackson said that specifically when it has come to capital improvements, the past practice has been to do more with less. We have concluded is that we can facilitate a better policy decision-making with Council by laying out a five-year plan. Historically it has been, tell us what you can accomplish at a modest investment. We will now show Council realistically what it takes to build the project (including costs at each phase) at the standard Council and the community want the project to be built. Council at that time can then scale back the project. We need to look at the five-year plan to see what we can do with the revenue stream and make that five-year listing of projects more of a plan, than just an allocation or lining up based up on priority. And then indicate what resources we see coming from the capital improvement program and what resources don't currently exist. We don't want to create any false expectations of when it's going to happen, and what we need in terms of grants, or donations, or other different revenue sources. In the past there hasn't been that level of detail.

There was discussion of the recommended highest priority capital improvement items, with the City Manager noting that we have a lot of other projects below $100,000 that don't rise to this level of decision-making, but are moving forward.

Councilwoman Cape felt it was important to have a discussion about bond issuance and what that would bring to the table for us in addressing the many needs of our community.

Councilman Newman presented Council with a proposal to maintain the momentum gained through the 90 day ride-for-free promotional campaign by offering a convenient fare-structure for transit ridership. He said the campaign concludes on November 11 and we need to maintain the increased ridership. He said that lower fares result in higher ridership and we need to make it simple for people - buy a pass one time and have unlimited access to service. He explained the comparable situation of parking in Asheville, when it was changed to the first hour fee and monthly and annual parking passes in the parking garages. He felt there are many benefits to his proposal and if we create these attractive new monthly and annual transit pass options, we can market the programs directly to existing customers. If we wait several months and the ridership falls, we will have missed the change to market this option directly to people who we know will use transit if it is convenient and financially attractive. He did say there will be some loss of fare-box revenue, but felt it would be offset by higher state funding levels if ridership remains higher and there will be more revenue generated if ridership increases.

Regarding the transit proposal, Councilman Mumpower didn't think we should evaluate a program in mid-stream and he didn't believe that our parking needs have decreased during this trial period. He didn't mind subsidizing people going to work, to the hospital, or getting groceries, but does have a problem in subsidizing people who are joy-riding on the buses.

Upon inquiry of Mayor Bellamy, City Engineer Cathy Ball said that we have seen an increase in parking since July 1, 2006, and feel we are at a point where we need to start planning for downtown parking in order to meet the needs of the people downtown. We have identified some locations and will be prepared to do a detailed presentation on parking at the October 24, 2006, meeting.

The majority of Council supported placing on Council's October 24, 2006, agenda the (1) budget amendment to enhance development services; and (2) the $2.5 Million budget amendment for a one-time capital funding.

The majority of Council supported moving forward on discussions on how long term capital needs will be presented as outlined by City Manager Jackson, which will be through a series of worksessions.

Councilwoman Cape asked when would be the appropriate time for Council to discuss instructing City staff to seek an alternative bid for a green-roof at the Civic Center. City Engineer Ball said that when we do the Request for Proposals (RFP) for a new roof and if we get direction from Council, we could add an alternative for a green-roof and they will provide us with the cost and time involved with a green roof. Staff will then come back to Council to award the contract and if Council decides to do a green-roof and the amount exceeds the budget, then City staff will come back again with a subsequent budget amendment. She would need authority from Council to add a green-roof as an alternative, noting that including it in the RFP won't cost the City any extra money.

After a brief discussion about the transit fare structure issue and the request that it be considered before the promotional campaign runs out on November 11, the majority of Council directed staff to look further into Councilman Newman's proposal, e.g., how it would affect the budget, what type of budget amendment would be needed, and the amount the City is subsidizing and place the item on the October 24, 2006, agenda. Councilman Newman, liaison to the Transit Commission, also noted that he would solicit the input from the Transit Commission, noting that the Commission meets on October 23, 2006, and staff will compliment the report at the October 24 meeting.

BOARDS AND COMMISSIONS:

Regarding the Sustainable Energy & Economic Advisory Committee's membership, (1) the City Clerk was instructed to prepare a document that Council could give to each interviewee at the time of the interview for each candidate to self-identify which specific category they would fill; (2) the City Clerk was instructed to arrange the following interviews over three different formal meeting days: Robert Sweetser, David Spector, Leah Karpen, Keith Bamberger, Cathy Holt, Marjorie Vestal, Peter Waskiewicz, Christopher Gilbert, Tabetha Reyes, Sasha Vrtunski, John Wilson, Kathryn Gubista, Victor Fahrer, Yuri Koslen, Chad Leatherwood, Mark Mathews, Catherine Shane, Michael Murphy and Bruce Mulkey (noting that Maggie Leslie and Margie Mears are candidates, but no interview is necessary); (3) the City Clerk was instructed to re-open the application process with a December, 2006, deadline in order for Council to actively recruit diversity on this Committee; and (4) the City Attorney was instructed to modify the resolution (a) establishing one of the members being a person representing Progress Energy (to be appointed by Progress Energy); and (b) research the membership resolution to see if the membership is restricted to City residents and report back to Council for possible resolution amendment.

Regarding the Film Commission vacancies, City Council said that attendance and reappointment information was not available and asked that these appointments be delayed until that vital information is received.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:08 p.m.

Tabetha Lipe
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday – October 24, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Mr. Rocko Smucker's First Grade Class from Hall Fletcher School led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 10, 2006, AND THE WORKSESSION HELD ON OCTOBER 17, 2006**

B. **RESOLUTION NO. 06-184 - RESOLUTION AMENDING THE 2006 CITY COUNCIL MEETING SCHEDULE TO DELETE THE COMMUNITY MEETING SCHEDULED FOR OCTOBER 31, 2006**

RESOLUTION BOOK NO. 30 – PAGE 127

C. **RESOLUTION NO. 06-185- RESOLUTION DIRECTING THE CITY CLERK TO PUBLISH A NOTICE OF INTENT TO EXECUTE A LICENSE AGREEMENT FOR SHARED PARKING WITH FAMPROP, LLC. AND AUTHORIZATION OF A REZONING APPLICATION FOR TWO PARCELS ON FAIRVIEW ROAD**

Summary: The consideration of a resolution directing the City Clerk to publish a notice of intent to execute a license agreement for shared parking with Famprop, LLC, and authorization of a rezoning application for two parcels on Fairview Road.

The City of Asheville owns property in Oakley known as Oakley Murphy Park identified as PINs 9657.06-48-8841 & 7385 which parcels are currently zoned RS-8. The parcels are improved with a Police Resource Center, tennis courts, ball field, parking and driveway. There is parking available for 30+ vehicles. During normal business hours the parking spaces are mostly empty as there is little recreational activity then, while after hours the spaces generally are filled as the recreation facilities are utilized

Famprop has acquired property at 723 Fairview Road adjoining the City's property which it proposes to renovate for office space for Families Together, Inc., a for-profit mental health services provider operating in Western North Carolina. Off-street parking for about 25 cars will be

required. Famprop has land on which a parking lot could be constructed; however, that part of the land is currently a green area which provides a natural buffer to the adjoining park. Since the parking lot on the City's property is readily accessible to Famprop's property and the lot is largely unused during the times that Families Together would need parking, it is an efficient and environmentally responsible use of existing infrastructure for Families Together to share the City's parking lot.

Famprop has proposed to enter into a license agreement for the use of the parking spaces and driveway on a non-exclusive basis. The license agreement would provide for an annual fee of $3,000 for a term of three (3) years. In order for Famprop to use the parking spaces it will be necessary for the City's parcels to be rezoned Office District.

Approval of the resolution will direct the City Clerk to publish a notice of intent to enter into the License Agreement and authorize the City Manager to sign an application for rezoning.

Pros:

1. The City will receive revenue that it does not currently receive.
2. Parking spaces that are currently vacant during business hours will be used.
3. It is an efficient use of existing infrastructure to satisfy parking standards.
4. Green space will be preserved instead of being converted to parking.
5. The impact on storm water runoff that would be associated with a new parking lot is eliminated.

Parks & Recreation staff, Planning & Development staff and Economic Development staff recommends adoption of a resolution directing the City Clerk to publish a notice of intent to execute a license agreement for shared parking with Famprop, LLC and authorization of a rezoning application for two parcels on Fairview Road.

RESOLUTION BOOK NO. 30 – PAGE 128

Resolution No. 06-136 -

D. RESOLUTION AUTHORIZING FIT COMMUNITY SIGN PANELS TO BE INSTALLED AT "WELCOME TO ASHEVILLE" SIGNS LOCATED ON STATE-MAINTAINED ROADS

Summary: The consideration of a resolution authorizing Fit Community sign panels to be installed at "Welcome to Asheville" signs located on state-maintained roads.

The City of Asheville was recently designated a Fit Community, a designation recognizing North Carolina communities that have excelled in promoting healthy lifestyles among their residents in areas of physical activity, healthy eating in schools and community, and tobacco prevention efforts with youth. Asheville is one of the first communities in North Carolina to receive the Fit Community designation.

Fit Together, a statewide initiative by the North Carolina Health and Wellness Trust Fund and Blue Cross and Blue Shield of North Carolina to combat obesity and overweight, launched the Fit Community program in 2005 to reward communities for supporting healthy life styles through healthy eating, physical activity and tobacco free living through policy and community infrastructure.

A benefit of designation is the posting of Fit Community sign panels to be installed at "Welcome to Asheville" signs located on state-maintained roads that will be provided by Fit Community and installed by the local division of the Department of Transportation.

Pros:

- Asheville's Fit Community designation will be proudly displayed at the major gateways into the city on state maintained roads.
- Fit Community panels will be provided and installed at no expense to the City of Asheville.

Cons:

- None

The Asheville Parks and Recreation Department recommends City Council to adopt a resolution authorizing Fit Community sign panels to be installed at "Welcome to Asheville" signs located on state-maintained roads.

RESOLUTION BOOK NO. 30 – PAGE 129

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Freeborn and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CHANGING THE STREET NAME OF "GENERAL AVIATION DRIVE" TO "WRIGHT BROTHERS WAY"

RESOLUTION NO. 06-187- RESOLUTION CHANGING THE STREET NAME OF "GENERAL AVIATION DRIVE" TO "WRIGHT BROTHERS WAY"

Mayor Bellamy opened the public hearing at 5:07 p.m.

Ms. Abby Moore, Emergency Address Coordinator, said that this is the consideration of a resolution renaming the existing street of "General Aviation Drive," located off Airport Road, to "Wright Brothers Way." This public hearing was advertised on October 13 and 20, 2006.

The Asheville Regional Airport Authority has petitioned the City of Asheville to rename "General Aviation Drive" to "Wright Brothers Way." As the Airport expands, the Authority will look at additional roads and petition for naming to other historical aviation figures. City staff has reviewed the proposed name and found no conflicts that would impede emergency service response. The primary purpose of establishing a name for any street is to facilitate emergency response. Staff researched the street data and has determined that this name is not duplicated. The adoption of the new street name is to enhance emergency response to the citizens and for easy of use for the Asheville Regional Airport Authority.

Pros:

- The street will be utilized to access the existing business and infrastructure to the Asheville Regional Airport Authority.
- Assignment of specific addresses, utility connection, and potential emergency response will be enhanced with specific the street name.

Cons:

- There are no negative affects of for assignment of "Wright Brothers Way" to this existing road.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the city's strategic operation plan. This action complies with the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure: Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

City staff recommends City Council adopt a resolution renaming the existing street of "General Aviation," located off Airport Road, to "Wright Brothers Way."

Mr. Fred English felt we should name our streets after people who promote Asheville.

Mayor Bellamy closed the public hearing at 5:09 p.m.

When Councilman Davis felt that we have a number of very important people in aviation locally, Ms. Moore responded that the Airport does have other roads which can be named after Asheville aviators.

Mr. Kevin Howell, member of the Airport Authority, described the process in which the Authority looked at several different names, ultimately requesting the name "Wright Brothers Way." Regarding the names on the aviations pilot wall at the Airport, Airport staff felt it was unrealistic to pick one name out of the over 50 names on the wall.

There was a brief discussion about asking that the Airport Authority re-visit the issue and consider renaming the road after a local aviator.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower felt that since there are other streets that can be named after our local aviators and because the Airport Authority is a body that is advisory to City Council, he moved to approve renaming "General Aviation Drive" to "Wright Brothers Way." This motion was seconded by Councilwoman Cape and carried on a 4-3 vote, with Vice-Mayor Jones, Councilwoman Cape, Councilman Freeborn and Councilman Mumpower voting "yes" and Mayor Bellamy, Councilman Davis and Councilman Newman voting "no."

RESOLUTION BOOK NO. 30 – PAGE 130

B. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED ON 2 IRIS STREET FROM COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY/CONDITIONAL ZONING FOR 84 RENTAL UNITS

Mayor Bellamy said that the petitioner has withdrawn his application on this matter and no public hearing is necessary.

C. PUBLIC HEARING TO AMEND THE CITY'S 2006 CONSOLIDATED ACTION PLAN TO INCLUDE A NEW COMMUNITY DEVELOPMENT BLOCK GRANT OF $160,000 TO THE HOUSING AUTHORITY OF THE CITY OF ASHEVILLE FOR CONVERSION OF VACANT PUBLIC HOUSING UNITS AT PISGAH VIEW APARTMENTS INTO A COMMUNITY SERVICES CENTER

RESOLUTION NO. 06-188- RESOLUTION AMENDING THE CITY'S 2006 CONSOLIDATED ACTION PLAN TO INCLUDE A NEW COMMUNITY DEVELOPMENT BLOCK GRANT OF $160,000 TO THE HOUSING AUTHORITY OF THE CITY OF ASHEVILLE FOR CONVERSION OF VACANT PUBLIC HOUSING UNITS AT PISGAH VIEW APARTMENTS INTO A COMMUNITY SERVICES CENTER

Mayor Bellamy opened the public hearing at 5:18 p.m.

Community Development Director Charlotte Caplan said that this is the consideration of a resolution to amend the 2006 Consolidated Action Plan to include a new Community Development Block Grant (CDBG) grant of $160,000 to the Housing Authority of the City of Asheville for conversion of vacant public housing units at Pisgah View Apartments into a Community Services Center. This public hearing was advertised on October 13 and 20, 1006.

The Housing Authority of the City of Asheville (HACA) has requested a CDBG grant to convert six vacant public housing units in Pisgah View Apartments to create a community services center which will house a range of educational and family self-sufficiency programs. The housing units are surplus to needs because of diminished demand for 4-bedroom apartments.

Services will include:

- "I Have a Dream" program – long term mentoring, tutoring, and enrichment assistance for 40 low-income children from elementary school through college
- ARP/Phoenix parenting classes
- A-B Tech GED program
- "Project MARCH" life skills counseling for parents and youth by Children First
- West Riverside Weed & Seed program office

These programs will not only benefit Pisgah View residents but also support the City's Weed & Seed initiative, which covers the entire West Riverside area.

To meet code requirements for educational uses, extensive renovations are needed. At this stage only 4 of the 6 apartments in the building will be converted, creating two community service units. The requested $160,000 CDBG grant will leverage $335,000 in HACA funds, for a total project cost of $495,000 ($100 per square foot).

Architectural plans for the project are almost complete, and construction should start early in 2007, with completion in the summer of 2007

Because of loan payoffs received late in Fiscal Year 2006, we currently have $251,099 in unallocated CDBG program income.

Pros

- Substantially enhances the delivery of educational and self-sufficiency programs in our largest and, by some measures, most troubled public housing development.
- Supports the Weed & Seed program and provides space for the Weed & Seed office
- Commits unallocated CDBG funds to a fast-moving project, improving our spending rate

Cons

- A large grant which uses up most of the unallocated CDBG funds, diminishing the City's ability to respond to other urgent needs for the remainder of the fiscal year.

Staff recommends approval of a resolution to amend the City's 2006 Consolidated Action Plan.

Mr. Walter Plaue felt that this money should be used strictly for affordable housing needs and not a community center.

Ms. Robin Merrill, Senior Staff Attorney at Pisgah Legal Services, urged Council to support this initiative. She explained the community center is not only for Pisgah View residents but the entire Weed & Seed service area, which covers the entire West Riverside area. She felt that investing $160,000 of CDBG money is worth the effort of being part of the entire solution to save 252 units of affordable housing at Pisgah View since HUD is changing the way they are subsidizing housing. Over the past two years, they have gotten a great deal of input from the residents at the Burton Street Community Center and at Pisgah View and they want to see their neighborhoods and their quality of lives improved.

Mr. Fred English felt that the vacant apartments should be remodeled because having a place to live is more important than having a community center.

Rev. Christopher Chiaronmonte urged Council to build public restrooms in the downtown area.

Mr. David Nash, Deputy Director of the Housing Authority, said that currently at Pisgah View Apartments there are 83% of residents earning less than $15,120 annually; many hard working families, many with small children, have special needs; serious crime problems documented by over 2,300 Asheville Police Department (APD) calls in the last year; and the Housing Authority is currently with the APD to develop new crime prevention strategies. This proposal supports the West Riverside Weed & Seed Initiative with CDBG bricks and mortar investment. City staff requested renovated office space for Weed & Seed Coordinator and other service providers (Children First/Project MARCH, I Have a Dream, Sisters of Mercy/ARP Phoenix, GED Program) need more functional space as well. After consultation, the Housing Authority jointly developed a plan that supports these important community services programs and facilitates their close collaboration with the Weed & Seed Coordinator. The CDBG request is $160,000 and the Housing Authority will match the CDBG funds 2 for 1. In addition, they will seek additional funding necessary to complete Building 16 renovations.

Ms. Laurie Newman, Burton Street resident, spoke in support for this initiative.

Mayor Bellamy closed the public hearing at 5:39 p.m.

Councilman Mumpower was convinced that we have to care about and uplift people, especially in public housing, but he has trouble in throwing money and bureaucracy at deep, serious problems and hope it will fix them. He felt that we are using CDBG money to reduce our housing stock, not to add to it. He doesn't disagree with the need, but disagrees with the approach. He felt that $500,000 is a good deal of money that can be put into special efforts, like law enforcement. He did feel that there is a tremendous need for 4-bedroom apartments in Asheville, but no parent who has the choice would go to Pisgah View because they are afraid, and we are not on top of law enforcement in public housing. He felt that we need more people and communities involved and must have a stronger law enforcement presence there.

Councilwoman Cape felt that the community needs a place for people to meet. When people can come together, support one another and build community, then you can build places where people want to live. It's unfortunate that we have a place where 4-bedroom apartments are vacant because there is no sense of community there. But, we have to help this community build community with proven programs and she felt this is a good investment to do just that.

Upon inquiry of Mayor Bellamy, Mr. Nash said that the 4-bedroom units have been vacant for at least 8-9 years. He said that at one time there was a plan to rehabilitate this building by the WNC Community Health Services for a clinic; however, they renovated a different building on Haywood Road instead. He noted that the Housing Authority does not receive applications, by those who quality under the HUD guidelines, for 4-bedroom apartments.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it will not be read.

Councilman Freeborn moved for the adoption of Resolution No. 06-188. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 131

D. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR THE DOUBLETREE HOTEL, LOCATED AT 117 HENDERSONVILLE ROAD, FOR AN EXPANSION OF THE EXISTING HOTEL AND TO PURSUE A HEIGHT MODIFICATION

ORDINANCE NO. 3349 - ORDINANCE APPROVING A CONDITIONAL USE PERMIT FOR THE DOUBLETREE HOTEL, LOCATED AT 117 HENDERSONVILLE ROAD, FOR AN EXPANSION OF THE EXISTING HOTEL AND APPROVAL OF A HEIGHT MODIFICATION

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 5:51 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Blake Esselstyn submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Esselstyn said that this is the consideration of the issuance of a conditional use permit for Doubletree Hotel, located at 117 Hendersonville Road, for an expansion of the existing hotel and to pursue a height modification.

He said that this review concerns a proposed five-story addition to an existing Doubletree Hotel. The hotel shares a site with a T.G.I. Friday's restaurant as well as a second hotel, a Sleep Inn (Attachment to City Exhibit 3 - Location Map). The addition is proposed at 39,208 feet, which, when combined with the existing 104,340 square feet, requires a level III site plan review (Attachment to City Exhibit 3 - Aerial Map). The facility would provide a new entrance, meeting space and waiting area as well as 37 additional rooms.

The site is located in a Highway Business zoning district within the corporate limits of the City of Asheville, on the west side of Hendersonville Road, just south of Biltmore Village (Attachments to City Exhibit 3 - Photographs of Existing Conditions and Front Elevations). There are vehicular accesses from both Hendersonville Road and Vanderbilt Road. The proposed addition would be on the side of the existing Doubletree building farthest from Hendersonville Road. One portion of the affected parking lot area lies in the jurisdiction of the Town of Biltmore Forest. The parking lot modifications in that area were approved by the town's Board of Adjustment and Design Review Board in September.

Lodging facilities are a permitted use in the Highway Business zoning district, and the building's size falls below the 200,000 square foot limit for multi-tenant structures. The scale of the proposed modifications to the site requires that the entire site be reviewed for compliance.

As a multi-tenant structure over 75,000 square feet, the proposed development must also address the conditions outlined in Sec. 7-16-2(d)(10)(a): Employ high quality building design; Blend building design and layout with other site features; Avoid bland and monotonous building design; and Ensure that buildings contribute to the community character of the City. Staff did not feel that the initial submission adequately addressed these conditions, but the applicant has since conferred with staff submitted revised elevations. Planning staff opinion is that the revised elevations sufficiently address these conditions while providing an appropriate match to the existing hotel's structure.

At their October 2, 2006, meeting, the Technical Review Committee (TRC) approved this project subject to the conditions in the staff report. At their October 4, 2006, meeting, the Planning and Zoning Commission voted unanimously to recommend approval, with the understanding that building height be noted as an issue and that any architectural modifications to the façade should take this into account.

The proposed building height is approximately 67 feet, higher than the 60-foot maximum typically applied to the Highway Business district (Attachments to City Exhibit 3 - Overall Site Plan; Front and Rear Elevations; Left Side Elevation and Right Side Elevation). Thus, approval of the building will require City Council to grant a modification to the height standard for this project. Staff is of the opinion that the structure's position on land below the surrounding roads makes the proposed (relatively small) height increase above the normal limit a reasonable proposition.

The project will include the addition of roughly 1200 feet of sidewalk along Hendersonville Road. The applicant is currently in discussion with the City of Asheville Engineering Department about an alternative to the 5-foot wide sidewalk and 5-ft wide grass strip adjacent to the road (required in the TRC Staff Report), so as to minimize the loss of some of the mature evergreen trees on the property.

The one communication that staff has received from a neighbor regarding this project was a letter from the Zoning Administrator of the Town of Biltmore Forest, received the day of the Planning and Zoning Commission hearing. The letter expressed concerns about the height of the building and encouraged the preservation of an extensive tree buffer. Since the height of the building would be located so close to the Town of Biltmore Forest, if a variance were granted, they felt if there was extensive tree buffering, it would be beneficial to the Town of Biltmore Forest

and the City of Asheville. This letter was discussed at some length during the Planning and Zoning Commission meeting, where a representative for the Town of Biltmore Forest was in attendance.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
This has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
The area of the property on which the building would occur is flat and has previously been paved, graded, or built upon. Only a small amount of open space will be affected by the addition of required parking spaces. The building site's lower elevation relative to the surrounding roads and terrain reduce the perceived mass of the structure. The proposed project is thus compatible with the topography and natural features.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
Staff feels that the proposed project would have no discernible effect on surrounding property values.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The proposed project would be in proximity to other large hotels and buildings, as well as the interstate, and would be in harmony with the neighboring area.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The *Asheville City Development Plan 2025* includes a series of Smart Growth Land Use Policies. The second of these states that "Compatible, higher density commercial … infill development should be encouraged." It can be argued that the proposed project complies with this policy. Further, one of the long-term goals of the Strategic Operating Plan is increased street and sidewalk connections. This project would provide a significant sidewalk extension along Hendersonville Road.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The project's location off Hendersonville Road ensures access to major transportation facilities and other services. Transit route 6 serves the area, passing immediately in front

of one entrance to the site. In addition, technical review from other departments has not revealed any problems for serving the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- High density infill development and significant addition of sidewalk would further goals of City of Asheville comprehensive plan, smart growth policies, and strategic operating plan.
- Project would require a special modification to the height standard.
- Neighboring land closest to the building is all owned by the applicant.
- Town of Biltmore Forest has expressed concern about the height of the proposed building.
- Applicant has improved façade design to address conditions in ordinance for large structures.

Staff recommends approval of the proposed project and Conditional Use Permit subject to the conditions in the TRC staff report. Staff also recommends approval of the modification to the dimensional (height) standard for this project.

After rebuttal, Mayor Bellamy closed the public hearing at 6:02 p.m.

Councilman Mumpower moved for the adoption of Ordinance No. 3399, granting a conditional use permit adopting the proposed Master Plan, with the requested modification to the zoning district's height standard, for the Doubletree Hotel, located at 117 Hendersonville Road, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department; and (5) At the direction of the Planning Director, this Project will be reviewed by the TRC prior to issuance of any building [or grading, etc....] permits. This motion was seconded by Councilman Freeborn and carried unanimously.

ORDINANCE BOOK NO. 23 – PAGE 112

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. **RESOLUTION NO. 06-189- RESOLUTION APPROVING A $500,000 HOUSING TRUST FUND LOAN TO SHELTER DEVELOPMENT, LLC, FOR THE DEVELOPMENT OF 63 UNITS OF AFFORDABLE SENIOR RENTAL HOUSING ON SPRINGSIDE ROAD**

Ms. Adria Hardy, Community Development Analyst, said that this is the consideration of a resolution approving a $500,000 Housing Trust Fund (HTF) loan for the development of 63 units of affordable senior rental housing.

Shelter Development, LLC plans to build 63 one- and two-bedroom apartments for the elderly on Springside Road in South Asheville, using a combination of Low Income Housing Tax Credits (LIHTC), this HTF loan, and HOME funding.

The developer was previously awarded $300,000 in HTF funds in March, 2006 for an 84-unit development on the same site. The HTF commitment was withdrawn when the project failed to win an LIHTC award and could not proceed as planned. The developer has now revised the project to be more competitive in the LIHTC process and plans to apply again for tax credits in January, 2007. Additionally, Shelter Development plans to submit an application for $300,000 in 2007 HOME funds. The combined value of the local HTF and HOME investments will earn crucial additional points for the project in the state-wide tax credit competition.

Tenants will have income below 60% of area median income and the rents will be below 110% of HUD fair market rents, qualifying the project for the most favorable HTF loan terms. The terms requested are 2% annual interest-only payments with principal deferred for 30 years.

The application was evaluated by a panel of outside experts and staff and scored well against the HTF criteria. Shelter Development has an excellent track record with LIHTC projects and other senior housing developments nationwide. The proposed rents are very affordable and the LIHTC rules guarantee 30 years of continued affordability.

The development cost of $133,000 per unit is higher than some other projects, but the cost will cover many amenities for the senior residents including a wellness center, exercise room, dining area, and beauty salon. The LIHTC application process is lengthy and awards will not be made until July, 2007. However, if tax credits are awarded, it is very likely the development will proceed successfully. Housing Trust Funds will not be released prior to the award of tax credits.

The Housing and Community Development Committee reviewed the application on October 9, 2006, and has recommended awarding a HTF loan in the amount of $500,000 at the terms requested.

Currently, just over $1,200,000 remains uncommitted in the Housing Trust Fund.

Pros:

- Creates 63 units of new affordable housing for seniors
- 30 years of continued affordability is assured.
- Project will increase tax base, adding approximately $20,000 a year in City taxes alone.

Cons:

- Ties up $500,000 of HTF for eight months before results of LIHTC competition are known.

Staff recommends approval of a resolution approving a $500,000 Housing Trust Fund (HTF) loan for the development of 63 units of affordable senior rental housing.

When Councilman Freeborn asked if there were any other pending applications, Ms. Hardy said that the City does not have any applications currently on file.

Councilman Mumpower didn't want to speak against affordable housing for the elderly, but what he can speak against is that we allocate almost $1 Million of City tax dollars into the Housing Trust Fund and mostly people who support that do not have access to wellness centers, exercise rooms, dining areas and salons. In addition, a portion of this money is coming from the federal government and at a time of unprecedented federal deficits, for us to be building at this level is out of touch with reality.

Mayor Bellamy explained that this is a loan request only, which will be paid back to the City. Ms. Hardy noted that the developer will be making annual interest-only payments of $10,000 a year. Over the 30 years that will be $300,000 coming back and then the lump sum of $500,000 and the end of 30 years for a total re-payment of $800,000.

At the request of Councilwoman Cape, Community Development Director Charlotte Caplan explained the low income housing tax credits and how they work.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 06-189. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 132

B. RESOLUTION TO COMMIT FEDERAL LOAN AND GRANT FUNDS FOR THE REDEVELOPMENT OF PROPERTY ON EAGLE AND MARKET STREETS

Mayor Bellamy said that this item has been removed from the agenda at this time.

C. RESOLUTION NO. 06-190- RESOLUTION ESTABLISHING ELIGIBILITY AND COST FOR RETIREE HEALTH BENEFITS UNDER THE CITY OF ASHEVILLE SELF-INSURED HEALTH PLAN FOR EMPLOYEES HIRED ON OR AFTER JANUARY 1, 2007, AND TO ADOPT CHANGES IN SUBSIDY RATES FOR EMPLOYEES HIRED ON OR BEFORE DECEMBER 31, 2006, WHO UPON RETIREMENT HAVE ACCESS TO COVERAGE THROUGH THEIR SPOUSE

Human Resources Director Lisa Roth said that this is the consideration of a resolution establishing eligibility and cost for retiree health benefits under the City of Asheville self-insured health plan for employees hired on or after January 1, 2007, and to adopt changes in subsidy rates for employees hired on or before December 31, 2006, who upon retirement have access to coverage through their spouse.

Retirees with access to other health insurance coverage through their spouses (or through Medicare or their own post-retirement employment) are not subsidized by the City to the same extent as retirees who have no access to other coverage. This means that individuals with the same length of service to the City may pay different amounts for their health insurance. This is perceived as an inequity to retirees of the City. Council asked for options about how to approach this issue.

In addition, given the effect of GASB 45 and the increasing costs of health insurance, staff considered how the City might approach, in an equitable way, providing retiree health benefits to future employees.

Resolutions passed by Council over the years have, since 1984, provided that retirees who have access to other coverage through their spouse could stay on the City health plan, but would not have their coverage subsidized by the City.

Recently, this provision was brought before Council as being unfair because two employees who worked for the City for the same amount of time paid different rates based on whether their spouses worked and had insurance coverage. Pursuant to discussion during a Council work session on October 17, 2006, Council wishes to formally consider the following proposal.

For current employees and future employees with a date of hire on or before December 31, 2006, the current resolutions will apply except that for employees who retire on or after January 1, 2007, who have access to other coverage through their spouse, the City will increase its subsidy from zero to a percentage based on years of service with the City of Asheville according to the following table.

YEARS OF SERVICE with COA	PERCENT OF SUBSIDY (Not of Premium)
25 or more	100% of subsidy
20 but less than 25	80% of subsidy
15 but less than 20	65% of subsidy
10 but less than 15	55% of subsidy
5 but less than 10	50% of subsidy
Less than 5	No subsidy

For future employees, with a date of hire on or after January 1, 2007, who retire from the City under the Local Governmental Employees Retirement System, whether through full service retirement, early retirement or disability retirement, the percent of the subsidy for any employee, with or without coverage available through their spouse, will be based on years of service with the City of Asheville, using the same chart. As is the case currently, employees with coverage available through Medicare, Medicaid or their own subsequent employment will continue to be permitted to remain under the plan, but at completely unsubsidized rates.

She said that the input received from 48 current employees were all favorable for Option 5.

Considerations:

On the positive side, the proposed resolution eliminates the perceived inequity for current employees who retire on or after January 1, 2007, with 25 years of service or more with the City of Asheville. It also reduces the inequity for current employees who retire on or after January 1, 2007, with at least five but fewer than 25 years of service with the City of Asheville. As this is an improvement to the current provisions, there should be no "conditions of employment" issues.

Also on the positive side, the proposed resolution with respect to employees with a date of hire on or after January 1, 2007, will have the long term effect of reducing retiree health costs by approximately 20% as those employees reach retirement. The new system will provide a fair and defensible plan based on the amount of time the employee provided services to the City of Asheville and its citizens.

On the negative side, the proposed resolution could increase health care costs by up to $24,000 per year, cumulative to as much as $240,000 per year based on current dollars, depending on the number of employees who have access to coverage through a spouse who decide to keep coverage through the City, until such time as all current employees retire and reach age 65.

City staff recommends that City Council approve a resolution establishing eligibility and cost for retiree health benefits under the City of Asheville self-insured health plan for employees hired on or after January 1, 2007, and to adopt changes in subsidy rates for employees hired on or before December 31, 2006, who upon retirement have access to coverage through their spouse.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 06-190. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 133

D. MOTION TO WAIVE THE PARKING FEES FOR THE FILMING OF "DON'T FADE AWAY"

Councilwoman Cape, member of the Film Commission, said that at the worksession held on October 17, 2006, discussion occurred about providing an economic development incentive to a film production company due to begin filming in downtown Asheville. At that meeting, the majority of Council supported adding an item to the October 24, 2006, agenda waiving parking meter fees in specific downtown locations for 10 days of filming.

The Line Producer of "Don't Fade Away" explained why they are asking for the waiving of the parking fees.

Mr. Fred English questioned with City of Asheville taxpayers will get if they waive the parking fees.

Councilman Mumpower felt that this is not an incentive, but a bonus and it comes out of the taxpayer pockets. He was glad they were here, but we are already providing them with a lot of amenities that cost money, e.g., streets, lights, police, etc. and he has trouble with adding another bonus to those services we are providing already.

Vice-Mayor Jones confirmed that if we waive the parking fees, that means we are not collecting the parking fees; therefore, that is coming out of the enterprise fund of parking, not coming out of the general taxpayer fund.

Councilman Freeborn noted that the budget for the film is approximately $1.65 Million and they plan on spending roughly $800,000 in our region with an economic impact of $2 Million into our regional economy.

Councilman Newman said that it is his understanding that we have done this before and he hoped Council does move forward in developing a policy for everyone to see in advance. He felt this is a very modest thing a city can do to encourage the film industry to do business in Asheville. However, the downtown business people are concerned when parking is lost. He did want the City to keep the loss of downtown parking spaces to a minimum because taking away a lot of street parking has a very significant impact on the businesses that are open near them.

Councilman Freeborn moved to waive the parking fees, in the amount not to exceed $3,000, for the filming of "Don't Fade Away." This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

At 6:30 p.m., Mayor Bellamy announced a 30-minute recess in which City Council will be traveling to the funeral home to honor the memory of former Councilman Herbert J. Watts, who recently died. After said recess, City Council will go into closed session and will return to the formal meeting at 7:30 p.m.

At 7:11 p.m., Councilman Mumpower moved to go into closed session to discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11(a)(4). This motion was seconded by Vice-Mayor Jones and carried unanimously.

At 7:18 p.m., Councilman Newman moved to come out of closed session. This motion was seconded by Councilman Mumpower and carried unanimously.

E. RESOLUTION ADOPTING THE DOWNTOWN PARKING ACTION PLAN INCLUDING THE SCHEDULE AND FUNDING STRATEGY FOR THE PURPOSE OF PROVIDING PUBLIC PARKING

City Engineer Cathy Ball said that this is the consideration of a resolution adopting a downtown parking action plan including the schedule and funding strategy for the purpose of providing public parking as follows:

Item	Description	Schedule	Estimated Total Costs*
1	Evaluate adding levels to Rankin Street Parking Garage	Completed	N/A
2	Evaluate demo and reconstruction of existing parking garages	Completed	N/A
3	Evaluation of parking option in the Battery Park area	Completed	N/A
4	Continue due diligence of proposed parking garage on Haywood Street across from Basilica	By June 2007	$23 M
5	Surface parking on North Lexington	By May 2007	$15,000
6	Surface parking on Cherry Street	By May 2007	$25,000
7	Temporary surface parking on Haywood Street to include the demolition of existing structures	By June 2007	$200,000
8	Public/Private partnership on Cox Avenue to include public parking	By June 2007	$3.5 M
9	Public/Private partnership on Biltmore Avenue to include public parking	By June 2007	$5 M**
10	Park side parking initiative	On-going	$10 M**
11	Continue to evaluation of parking fee impact	On-going	N/A

* Estimated total costs –These costs include previous expenditures and estimated future costs. Due to escalating construction costs these are subject to change.

** These are subject to change depending on financing options such as tax increment financing.

The demand for parking in the downtown sectors of the city continues to grow. Original projections for growth in demand have proved to be too low in the present fiscal year. Parking demand for monthly permitted spaces has reached equilibrium very close to the total sold in fiscal year 2006 in spite of higher rates. Transient parking is increasing at an annualized rate of 10% during this fiscal year. The Civic Center deck, historically one of the least used facilities, has twice experienced a full condition during the month of October. Other than during events where special event fees apply, this has not happened before. Last year during the month of September the Rankin deck, the most popular deck, experienced full conditions for 8 hours. This September the Rankin deck experienced 45 hours of full condition.

Staff has been evaluating several options for increasing parking in downtown. We have evaluated adding floors to the existing parking garages. While Rankin Street Parking Garage was originally designed to be expanded by two levels, the building code requirements for this structure have changed significantly making this option cost prohibitive.

The best option for increasing parking in the current garages is to demolish the existing garages and rebuild. Staff does not recommend this option until additional parking is available due to the loss of parking during demolition and construction.

The proposed parking garage on Haywood Street across from the Basilica may still be a viable option. In order to determine this possibility, staff would need to reengage in negotiations with the Catholic Church and National Church Residents. In addition, part of the due diligence would include working with HUD to evaluate mitigation options for the Battery Park Apartment Residence.

Staff has developed a parking program that identifies several projects to increase parking in downtown Asheville. These projects include:

- Pave and landscape parking lot on the north side of Lexington Avenue.
- Implement monthly parking on Cherry Street.
- Utilize City owned property to leverage parking on Haywood Street. (Explore option of providing temporary surface parking in this area.)
- Formulate public/private partnerships for multiuse parking facility on Biltmore Avenue and Cox Avenue.
- Participate in the development of the park side development plan to include necessary parking for the City/County area.
- Continue to evaluate parking fee structure to determine impact on the system.

We anticipate that the parking fund will contribute approximately $850,000 to a capital reserve fund this fiscal year. This money will allow us to fund the initiatives listed above. We anticipate that most if not all of this money will be used in debt service for new facilities and maintenance improvements to the existing decks.

In Fiscal Year 2009 the City will have paid the debt service for the Rankin and Wall Street Garages. This will allow an additional $630,000 to be available for capital improvement funding.

Pros:

- Will allow staff to begin to move the process of forming partnerships and parking acquisition forward for council's final approval.
- Provide for needed public parking in Downtown Asheville.
- Allow for continued economic sustainability in the area.

Cons:

- Options will require a significant financial commitment. Staff will bring these costs to Council prior to executing any agreements.

Staff recommends approval of a resolution adopting the downtown parking action plan including the schedule and funding strategy for the purpose of providing public parking.

Mr. Bill Maloney, business owner in the Haywood Park Hotel, urged Council to not look at building a parking garage on Haywood Street across from the Basilica, but look at something more creative near-by. He suggested Council enhance the Basilica by converting the City-owned property into a park.

Ms. Julia Brandt said that last year thousands of people signed a petition urging City Council to not build a parking garage across from the Basilica and all the reasons are still valid today. She felt that Council should look at parking on a larger scale rather than lumping all the parking garages together. She suggested the City look at satellite parking and extends the on-street parking meter hours longer than 2 hours. She also suggested the City look at partnering with other businesses downtown to use their existing parking for public use as well.

Mr. Fred English felt that the City had enough parking decks in Asheville and suggested adding a deck or two to the existing decks.

Mr. Roger Smith, resident at the Battery Park Apartments, said that the residents at the Battery Park Apartments are concerned with their health, safety and security if a new deck is built across from the Basilica. He urged Council to not build in that area and suggested a park as well.

Ms. Mary Selby was also concerned about the possibility of building a parking deck in front of the Basilica. She felt that when there is an event at the Civic Center, traffic will be dangerous. She suggested building a parking deck on the edge of Asheville and provide easy transportation to the Grove Arcade, Civic Center, etc. which would help Asheville be walker-friendly.

Mr. Dwight Buckner urged Council to consult with the Downtown Commission and ask for assistance with an overall development parking plan.

Councilwoman Cape wanted to remove the City continuing their due diligence of the proposed parking garage on Haywood Street across from the Basilica from the Downtown Parking Action Plan. She did support the idea of an overall development parking plan. She felt the City should look at creative options that we have available that are non-standard, i.e., building parking decks on top of the interstate.

Councilman Newman felt that in front of the Basilica is a problem site. He wondered about what public parking opportunities there were to partner with Buncombe County, since they are in the process of building a deck near the Health Department and also parking on Cox Avenue.

Ms. Ball responded to Councilman Newman about the pros and cons of stripping the surface parking on Cherry Street, noting that there hasn't been a project budget set up for that yet.

Councilman Freeborn also supported a comprehensive parking plan. He too felt the City should remove the proposed parking garage across from the Basilica. He suggested a community charette to ask people what they would like on that particular piece of property.

Ms. Ball responded to Councilwoman Cape about the temporary surface parking on Haywood Street, including the demolition of existing structures.

Vice-Mayor Jones recommended deleting the proposed parking garage across from the Basilica too. She suggested adopting the Downtown Parking Action Plan (minus the parking garage on Haywood Street) in addition to adding another initiative to the Plan - begin a comprehensive transportation demand study for downtown. She was ready to start working on the other opportunities in the Plan at the same time endorsing the idea of the comprehensive plan.

Ms. Ball responded to various questions/comments from Councilman Mumpower regarding the proposed parking garage across from the Basilica, some being, but are not limited to: what the City has spent to date on this site; the risk factors of the Basilica; where is our primary need for parking in downtown; did the City made a commitment to the Grove Arcade to provide parking; what is the percentage of people who drive vs. walk; when was the last time the City developed a comprehensive parking plan; explanation of our parking fund; does demolition of an existing building or new construction create more of a risk factor; can a parking garage be demolished without explosives; and is there any realistic property in that vicinity for a parking garage.

Councilman Mumpower could not support deleting the proposed parking deck across from the Basilica because that is where the need is, that is where the research shows where we need one, and that is where the opportunity is.

Councilman Davis personally would not like to see the parking garage across from the Basilica, but felt we should keep it in the plan because to remove it may limit the future growth of the City. He noted that in Greenville, S.C., they have adequate parking which is camouflaged. He felt we may be a little past the comprehensive plan at this point because we are not developing an entire city, but felt it was very important to consider the Downtown Commission, Downtown Association and stakeholders in whatever is done with the parking.

Ms. Ball responded to Councilman Davis about the land near the Civic Center on Rankin Street and the possibility of working with Progress Energy on the land their transformer station sits on.

Mayor Bellamy agreed that we need some additional parking downtown, and supported looking at public/private partnerships. She would not support another study in that staff has looked at where we need parking and we need it throughout downtown. She suggested looking into partnership opportunities for (1) the land behind the Sheriff's Department; (2) the land on Carter Street; and (3) the parking lot at the Senior Opportunity Center. She wanted to work with whoever owns the Haywood Park Hotel and ask them what their future plans are and that the City is willing to come to the table to talk about parking. She did not support a park across from the Basilica in that the land is too valuable. If no parking deck is to be built on that property, then we should sell the land and use the money to buy another piece of property on which to build a parking deck.

In response to Councilman Mumpower, Ms. Ball said that if the City buys the property independently and does the design work, it would take approximately 18 months to 2 years to begin construction.

Councilwoman Cape said that downtown is not just Haywood Street anymore and our vision of downtown and where we look for parking has to expand as well. In talking with the officials in Greenville, S.C., they said they made a specific effort to locate their parking so people would have to walk by buildings and stores to get to their destinations. We need to have a

willingness to have creative distances for people to travel. She suggested adding to the Downtown Parking Action Plan another initiative - What is the aggressive way to look for who might be willing to sell the City some property. She wanted to know if the City has been exploring the Rankin/Lexington Street area. She also wondered if we have developed relationships with the larger grocery stores at the edge of town for park and rides.

Upon inquiry of Mayor Bellamy, Ms. Ball said that because of the parking needs in downtown Asheville surrounding neighborhoods are being impacted.

When Mayor Bellamy asked what kind of direction staff needed to move forward, Ms. Ball suggested staff be directed to aggressively pursue a partnerships or agreement that would allow the City to begin construction within a year.

Councilman Newman suggested City Council formally ask Buncombe County to join us in looking at parking needs; and to encourage them to fast track some of their potential projects, i.e. Cox Avenue, noting that the City has resources that are set aside for parking that can be used for the City to build their own parking facilities or to provide infrastructure, or other things to enable others to lead on parking or to partner with the City.

Upon inquiry of Councilman Mumpower, Ms. Ball said that she would rely on Council's policy direction concerning re-negotiation with the Church regarding the additional property needed for a proposed parking garage across from the Basilica.

It was the consensus of Council to direct staff to revise the Downtown Parking Action Plan, taking into consideration Council's comments, and come back with a revised Plan for a formal vote.

F. ORDINANCE NO. 3400 - BUDGET AMENDMENT TO FUND STAFF ADDITIONS AND REORGANIZATIONS IN THE PLANNING & BUILDING SAFETY DEPARTMENTS THAT WILL ENHANCE DEVELOPMENT INSPECTION, PLANS REVIEW, CODE ENFORCEMENT AND LONG-RANGE PLANNING EFFORTS EFFECTIVE JANUARY 1, 2007

City Manager Jackson said that this is the consideration of a budget amendment, in the amount of $132,996, to fund January 1, 2007, staff additions and reorganizations in the Planning & Building Safety Departments that will enhance development inspection, plans review, code enforcement, and long-range planning efforts.

City Council recently requested a recommendation about staffing in the Planning and Development Department to achieve the following goals:

- Better manage and track zoning violations, fines, etc.
- Perform zoning field inspections throughout the construction process
- Devote more resources for long range planning

To achieve the goals laid out by City Council, the Planning Department proposes adding three additional positions: a Zoning Enforcement Officer, a Planning & Zoning Technician, and an Urban Planner. The Planning Department will also reorganize and upgrade several existing staff positions. With a January 1, 2007, planned implementation date, the cost of these additions and upgrades for half the fiscal year is $168,019.

In addition to the development review needs in the Planning Department, Building Safety staff has also identified the need to add a Plans Reviewer to focus on small commercial and residential projects. Currently, Building Safety has three commercial plan reviewers and one

residential reviewer. Many small commercial and residential projects could be approved in a very short time if the staff resources existed. Data from the previous three months indicate that we are averaging approximately 16 calendar days to complete plans review for up fits and small remodels in commercial occupancies; this compares to the departmental goal of a 5 calendar day completion time. Turn around time for larger projects would also improve by allowing the other plan reviewers more time for them. The cost of adding this position on January 1, 2007, is $26,175.

The total half-year cost for implementing this development review enhancement proposal on January 1, 2007, is $132,996. (The annualized on-going cost will be approximately $193,500). Finance Department staff recommends that the funding for this service enhancement package come from the additional $346,000 in state utility tax revenue that will be collected in Fiscal Year 2006-07. As indicated in the first quarter financial report, revenue from state utility taxes increased by double digit percentages in the final quarter of Fiscal Year 2005-06 and the first quarter of Fiscal Year 2006-07. Based on this growth, and strong growth in other general fund revenues, staff believes that the $132,996 for this service enhancement can be appropriated without any negative financial impact on the City.

PROS:

- Improvement across a range of development review services

CONS:

- Additional revenue will not go to fund balance

City staff recommends City Council approve the budget amendment to fund staff additions and reorganizations in the Planning & Building Safety Departments that will enhance development inspection, plans review, code enforcement, and long-range planning efforts.

Councilman Mumpower felt that more control requires more staff and more staff requires more tax dollars, which is a vicious cycle he could not support.

Councilman Newman felt that to have effective enforcement of our ordinances and to provide the development community with the staff to move their projects forward he would support the motion.

Councilwoman Cape noted that it's just not enforcement, but the amount of development and projects in the City.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it will not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3400. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no." ordinance Book 23 - page 116

3401

G. ORDINANCE NO. ~~3402~~ - BUDGET AMENDMENT FOR ONE-TIME CAPITAL FUND PROJECTS

City Manager Jackson said that this is the consideration of a budget amendment, in the amount of $2,500,000 to fund high priority capital improvement projects.

As discussed with City Council at the October 17 2006, worksession, staff has identified $2.5 million in one-time funding that is available to augment the capital improvement budget that was approved for Fiscal Year 2006-07. This $2.5 million in funding will come from two sources. At the time of budget adoption, there was approximately $1.5 million in property and sales tax revenue that was not included in the budget. Council directed staff to report back after the first quarter on the possibility of appropriating this funding for capital needs. Based on the City's financial performance through the first quarter, staff is recommending that the additional $1.5 million that was not budgeted in June now be appropriated for high priority capital needs.

In addition, the preliminary year-end audit figures for Fiscal Year 2005-06 show that the City's fund balance will be approximately $23.8 million or 31% of total expenditures. Based on these numbers and staff's projections that fund balance will grow to 34.1% in Fiscal Year 2006-07, staff recommends that Council appropriate an additional $1.0 million from fund balance to help address capital needs; bringing the total available funding to $2.5 million.

Following a prioritization process with the management team, the City Manager is proposing that the projects below receive funding from this $2.5 million:

PROJECTS	Cost
Fire Station 12 - Sand Hill Rd Land	250,000
Civic Center Arena Roof*	900,000
Haw Creek Sidewalks**	370,000
Patton Ave. Sidewalks**	300,000
Fleet Replacement	255,000
Street & Sidewalk Maintenance	200,000
Public Safety Radio Replacements	100,000
Richmond Hill Entrance & Parking Lot	125,000
TOTAL	2,500,000

* Total cost is $1.5 million. $600,000 in funding is already available from prior years' CIP allocation

** The amounts above represent the City's match. The total cost of the projects are: Haw Creek: $700,000; Patton: $450,000

PROS:

- Addresses high priority capital needs that could not be funded when the budget was initially adopted

CONS:

- Additional revenue will not go to fund balance

City staff recommends City Council approve the budget amendment to fund high priority capital needs.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it will not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3401. This motion was seconded by Councilman Freeborn and carried unanimously.

ordinance book 23 - page 110

H. ORDINANCE NO. 3402 - BUDGET AMENDMENT FOR ASHEVILLE TRANSIT FARE STRUCTURE

Transit and Parking Services Manager Bruce Black said that this is the consideration of fare revisions and the provision of evening service for the Asheville Transit System; and the associated budget amendment.

The Asheville Transit System (ATS) is currently operating without charging its customers for use. Council adopted fares as part of the annual budget ordinance which is to become effective November 13, 2006. Council has asked staff to explore the costs, if any, of revising this fare schedule to reduce the approved fares in accordance with a specific proposal. Additionally, a proposal has been made to extend service by one additional hour in the evenings.

The proposed revised fares are lower than the currently approved fares. However, the lower fares are projected to increase ridership beyond the number of trips that are projected to be retained from the fare free promotion, and therefore there will be a slightly increase in revenue over the current budget. When the additional passengers from fare free are considered, the current budgeted fare box revenue is expected to increase by $20,947. If the evening service program is approved, it will add another $1,750 in revenue; producing a total increase in fare box revenue of $22,697.

Due to the increased number of passengers and longer operating hours, staff recommends that enhanced security be maintained for the duration of the year. Also, an additional supervisory position will be needed to help control the system and to better deal with daily operational problems. The fare free period is straining supervisory personnel, and the ability to cope with enhanced ridership for a full year is lacking. The additional passenger loads and longer operating hours are also leading to an increase in maintenance costs. For the remainder of this fiscal year, the total additional cost for the reduced fare program will be $105,000, and the total cost for evening service will be $33,125. Therefore, the total cost of the two programs combined is $138,125.

Since the cost of these two programs ($138,125) exceeds the additional fare box revenue ($22,697) that will be generated, the transfer from the General Fund to the Transit Fund will need to be increased by $115,428 to support the net cost of this proposal. Based on 1st quarter operating results, staff is recommending that the sales tax budget in the General Fund be increased to fund this additional transfer amount.

Pros:

- The revised fares are projected to increase the ridership on the Transit System by up to 60,000 trips above the projected number of trips retained from the fare free promotion. The addition of evening service would add an additional 6,000 trips.

Cons:

- The transit system will experience additional personnel and operations costs in any case. The addition of more passengers as a result of reduced fares and evening service will increase that strain.
- Additional General Fund revenue will not go to fund balance

City staff requests that City Council consider the proposed fare reduction, effective November 13, 2006, as follows: 75-cents cash fare; $1.00 day fare; $7.00 ticket book; $15.00 monthly pass; and $120.00 annual pass.

Ms. Karen Austin, Chair of the Asheville Transit Commission, spoke in support of the proposed fare reduction noting that the proposal will serve the goals they are trying to meet. The Commission voted on this proposal and endorsed changing the price of the monthly passes to $15.00 and that the fare for a single trip be raised to $1.00. They also supported expanding the evening service for one additional hour, which is a viable option for more working people.

When Mr. Fred English asked if there were any calls to the Police Department resulting from problem riders, Mr. Black said that they are in the process of collecting the data on the entire trial period. He said that the interim report did indicate that there were some police calls; however, at the start of the program there was 1 complaint to every 2,000 trips and at the end of September, there was 1 complaint to every 7,000 trips.

Mr. Dwight Buckner endorsed the proposal to extend the bus service one additional hour in the evenings.

City Council then discussed the proposed rates, the subsidy for transit, and the need to have an incentive for regular use of transit.

Councilman Newman moved to approve the following rate structure: $1.00 cash fare per trip with no transfer fees; no day fare; $7.00 ticket book; $15.00 monthly pass; and $120.00 annual pass. This motion was seconded by Councilwoman Cape.

Councilman Newman said that our overarching message is a transit system to both meet the needs of the working poor and for it to function in a way that helps achieve other community goals, like air quality, congestion, and bringing people downtown. As a result of the tremendous rise in the ridership during the Ride For Free Program is makes sense to look at what we can do to encourage people to continue to use transit and that is by adopting a really attractive fare package.

Councilman Freeborn felt the monthly passes can be an incentive for employers to give to their employees to reduce employee parking and free up the spaces for customers.

Councilman Davis felt that the Ride for Free Program should have been completed and evaluated before a new rate structure was proposed; however, he understands the need to improve the transit system for those who really need it. He was concerned though of subsidizing this on the backs of people who have to pay for monthly parking downtown, whether they need to or choose to drive to work.

Upon inquiry of Mayor Bellamy, Councilman Newman felt it would be more appropriate to vote on the proposed rate structure in one motion, rather than vote on each new rate separately.

Councilman Mumpower said that all of Council agrees on the importance of mobility for people, but it's how we provide that mobility and the rate of subsidy. He felt that some of the proposed rates had merit, but to vote on them in one motion, he felt, represented excessive subsidy. In addition, he felt we are proceeding without having the total data within which to analyze the pilot program.

Councilwoman Cape said that we are trying to encourage people to invest with us in our system.

At the explanation by City Attorney Oast that a procedural motion would take precedence over the original motion, Councilman Mumpower moved for a procedural motion to vote on each proposed rate separately.

Councilman Newman then rescinded his original motion.

Councilman Newman moved to establish a $15.00 monthly pass. This motion was seconded by Councilwoman Cape and carried on a 4-3 vote, with Vice-Mayor Jones, Councilwoman Cape, Councilman Freeborn and Councilman Newman voting "yes" and Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no."

Councilman Newman moved to establish a $1.00 cash fare per trip with no transfer fees. This motion was seconded by Councilwoman Cape and carried unanimously.

Councilman Newman moved to establish a $7.00 ticket book. This motion was seconded by Councilman Freeborn and carried on a 5-2 vote, with Councilman Davis and Councilman Mumpower voting "no."

Councilman Newman moved to establish a $120.00 annual pass. This motion was seconded by Councilman Freeborn.

Mayor Bellamy moved to amend the motion that the annual pass be established at $171.00. This motion was seconded by Councilman Mumpower and failed on a 3-4 vote, with Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "yes" and Vice-Mayor Jones, Councilwoman Cape, Councilman Freeborn and Councilman Newman voting "no."

The original motion made by Councilman Newman and seconded by Councilman Freeborn to establish the annual pass at $120.00 carried on a 4-3 vote, with Vice-Mayor Jones, Councilwoman Cape, Councilman Freeborn and Councilman Newman voting "yes" and Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no."

Councilman Freeborn moved to extend the bus service by one additional hour in the evening. This motion was seconded by Councilwoman Cape and carried unanimously.

After Vice-Mayor Jones moved, and Councilman Freeborn seconded the motion, to adopt the budget amendment for the Asheville Transit fare structure, it was the consensus of Council that the individual votes regarding the rate structure and the one hour of additional bus service in the evening were sufficient actions directing City staff to amend the budget accordingly.

VI. OTHER BUSINESS: Ordinance Book 23 - page 125

Councilman Mumpower shared the Asheville Drug Commission's October poster and thanked the Asheville Citizen-Times for printing the posters.

Vice-Mayor Jones thanked the community and individual organizations for their participation in the effort at Carrier Park to plant 35,000 bulbs in remembrance of children who are neglected and abused across North Carolina. She urged the community to continue support of the WNC Child Abuse Prevention Center.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Kyle Ross invited City Council to speak at a gathering to support those who died or were victimized in the City of Asheville or Buncombe County law enforcement incidents. She noted that the date and time has yet to be set, however, she asked Council to contact her if they were interested in speaking.

Mr. Fred English felt that the U.S. Army Reserve Center should have been allowed to lease the City-owned property on Louisiana Avenue for free. He felt the $112,000 a year lease Council approved not long ago could have been used for training instead. Mayor Bellamy said that she would discuss the re-consideration of this matter being brought back up with the City Manager and the City Attorney. Councilman Mumpower supported that matter being reconsidered.

Mr. Chris Pelly, President of the Coalition of Asheville Neighborhoods, explained why he felt the September 15, 2006, letter City Attorney Oast sent to Staples, regarding compliance with the Unified Development Ordinance standards, did not mention that the building was out of compliance for setback standards, signage and pedestrian orientation. He felt the language of the letter held no sense of urgency or purposeness. City Manager Jackson said that he would take the comments by Mr. Pelly under advisement and would welcome any feedback from Council if the letter was not consistent with the direction of City Council. Mayor Bellamy noted that the third-party review matter will be coming back to City Council in November.

VIII. ADJOURNMENT:

- Mayor Bellamy adjourned the meeting at 10:02 p.m.

Tarra Lipe
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday – November 14, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Co ncilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manage Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. AWARD

Ms. Susan Roderick, representing Quality Forward, presented the City of Asheville and the Transit Commission with the Hall of Fame Award for working together to increase transit ridership through the Ride for Free Program, the beautification of the Transit Center on Coxe Avenue, and adding bus benches and shelters.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "E", "F", and "G" were removed from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 24, 2006

B. RESOLUTION NO. 06-191 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR INSTALLATION OF A SIDEWALK ALONG PATTON AVENUE FROM REGENCY PARK BOULEVARD TO LEICESTER HIGHWAY

Summary: The consideration of a resolution authorizing the Mayor to execute a municipal agreement with the N.C. Dept. of Transportation (NCDOT) for installation of sidewalk along Patton Avenue from Regency Park Boulevard to Leicester Highway; and the associated budget amendment, in the amount of $150,000, to accept the funds from the NCDOT.

The NC DOT has agreed to pay the City of Asheville $150,000 toward the installation of sidewalk on the north side of Patton Avenue from Regency Park Boulevard to Leicester Highway. The total cost of the project is $450,000. City Council recently approved the $300,000 City match as part of the $2.5 million mid-year appropriation for high priority capital projects.

Patton Avenue is a high volume corridor that serves as a major transit route. Several pedestrians use this route as is evidenced by the worn paths in the grass. This sidewalk is a high priority on the Pedestrian Thoroughfare Plan. The City is in the process of finalizing the design of the sidewalk. We anticipate beginning construction on the sidewalk in spring 2007.

As part of this agreement the City will be responsible for maintaining the sidewalk which is standard operating procedure for all sidewalks on State maintained roadways.

Considerations:

- This sidewalk has been identified as a high priority on the Pedestrian Thoroughfare Plan and is located on a major transit route.
- Due to increase in construction costs over the past four years, the cost of the sidewalk has increased significantly.

City staff recommends City Council authorize the Mayor to execute a municipal agreement with the NCDOT for installation of sidewalk along Patton Avenue from Regency Park Boulevard to Leicester Highway and approve the associated budget amendment, in the amount of $150,000, to accept the funds from the NCDOT.

RESOLUTION BOOK NO. 30 - PAGE 136

C. **ORDINANCE NO. 3403 - BUDGET AMENDMENT TO ACCEPT THE N.C. DEPT. OF TRANSPORTATION FUNDS FOR INSTALLATION OF A SIDEWALK ALONG PATTON AVENUE FROM REGENCY PARK BOULEVARD TO LEICESTER HIGHWAY**

Summary: See Consent Agenda Item "B" above.

ORDINANCE BOOK NO. 23 - PAGE 127

D. **RESOLUTION NO. 06-192 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LICENSE AGREEMENT WITH FAMPROP, LLC, FOR SHARED USE OF A PARKING LOT AND DRIVEWAY ON CITY-OWNED PROPERTY ON FAIRVIEW ROAD**

Summary: The consideration of a resolution authorizing the City Manager to execute a License Agreement with Famprop, LLC, for shared use of a parking lot and driveway on City owned property on Fairview Road.

The City of Asheville owns property in Oakley known as Oakley Murphy Park identified as PINs 9657.06-7385 which parcel is currently zoned RS-8 Residential Single-Family High Density District. The parcels are improved with a Police Resource Center, tennis courts, ball field, parking and driveway. There is parking available for 30+ vehicles. During normal business hours the parking spaces are mostly empty as there is little recreational activity then, while after hours the spaces generally are filled as the recreation facilities are utilized

Famprop has acquired property at 723 Fairview Road adjoining the City's property which it proposes to renovate for office space for Families Together, Inc., a for profit mental health services provider operating in Western North Carolina. Off-street parking for about 25 cars will be required. Famprop has land on which a parking lot could be constructed; however, that part of the land is currently a green area which provides a natural buffer to the adjoining park. Since the parking lot on the City's property is readily accessible to Famprop's property and the lot is largely unused during the times that Families Together would need parking, it is an efficient and environmentally responsible use of existing infrastructure for Families Together to share the City's parking lot.

On October 24, 2006, City Council approved a resolution directing the City Clerk to publish a Notice of Intent with regard to a proposal from Famprop to enter into a license agreement for the use of the parking spaces and driveway on a non-exclusive basis and

182

authorizing the City Manager to sign a rezoning application. The City Clerk published a Notice of Intent in connection with the proposed license agreement on October 27, 2006, in the Asheville Citizen-Times.

The license agreement would provide for an annual fee of $3,000 for a term of three (3) years. In order for Famprop to use the parking spaces it will be necessary for the City's parcels to be rezoned Office District.

Pros:

- The City will receive revenue that it does not currently receive.
- Parking spaces that are currently vacant during business hours will be used.
- It is an efficient use of existing infrastructure to satisfy parking standards.
- Green space will be preserved instead of being converted to parking.
- The impact on storm water runoff that would be associated with a new parking lot is eliminated.

Approval of the resolution will authorize the City Manager execute the License Agreement subject to the City's property being rezoned.

City staff recommends City Council adopt the resolution authorizing the City Manager to execute a License Agreement with Famprop, LLC, for shared use of a parking lot and driveway on City owned property on Fairview Road.

E. RESOLUTION AMENDING THE INTERLOCAL AGREEMENT FOR REGIONAL AIR QUALITY PROGRAM - CLEAN AIR COMMUNITY TRUST

This item was removed from the Consent Agenda for discussion and/or a separate vote.

F. BUDGET AMENDMENT RECOGNIZING THE RECEIPT OF COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM INCOME IN EXCESS OF THE AMOUNT BUDGETED FOR FISCAL YEAR 2006

This item was removed from the Consent Agenda for discussion and/or a separate vote.

G. RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE STAFF TO EXPLORE THE FEASIBILITY OF CREATING AN INDEPENDENT AIRPORT AUTHORITY GOVERNANCE STRUCTURE

This item was removed from the Consent Agenda for discussion and/or a separate vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Newman moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS PULLED FROM THE CONSENT AGENDA FOR SEPARATE VOTES

RESOLUTION NO. 06-193 - RESOLUTION AMENDING THE INTERLOCAL AGREEMENT FOR REGIONAL AIR QUALITY PROGRAM - CLEAN AIR COMMUNITY TRUST

Summary: The consideration of a resolution amending interlocal agreement for regional air quality program - clean air community trust

In May of 2000, the City of Asheville and Buncombe County adopted an interlocal agreement to continue participation in a regional air quality program as allowed by State law. The need to do this was created by the withdrawal of Haywood County from the regional agency that had existed for some 30 years. This new agency was approved by the State Environmental Management Commission in July of 2000.

During the years of its existence, the old agency had accumulated a substantial amount of money from permit fees, fines, and other sources. In the agreement establishing the new agency, the Clean Air Community Trust (Trust) was created with the intention that it would be funded from these revenues, and use the money for educational purposes related to reduction of air pollution. The Trust was also to engage in its own fundraising activities, including grants and donations.

At about the same time that the new agency was created, a lawsuit was brought by the county schools and an individual plaintiff against the City, the County and the agency regarding the disposition of those funds. The conclusion of this litigation was that, since the agency's fines were penal in nature, the funds accumulated from collecting those fines were subject to the statutory and constitutional limitation that requires the "clear proceeds" to be paid over to the maintenance of free public schools.

This ruling reduced substantially the money that was available to fund the Trust. Although the Trust has continued to operate, its financial limitations have constrained its activities such that the bulk of its income now must come from fundraising activities. The Trust has been advised that one way to increase its fund raising ability is to expand its governing board membership to allow a broader cross section of the community to participate.

Currently, the Trust board consists of 7 members. Initially, members were to be appointed by the City Council (2) and the County Commissioners (3), with two members selected by the first five. All subsequent appointments are made by the board, but are subject to approval by the Council and Commissioners.

The Trust seeks greater flexibility in structuring itself to generate revenue to fund its activities. However, because the Trust is provided for in the interlocal agreement between the City and County, changing the Trust structure is cumbersome, and involves an amendment to the interlocal agreement, which requires approval by the City Council and County Commissioners.

What the Trust and the Air Quality Agency propose is to amend the interlocal agreement to delete entirely the provisions relating to the Trust. This would have the effect of allowing the Trust to structure itself in the manner that best suits its purposes, without approval by the City and County. Since the Trust may to some extent still be dealing with public money, coming through the Air Quality Agency, it is recommended that the Agency retain some oversight of the Trust with respect to this money, and language to that effect has been included in the amendment. This requirement is essentially the same as for any outside agency that receives public money from the City.

In addition to the provision regarding the Trust, the Agency has requested some minor amendments of a technical nature regarding the hiring and terms of employment of the Agency Director.

There is a requirement in the resolution for an accounting of activities since 2000. Since this is an interlocal agreement involving Buncombe County, similar action by Buncombe County would be required in order for the amendment to be effective.

Considerations:

- The financial situation of the Trust is substantially different from what was contemplated at the time of its creation, and there is substantially less public money available to the Trust.
- The Trust activities now require more fundraising than fund management, and the Trust should be allowed to structure itself as needed to suit its purposes.
- With this added flexibility, the Trust should be better able to pursue its mission.
- The Trust will be required to account for any public money received through the Agency.

If Council desires to make this amendment to the interlocal agreement, adoption of the resolution is recommended.

Councilman Mumpower was concerned that the regional foundation from which this committee was created is no longer in place. He questioned the viability of the committee since this body is not able to fulfill their original mission due to changes beyond their control, mainly the funding resources they were going to have.

Councilman Davis spoke in support of the amendments recognizing that the committee does have a place in the community.

Councilman Freeborn moved for the adoption of Resolution No. 06-193. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 138

ORDINANCE NO. 2104 BUDGET AMENDMENT RECOGNIZING THE RECEIPT OF COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM INCOME IN EXCESS OF THE AMOUNT BUDGETED FOR FISCAL YEAR 2006

Summary: The consideration of a budget amendment recognizing the receipt of Community Development Block Grant (CDBG) program income in excess of the amount budgeted in Fiscal Year 2006.

The City's Budget document and Consolidated Annual Action Plan for Fiscal Year 2006 estimated CDBG program income receipts at $125,000. Because of a high rate of loan pay-offs, $376,099 was actually received, producing a balance of $251,099 in unbudgeted program income.

This budget amendment budgets $160,000 of these additional CDBG funds to the Housing Authority for its Pisgah View Community Services Center, as approved by Council on October 24, 2006, and the remaining $91,099 to contingency.

City staff recommends that Council approve the budget amendment to allocate $160,000 in CDBG program income to the Pisgah View Apartments Community Services Center and $91,099 to Contingency.

Councilman Mumpower felt this budget amendment is a poor investment of precious dollars.

Councilman Freeborn moved for the adoption of Ordinance No. 1[illegible] This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 - PAGE 12[illegible]

RESOLUTION NO. 06-[illegible] - RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE STAFF TO EXPLORE THE FEASIBILITY OF CREATING AN INDEPENDENT AIRPORT AUTHORITY GOVERNANCE STRUCTURE

Summary: Said resolution reads "WHEREAS, the Asheville Regional Airport was built by the City of Asheville in 1958 for the benefit of Western North Carolina; and WHEREAS, the Asheville Regional Airport ("Authority") was established in 1979 as a joint governmental agency organized and created by the City of Asheville ("City") and the County of Buncombe ("County"), pursuant to Article 20 of Chapter 160A of the General Statutes of North Carolina for the purpose of maintaining, operating, regulating and improving the Asheville Regional Airport ("Airport"); and WHEREAS, the Airport is a regional asset for all of Western North Carolina that supports economic development through aviation and non-aviation development and provides critical aviation related services; and WHEREAS, the Authority since its creation has been successful in the development and operation of the Airport; and WHEREAS, the Authority has matured into a fully self-sustaining enterprise requiring no local financial assistance for its operations, maintenance and capital programs; and WHEREAS, the ongoing success of the Airport and Authority requires a governance environment that provides for long-term stability and growth; and WHEREAS, the City, County, and Authority desire to explore the feasibility of creating an independent authority governance structure as authorized in north Carolina law. Now, therefore, be it resolved by the City Council of the City of Asheville that the Asheville City Council expresses its support and desire to have staff of the City of Asheville work with Buncombe County, the Airport Authority, and other appropriate entities to explore the feasibility of creating an independent authority governance structure to own, operate, maintain and develop the Asheville Regional Airport which is a key regional asset to all of Western North Carolina."

Upon inquiry of Councilman Mumpower, City Manager Jackson said that the City, Buncombe County and the Airport Authority will work together to evaluate the pros and cons of forming an independent authority. Some reasons to pursue this include (1) the Airport has grown to the point that it operates largely independently today and there are some aspects of their growing business with the Federal Aviation Administration that would be streamlined by being an independent body; and (2) potentially recover the City's investment of approximately $10 Million (estimate of the acquisition of land to make it possible for the Airport to develop) in the Airport under some reasonable basis of recovery.

Councilman Mumpower felt that the City gave up sewer and we've had water, in many ways, taken away from us. It appears that the things that most cities retain as assets to help define themselves as cities and maintain some control over their destiny, we have a history of handing over to other people.

In response to Councilman Mumpower, City Manager Jackson said that the major benefit that we have in the current arrangement is the direct reporting relationship to Council with the Council appointments to the Airport Authority. The evaluation process would include looking at the best way to continue making appointments and keeping that benefit. He said there are no direct economic benefits to the City under the current arrangement.

Mayor Bellamy explained that the City owns the land the Airport is located on. She was clear that this is not a commitment to move forward, only for us to do due diligence to see is this is the best model in place.

In response to Councilwoman Cape, Airport Director David Edwards said that he didn't think the study would be a major cost estimate for anyone because this is not an unusual governance model and is used elsewhere in the state. He felt that it would be relatively easy to determine some of the property value issues.

Councilman Freeborn, Chair of the Airport Authority, explained that the $10 Million figure is the value in today's dollars of what the City put forward. He said that the Airport Authority unanimously supports the exploration of creating an independent Airport Authority.

Upon inquiry of Councilwoman Cape, City Manager Jackson said that the study will consist of a financial analysis of what has been the equity investments in the Airport; what is the financial feasibility of creating an independent authority and the means to move in that direction; and looking at alternative governance models.

Councilman Davis moved for the adoption of Resolution No. 06-144. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 - PAGE 140

III. PUBLIC HEARINGS:

A. **PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL USE PERMIT MASTER PLAN FOR INGLES LOCATED AT 1875 HENDERSONVILLE ROAD TO AMEND THEIR MASTER PLAN FOR ALLOWANCE OF A THIRD MODIFICATION TO A FRONT SETBACK FOR A PROPOSED OUT-PARCEL BUILDING**

ORDINANCE NO. 345 - ORDINANCE GRANTING AN AMENDMENT TO THE CONDITIONAL USE PERMIT MASTER PLAN FOR INGLES LOCATED AT 1875 HENDERSONVILLE ROAD TO AMEND THEIR MASTER PLAN FOR ALLOWANCE OF A THIRD MODIFICATION TO A FRONT SETBACK FOR A PROPOSED OUT-PARCEL BUILDING

Mayor Bellamy said that this public hearing for an amendment to a conditional use permit Master Plan for Ingles located on 1875 Hendersonville Road to amend their Master Plan for allowance of a third modification to a front setback for a proposed out-parcel was originally scheduled on September 12, 2006, but continued several times to this date.

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 5:22 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of an amendment to the conditional use permit Master Plan for Ingles located on 1875 Hendersonville Road to amend their Master Plan for allowance of a third modification to a front setback for a proposed out-parcel.

He said that the original consideration approved by City Council on January 6, 2006, included a rezoning of a rear parcel to Highway Business to allow for the expansion of the Ingles Market Store (Attachments to City Exhibit 3 - Location Map & Aerial Map). Included with the rezoning was the master plan for the site and the new store. The total square footage for the shopping center was to be expanded by about 40,000 square feet (City Exhibit 4 - Revised Site Plan. During the original review a condition was placed on the project to limit the number of driveways to two drives. These driveways have full movement traffic signals. The developer is requesting a third drive to provide more direct access to the gas station area at the front of the parcel. The driveway will provide additional right-of-way along Hendersonville Road to provide a safe movement into the parking area. The proposal was reviewed by the City Traffic Engineer and was determined to be safe as proposed. The request was considered by the Board of Adjustment to appeal the requirement in the Unified Development Ordinance (UDO) limiting developments to two driveways. The Board of Adjustment approved a UDO variance for the additional driveway at their meeting on May 22, 2006. The plan and configuration for the driveway was reviewed and approved by the N.C. Dept. of Transportation as well. The driveway will have a limited movement for a right-turn-in only. Amending the conditional use permit requires approval by City Council.

The current plan provides about 124,000 square feet of retail space. Construction of the new store and smaller shops is underway now. The latest amendment to the plan is to replace the existing Asian Grill with a new structure labeled 'Shops E' positioned near Hendersonville. The Highway Business District has a 35' front setback from Hendersonville Road (as measured from back curb for streets wider than 45') (Attachments to City Exhibit 3 - Street Side Elevation and Parking Lot Elevation). The building is positioned to relate to the street with sidewalk access from Hendersonville Road to the doors of the building. Ingles is requesting a modification of the front setback by up to 10 feet to improve the relationship of the building to the street. The building provides windows and doorways along both the Hendersonville Road side of the structure and the parking area. The modification request is in keeping with some other new developments in the vicinity of the Ingles (Panera Bread and Gerber Village) which provide a close relationship of the buildings to the street.

As noted on the original staff report, the project will provide a 40' 'no-grade' buffer area at the rear of the store property adjacent to the rear tract and creek. In addition, Ingles will plant an evergreen screen against this 40 foot buffer space and other buffers for adjacent properties. The rear tract zoned Office Business District also provides a self imposed 40' side building setback from neighboring uses for any future development on the site. At the rear of that property a fifty foot wide 'no-clear', 'no-grade' buffer is provided against the single family neighborhood (Attachment to City Exhibit 3 - Tree Plan).

Staff after reviewing the revised plans noted the following minor comments: (1) Two additional street trees are required in front of the gas canopy area near the Mills Gap entrance; and (2) Open space should be specified on the plan (12,400 square feet) and could be made up entirely by the grass area at the front of the store or other areas on the site meeting UDO specifications.

Section 7-16-2(c) of the UDO states that the Asheville City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed driveway was reviewed by the N.C. Dept. of Transportation and the City Traffic Engineer without concern with the request. The driveway is not expected to create an endangerment for the community. The remaining site plans and configurations of buildings have also been reviewed by the Technical Review Committee members.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The project area is an existing shopping plaza on a retail corridor. Although some land forms have been changed to provide the new store pad, the existing parking area will provide additional green space and area for tree plantings. Adjacent property owners will be buffered as noted on the plans and the planting list. An emphasis on evergreens in the buffer yards will provide helpful screening.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The redevelopment of the Ingles Plaza is expected to increase the value of adjoining property in the area. The site will be brought up to code for items covered in the UDO. Neighboring properties will be provided with buffer screening as required by the UDO.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The Hendersonville Road area is one of the major shopping and business corridors for the south side of the City. The proposed development and amendments to the plan will be in harmony with the scale, bulk, coverage, density and character of the area. Neighboring properties will be screened as shown on accompanying landscape plans.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The Asheville City Development Plan 2025 recognizes the commercial nature of the corridor. Redevelopment of existing sites and making infill improvements of those sites is recommended. The proposal is in keeping with the official plans adopted by the City. The master plan shows a connecting network of sidewalks and the property is on the Asheville Transit line. A bus shelter will be provided on the site as a location to be mutually agreed to by transit officials and developer.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The corridor is one of the most heavily traveled corridors in the City. The site has good access to a traffic signal and is located on the bus route. All other infrastructure is in place to manage and facilitate the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The third driveway request provides a direct consideration for this standard. The third driveway provides a long deceleration lane to provide safer speeds for making the turn into the development. The traffic is not expected to be worsened by the addition of the third driveway cut. The other impacts of the development were reviewed by an earlier Traffic Impact Analysis (TIA). The plan was modified to reflect the comments from the TIA

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable because the driveways have been reviewed for safety and design; the site plan has been redeveloped and will integrate the goals of the UDO, including landscaping, site access and sidewalk connections throughout the site, and landscape buffer yards; the building setback modification for Building E will reinforce a more pedestrian scale redevelopment in the area, and in general this retail use of the site is in keeping with the character of Hendersonville Road.

Considerations:

- An existing shopping plaza is being renovated
- The new development will comply with UDO requirements
- The development is in keeping with the scale and character and uses in the surrounding area
- The modified plans including the third driveway have been reviewed for safety and found to be compliant
- The setback modification request for Shop E will not compromise the character of the surrounding area

Staff recommends approval of the site plan and modifications to the third driveway and buildiing setback be approved with the following conditions: (1) Buffer and parking lot landscaping provided as shown in the plan with the addition of two street trees located near the gas canopy; and (2) Open space will be specified meeting UDO requirements.

Mr. Fred English hoped Council not not support this request until an Ingles is built on Tunnel Road in the old Wal-Mart space.

After rebuttal, Mayor Bellamy closed the public hearing at 5:33 p.m.

Upon inquiry of Councilwoman Cape, Traffic Engineer Anthony Butzek said that there will be a 5-foot sidewalk and a 5-foot buffer along Hendersonville Road.

In response to Councilman Freeborn, Traffic Engineer Anthony Butzek felt that the third driveway on Hendersonville Road was important to the traffic flow on Hendersonville Road.

In response to Councilman Newman, Mr. Glines said that a transit stop will be placed on Hendersonville Road in front of the development.

Councilwoman Cape wanted to make sure that the pedestrian amenities along Hendersonville Road will be functioning doors, storefronts and windows.

Vice-Mayor Jones moved for the adoption of Ordinance No. 3405, granting an amendment to the conditional use permit Master Plan for Ingles located on 1875 Hendersonville Road to amend their Master Plan for allowance of a third modification to a front setback for a proposed out-parcel; subject to the following conditions: (1) Buffer and parking lot landscaping

provided as shown in the plan with the addition of two street trees located near the gas canopy; and (2) Open space will be specified meeting UDO requirements; (3) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (4) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; and (5) The building orientation on the site and other site improvements must comply with the conceptual site plan presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 23 – PAGE [illegible] 131

B. PUBLIC HEARING TO CONSIDER THE ADOPTION OF AN ORDINANCE DESIGNATING THE PROPERTY KNOWN AS THE NATIONAL BANK OF COMMERCE, LOCATED AT 11 CHURCH STREET, AS A LOCAL HISTORIC LANDMARK

ORDINANCE NO. 3406 - ORDINANCE DESIGNATING THE PROPERTY KNOWN AS THE NATIONAL BANK OF COMMERCE, LOCATED AT 11 CHURCH STREET, AS A LOCAL HISTORIC LANDMARK

Mayor Bellamy opened the public hearing at 5:39 p.m.

Historic Resources Commission Director Stacy Merten said that this is the consideration of an ordinance designating the property known as the National Bank of Commerce, located at 11 Church Street, as a local historic landmark. This public hearing was advertised on November 3 and 10, 2006.

The National Bank of Commerce with a period of significance from ca. 1899-1955 is significant historically for its contribution to the business development of downtown Asheville at the turn of the 20th century. The National Bank of Commerce, which became the First National Bank & Trust Company in 1931, was one of a small number of banks to survive the stock market crash of 1929, later merging first with Union National Bank of Charlotte in 1958 to become First Union National Bank of North Carolina and now merged with Wachovia, one of the largest banking institutions in the Country.

The building is also significant architecturally for its association with prominent Asheville architect Ronald Green, who designed many important buildings in the area including the Longchamps Apartments and the Jackson Building. It is also notable as being one of only a few buildings constructed downtown in the neoclassical style.

The building being designated evolved from three separate buildings. The northernmost built ca. 1899, the center built ca. 1901 and the southernmost building ca. 1906. In 1922 the two oldest buildings were joined creating the bank building. The third building was joined to the other in the 1940's. The designation includes all of the lots historically associated with the property (lots 33, 34 & 35).

This building was covered in 1965 and has since been restored back to its 1922 appearance.

The National Bank of Commerce is listed as a contributing structure in the Downtown Area National Register Historic District.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in local property taxes. Currently the tax appraisal for the property included in the proposed designation is $2,550,900. If the property is designated as a local landmark the potential tax savings for the property owner, including city, county and school taxes, would be $14,078.42.

The ordinance designates the National Bank of Commerce as a local historic landmark. The designation includes the exterior of the structure the property on which it is located, and the interior features as identified in the ordinance.

When a property is designated historic, restrictions are placed on the property, and any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County. All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings. It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

Based on the above findings and the analysis provided in the complete copy of the designation report, staff finds this request to be reasonable.

Based upon the foregoing, the Historic Resources Commission recommends that the Asheville City Council adopt an ordinance designating the National Bank of Commerce, located at 11 Church Street, as a local historic landmark. Staff concurs with the recommendation of the Historic Resources Commission for this designation.

Pros:

- A significant property will be recognized for its contribution both architecturally and culturally to the history of the area.

Cons:

- The tax deferral will result in a loss of revenue to the city and county.

Mr. John Dickson, President of Asheville Savings Bank, spoke in support of the designation.

Mayor Bellamy closed the public hearing at 5:46 p.m.

Councilman Mumpower felt that when you take people off the tax rolls, in this case by 50%, that is unfair to the other people who continue to pay taxes. He was also uncomfortable that when people get a significant tax break you take away some of their incentive of their investment in city government and their incentive to participate actively.

Upon inquiry of Councilwoman Cape, Ms. Merten said that the designation does not keep the buildings from being demolished, but can delay demolition for up to a year to allow the local preservation agency to work with owner to find an alternative to preserve it.

In response to Councilman Davis, Ms. Merten said that the landmark status is monitored.

After a short discussion of the process to which designation requests come before City Council, City Attorney Oast said that the process is set out in detail in the N. C. General Statutes and to the extent to which staff can notify Council what is coming forward may be somewhat limited; however, staff will do their best to give Council some advance notice on what is coming forward.

192

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. ~~3407~~ 3406. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no".

ORDINANCE BOOK NO. 23 - PAGE 134

C. PUBLIC HEARING TO CONSIDER THE ADOPTION OF AN ORDINANCE DESIGNATING THE PROPERTY KNOWN AS THE RANKIN/BEARDEN HOUSE, LOCATED AT 5 WOODLAWN AVENUE, AS A LOCAL HISTORIC LANDMARK

ORDINANCE NO. ~~3406~~ 3407 - ORDINANCE DESIGNATING THE PROPERTY KNOWN AS THE RANKIN/BEARDEN HOUSE, LOCATED AT 5 WOODLAWN AVENUE, AS A LOCAL HISTORIC LANDMARK

Mayor Bellamy opened the public hearing at 6:01 p.m.

~~Historic Resources Commission Director Stacy~~ Merten said that this is the consideration of an ordinance designating the property known as the Rankin/Bearden House, located a 5 Woodlawn Avenue, as a local historic landmark. This public hearing was advertised on November 3 and 10, 2006.

Ms. Merten said that the Rankin/Bearden House, with a period of significance from ca. 1848-1912 is significant culturally as one of the oldest intact frame houses in Asheville and one of the few remaining in Buncombe County. It is also significant for its association with William Dinwiddie Rankin, who was on the Asheville City Council and mayor from 1855-1857; James Eugene Rankin, the eldest son of W. D. Rankin and a prominent Asheville businessman and Civil War veteran; Marcus Josephus Bearden, partner is the Asheville Loan and Construction Company, which was responsible for much of Montford's development; and who in partnership with J.E. Rankin built the first tobacco warehouse in Asheville.

The Rankin-Bearden House is also significant architecturally in that embodies the distinctive characteristics of two important architectural periods, Greek Revival and Victorian Italianate. The house was significantly altered in 1866 when the original kitchen and servant's quarters were joined with the main house and again in 1899 when the chimneys were moved and the Italianate bay was added.

The Rankin/Bearden House is a contributing structure in the Montford Area National Register District.

The ordinance designates the Rankin/Bearden House as a local historic landmark. The designation includes the exterior of the house and the lot on which it is located, the faux-stone wall on the front of the lot and all of the interior features as identified in the ordinance.

When a property is designated as a local historic landmark, restrictions are placed on the property, and any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County. All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings. It is important that properties of local

significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in local property taxes. Currently the tax appraisal for the property included in the proposed designation is $505,900. If the property is designated as a local landmark the potential tax savings for the property owner, including city, county and school taxes, would be $2,792.06.

Based on the above findings and the analysis provided in the complete copy of the designation report, staff finds this request to be reasonable.

Based upon the foregoing, the Historic Resources Commission recommends that the Asheville City Council adopt an ordinance designating Rankin/Bearden House, as a local historic landmark. Staff concurs with the recommendation of the Historic Resources Commission for this designation.

Pros:

- A significant property will be recognized for its contribution both architecturally and culturally to the history of the area.

Cons:

- The tax deferral will result in a loss of revenue to the city and county.

Mayor Bellamy closed the public hearing at 6:05 p.m.

Upon inquiry of Councilwoman Cape, Ms. Merten explained that the tax reduction can begin regardless of the state of renovation or rehabilitation.

Councilman Mumpower reiterated his concern with the 50% tax break.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3407. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 - PAGE 136

D. PUBLIC HEARING TO CONSIDER THE REQUEST BY THE ST. DUNSTAN'S COMMUNITY TO CREATE AN HISTORIC PRESERVATION OVERLAY DISTRICT FOR THE ST. DUNSTANS' NEIGHBORHOOD

At City staff's request due to a posting error, Vice-Mayor Jones moved to continue this public hearing until November 28, 2006. This motion was seconded by Councilman Davis and carried unanimously.

IV. UNFINISHED BUSINESS:

A. ADDITION OF PROPERTIES ON EAGLE AND MARKET STREETS TO THE LARGER CITY-OWNED PROPERTY INITIATIVE REQUEST FOR QUALIFICATIONS

Planning & Development Director Scott Shuford said that this is the consideration of a resolution to commit federal loan and grant funds for the redevelopment of property on Eagle and Market Streets.

This is a consideration of a request from Eagle Market Streets Development Corporation (EMSDC) that the City obligate $775,369 in CDBG Section 108 loan funds and $340,000 in Economic Development Initiative (EDI) grant funds for the rehabilitation of property at 17-23 Eagle Street (the Collette Building) and 38 South Market Street (the Del Cardo Building).

These funds were budgeted by Council in April 2004 for an earlier EMSDC project that included construction of an infill building behind the Collette and Del Cardo buildings. That project became the subject of a lawsuit, which delayed the project enough to prevent it going forward.

On April 12 this year, the PED Committee requested interested parties to make fresh proposals for redevelopment in the area, and on September 13 EMSDC presented a "Rehab First" proposal to the Committee, in which it would partner with a group of local investors: Jay Stewart, Doug Beatty, and David Moore (SBM) to rehabilitate the Collette and Del Cardo buildings, leaving new infill construction for a later, separate phase.

The Committee reviewed the proposal in depth at its October 11, 2006, meeting and recommended that it should be considered by Council, subject to some technical conditions. Staff, EMSDC, and SBM have since met and revised the organizational structure of the project so that most of the conditions are met.

The City received the $800,000 Section 108 guaranteed loan in August 2003 for the original redevelopment project. Since then, we have repaid to the Treasury a total of $156,135 in interest and principal repayments. We need to use the loan funds in a project which will generate program income for future loan repayments. There is no time limit on use of the funds and HUD will allow transfer to any eligible project that meets its underwriting criteria.

The $340,000 EDI grant must be expended alongside the Section 108 loan, not before, and must be fully expended by September 30, 2007 (non-waivable). Unlike the Section 108 funding, it is not transferable to another project, but we can request a revision which does not substantially weaken the project in terms of the factors on which it was originally rated (need, soundness of approach, leveraged resources, etc).

The two buildings will be renovated to provide a total of 13,000 sf of retail and office space. The total estimated project cost is $2,200,000 or $169 psf, including acquisition, rehabilitation, and soft costs. The project would not be feasible if it depended wholly on loan financing. Key elements in the financing are therefore the EDI grant, the $410,000 in acquisition and other costs already met from CDBG grant funds, and an estimated $500,000 in equity from Historic Rehabilitation Tax Credits. SBM will commit to contributing most of this equity.

EMSDC will retain control of both buildings during the rehabilitation phase, and will employ an experienced development consultant to act as its project manager. At completion, but before occupancy, EMSDC will place the property into a business condominium structure and sell the main floor of the Collette building to SBM for the amount of their tax credit contribution plus an appropriate share of the loan obligation(s). EMSDC will retain ownership of the Del Cardo and the lower level of the Collette.

Staff have closely reviewed the development pro-forma and discussed it with the development partners. Overall, the project appears to be feasible with the proposed financing structure. Risks are identified and discussed below.

1. There is a risk that HUD will not approve use of the EDI grant for the revised project. In that case, the project may not be able to proceed.
2. The timetable may slip, resulting in the loss of any EDI funds not drawn down from the Treasury by September 30, 2007. The timetable is already tight and any delays from now on will add cumulatively to this financial risk. However, the projected cash flow is sufficiently robust to allow some of the EDI grant to be replaced by conventional financing if needed.
3. As yet, there is no detailed plan for the rehab work. The per square foot costs are estimates based on recent costs for other buildings elsewhere. However, an adequate 20% hard cost contingency has been provided.
4. The rent assumptions appear reasonable based on staff knowledge of downtown rents, although no professional market survey has been presented. The 5% vacancy assumption is low, but the robust cash flow provides some safeguard.
5. Considerable pre-development work has still to be accomplished before construction can start. The following tasks must be addressed simultaneously:

   City Tasks
   a. Requesting and obtaining HUD permission for all of the Section 108 and EDI funds to be used on this rehab-only phase of the original project (underway - will take 1-3 months to get a final ruling from HUD);
   b. Updating the Environmental Review
   c. Finalizing the Section 108 loan and EDI grant agreements;

   EMSDC Tasks
   a. Completing architectural plans, cost estimates, and bid documents;
   b. Obtaining Park Service approval of the design – for tax credit purposes
   c. Submitting plans for review by Downtown Commission and S. Pack Square Design Review Committee
   d. Completing legal/organizational work for the tax credits;
   e. Carrying out an appraisal of the property
   f. Obtaining commitments for equity and bank financing;
   g. Bidding and selecting the contractor(s);
   h. Completing relocation of the last tenant in the Collette building.

Pros:

- Will rehabilitate vacant buildings and reduce blight on the Block (the Del Cardo, in particular, is a key structure because of its visibility);
- Will greatly increase economic activity on the Block, including opportunities to re-establish African-American owned businesses such as the Ebony Grill;
- Preserves historically-significant structures (especially the Del Cardo).
- Will make use of the EDI grant, which otherwise will be lost
- Will make use of the Section 108 loan, which is not currently costing anything in net interest but represents an opportunity cost;
- Proposal brings in significant private equity.

Cons:

- Risk of project failure due to cost over-runs, to loss of EDI grant funds after timetable slippage, or to higher than anticipated vacancy rates after completion.
- Consequent risk that part of the Section 108 loan funds will not be repaid, placing the burden of repayment to HUD on the City's CDBG fund.
- Continues a low density development pattern.

Mr. Shuford summarized three possible actions. One would be to approve the rehabilitation project proposed by EMSDC outlined above. Staff's review of the project is that it is doable, has a pro forma that is sound and it complies with the S. Pack Square Redevelopment Plan. The drawbacks to the project would be the limited scope of the project and the very tight schedule necessary to expend the federal funds. Concerns raised are that the project represents a considerable public investment to rehabilitate two low-rise buildings when the rest of downtown is going basically high-rise. So the question is whether the investment will create the necessary incentive for surrounding properties to also redevelop. The second option is to find a way to connect the Eagle-Market Street properties to a larger City-owned property initiative. Council is going through an evaluation of bringing other City-owned properties into the opportunity for redevelopment and through that master developer approach, it may create a situation where these properties will be able to be incorporated into that larger-scale redevelopment possibility and have the potential to affect more properties in The Block with redevelopment. One disadvantage is that the EDI grant will be put in even greater jeopardy than what has been proposed by EMSDC. We can petition HUD for additional time with the EDI grant. He didn't think it would be well-received, but there always is that possibility that we can keep the grant alive and we can reallocate the Section 108 funds to other projects that would comply with the HUB requirements. The last option is an option to take no action and wait for other alternatives to present themselves.

Mr. Darryl Hart, Chairman of the Board of Directors of EMSDC, presented City Council with a letter dated November 14, 2006. He said that they were excited to proceed with the Rehab First Project; however, they do support and welcome their inclusion in the City-owned property RFQ process. They look forward to scheduling a meeting with the Mayor and City Manager to discuss the RFQ process further about how it they will be a part of it.

Mr. Gene Ellison, property owner on The Block, supported the inclusion of his property on Eagle and Market Streets into the RFQ process.

Councilman Davis appreciated the efforts of the EMSDC and the private ownership on The Block.

Councilman Davis moved to include the Eagle and Market Streets property as part of the City's larger RFQ process. He specifically said that this is not to be entangled with the City-owned property, but to be looked at as a part of the on-going process we will begin later this month. This motion was seconded by Vice-Mayor Jones.

Upon inquiry of Councilman Newman about how these properties will interface with the City-owned property located around the City, Mr. Shuford said that the RFQ will be linked to a couple of properties that have a natural connection, but offer the opportunity for developers to submit their qualifications for a range of properties. He understands that Mr. Hart is suggesting that the EMSDC properties be added to that list. They would not be required to be redeveloped as a component of any other City-owned property, but they certainly are very close to other sites that we do expect to have considerable developer interest, primarily the City Hall parking lots. Because of that, should a major project be pursued for the parking lots and hopefully for the

facility along Charlotte Street, we would be in a position to see interest in surrounding properties because of the increase of activity and the economic development that will occur as a result of the development. He feels those properties will benefit from the larger scale development that is likely to occur.

There was a brief discussion initiated by Councilman Newman regarding the monthly amount spent in interest on the loan payments, resulting in the feeling that there should be a drop dead date. If it means losing the EDI grant, then we lose that grant, but we can put the Section 108 money into something that will happen in the near future.

Upon inquiry of Councilwoman Cape, City Manager Jackson said that at the next worksession City staff will seek Council's guidance on the RFQ. Staff will ask for Council's broad parameters on what they want accomplished and staff will go out and see who is interested in being our partner in moving either some or all of the properties forward, and who can potentially bring some solutions to The Block.

In response to Councilwoman Cape, Mr. Shuford said there is a great risk of losing the $340,000 EDI grant. Regarding the Section 108 grant, we will lose whatever interest is paid and we may have the opportunity to allocate that Section 108 money to a different project in different area of town, but the goal would be to use that money and the commitment we made to The Block in The Block.

Councilman Mumpower was concerned that the EMSDC brought forward a proposal and then the City changed the course. Mr. Shuford said that the EMSDC is excited about the inclusion in the City-owned property RFQ and we think this is an opportunity for a successful outcome. He noted that it may be time to revisit the original South Pack Square Redevelopment Plan because conditions in Asheville and the downtown have changed since the Plan was adopted.

Mayor Bellamy said that Mt. Zion wants to help, but did not want to tie their property into anything that might have a negative connotation for the Church. They just want to see what happens. She understands that Council wants a timeline on where we want to go with this issue. She feels that City staff needs to apply for an extension of the EDI grant to see if it's possible to use those funds for this development and not lose our commitment of the Section 108 loan funds for the Eagle-Market Street. She personally feels that the City has received $800,000 of Section 108 loan funds and if we send that money somewhere else, she wants some other loans to come back in that amount for the Eagle-Market Street area, since they were the original community that applied for those funds. She said that Council is supportive of this endeavor whenever it moves forward noting that they will not lose sight of the renovation of The Block.

Councilman Newman explained why he felt that if we put this property into a larger process, he hopes that there is a way we can have some timing cut-off point so that things are not dragging on.

The motion made by Councilman Davis to include the Eagle and Market Streets property as part of the City's larger RFQ process, and seconded by Vice-Mayor Jones, carried unanimously.

At 6:48 p.m., Mayor Bellamy announced that City Council would take a short recess which would include a closed session. Councilman Mumpower then moved to go into closed session for the following reasons: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 143-318.11(a)(5); (2) To consult with an attorney employed by

the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including potential litigation. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (3) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11(a)(4). This motion was seconded by Councilwoman Cape and carried unanimously.

At 7:12 p.m., Mayor Bellamy recessed the closed motion to return to the formal meeting, noting that the closed session would continue at the end of the formal meeting.

B. RESOLUTION NO. 06-195 RESOLUTION AUTHORIZING THE PARKS AND RECREATION DEPARTMENT TO WORK WITH THE WESTERN NORTH CAROLINA DISC GOLF CLUB TO REVIEW THE PLANS OF THE DISC GOLF COURSE UNDER CONSTRUCTION AT RICHMOND HILL PARK

Assistant Superintendent of Recreation Jeff Joyce said that this is the consideration of a resolution authorizing the Parks and Recreation Department to work with the Western North Carolina Disc Golf Club (WNCDGC) to review the plans of the Disc Golf Course under construction at Richmond Hill Park.

On September 12, 2006, City Council unanimously approved having a Disc Golf Course at Richmond Hill Park. Council also voted to remove the ball fields from the original approved plan. In addition, Council directed Parks and Recreation staff to collaborate with the Disc Golf Club to review the plans and to make the Disc Golf Course as environmentally friendly as possible. A meeting was held on September 19, 2006, with staff and James Nichols, course designer, to discuss this process and to develop the timeline for the Council meeting on November 14, 2006.

Staff of the Parks and Recreation Department held two public input sessions concerning the Disc Golf Course. The first meeting was on Sunday, October 8, at Richmond Hill Park to tour the proposed course and to collect input. At the first meeting, 46 suggestions were made, of which close to 90% were incorporated into the newest course revision. These 46 suggestions were reviewed at the second public meeting held on Monday, October 16, 2006. New suggestions were accepted at this meeting. Staff has met with Disc Golf Club members on four occasions on site to make revisions and to try and meet the requests of the public. One of these visits was with Dr. Ed Hauser, a wetlands specialist. Together with staff, James Nichols, and James Wood, Dr. Hauser gave his input on ways to make the course more environmentally friendly. Many of his suggestions have been incorporated into the new design.

The result of the process is the design before Council. This is the fifth revision of the original plan. It should also be noted that there will be operational and maintenance costs associated with the course and other park features as they are developed. Funding for these costs will be incorporated in the Fiscal Year 2007-08 budget process for Council consideration. Costs for the relocation of the course will be absorbed by Parks and Recreation crews, with the assistance of WNCDGC. The material costs are part of the existing budget that has been approved.

Pros:

- Support of the disc golf community (petition with over 800 signatures supporting the course at Richmond Hill)
- WNC Disc Golf Club and City Staff worked hard at making the course as environmental friendly as possible.

- Course to be built at extremely low cost, with many of the materials used from fallen trees on site
- Labor pool from the WNC Disc Golf Club; their desire is to provide most of the work force.
- Disc Golf supporters have compromised several areas to protect the core habitat of the wetland area
- 9 holes moved out of 600'core habitat area

Cons:

- Some citizens simply do not want any development at Richmond Hill Park and to save it as a no-impact park

City staff recommends City Council adopt the resolution authorizing the Parks and Recreation Department to work with the WNCDGC to review the plans of the Disc Golf Course under construction at Richmond Hill Park.

The following individuals spoke in support of the disc golf course at Richmond Hill Park:

Mr. Ryan Pickens, a founder of the WNCDGC
Mr. James Nichols, member of the WNC Disc Golf Club and Disc Golf Course designer at Richmond Hill Park and other disc golf parks around the country
Mr. John Thelen, a founder of the WNCDGC (handed Council newspaper articles outlining his company's projects in the area)
Ms. Meredith Nichols, Chair of the WNCDGC (handed Council petition containing 575 local and tourists who support disc golf at the Richmond Hill Park)
A supporter for the disc golf course
Mr. Mike Brown, Pisgah Area Southern Off-Road Bicycling Association (also request for the development of a trail network at Richmond Hill Park)
Mr. Craig Fender, local business owner and disc golfer
Mr. James Wood (also request to establish an Ecological Advisory Committee; request for conservation easement at Richmond Hill Park; support for trail network; request for restoration of Smith Creek tributary; work with Asheville Botanical Gardens and others for wildlife and bird watching attractions)
Mr. Eric Marks, Asheville resident

Upon inquiry of Councilman Mumpower about the maintenance budget, City Manager Jackson said that we will treat this like any other new facility. The amount will not be significant and we will consider it as part of the overall budget planning. Mr. Joyce also responded that the WNCDGC will also help financially as they have made a tremendous commitment.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 06-195. This motion was seconded by Councilman Freeborn and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE [redacted] 142

C. RESOLUTION NO. 06-196 - RESOLUTION ADOPTING A DOWNTOWN PARKING ACTION PLAN INCLUDING THE SCHEDULE AND FUNDING STRATEGY FOR THE PURPOSE OF PROVIDING PUBLIC PARKING

City Engineer Cathy Ball said that this is the consideration of a resolution adopting a Downtown Parking Action Plan including the schedule and funding strategy for the purpose of providing public parking.

The demand for parking in the downtown sectors of the city continues to grow. Original projections for growth in demand have proved to be too low in the present fiscal year. Parking demand for monthly permitted spaces has reached equilibrium very close to the total sold in fiscal year 2006 in spite of higher rates. From August 14 through September 30 transient parking increased at a rate of 10%. Prior to this period, demand was increasing at an annual rate of 2.9%. The total increase in demand for the four months starting July 1 through October 27th has been 6.1%. The Civic Center deck, historically one of the least used facilities, has twice experienced a full condition during the month of October. Other than during events where special event fees apply, this has not happened before. Last year during the month of September the Rankin deck, the most popular deck, experienced full conditions for 8 hours. This September the Rankin deck experienced 45 hours of full condition.

Staff has been evaluating several options for increasing parking in downtown. We have evaluated adding floors to the existing parking garages. While Rankin Street Parking Garage was originally designed to be expanded by two levels, the building code requirements for this structure have changed significantly making this option cost prohibitive.

The best option for increasing parking in the current garages is to demolish the existing garages and rebuild. Staff does not recommend this option until additional parking is available due to the loss of parking during demolition and construction.

Staff has developed a parking program that identifies several projects to increase parking in Downtown Asheville. Staff has limited the Downtown Action Plan to specific tasks that can be tracked for progress and costs. These projects include:

- Pave and landscape parking lot on the North Lexington Avenue.
- Implement monthly parking on Cherry Street.
- Determine the highest and best use of the property the City owners on Haywood Street. This includes working with the private sector to determine if a partnership can be developed to include public parking. (This process may involve a public charette to gain public input.)
- Formulate public/public/private partnerships for multiuse parking facility on Biltmore Avenue and Cox Avenue.
- Evaluate locating a parking facility on the existing surface parking lot the City owns on Rankin Avenue across from the Civic Center.
- Evaluate opportunity for public parking at or near the Senior Opportunity Center.
- Evaluate opportunity for public parking at the Sheriff's Office/Ann Street.
- Determine feasibility of placing a parking facility on North Carolina right-of-way over I-240.
- Participate in the development of the park side development plan to include necessary parking for the City/County area.

All of these options will be evaluated in conjunction with other Transportation Demand Management (TDM) tools in order to maximize transportation needs and minimize costs and environmental impacts. As part of the TDM evaluation, the staff will look for opportunities to provide park and ride and/or a downtown shuttle system. Additionally, staff will continue to monitor the parking fee structure to comprehensively determine impact on the downtown parking system. Once this Plan has been adopted by City Council, staff will coordinate with the Downtown Commission on the implementation of specific tasks.

We anticipate that the parking fund will contribute approximately $850,000 to a capital reserve fund this fiscal year. This money will allow us to fund the initiatives listed above. We

anticipate that most if not all of this money will be used in debt service for new facilities and maintenance improvements to the existing decks.

In Fiscal Year 2009 the City will have paid the debt service for the Rankin and Wall Street Garages. This will allow an additional $630,000 to be available for capital improvement funding.

Pros:

- Will allow staff to begin to move the process of forming partnerships and parking acquisition forward for council's final approval.
- Provide for needed public parking in Downtown Asheville.
- Allow for continued economic sustainability in the area.

Cons:

- Options will require a significant financial commitment. Staff will bring these costs to Council prior to executing any agreements.

City staff recommends adoption of the resolution adopting the following Downtown Parking Action Plan including the schedule and funding strategy for the purpose of providing public parking:

Item	Description	Schedule	Estimated Total Costs*
1	Evaluate adding levels to Rankin Street Parking Garage	Completed	N/A
2	Evaluate demo and reconstruction of existing parking garages	Completed	N/A
3	Evaluation of parking option in the Battery Park area	Completed	N/A
4	Determine highest and best use of the property the City owns on Haywood Street.	By June 2007	Unknown
5	Surface parking on North Lexington	By May 2007	$15,000
6	Surface parking on Cherry Street	By May 2007	$25,000
7	Evaluate possibility of new parking lot on Rankin Avenue across from the Civic Center	By June 2007	$13 M
8	Parking at or near the Senior Opportunity Center	By June 2007	Unknown
9	Parking at or near the Sheriff's Office/Ann Street	By June 2007	Unknown
10	Determine feasibility of locating parking facility over I-240	By June 2007	Unknown
11	Public/Private partnership on Coxe Avenue to include public parking	By June 2007	$3.5 M
12	Public/Private partnership on Biltmore Avenue to include public parking	By June 2007	$5 M**
13	Park side parking initiative	On-going	$10 M**

* Estimated total costs –These costs include previous expenditures and estimated future costs. Due to escalating construction costs these are subject to change.

** These are subject to change depending on financing options such as tax increment financing. This figure assumes $20,000 per parking space plus 20% contingency.

Mr. Barry Olen, representing the Grove Arcade Public Market Foundation and the Battery Hill Associates, presented City Council with a copy of his presentation. He reviewed with Council the background of downtown parking along with the business features associated with parking. He proposed a shoppers survey and a business survey to find out exactly what the individual needs are. He suggested working with representatives of retail, residential, office, service, etc. through the Asheville Downtown Association and the Grove Arcade Board to add to the survey questions. In conclusion, he reviewed (a) need for additional parking price variation as per convenience; (b) "staged" parking; (c) location of parking garage; (d) possible shuttle from outlying parking garage; (e) retail space as part of garages; and (f) public restrooms.

Dr. Dwight Buckner, President of the Asheville Downtown Association, said that they are planning a parking charette in January of 2007 and hoped the City would participate.

Councilman Freeborn felt that the reality is that we really don't know what our parking needs are since the last time this was reviewed was in 1998. He hoped that the Asheville Downtown Association will work with the TDM Coordinator to aggressively survey employers and shoppers to find out what their real needs are and incorporate that input into this Plan. He also supported the City participating in the parking charette in January.

After a short discussion about the City's plans for the surface parking on Cherry Street, Councilman Newman supported keeping that lot free.

Councilman Mumpower explained why he felt this Plan removes the most viable option for near term relief of our parking problems and that is the parking deck that has been planned for years in front of the Civic Center. He felt it abandons commitments made to business people, the Grove Arcade and others downtown. He felt we are indulging special interests over the community interests. He felt that that with original plan could have been modified. He also felt that we have missed the opportunity to partner with Buncombe County on their two parking initiatives - the proposed parking garage by the Health Department and the proposed parking garage on Coxe Avenue.

Vice-Mayor Jones said that we are actively pursuing working with the County with the idea we are bringing resources to both of their proposed parking garages.

City Engineer Ball said that we are not sure if we can add more public parking on the lot across from the Health Department but we would like to enter into some agreement with Buncombe County to help them manage that and see if it's available for off-hours public parking. However, we are still hopeful we can still add some public parking on that garage. We are still in the very early stages of the proposed parking garage on Coxe Avenue with the opportunity to add public parking.

At the request of Councilwoman Cape, it was the majority of Council's decision to add "Public/Private Partnership on lot next to Health Department to include public parking" as another item to the Downtown Parking Action Plan.

Councilman Davis felt there was a strong indication that the City can partner with Buncombe County for public parking to be included on the proposed garage on Coxe Avenue. He would also support a scaled down version of the original plan for the parking garage in front of the Civic Center.

At the suggestion of Councilwoman Cape, it was the majority of Council's decision to add "Property Scouting for the Future" with an on-going schedule, as another item to the Downtown Parking Action Plan.

Mayor Bellamy said that regarding the parking garage in front of the Civic Center, the reality is that the City doesn't own the key property to build the deck.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 06-196. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 143

D. OWENS REPORT UPDATE - PRUDENTIAL SIGN; STAPLES; AND GREENLIFE

Assistant City Manager Jeff Richardson said that the purpose of this report is to update Council concerning staff efforts to address community and Council concerns about the Greenlife, Staples and Prudential developments.

Council received a report from Professor Owens of the Institute of Government and directed staff to contact the affected property owners/businesses about what steps might be taken to address the indicated concerns. The following is the result of those staff efforts for each development:

Prudential Sign – This involved an attached sign on the east-facing façade of the building that did not meet code requirements. The business owner has removed the sign in question, replacing it with a conforming sign on the south-facing façade. The site is now in full compliance.

It was the consensus of Council that no further action would be necessary on this issue.

Staples – Staff made a conference call to Staples executives on September 19, 2006, and discussed options for addressing community concerns. The Staples executives requested an opportunity to internally discuss how they might address these concerns and asked for approximately one month to develop some concepts for consideration. The teleconference was followed up with correspondence from staff. We have not had a response from Staples at this time; however, it is his understanding that Staples corporate headquarters will come back to the City with a more detailed response to the concerns that have been previously noted.

Mr. Mike Lewis stressed for the need of enforcement of the Unified Development Ordinance and asked that in any future correspondence with Staples that it be worded that City Council (not the community) is concerned about possible violations and that the violations need to be rectified within a certain timeframe.

Mr. Chris Pelly, President of the Coalition of Asheville Neighborhoods, agreed with Mr. Lewis in that any correspondence to Staples needs to be specific and stress the urgency of the situation. They need to be specifically asked to respond to the violation of setbacks, the size of their signs and the pedestrian amenities. He feels it is time that the City issue a Notice of Violation. The notice would clearly define what Staples must do to become compliant with the Unified Development Ordinance (UDO) and it would also stipulate a timeline by which Staples must come into compliance. Another option for City Council is to require Staples to seek a variance from the UDO standards through the Board of Adjustment appeals process. Either way, City Council needs to provide resolution to this issue.

After a short discussion, it was the consensus of Council to have the Mayor write a letter to Staples, with language that this is a City Council concern, inviting them to attend a near certain date Council meeting and be prepared to address the issues raised, e.g., signs, pedestrian amenities to soften the flat wall in some form of green-screening, etc.

Councilman Freeborn was concerned that the building is not Americans with Disabilities Act compliant.

At the suggestion of Councilwoman Cape, Mayor Bellamy said that City Council will hold a closed session next week about what our options are with regard to Staples.

Vice-Mayor Jones felt it was important for the community to know that the letter is not the only communication City staff has had with Staples.

Greenlife - Staff reiterated concerns about the effects of the loading dock on the surrounding Maxwell Street community to both the business owners and the property owners.

Mr. John Swann addressed City Council on the short-range and long-range options to address concerns. He handed Council a copy of the receiving/loading dock reconfiguration options. He asked for some clarification on where Council stands on the options.

Using maps, Mr. Swann explained the options stating that he is interested in solving the concerns. One option would be to leave the configuration as is. The pros would be it would be no cost and no disruption of business. The cons would be that it does not address the issue of truck traffic on Maxwell Street; does not address the issue of buffer zone on Maxwell Street; current configuration is difficult for delivery drivers; and current configuration is not adequate for future business growth.

Another option - Intermediate Option #1 would be to move the loading dock to the east end of the building. The pros would be that it removes tractor-trailer traffic from Maxwell Street; allows for the largest (approximately 23 feet) buffer zone along Maxwell Street; and would not affect house or trees at the corner of Maxwell Street. The cons would be that the existing terrain is extremely steep and would require extensive fill and retaining wall; would require new corridor across entire back of building; would trigger requirement for whole-building sprinkler system; would require relocation of offices and/or refrigeration rack and/or walk-in coolers and/or main electrical service; would obliterate Bordeaux entrance to property; truck access is next to impossible with this configuration; would remove access to lower parking lot; would require removal of outside café seating porch; does not address smaller delivery and service truck traffic on Maxwell Street; substantial disruption of business; does not address future business growth; and cost estimate at $400,000 - $500,000 or more.

Another option - Intermediate Option #2 would be to rezone the residential lot at the corner of Maxwell Street and Greenlife exit, move or demolish the existing house, grade and pave the lot and realign loading dock. The pros would be that it removes tractor-trailer traffic from Maxwell Street and allows for slightly larger (approximately 7 feet) buffer zone along Maxwell Street. The cons would be that it requires rezoning from the City; requires cooperation of landlord; requires moving or demolition of house; requires removal of two large mature trees; some disruption of business; does not address smaller delivery and service truck traffic on Maxwell Street; does not address future business growth; and cost estimated at $75,000 - $100,000.

Another option - Long-Term Option #1 (includes Intermediate Option #2 above) would be to add onto the east side of building (including structured parking), remodel existing café into new loading dock, build loading corridor from new loading dock around coolers to back of building.

The pros would be that it removes tractor-trailer traffic from Maxwell Street; allows for larger buffer zone (approximately 13 feet) along Maxwell Street; may not require removal of large mature trees; and addresses future business growth. The cons would be that it requires zoning from City; requires cooperation of landlord; requires moving or demolition of house; may require cutting down two large mature trees; does not address smaller delivery and service truck traffic on Maxwell Street; considerable disruption of business; and cost estimated at $250,000 - $300,000 (cost estimate is for reconfiguration of loading facility only and does not include cost for store expansion).

Another option - Long-Term Option #2 which is to add onto the east side of the building (including structured parking), include loading dock in new construction. The pros would be that it removes all delivery trucks from Maxwell Street; allows for largest (approximately 23 feet) buffer zone along Maxwell Street; and addresses future business growth. The cons would be that it does not address service truck traffic on Maxwell Street; requires widening and/or realignment of Marcellus Street and/or Bordeaux Street; may not be compatible with new residential condominium construction on Bordeaux Street; would require freight elevator and new corridor along entire back of building; would require relocation of offices and/or refrigeration rack and/or walk-in coolers and/or main electrical service; new loading area would take up valuable space that could be used for employee/customer parking; potential for major disruption of business; and most expensive option - cost estimated at $500,000 - $750,000 or more (cost estimate is for reconfiguration of loading facility only and does not include cost for store expansion).

Ms. Hilary Stewart said that she rents a house directly across from the Greenlife loading dock and garage area on Maxwell Street. She explained the practical non-stop noise, exhaust fumes and even rats. She questioned why the nosey unpleasant part of the store wasn't put on the other side of the building.

Ms. Elsa Stewart, resident on Maxwell Street, said that Greenlife has extremely bright orange lights that angle into their house. In addition, the garbage area attracts rats. She suggested the garbage area be moved to the other side of the building.

Mr. Reid Thompson, resident on Maxwell Street, felt it was time City Council enforced the laws. He showed Council pictures of the lack of Greenlife's vegetative buffer and also pictures of a tractor trailer truck unloading - not in the loading docks - but unloading on Maxwell Street. In addition, he said that since the City moved the "No Parking" sign, his personal vehicle has been ticketed every time he calls about trucks on Maxwell Street.

There was considerable discussion by City Council of the options Mr. Swann presented and each Council member voiced their ideas, concerns and/or preference. Most voiced support for Long-Term Option #2 with some sort of short-term solution for residents on Maxwell Street.

Mr. Swann said that the maps are not drawn to scale or drawn by anyone with expertise. The next step would be further analysis of all these options and then to take the plan to a professional designer to see if the plan is feasible and that in itself will be expensive. He asked for any help the City could give with that, possibly some economic development funding. If Council is interest in Long-Term Option #2, they will need some technical assistance because no one in his organization has the expertise to plan such a project. He felt that in some ways the City has inadvertently gotten Greenlife into this situation because from their point of view, they went through the entire permitting, review and building process and no one raised a question until the business was opened. He would appreciate anything the City can do to help them address this situation.

Councilwoman Cape didn't think that it was important that we micromanage Greenlife's building changes but that we make certain that the UDO requirements of the buffer and traffic off Maxwell Street are upheld.

At the suggestion of Councilman Mumpower, Mr. Swann said that if they will take into consideration of moving the cooler, which will get them closer to the 20-foot buffer.

When Mayor Bellamy said that the Owens Report specifically states that "it appears that truck traffic should not have been allowed to use Maxwell Street," Traffic Engineer Anthony Butzek said that the City can design some type of structural islands to keep trucks off the street.

Councilman Newman feels that if Greenlife is willing to work with the City in good faith and put some resources forward to look at the different options, we should meet them half way and ask the City Manager to look for which option(s) would be the most workable solution

Councilman Davis would like for Mr. Swann to give a little more direction on where he wants to go with his business; and, if we can make it happen, he would be willing to have only our planners work with him.

In response to Councilwoman Cape, Mr. Swann said that few sites in the City are big enough for his business; but the Deal Buick site is not out of the question. However, Greenlife is committed to a long-term lease at the existing site.

At the suggestion of Councilman Freeborn, the majority of Council decided that the next step would be to have Councilman Freeborn and Councilman Newman take a role in this by working with staff, Greenlife and community representatives to get Council's short-term and long-term expectations fully realized and make sure they are in line with reality. The report will be brought back to Council in 30-60 days.

It was the majority of Council's decision to instruct the City Attorney to investigate the issue of issuing tickets to private vehicles on Maxwell Street.

E. STATUS OF ROADWAY IMPROVEMENTS BY TARGET CORPORATION

Traffic Engineer Anthony Butzek said that in 2003, Target was issued a Certificate of Occupancy. They were required to post a bond in the amount of $350,000 to complete roadway improvements determined to be necessary by the completed traffic study. City staff has subsequently been involved in ongoing efforts to encourage Target to complete the necessary improvements. While progress has been slow, Target now appears to be making good faith efforts to complete the required improvements.

Two specific off-site roadway improvements were required to mitigate Target's traffic impact:

1. Installation of a traffic signal at the intersection of River Hills Road and Circuit City/Pier One
2. Addition of a second eastbound left-turn lane on Swannanoa River Road at S. Tunnel Road

1. Traffic Signal

Metal poles and arms were ordered in summer 2006. Construction of the traffic signal began in September 2006. Work is well underway, and metal poles and arms have been installed. Outstanding items include adjustment of improperly installed arms, reinstallation of signals, wiring and activation of the signal, and repaving and restriping of

eastbound River Hills Road approaching the signal. An estimated completion date is being sought.

2. Turn Lane

This portion of the project requires approval of the N.C. Dept. of Transportation (NCDOT) since they maintain Swannanoa River Road, S. Tunnel Road, and Wood Avenue. Target has approval from NCDOT for most of the work, but is still waiting on approval for the necessary modifications to the traffic signal (this approval has to come from Raleigh). Target's contractor was apparently ready to begin work within the past two weeks, but was asked by NCDOT to delay the project until late winter or early spring. The reasons for this included the approaching holiday traffic, and the fact that the work was starting so late in the year due to Target's inability to get final NCDOT approvals. The difficulty of constructing during cold weather was also a consideration. Given the proximity of the holidays and the impact that ongoing construction would have on the associated traffic, staff supports this decision and has requested a start date of approximately March 1. This project is expected to take two to three months to construct.

Based on the current process, it would be reasonable to expect that all work would be completed by the end of May 2007, possibly sooner. Additional information will be provided by staff at the meeting as it becomes available.

In response to Councilman Mumpower about getting improvements completed on a timely basis, Mr. Butzek said that the City staff has already implemented a procedure whereby City staff is more stringent in ensuring that improvements are in place prior to the issuance of a final Certificate of Occupancy.

Upon inquiry of Councilman Mumpower, Mr. Butzek said that it is reasonable to put timetables in place. In terms of the signal, we expect this to be operating before Thanksgiving. With the turn-lane improvements, a March 1, 2007, start date is what the City has requested.

In response to Mayor Bellamy, City Attorney Oast said that we are certainly in a position to state that Target is not in compliance and whatever enforcement that emanates from that we can pursue.

With regard to compliance deadlines, it was the consensus of City Council to instruct the City Attorney to work with Mr. Butzek and Target to come up with an agreement that has real penalties built into it with regard to establishing dates and timelines, with said agreement being voted on by Council on November 28, 2006.

V. NEW BUSINESS:

A. ROCK HILL ROAD SANITARY SEWER REQUEST

City Engineer Cathy Ball said that the purpose of this report is to provide information to City Council on the availability of sanitary sewer on sections of Rock Hill Road as well other areas of the City.

Early this fall, Mr. Author Edington of 236 Rock Hill Road contacted the City requesting information about the location of sanitary sewer adjacent to this residence on Rock Hill Road. Staff informed Mr. Edington that the closest sanitary sewer line to his property was approximately five hundred feet along Rock Hill Road. Mr. Edington's septic system recently failed. He was notified by the N. C. Dept. of Health Services that he could not utilize a septic tank system to dispose of his waste water.

On October 12, 2006, City Council received a petition from Mr. Edington and adjacent residences requesting public sewer service.

After follow up investigation staff was able to determine the following:

- The subject property was annexed into the City in 1983.
- Staff could find no evidence that the City was required to provide public sanitary sewer to properties in this area.
- There are approximately eleven homes in this area that do not have access within 300 feet of their home. (The N.C. Dept. of Health Services requires that homes within 300 feet of a public sanitary sewer system.)
- There are approximately ten areas in the City that contain four or more homes that do not have access within 300 feet to a public sanitary sewer line.
- The current practice of the City of Asheville for annexation areas is to provide public sewer service within 300 feet to all existing homes in the annexed areas.
- Public sewer service is provided by Metropolitan Sewerage District (MSD). As part of the Consolidation Agreement, MSD does not extend sewer service in the district.

The cost to provide public sewer service to all eleven homes in this area is estimated to cost $850,000. These costs include design, permitting, easement acquisition and construction. The cost to provide public sanitary sewer service to 236 Rock Hill Road is approximately $100,000. These costs include design, permitting, construction and resurfacing the street.

The other areas that do not have four or more residences and do not have public sewer service within 300 feet are included in the table below.

Item	Area	Annexed	Number of Residences	Cost to Provide Public Sewer
1	Sourwood Lane	1973	4	$745,000
2	Rock Hill Road	1983	11	$850,000
3	Galloway	1988	6	$415,000
4	Gashes Creek	1973	34	$1,440,000
5	Oak Hill	1960	8	$750,000
6	Spooks Branch	1960	4	$410,000
7	Oteen Church	1973	7	$1,050,000
8	Baker	1960	4	$460,000
9	Beaverbrook	1960	19	$1,140,000
	TOTAL			$7,260,000

If Council authorizes staff to move forward on installing public sewer service in the Rock Hill Road area, the design would need to be completed and permits acquired prior to construction. We estimate that construction could begin in the summer of 2007.

Staff recommends that this request be evaluated as part of the annual budget process due to the financial impacts of this decision.

Ms. Helen Edington, resident on Rock Hill Road, said that their septic tanks are failing and since they are City residents, urged City Council to do something a soon as possible.

Mr. James Grant, property owner in the Rock Hill Road area, sought City Council assistance for the homes in the Rock Hill Road area.

Upon inquiry of Councilman Mumpower, Ms. Ball said it was her understanding that the Health Department will not allow a septic tank at the Edington home because the septic field area has become so saturated that it won't allow discharge and therefore it won't pass the test. There is not another location on their property where they can site the septic field that will pass the Health Department's requirement.

In response to Councilman Mumpower, Ms. Ball said the only options are to provide another septic tank system or to provide public sewer service. The option of public sewer service to where the property owner has more flexibility in being able to pay for it is the option of doing a special assessment, but $850,000 for 11 homes over 5 years is still a lot of money for the homeowners. Also, some smaller apartment complexes have a septic pool if you can find a location.

Councilman Freeborn was familiar with two types of septic systems, one of which is for land that doesn't percolate. That may be a short-term solution. But, ultimately, these are City residents and we should help. If a special assessment process is used, he would support allowing them to pay over 20-30 years.

Vice-Mayor Jones said that situations like this will be coming forward and perhaps the City, MSD and the affected residents can meet to see how we can plan for this in the future.

Mr. Tom Hardy, representing MSD, reiterated that as part of the 1990 Consolidation Agreement, MSD does not extend sewer service in the district. He recommended doing a little more in depth research on these sites with the Health Department and prioritize and see how bad the sites are, like if the sites are failing. There are other options to on-site systems and you will need to find out what the Health Department will allow in terms of alternate on-site technologies. That may be where we can save some money. If we find that we can't do that and we have to go to public sewer, we will be glad to market our resources as far as engineering and design and that sort of thing to help out. We could do that a lot more efficient than a consultant because we do a lot of rehab and we have engineers in house. Before a budget is estimated, you should survey it, lay it out and then get a tight budget estimate for at least this hot spot. But first, the Health Department should determine how many of the 11 are hot spots and are there on-site systems that could serve that purpose.

Vice-Mayor Jones thanked Mr. Hardy for his offer of technical assistance.

Upon inquiry of Councilwoman Cape, City Manager Jackson said that City staff will be reviewing with Council next week some annexation policies.

In response to Mayor Bellamy, City Attorney Oast explained what services the City provides when an area is annexed.

Upon inquiry of Councilwoman Cape, Ms. Ball said that none of these areas qualify for Community Development Block Grant funds.

Understanding the urgency, it was the consensus of Council to instruct the City Manager to work with MSD and look at all available options and then report back to Council with cost estimates on each option and time frames to make each of those happen on December 12, 2006, with the overall plan for the boarder problems, but report back to Council on November 28, 2006, with a specific plan for the Rock Hill Road immediate problem.

Ms. Ball said that in the meantime, given the urgency of the situation, we may try to see if there is some way to pump the system on a regular basis in order to meet the Health Department Codes so they wouldn't necessarily be in violation. We would have to work with the Health

Department to see how quickly that would have to be done to meet their requirements until some other measures are put in place. In addition, City staff will try to get all the people out there to meet together and look at other opportunities. If there is another way to do a different kind of septic system that would work, we would probably try to do that since that would happen quicker than putting in a new sewer line.

B. LEGISLATIVE PROGRAM FOR 2007 SESSION OF THE N.C. GENERAL ASSEMBLY AND THE FISCAL YEAR 2008 FEDERAL PRIORITIES STATE AND FEDERAL LEGISLATIVE AGENDA

City Attorney Oast said that that the purpose of this agenda item is: (1) To review significant legislation of interest to municipalities from the 2006 "short" session of the N C. General Assembly; (2) to review the outcome of Council's legislative requests from 2006; and (3) to give the Council an opportunity to begin discussion of issues it may wish to include in a Legislative Agenda for the 2007 Session of the North Carolina General Assembly, and for federal priorities for the upcoming 110th Congress.

In recent conversations the Council has expressed an interest in beginning its development of a legislative program earlier than it has in past years. In recent years, the Council has begun these discussions no sooner than in January or February.

The North Carolina League of Municipalities (NCLM) recently held its Annual Convention in Greensboro.

The following is the new potential legislative initiatives that Council members have noted as of interest. For the Federal Legislative Agenda (1) Illegal Immigration - Support for national and state legislation/resources to address illegal immigration issues at the local level, specifically in respect to criminal behavior and the employment of illegal aliens; (2) Social Security Office Location - Support changes to require that Social Security offices be located on public transportation routes so that all citizens have access to the services provided by the agency; (3) North Carolina Health Choices Initiatives - Support federal legislation securing the necessary funds to continue to insure our children in North Carolina by supporting Senate Bill S. 3913 (Keeping Children Covered Act of 2006); and (4) Minimum Wage - Support raising the federal minimum wage. For the State Legislative Agenda (1) Safety for Children in Public Parks - Support legislation that strengthens the laws regarding the sex offenders and public protection registration programs to protect children in public parks (2) Illegal Immigration - Support for national and state legislation/resources to address illegal immigration issues at the local level, specifically in respect to criminal behavior and the employment of illegal aliens; (3) Chimney Rock - Support creation of Chimney Rock as a new State Park; and (4) Real Estate Transfer Tax - Support North Carolina General Assembly legislative action for an act to authorize Buncombe County to levy an excise tax on instruments conveying real property in Buncombe County.

Initiatives identified by Council currently on the 2006 Legislative Agenda include (1) Criminal Justice System Reform - Support continued legislative review and action as necessary to address criminal justice system funding issues, particularly as they affect Asheville; and (2) Repeal Sullivan Acts - Support repeal of the Sullivan Acts II and III.

Council has an opportunity to (1) identify potential new initiatives; (2) select initiatives for inclusion in a state and federal legislative agenda; and (3) consider how to communicate with our legislative delegation.

Because the 2007 session is a long session, the legislature is not as restricted as in the short session as to the items it may consider. The deadlines for submission of local bills to Bill Drafting, and for introduction in one of the two houses of the General Assembly are typically

established during the first week of the session. However, it is not too early to begin discussions with the members of our delegation, before they go down to Raleigh. Some of this discussion can occur at the meetings of the Chamber of Commerce Legislative Task Force, which both Council and City staff regularly attend. The City's legislative program will be reviewed at an upcoming meeting of the Task Force.

City staff recommends that Council discuss its interest in Legislative initiatives for the upcoming session of the North Carolina General Assembly, as well as federal funding priorities for Fiscal Year 2008-09 and what further steps it may wish to take to develop a state and federal legislative program.

On April 25, 2006, the City Council adopted Resolution No. 06-91, and transmitted it to the members of the General Assembly whose district includes Asheville. The following actions were requested and taken:

1. **Request**: Amendment of the 1993 local act affecting utility franchise taxes paid by CP&L (now progress Energy) and PSNC to include settlement of the litigation arising from the annexation of Progress Energy's Lake Julian facility.

   Action: Amendment adopted as submitted.

2. **Request**: Legislative annexation of general properties south of town (at the request of the property owners).

   Action: Annexed as requested.

3. **Request**: Consideration of legislation to establish a funding source for the Asheville Civic Center.

   Action: No action taken, but a response came from Senator Nesbitt indicating that legislative action would not be appropriate until there had been some preliminary discussion with the delegation, and until the City had resolved its position on the matter.

4. **Request**: Repeal of the Sullivan Acts.

   Action: No action taken.

The remaining items in Resolution No. 06-91 were not specific to Asheville:

5. **Request**: Review level of funding to the criminal justice system.

   Action: In the law amending the 2006, the following additional positions were authorized and funded:

   a. District Court Judge seats increased from 7 to 8.

   b. Assistant District Attorney positions increased from 11 to 13.

   c. Cap on number of magistrates (previously 15) was removed.

6. **Request**: Support Land for Tomorrow initiative for referendum on issue of State funding ($1 billion) for public lands. Also supported by the Chamber's Legislative Task Force.

   Action: No action taken.

7. **Request**: Oppose efforts to dilute local amendment over cable TV franchise.

   Action: A law of statewide application was adopted. Although the law dilutes local authority significantly, some local government concerns were recognized and incorporated into the law prior to adoption. A more detailed report will be provided to Council at a later time.

8. **Request**: Support an increase in the minimum wage to $7.00/hour.

   Action: The minimum wage was increased to $6.15/hour, effective January 1, 2007.

We are continuing to gather information about Council's other legislative concerns, and will report our findings.

With regard to the general state legislation of interest items, because 2006 was a "short" session, the potential for major legislative action for affected cities was somewhat limited. Following is a listing of some general laws of interest. Some items are covered in the memorandum dealing with Council's legislative requests.

1. Amendments to "Bill Lee" act. This law enables local governments to identify zones within their jurisdictions, that because of depressed economic conditions, are eligible for tax credits. The law was amended to narrow the criteria for qualification, but expands the businesses eligible for credit.

2. Eminent domain powers. In response to the Kelo v. New London decision from the U.S. Supreme Court, legislation was adopted that narrows the purposes for which local governments in North Carolina can use the power of eminent domain.

3. As reported to Council earlier, local governments were authorized to permit their law enforcement officers to perform the functions of an immigration officer pursuant to a Memorandum of Understanding with a federal agency.

4. Stormwater – Some changes of a technical nature were made to the 2004 law to conform its provisions with regulations adopted by the Environmental Management Commission.

There was other legislation of interest to municipalities; the list set out above is necessarily selective, based on matters that have a direct and potentially significant impact on cities, or with respect to which Council has expressed an interest.

City Attorney Oast urged Council to come to him or Economic Development Director Sam Powers with any requests for legislation. He also suggested that Council begin contacting our legislators now.

C. PRIORITIES FOR FUNDING UNDER THE SURFACE TRANSPORTATION PROGRAM - DIRECT ATTRIBUTABLE PROGRAM (STP-DA)

Metropolitan Planning Organization (MPO) Coordinator Dan Baechtold said that this is consideration of support for using federal Surface Transportation Program – Direct Attributable (STP-DA) money to fund small transportation projects with high priority at the local level. The Metropolitan Planning Organization is in the beginning stages of discussions about programming these funds. The MPO has put out a preliminary "call for projects."

STP-DA – This term refers to a federal funding source for transportation projects. The acronym stands for Surface Transportation Program – Direct Attributable. The term "Direct

Attributable" refers to the fact that this is the portion of federal STP funds that are allocated directly to our area, and the amount of the funds can be attributed to the population of our urbanized area.

The Asheville Urbanized area receives about $2.7 million per year in STP-DA funds. The Asheville urbanized area includes portions of Buncombe, Henderson, and Haywood Counties. The membership of the French Broad River MPO is made up of all the local governments in the three counties.

The MPO has the option to choose how these funds will be programmed. Through its committees (the Transportation Advisory Committee and Technical Coordinating Committee), the French Broad River MPO could select which projects will be constructed with STP-DA funds. The STP-DA funds can be spent on most types of capital improvements for transportation. Some examples include: road widening, intersection improvements, sidewalks, greenways, bicycle lanes, streetscape and landscaping improvements, crosswalks, and transit capital projects such as purchasing buses, shelters, or benches. The funds can be spent on all aspects of the project including design and the purchase of right of way.

The French Broad River MPO is currently seeking input from local governments to determine high priority local projects that would be good candidates for these funds. The MPO will then enter into discussions with NCDOT to determine a process for programming the funds in the Transportation Improvement Program (TIP).

At a later date, the MPO will put out a more formal call for projects and determine a method for equitably distributing the funds throughout the region. For this preliminary call for projects, City staff has identified a list of local transportation needs that are either under-funded or have no funding source. This list is in draft form, but will be used as a starting point for discussions at the MPO level.

PROS:

- This funding source provides an opportunity to accomplish small transportation projects in a variety of categories.
- There are many documented local transportation needs that are under-funded.
- STP-DA funds are flexible and can be used for road improvements, sidewalks, bicycle projects, greenways, crosswalks, landscaping, and transit improvements.
- The funding can be used for all aspects of the project including design and purchase of right of way.
- In the past, the regional MPO process for prioritizing projects has been cooperative and successful.

CONS

- This is not new or additional funding. The money is currently committed to other projects in our region. The MPO will need to work with the NCDOT to make adjustments to the TIP to make these funds available for locally selected projects.
- Projects that are locally selected and paid for with STP-DA funds will require a twenty percent (20%) local match.
- The City will be responsible for all aspects of project management, including purchase of right of way, design, and construction. Project management can be complicated and time-consuming and will require additional staff resources.
- Equitable distribution of the funds will require regional cooperation.

City staff requests Council support the process at the MPO level to program STP-DA funding on the high-priority local projects list developed by staff.

Mayor Bellamy said that she has received a request from a state representative for Council's support on this initiative; however, he does want the MPO to allow the N.C. Dept. of Transportation to define where the money will come from, as opposed to the MPO.

It was the consensus of Council to support the process at the MPO level to program STP-DA funding on the high-priority local projects list developed by staff.

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of October 6 - November 2, 2006: G. Bryon Zimmerman (Parks & Recreation), Rhea Cravens (Water), Lee Shepard (Streets), Tom Fisher (Streets), Kara Hastings (Sanitation), James Gregory (Streets) and Edna Stancil (Streets).

The following claims were received during the period of November 3 - 9, 2006: Cue'N Spirits (Water), Kevin Hackett (Parks & Recreation), Marquel Fisher (Sanitation), Belinda Blankenship (Police), Juanita Medford (Sanitation) and Christina Leif (Engineering).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton spoke to Council about the quality of life and the need for quality public education. He said that recently he has received reliable reports that some City departments are not conforming to the requirements of Section 6.2 of ISO 9000 I for quality personnel practices in general and may, in some cases, be in violation of the provisions of Title VI of the 1964 Civil Rights Act. Mayor Bellamy instructed the City Manager to investigate the allegations cited by Mr. Hampton.

At 10:30 p.m., Councilman Freeborn moved to continue the closed session. This motion was seconded by Councilman Davis and carried unanimously.

At 11:00 p.m., Councilman Freeborn moved to come out of closed session. This motion was seconded by Vice-Mayor Jones and carried unanimously.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 11:00 p.m.

Kesha Lipe
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – November 21, 2006 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

GROVE ARCADE UPDATE

Ms. Ruth T. Summers, Executive Director of the Grove Arcade Public Market Foundation, updated City Council on the Grove Arcade Public Market. She said that concerted efforts have been made by the Foundation and staff to evaluate tenant mix and to seek out and attract sustainable businesses that enhance the Grove Arcade and its tenants. She explained that the successes which include the retail floor is 96% leased, 10 new businesses opened; 5 businesses have expanded; and only one retail space is vacant (682 square feet). She then explained the tenant mix in the Grove Arcade consists of fresh food; prepared food & restaurants; service providers; specialty stores; and arts & crafts. She said the Grove Arcade exemplifies the entrepreneurial spirit and unique homegrown business model.

She explained they are continuing to face the challenges of addressing inherited financial problems by: (1) streamlined management; and (2) reduced receivables and administration costs. To move forward they have (1) restructured foundation board and added new members; and (2) redefined mission statement and adopted the following to guide our actions - "To effectively operate a premier destination in downtown Asheville, filled with successful businesses and educational programs that reflect our mountain heritage and cosmopolitan taste". They are a community gathering space and they have also become a venue for neighborhood events.

Ms. Summers responded to various questions/comments from Council, some being, but are not limited to: how many residential units and office space is vacant on the second floor; how was the new mission statement created; is the Grove Arcade looking at the public component and reaching out for events; are the tenants happy with the new direction away from more of the agricultural field to food and specialty shops; and is a public market feasible in the Grove Arcade.

In response to Councilman Mumpower, Ms. Summers explained that the lack of parking does have an economic impact on the success of not only the Grove Arcade but all downtown businesses. She wondered if Council could work with the federal government to open up the federal building parking lot because the federal court people are using the Wall Street Parking Garage and there are many times the garage is full and not available for transient parking. She also mentioned the difficulty of finding the existing parking garages. In addition, she said that the Grove Arcade is in the process of compiling information to present to the City in the future about the restructuring of the Certificates of Participation Loan for a longer period of time.

In response to Mayor Bellamy, the Grove Arcade Board of Trustees would like to participate with the City and possibly the Chamber of Commerce in surveying downtown merchants about parking in the downtown.

On behalf of City Council, Mayor Bellamy thanked Ms. Summers for the informative update and expressed the asset the Grove Arcade is to Asheville and Western North Carolina.

POLICE ADVISORY REPORT

Mr. Tim Flora, Chair of the Citizens/Police Advisory Committee, said that in January of 2006, and in conjunction with the rollout of new districts created by the Asheville Police Department to enhance its policing effectiveness, the Citizens/Police Advisory Committee decided to sponsor a series of five community meetings to give residents the opportunity to (1) meet the police officers responsible for patrolling their neighborhoods; (2) participate in a discussion of the public safety concerns of their community; and (3) share ideas on how the police and the community - working together - can address those concerns.

A community meeting was held in one of the five represented areas of the City each month starting in March, 2006. These meetings were promoted via the local print and broadcast media as well as through neighborhood associations, targeted mailings, and area postings. An agenda was specifically designed to enhance the flow of community in both directions. As a result of these meetings, a 14-page report was compiled listing both the top issues identified in each respective area and the community's suggestions for addressing these issues.

In North Asheville, traffic safety, vehicle/home beak-ins and vandalism/graffiti issues were identified. In West Asheville, traffic safety, vehicle/home beak-ins, drugs and Hispanic-related issues were identified. In South Asheville, traffic safety, vandalism/graffiti and drugs were issues identified. In East Asheville, traffic safety, drugs and illegal aliens were issues identified. And, in Central Asheville, drugs, repeat offenders, homelessness and gangs were issues identified. Traffic safety and drugs were the two major issues in all communities.

The following is a sampling of the solutions provided by the community on mitigating the top concerns: Traffic Safety - cameras at stop lights, particularly the most troublesome areas; increased ticketing for illegal parking; more use of electronic speed boards; and print traffic citations in the newspaper. Drugs - more officers dedicated to illegal drug enforcement; use closed-circuit TV cameras in troubled areas; increase prevention initiatives; and more prosecution of drug dealers. Vandalism/Graffiti - requirement to remove all graffiti immediately after event; and provide a public wall where it would be legal to paint. Vehicle/Home Break-Ins - increase police communications with pawn/second-hand shops; and establish more community watch groups/neighborhood associations.

In response to Councilman Mumpower, Mr. Flora said that the Asheville Police Department is already responding to some of these issues and he would be happy to come back to Council in the next couple of months to talk about turning this information into action.

Police Chief Bill Hogan said that Captain Benson has met with the appropriate Police personnel and asked for specific strategies on what they were going to do in the different districts to respond specifically to these issues. They will be coming back with plans and accomplishments.

It was the consensus of Council to ask Mr. Flora and/or Police Chief Hogan to come back to Council in the January or February to hear further updates on the progress made to date. Mayor Bellamy felt it would be good to hear intermediate updates from the Public Safety Committee as well.

PUBLIC SAFETY PARTNERSHIPS

Mr. Gene Bell, Executive Director of the Housing Authority of the City of Asheville (HACA), said that the Asheville Housing Authority, in its on-going efforts to continue its partnership with the Asheville Police Department, has continued to evaluate its public safety needs at its various housing locations throughout the City.

At its November 2006 meeting, the City Council Public Safety Committee heard a presentation from the Asheville Housing Authority regarding its on-going efforts to bolster public safety throughout areas of concern within the Asheville Housing Authority properties. To that end, the Authority is prepared to move forward with additional coordinated efforts aimed at increasing public safety throughout these properties.

The purpose is to develop and implement short- and long-term security strategies to impact high crime areas within the HACA developments. The Asheville Police Department (APD) call for service statistics from 10-1-05 through 10-1-06 indicate that there were 2,312 calls from Pisgah View Apartments, 1,277 calls from Lee Walker Heights, 1,200 calls from Deaverview, 1,078 calls from Livingston/Erskine/Walton combined, and 967 calls from Hillcrest, with lower numbers from other developments.

The following is their plan: (1) Pisgah View: HACA Safety Team will focus additional overnight resources to disrupt illegal drug and alcohol markets. Primary strategy in Pisgah View will be multiple patrols in the short term, with implementation of cameras and gates over the next six months; (2) Hillcrest: HACA Safety Team will focus additional overnight resources to disrupt illegal drug and alcohol markets. Primary strategy in Hillcrest will be to staff the gatehouse and check identification of all persons entering the development during high crime hours; (3) Deaverview: Resident officer is making a difference; HACA Safety Team will continue to monitor conditions; (4) Lee Walker Heights: HACA will ask APD to mirror HACA Safety Team efforts in developments above by staffing the entrance to Lee Walker during peak hours; (5) Livingston/Erskine/Walton: HACA will ask APD to mirror HACA Safety Team efforts in developments above by increasing patrols in this area; (6) HACA Safety Team and APD will continue periodic patrols of other HACA developments, adjusting these plans as necessary; (7) HACA will support an APD request for additional City funding to match HACA Safety Team funding if deemed necessary by APD leadership; and (8) HACA leadership will work on infrastructure needs including (a) acquiring four radios compatible with APD system; (b) upgrading street lights at Pisgah View Apartments and Hillcrest; (c) installation of cameras at Pisgah View Apartments; and (d) implementation and funding of gate plan at Pisgah View Apartments.

Councilman Mumpower, Chair of the Public Safety Committee reported on the 2007 Public Safety for Public Housing Partnership Initiative – Renewing Our Efforts. Public housing continues to be ground zero for much of the open drug trafficking and related criminal activities that occur in our communities. Under the leadership of our Chief Hogan and the efforts of the Asheville Police Department, good progress has been made over the past year and a half, but there is a need for persistent diligence and new initiatives to counter the adaptation and enthusiasm of those who use public housing as a playground for illegal activity.

Our 2007 plan centers on the implementation of 4 distinct creative crime prevention initiatives in 4 separate pubic housing developments. The impact of each initiative will be tracked and at the end of a reasonable period of implementation, we will evaluate the effectiveness of these interventions. Efforts will then be made to expand the most workable options to other public housing development and high crime neighborhoods.

Components

Initiative 1	Gated community	Establish a gated community that is better able to filter out non-residents who affect the safety of the development. This initiative would be supported by APD but implemented through the Housing Authority.
Initiative 2	Beat police on the street	Establish 24 hour beat police presence dedicated to monitoring and supporting crime prevention in a specific public housing development.
Initiative 3	"I" Can Do It Program	An extension of the High Point "hug a thug" program, this approach centers on *investigation*, involvement of *influentials*, and *intervention* with street dealers. It would require a partnership between APD, DA's office, housing authority, neighborhood churches, residents, family members and other concerned individuals.
Initiative 4	Dedicated Drug Suppression	High intensity attention provided by the APD Drug Suppression Team with a dedication to creating a "zero tolerance" environment for drug trafficking of any form in the identified public housing development.

This would need to be a team effort involving a wide array of community minded people, organizations, government entities, churches, neighborhoods and others with an eye on the impact and harm of drugs in our community.

To hold the line and limit the harms of drugs in our communities we must demonstrate a higher level of creativity, enthusiasm, intentionality, and persistency that those who traffic in drugs. This initiative is about proactive community action, cooperative effort, and dedication to the importance of public safety. These are just for creative opportunities – there are more and better ideas out there for us to discover and bring to life. That's the real opportunity and need – to renew our efforts to assure public safety in public housing.

In tandem, the Asheville Police Department has been and will continue to analyze additional strategies to better provide more effective public safety at these properties.

The Public Safety Committee asked that the Council endorse Asheville Police Department in its efforts as it continues to analyze and evaluate public housing public safety strategies in coordination with the Asheville Housing Authority's on-going efforts.

Mr. Bell responded to various questions/comments from Council regarding efforts to assure public safety in public housing, noting that the residents and neighborhoods want to be involved in positive solutions.

In response to Vice-Mayor Jones, Mr. Bell asked that the Meals on Wheels Office contact him regarding delivering hot meals to residents in public housing.

Police Chief Hogan said that they are looking at the High Point model which studies the social network of neighborhoods. The point is you are not going to stop people from dealing drugs but what you can do is break the marketing system that occurs at the street level drug-dealing. What that does is takes the violence out of the neighborhoods and basically by following

their model, it actually collapses that market and it doesn't come back. He will also be looking at other alternatives and will report back to Council in 60-90 days with a complete analysis.

It was the consensus of Council to endorse Asheville Police Department in its efforts as it continues to analyze and evaluate public housing public safety strategies in coordination with the Asheville Housing Authority's on-going efforts. In addition, it was the consensus of Council to ask the Police Chief to report back to Council within 60-90 days with his complete analysis.

THE EXPLODING CRISIS OF CHILD PORNOGRAPHY AND INTERNET PREDATORS

Mr. Grier Weeks, Executive Director of the National Association to Protect Children, first explained what child pornography is, noting that the three types of child pornography crimes consist of (1) production/manufactures; (2) distribution; and (3) possession. In a 2005 study funded by Congress - Child-Pornography Possessors Arrested - Internet-Related Crimes; Findings from the National Juvenile Online Victimization Study, it showed (1) 83% had images of children 6-12 years old; 39% had images of children 3-5 years old; and 19% had images of children younger than 3 years of age. Said study had 80% images of children of sexual penetration; and 21% had images of children subjected to "bondage, rape or torture. Most of these were ... gagged, bound, blindfolded or otherwise enduring sadistic sex."
The study revealed that 1% limit their collections solely to images that researchers termed "soft-core" ("nude or semi-nude minors").

Law enforcement says that victims are getting younger; many are babies or toddlers; abuse is getting more violent and sadistic; and live "pay for view" and streaming videos.

In said study, it showed that who possesses child pornography that 55% were known to be direct threats; and 40% were known to have directly sexually abused a child. The crisis is big - there are over 100,000 websites; over 3.5 million images identified; estimated 20,000 new images each week; and federal and state law enforcement completely overwhelmed, outnumbered and outspent.

In the peer-to-peer trafficking study of worst images revealed that in North Carolina there are over 65,000 IP addresses.

He explained that every North Carolina child online is at risk; children are quickly enticed online; predators are "cataloguing" children; and the state Internet Crimes Against Children (ICAC) Task Force agents are overwhelmed, leaving children unprotected as a result.

He then explained the weak laws in North Carolina.

Law enforcement is overwhelmed - cases are triaged (major commercial rings, identifiable children believe to be in immediate danger); vast majority of cases cannot be investigated; very few victims identified and rescued; and high profile undercover operations typically net dozens, less than 200.

He explained the federal spending priorities for Fiscal Year 2005-06, with only $14.5 Million being allocated for the Internet Crimes Against Children Task Force Program (50 states).

He suggested the following ways Asheville can help: (1) Fund a dedicated child exploitation investigator with APD with salary and benefits of approximately $8,000 ($4k afterwards), 3,000 for laptop, desktop and peripherals and $1,000 for software. This would be an enormous potential to assist and improve other sexual abuse investigations; (2) Become a model ICAC Task Force Partner, which could consist of (a) creating a dedicated APD position; (b) joining the NC ICAC Task Force; (c) have a strong commitment to training (d) have a strong

partner in ICAC data network; (e) cross-training, cooperation with child abuse investigations; and (f) show leadership nationally; (3) Call on state legislature to take action/support Representative Goforth and delegation for stronger penalties, model laws, more funding for ICACs and more funding for forensic labs; (4) Provide leadership and invest in state, regional or local forensic capacity because the great single bottleneck is 8 month waits are common and there is no one solution but more capacity is urgently needed; and (5) Fund educational programs for parents in community and schools about online child safety: (a) 1,000's of Asheville children online are at risk; (b) parents have very limited knowledge of dangers and safeguards; (c) weakest parental link endangers kids; (d) sporadic efforts to education; and (e) return on investment would be high.

On behalf of City Council, Mayor Bellamy thanked Mr. Weeks for the opportunity for this Council to lend its support to help our children be safe and by being a part of this initiative.

In response to Councilman Mumpower, Mr. Weeks said that even though Buncombe County does have a person who does these types of investigations now, he would request that the City of Asheville dedicate an officer because two full-time people could save a lot of children.

Vice-Mayor Jones urged parents to continually stress to children to call 911 and ask for help if anyone is harmful to them.

Mr. Weeks responded to Councilman Mumpower regarding how much are child pornography is related to other crimes.

In response to Councilwoman Cape on how the City can play a role in helping parents become educated, it was the consensus of Council to charge City Manager Jackson, Police Chief Hogan and Community Relations Director Lauren Bradley to take on this task, by perhaps a link on the City's website, information on how blocks can be placed on a computer and an informative program on the government channel.

It was the consensus of Council to (1) ask Police Chief Hogan to look at this issue and come back with recommendations of how those recommendations could be folded into our budget process and report back to Council in 60-90 days, or sooner if possible; (2) add the issues outlined by Mr. Weeks requesting legislative support on Council's legislative agenda; and (3) explore regional and Buncombe County partnerships.

At 4:31 p.m., Mayor Bellamy announced a short recess.

STRATEGIC PLAN ACCOMPLISHMENTS

Ms. Lauren Bradley, Community Relations Director, said that on January 12, 2006, City Council hosted a *Goals for Asheville* forum where citizens were invited to participate in focus groups to develop consensus on their top three community priorities. City Council reviewed the citizen input collected at the forum at Council's January 20-21, 2006 retreat. During the retreat, Council worked to incorporate the community's feedback into the City's Strategic Vision and Goals document, which was officially updated in February.

Throughout the year, City Council has received periodic updates on progress related to City Council's goals.

She explained that the goals for the Asheville forum's top community priorities: were (1) Development & Growth; (2) Employment, local businesses & economic development; (3) Natural environment & Public/Alternative Transportation; (4) Public Safety & Drug Issues; (5) Affordable Housing; and (6) Public Education & Youth.

Council's seven priority areas were (1) Economic Development, Job & Business Growth; (2) Growth, Development & Land Use; (3) Community Building; (4) Housing Opportunities; (5) Natural and Built Environment; (6) Partnerships to Improve Critical Services and Infrastructure; and (7) Sense of Place, Heritage & Arts.

She reviewed accomplishments in the area of critical services and infrastructure: (1) Civic Center roof, street and sidewalk construction, public safety communication enhancements and fleet replacement; (2) $2.5 million investment in critical capital needs; (3) Added five new 30-foot low floor buses, improving access for elderly and handicapped riders; (4) Began implementation of a strategic capital improvement plan for the water system; and (5) Received positive results from the American Waterworks Association QualServe peer assessment of the city's water system (designed to help water utilities achieve superior performance).

In the area of growth and development, we (1) Extended services into the extraterritorial jurisdiction (2) Conducted stakeholder processes for: Shiloh Neighborhood Plan, Merrimon Avenue Corridor Study, and Haywood Road Corridor Study; and (3) Bringing forward freestanding amendments and comprehensive revision of Unified Development Ordinance: Steep Slope, Enforcement, and Landscaping.

More accomplishments in the Housing Opportunities field consist of (1) Significant progress on the 10 Year Plan to End Homelessness; and (2) Application of CDBG, HOME and HTF funds to the Woodfin and Griffin Apartments. An accomplishment in the Economic Development field includes the Request for Proposals for City-owned property. In addition, an accomplishment in the Natural & Built Environment includes (1) John B. Lewis Soccer Complex; (2) Covington Clubhouse at Aston Park Tennis Facility; and (3) Hall Fletcher Park in West Asheville.

A sample of ongoing initiatives include (1) Construction of downtown public restrooms; (2) Comprehensive wayfinding program; (3) Wilma Dykeman Riverway Plan; (4) Ongoing participation in the HUB project; (5) Sustainable Advisory Committee on Energy & the Environment; (6) Regional partnership to address flood issues; and (7) Addition of planning staff to enhance enforcement and long-term planning initiatives.

She said that as key programs and initiatives continue to progress, it is recommended that Council use this summary as well as any additional updates to continue to update the Strategic Vision and Goals document during the City Council retreat in early 2007.

Ms. Bradley and Planning & Development Director Scott Shuford responded to various questions/comments from Council, some being, but are not limited to: how is this information being distributed to the community; what is the timeline on the steep slope ordinance and the ordinance regarding point incentives; and will the Unified Development Ordinance amendments be brought to Council in a whole package or piece-meal.

At 4:56 p.m., Mayor Bellamy announced that City Council would take a short recess which would include a closed session. Councilman Mumpower then moved to go into closed session for the following reasons: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 143-318.11(a)(5); and To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11(a)(4). This motion was seconded by Councilwoman Cape and carried unanimously.

At 5:35 p.m., Mayor Bellamy recessed the closed motion to return to the formal meeting, noting that the closed session would continue at the end of the formal meeting.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance (UDO) amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been scheduled on November 28, 2006. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Homestays UDO Amendment

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance to provide for "homestays" in single family residential zoning districts.

This code amendment provides for "homestays" (currently known as "bed and breakfast homestays") in single family residential zoning districts as uses by right subject to special requirements. Since the initiation of proactive enforcement on illegal short-term (less than 30 days) rentals in various Asheville neighborhoods, staff has been meeting with a focus group of realtors, B&B owners, Tourism Development Authority staff, and Coalition of Asheville Neighborhood (CAN) members to discuss areas for compromise. One area of apparent agreement is the provision of homestays as uses by right subject to special requirements in single family residential zoning districts. Bed and breakfast homestays are currently allowed as uses by right subject to special requirements in multi-family zoning districts.

A bed and breakfast homestay is defined as: a private, owner-occupied residence with one to three guest rooms where overnight accommodations and a morning meal are provided to transients for compensation and where the use is subordinate and incidental to the main residential use of the building. This definition would be applied to "homestays".

Section 7-16-1 provides the conditions under which uses by right subject to special requirements can be established. Bed and breakfast homestays must meet the following requirements:

- Current use districts: RM-6, RM-8, RM-16.
- No displays of goods, products, services, or other advertising shall be visible from outside the building.
- Shall be carried on by a resident of the property.
- A maximum of one full-time equivalent (one FTE) non-resident of the dwelling may be employed.
- On premise retail sales shall not be a component of the bed and breakfast homestay.
- A maximum of 25 percent of the gross floor area of the dwelling unit may be used for the bed and breakfast homestay. For the purpose of calculating the area of the structure devoted to the bed and breakfast use, only the floor areas of the bedroom and bathroom areas used by the bed and breakfast guests shall be considered in such calculations.
- No activities other than lodging, a morning meal, and an evening and/or afternoon refreshment shall be provided.
- Activities shall be provided for overnight guests only.
- Off-street parking shall be provided as required by subsection 7-11-1(c) of this chapter. Parking shall be located on the same lot on which the bed and breakfast homestay is

located, at the rear of the lot and screened with vegetation from adjacent properties and from the street.

- No accessory structures shall be used to accommodate guests.
- The owner shall reside in the principal structure.
- The length of stay of guests shall not exceed 14 days.
- No home of less than 2,500 heated square feet shall be used for a bed and breakfast homestay.
- Signage shall be limited to a single sign, not to exceed four square feet, attached to the home.
- Exterior lighting shall be residential in nature and shall not be directed towards adjacent properties.
- Bed and breakfast homestays shall be located a minimum of 500 feet from other bed and breakfast homestays and bed and breakfast inns. In calculating the 500 foot distance between bed and breakfast establishments, measurements shall be taken from the closest property line of the lot of the existing bed and breakfast establishment to the closest property line of the lot of the proposed bed and breakfast homestay. Existing, legally established bed and breakfast homestays that do not meet this separation requirement of 500 feet are permitted to expand to the maximum limits allowed under this chapter, al long as all applicable development standards are met.

This amendment allows the added flexibility for these extremely restricted uses to be accommodated in all residential districts. Additionally, the length of stay is proposed to change from 14 to 30 days and a prohibition on external signage in single family residential districts is proposed to increase neighborhood compatibility.

A suggestion was made by a citizen to increase the distance between homestay uses to 1,000 feet. He used a map that illustrates the effect of various separation distances. A request from Rebecca Manning has also been received for additional short-term rental uses in residential districts.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Factors for Consideration:

- This would allow an Edwin Avenue property previously denied by City Council to likely qualify as a homestay.
- The City's rich architectural heritage can be shared with more visitors.
- There are many neighborhoods and properties that can benefit from the positive effects of these uses, just as Montford has.
- The regulatory limitations on these uses mitigate their impacts.
- There would be an opportunity for persons negatively affected by the City's short-term rental enforcement efforts to legitimately establish a homestay use.

On October 4, 2006, the Planning and Zoning Commission recommended partial approval of the proposed code amendment by a vote of 6-1 (Ms. Weeks opposed). The Commission was concerned about the expansion of "commercial" uses like homestays into single family districts so their recommendation was to delete the portions of the ordinance dealing with expansion of the uses and retain the change in nomenclature. One version of the ordinance represents the ordinance recommended by the Commission. The other version is the ordinance change originally prepared by City staff. City staff also requests that Council provide direction to staff concerning whether additional efforts should be undertaken to "legalize" short-term rental of properties in residential areas.

Councilwoman Cape was generally supportive of homestays in our community when they are regulated appropriately. She feels this is a viable economic opportunity for people to stay in their homes with our aging population and rise in taxes.

Mr. Shuford responded to various questions/comments from Council throughout their discussion about the 2,500 square foot requirement for a home to be a homestay and the 500 feet separation from one homestay to the other.

In response to questions from Council, City Manager Jackson said that the benefit of having this controversial UDO amendment before Council at this worksession is not to encourage a debate, but to ask questions for clarification on the amendment.

Mr. Shuford then responded to various questions, some being, but are not limited to: what is the economic impact on the property owner; will the owner have to pay room tax; and are there alternative ways to get at the spacing requirement goal not to have the residential neighborhood overwhelmed by these issues.

After a brief discussion about the necessity of worksessions, it was the consensus of Council to instruct the City Clerk to bring forward a resolution on November 28, 2006, changing the 2007 City Council meeting schedule to hold three formal meetings a month (the second, third and fourth Tuesdays of each month) at 5:00 p.m. in the Council Chamber (thus deleting the third Tuesday worksession).

Mayor Bellamy asked that the record show that City Council received this information and instructed the City Manager to place this public hearing on the next formal City Council agenda.

REQUEST FOR QUALIFICATIONS OF DISPOSITION OF CITY-OWNED PROPERTY IN THE DOWNTOWN AREA

Planning & Development Director Scott Shuford said that this is the second phase offering of City-owned property for redevelopment.

Staff is prepared to proceed with the preparation of a Request for Qualifications (RFQ) for additional City-owned property. Prior to moving forward, we are requesting policy direction from Council so that we can structure an RFQ that will meet your expectations.

There are four key issues that require Council concurrence and direction. These are:

- Whether Council is in agreement with the staff proposal to structure an RFQ that includes some properties as linked and other properties that may be separately proposed for development.
- Whether Council is in agreement with the staff proposal to include other properties not under direct City control in the RFQ.
- Whether Council is in agreement with the staff proposal as to which properties should be included in the RFQ.
- Whether Council is interested in a 'directive' RFQ or whether it agrees with the staff proposal to not limit the creativity of the proposers through a more open-ended RFQ while still ensuring that key city goals are met.

With regard to 'linking' properties, staff notes that the 'prize' property is the so-called "Parkside" site to the immediate south of City Hall. There has been considerable developer interest in this site. Staff proposes to leverage this interest to facilitate the development of other nearby City-owned property with workforce-housing. We would require responders to commit to developing the City-owned property on the west side of Charlotte Street, at a minimum, as a

condition of being able to acquire development rights to the "Parkside" site. Other properties in this proposed RFQ may be proposed for separate development, exclusive of developer interest in "Parkside."

With regard to which properties are proposed for inclusion in the RFQ, staff has suggested the following list of properties:

- "Parkside"
- Property located on the east and west sides of Charlotte Street
- Rankin parking garage site
- Civic Center parking garage site
- 29 Haywood Street
- Civic Center site
- Properties acquired to site the Battery Park parking garage west of the Civic Center
- Transit Center site on Coxe Avenue
- Parks and Recreation maintenance facility site on Hilliard
- Transit offices/maintenance facility in the WECAN neighborhood

He reviewed in more detail the City-Owned property to be considered for RFQ as follows:

	Identification	Address	Acres	Tax Value	Description
1	Parkside	Marjorie Street	2.47	$3,862,400	Parking Lots South of City Hall
2	William Wolcott Bldg.	161 S. Charlotte St.	2.73	2,730,000	Public Works building & parking
3	Public Works Compound	171 S. Charlotte St.	4.55	2,502500	Building, sheds, storage
4	Fleet Management	173 S. Charlotte St.	2.17	2,170,000	Building & parking
5	Water Maintenance	S. Charlotte St.	3.76	6,928,200	Two Buildings & parking
6	ABC Store	179 Biltmore Ave.	0.84	840,000	Store building & parking
7	Service Station	45 McCormick Pl.	0.46	496,500	Service Station facilities
		Sub-Total	**16.98**	**19,529,600**	
8	Office of Econ. Dev.	29 Haywood St.	0.18	685,400	Building/Hallway to Parking garage
9	Rankin Street Garage	4042 College Street	0.92	8,420,700	Parking deck
		Sub-Total	**1.1**	**9,106100**	
10	Civic Center	87 Haywood St.	3	22,741,300	Civic Center & Thomas Wolfe Aud.
11	Parking Lot	52 Rankin St.	0.64	785,000	Surface parking
12	Civic Center Garage	68 Rankin St.	0.95	5,708,000	Parking deck
13	Handy Park	68 Haywood St.	0.25	807,300	Parking Building
14	Flying Frog	76 Haywood St.	0.3	806,100	Building & Parking
15	33 Page	33 Page Avenue	0.11	961,200	Building
16	Parking Lot	Page Avenue	0.11	510,000	Parking lot
		Sub-Total	**5.36**	**32,318,900**	
17	Park Maintenance	Hilliard Avenue	2.35	57,300 235,000*	Maintenance building & storage
18	Transit Center	360 Haywood St.	3.51	101,300 351,000*	Building & parking
		Total	**29.3**	**61,113,200**	
				61,540,600*	

* Estimated land value

With regard to including non-City-owned properties in the RFQ, potential RFQ responders may be interested in expanding the scope of their responses to include sites not

owned by the City. For example, the Hayes-Hopson building owned by Stewart Coleman, the property owned by Buncombe County between City-County Plaza and Marjorie Street, and the Harrison family property may be appropriate to include due to their proximity to Parkside properties. At the November 14, 2006, Council meeting, the Eagle Market Street Corporation expressed interest in this approach as well. The RFQ could be structured to invite potential responders to indicate how they might optionally assemble various non-City properties into a development plan.

Finally, with regard to whether the RFQ should be "directive" vs. open-ended, staff notes that, while City Council may be very interested in having an affordable housing component, additional public parking, or a new performing arts center, precisely where (or on which properties) these uses should be located may be better determined by RFQ responders than by the City. To pre-plan the location of certain uses will limit responder creativity. Instead, staff proposes to structure the RFQ so that the following goals previously identified by City Council are clearly known and that responders clearly understand that their opportunity to obtain City-owned property for development is dependent on their prior experience and success in meeting similar goals in other situations.

- Provision of workforce housing
- Potential to promote new or revitalized entertainment venues
- Consistency with City plans or policies, including Smart Growth and environmentally-friendly/green building development practices
- Place-making design that complements our unique Downtown business and residential communities and takes constructive public input into consideration
- Provision of strategically-sited public parking
- Ability to accommodate all modes of transportation
- Potential for significant tax base enhancement

He went into detail for the pros and cons. The pros being (1) the RFQ has the potential to achieve significant results in Council identified goals in housing, public venues, public parking, density, and infill development; (2) the RFQ has the potential to generate interest on a national level by firms with portfolios that include experience in very large scale, mixed use projects; (3) land assembly can be the most prohibitive component of urban development projects, and the offering of City-owned property reduces risk of the developer and should promote increased response; (4) the RFQ process offers the ability for national firms to team local firms in the design, development, and construction phases; and (5) linking the Parkside and S. Charlotte sites provides an opportunity to develop along the new Pack Square Park, along The Block, and along S. Charlotte Street. The cons include (1) redevelopment of city-owned properties will require complex facility master planning to determine relocation/consolidation of existing public facilities on redevelopment sites; (2) there is no assurance that respondents will possess the financial capabilities, qualifications, and experience required for the projects; and (3) linking the Parkside and S. Charlotte Street sites may limit qualified respondents due to the large scale nature of the project.

Once staff has received direction from Council on these four areas, the City Manager will negotiate a contract with a firm having experience in developing complicated RFQs for assistance in the design and distribution of the RFQ and assistance in evaluating the responders' qualifications.

Staff requests Council provide direction on the four identified critical RFQ components and authorize the City Manager to retain consultant assistance in the design and distribution of the RFQ and the evaluation of the RFQ responses.

He asked for Council's guidance on whether you want staff to link the Parkside and S. Charlotte Street properties together or whether you want more information on that; whether you are content with the list of properties put on the table; whether you want to look at the possibility of including some non city-owned properties in the RFQ; and whether you want to have an open-ended RFQ, which staff is recommending. He said that staff is suggesting we get a consultant to help us phrase the RFQ to make sure that we are going to get respondents that have experience in workforce housing, green building, etc., so that it increases the likelihood of those goals being met.

Mr. Shuford responded to various questions/comments from Council, some being, but are not limited to: what is the current value of the facilities we are currently using in relation to what we are going to get back in terms of selling them off and the tax value; and what is the proximate land and building value of the Public Works Facility when it was built and what is the value at today's dollars.

Councilman Newman felt that regarding linking properties, we should encourage that but not require it. We need to keep our options open. He didn't see any downside to putting all the properties on the RFQ; however, the Civic Center and the two parking decks would be a low priority because we are not trying to lose parking. He hoped we would focus on the large tracks that are clearly underutilized, like the Park Maintenance facility on Hilliard Avenue. He feels that is very valuable property and we could probably find a better place for that facility. Also, the Housing Authority has property adjacent to this land and he encouraged us to talk with the Housing Authority and if they are interested, potentially having some of their property marketed in the RFQ with ours as well. He would support being flexible in the RFQ to achieve as many Council goals on the properties as we can.

City Manager Jackson said that regarding the Civic Center, staff will come back at Council's December 12 meeting to discuss the Capital Improvement Program and the direction for the Civic Center. At that time Council can discuss whether those properties should be included in the RFQ. In the meantime we can engage someone to craft the RFQ and then get direction on where you want to go with the Civic Center.

Councilman Mumpower had a problem with properties that we are currently using for services (e.g., S. Charlotte Street property and the Park Maintenance facility) and was curious to where we would relocate these facilities. We have talked about the value of the proximity services and having them clustered to the core of the City and how it saves money and accomplishes other things for us. Also, RFQ's and RFP's cost people a lot of money and we need to be sensitive about that. He was particularly disturbed about the William F. Wolcott Jr. Building at 161 S. Charlotte Street and wondered if we are taking something off the table that really has a lot of value to us. He questioned a facility that new being torn down. Personally, he is comfortable exploring and experimenting with vacant property, but not currently used property.

Upon inquiry of Councilman Freebom, Mr. Shuford said that we are not developing a plan to relocate existing uses until we find that Council has interest in putting those properties out there. We did some initial exploration about some possible sites, but nothing in any formal or comprehensive way. There is an opportunity to relocate these maintenance facilities into a single location and we might want to do that eventually because there are economies to be had there and an opportunity to capitalize on the value of the land.

In response to Councilman Freebom, Mr. Shuford said that the West End/Clingman Avenue Neighborhood would like for the transit offices to be relocated. The neighborhood is willing to tolerate a more dense development there. The site has outstanding views and has the potential to be an attractive multi-family site and the site is large enough to generate a project that would be a source of neighborhood pride.

Councilman Freeborn felt we should include all the properties in the RFQ along with Council's goals and then see what we get back.

It was the consensus of Council to add the transit station on Coxe Avenue to the table of City-owned property to be included in the RFQ.

Vice-Mayor Jones agreed with not requiring linkages, but encouraging them. She was not interested in having the parking garages included in the RFQ. Regarding the transit station on Coxe Avenue, she felt it was built not long ago and we have already had to transition the people who use it once already. She felt this was a bold initiative and endorsed the goals, particularly for workforce housing and the potential for tax base enhancement.

Councilwoman Cape also was not interested in including the parking decks in the RFQ. She wondered if it's best for staff to look at where is this consolidation land, what would that cost us, what would that look like, and what is its real solid on the ground value before we commit to getting rid of these existing facilities. It might cost us a lot more to get what we need than we would realize.

Councilman Davis said that the Civic Center and the parking decks are functioning well and we are not eager to sell, but we owe it to ourselves to be open to a better use or function of those things. We don't want to take away from the parking decks, but there may be an opportunity for some mixed-use to make those decks bigger. He thinks there are a lot of opportunities here to see what interest there is in being a part of our community. He did not support giving away the things we have, but we should look to see what we can do better.

Mayor Bellamy was excited about the Parkside development and how it relates to what can happen in the Eagle/Market Street area. She felt there may be some opportunities on the property across Charlotte Street on Martin Luther King Jr. Drive for infill and/or town houses up Martin Luther King Jr. Drive. She did not have a problem with keeping the ABC store property on the list, however, she wanted the service station property to be taken off the list because it provides gas for our service vehicles and we just brought the new CNG station on line. She also supported taking the parking decks out of the RFQ. She is totally in support of the Handy Park, Flying Frog, 33 Page Avenue and Page Avenue parking lot being included in the RFQ and suggested we work with nearby land-owners to see if we can support their endeavors. She is supportive of the transit offices being located understanding the relocation issues. She doesn't see the transit offices or the Park Maintenance facility on Hilliard Avenue being the highest and best use of those properties. Regarding the Park Maintenance facility on Hilliard Avenue, she said that Assistant City Manager Jeff Richardson is working on an initiative for housing in that immediate area and suggested contacting him on this issue. She also felt that we should talk to the owners of the vacant land next to the transit station on Coxe Avenue about its potential. She felt the transit station would be a complimentary addition to what could be built on that property.

Councilman Newman encouraged Mr. Shuford to talk with the N.C. Dept. of Transportation about getting the right-of-way released near the old Valley Street that is next to the City Employee parking lot.

Mayor Bellamy felt the William F. Wolcott Jr. Building parking lot could serve as a location for a deck to service the Parkside development and parking for City employees. But, she did have concerns whether the Wolcott building was old enough to be torn down. She also felt that the pedestrian bridge across S. Charlotte Street would be better utilized if staff would maintain the property, especially cutting the kudzu back on a regular basis.

Mr. Shuford said that one of the reasons why the William F. Wolcott Jr. Building was chosen to be a permit center is it does offer easy parking, but by the same token that parking is

largely taken up by City employees. In addition, we are not able to accommodate all the staff that needs to be involved in the permit center at that location. He suggested Council adding a goal that there be a way to accommodate the office needs and other needs of the City facilities as apart of the RFQ. We could add that there needs to be a great deal of sensitivity with regard to addressing parking needs, facility relocation and the possibility that we could actually have a consolidated permit center that would accommodate all the City staff.

It was the consensus of Council to add the City's Purchasing Division on Hunt Hill to be included in the RFQ as that is not the highest and best use of that property.

Vice-Mayor Jones said that we have some other properties in our ownership that we could use for relocation, e.g. the Armory property in west Asheville.

City Manager Jackson summarized by (1) eliminating from the RFQ the parking garages; (2) bringing back the Civic Center issue in December for further direction; (3) including the transit station and the Purchasing Division property on Hunt Hill in the RFQ; and (4) regarding the Charlotte Street property to craft the RFQ to say we have some very valuable buildings and facilities that we want to retain but that we are willing to entertain opportunities that are place-making in nature to address the goals in a phenomenal way.

ANNEXATION SERVICES POLICY

City Manager Jackson said that before staff gets into the rationale and the criteria used in putting together an annexation plan, staff would like Council's feedback on the merits with proceeding with the annexation plan.

Planning & Development Director Scott Shuford said that we have already started our initial investigation of areas that would quality for annexation and they are in a variety areas around the periphery of the City. We realize there are opportunities for our annexation laws to change since something is brought up at each session of the General Assembly. We are entering into discussions with the Town of Woodfin and Town of Fletcher about where their boundaries might ultimately be and our boundaries might ultimately be. We have determined that we do not need an agreement with the Town of Weaverville or the Town of Black Mountain because of their distance away from us. We would like to continue the policy established by Council of proceeding with annual annexations over the past seven years, noting that we do them in an incremental way and a fiscally responsible way. He asked if Council would like for them to proceed with an annexation plan for 2007.

Upon inquiry of Councilman Freeborn, Mr. Shuford said the benefits of not annexation in 2007 would be the savings of staff time, emotional response from citizens, and the savings of Council time.

City Manager Jackson said that Council has the following three options - (1) continue to be proactive and thoroughly analyze areas that meet statutory thresholds; (2) scale back the annexation areas for more connectivity; and (3) postpone annexation.

Mr. Shuford said that we have been able to keep taxes at essentially the same level to some extent due to annexation and the growth that has occurred in our community. Without those tools we do lose some of the revenue potential we might otherwise get. Council has the option of delaying the effective date of annexation up to 400 days after the annexation ordinance passes, and, there are other options to delay the effective date of annexation to give people more time to adjust. Again, we face challenges on our borders and there may be some state-wide action to tie our hands.

Vice-Mayor Jones supported moving forward in a scaled back version. She felt that annexation done in a fiscally appropriate way is about advocating for the citizens of Asheville. It's about equity and fairness for our citizens.

Councilman Newman said that we have not been aggressive with our annexations and would support moving forward in a scaled back version. He would support having our staff analyze the areas around the City that are rapidly urbanizing and then bring forward the ones that clearly meet the criteria and let Council make their decisions about each one of them on their merits. We are having more and more people living around the City of Asheville coming into the City and using our services and infrastructure and asking them to pay no taxes is unfair to the Asheville resident.

Councilman Mumpower is against involuntary annexation. He feels that it is divisive and creates a number of problems for us. If Council chooses to involuntary annex, he felt we should provide services comprehensively. He would not support any annexations in 2007.

Councilman Davis is a proponent of annexation where it is normal and where urbanization has occurred. With our situation the way it is with the Water Agreement, we should have a tool in the future for voluntary annexations. He would support a scaled back version especially in the areas that have some potential to be precluded from annexation for other reasons. Regarding the other areas that are not in jeopardy, he would support holding off any annexations in 2007.

Councilwoman Cape was concerned about the state-wide legislation restricting cities from having the ability to annex in general. While she is not in support of actively pursuing annexation in all areas, we need to be careful that we don't lose the opportunity at all.

Mayor Bellamy supported the scaled back version because Council has a lot to accomplish in 2007.

Mr. Shuford said there may be some mutual exclusivity about what direction we have been given. Councilman Davis mentioned that there may be some areas that if we don't act in the relatively near future, they could be potentially precluded from our ability to annex. And to some extent, having some good healthy annexation agreements is a way to address that in lieu of annexation. We will certainly pursue that as well. Also, by the same token, we may have some areas that aren't necessarily fill-in that would be in jeopardy of not being able to be annexed for other reasons.

Mr. Shuford responded to Councilman Mumpower about why our state legislators are contemplating doing away with forced annexation.

Mayor Bellamy felt it was important for our legislators to understand the need for Asheville to have true control of our water system with regard to annexation.

It was the majority of Council's decision to proceed with the annexation on a scaled down version.

Mr. Shuford said that regarding Council direction regarding certain annexation policies prior to developing the next proposed annexation phase, the provision of sewer services is one that staff will bring back to Council at a future date because a policy change would have to be in effect for 180 days for water and sewer policy changes and so this would not affect anything staff will bring forward to Council in 2007. Regarding the acceptance of private streets and private sidewalks, he suspects we will not be in a situation where those would be of a concern in the

2007annexation. Regarding the annexation of manufacturing uses, staff will avoid using manufacturing uses to the extent as possible based on prior Council direction.

Vice-Mayor Jones was explicit that she did not want to annex any manufacturing uses.

Regarding the manufacturing facilities, Councilman Newman felt that adding additional financial burdens to manufacturing facilities is valid, but we have manufacturing facilities in the City and they pay twice the amount of what other manufacturing facilities pay. If we follow these policies year after year of not growing naturally as growth and development occurs, the path we will be on is high taxes and lousy services. He wondered if there may be some proactive ways for our City to grow and still support these economic engines.

Mr. Shuford said that clearly if manufacturing facilities are brought into the City they have the ability for lower insurance premiums. In addition, our Economic Development Director is in the process of developing some economic development incentives for businesses in our City.

Councilman Davis felt that we need to be careful in thinking about manufacturing facilities when there are many small businesses in the City as well.

Councilman Mumpower spoke against annexation of manufacturing businesses.

BOARDS AND COMMISSIONS:

After a short discussion, it was the consensus of Council to instruct the City Clerk to (1) prepare the proper paperwork to reappoint Kenneth Kaplan to serve an additional 3-year term, term to expire November 13, 2009, or until his successor has been appointed; and (2) re-advertise for the other appointment with a January 2007 deadline (since Ms. Holmes-Young has served two full successive terms).

Regarding the vacancies on the Educational Access Channel Commission, Vice-Mayor Jones, Chair of the Boards & Commissions Committee, explained that Mr. Tim Amos, Chair of the Educational Access Channel Commission, sent a letter to City Council on September 18, 2006, outlining their reasons recommending that City Council abolish the Educational Access Channel Commission because it has served its useful purpose. In the letter, he said they have completed their initial implementation and oversight of the city- and county-wide educational access channel. They have secured non-city funding for the at least near term needs of the channel, and have established a collaborative oversight consortium of educational institutions to ensure its future. Also, the community has benefited from the successful operation of the Educational Access Channel for several years now which has yielded nothing but positive feedback from viewers and stakeholders. As a result, there has been little or no action required by the Commission for quite some time. For these reasons, they recommended that the City Council abolish the Educational Access Channel Commission. Vice-Mayor Jones said that she has talked to Mr. Amos at length about this. It was the consensus of Council to (1) invite Mr. Amos to an upcoming Council meeting to present his request; and (2) instruct the City Attorney to prepare a resolution dissolving the Educational Access Channel Commission to be considered at the time Mr. Amos makes his presentation.

After City Attorney Oast explained the role of the Board of Directors for Victoria of Asheville, it was the consensus of Council to have the City Clerk prepare the proper paperwork to reappoint Assistant City Manager Jeff Richardson, Chief Financial Officer Ben Durant and City Attorney Oast to each serve an additional three year term respectively to the Victoria of Asheville Board of Directors, terms to expire November 29, 2009, or until their successors have been appointed.

After a brief discussion about the mission of the Film Commission, it was the consensus of Council to invite a representative of the Film Commission to an upcoming Council meeting to discuss their goals and ways Council can help strengthen the Commission, and then proceed with making appointments to that Commission, if appropriate.

It was the consensus of Council to have the City Clerk arrange the following interviews for vacancies on the Sustainable Advisory Committee on Energy and the Environment: Sylvia Farrington, Jane Mathews, Jonathan Barnes and Lach Zemp. After a short discussion on the different ways to ensure that Progress Energy has a seat on the Committee, it was the consensus of Council to restructure the membership so that one of the "designated" energy management seats be re-designated for the Progress Energy Regional Vice President (or other appropriate official) or his/her designee.

At 8:37 p.m., Councilman Freeborn moved to continue the closed session. This motion was seconded by Councilman Newman and carried unanimously.

At 9:20 p.m., Councilman Freeborn moved to come out of closed session. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:20 p.m.

Keesha Lipe
CITY CLERK

Jerry M Bellamy
MAYOR

Tuesday – November 28, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Mr. Trayvon Clark, Eighth Grade student at Asheville Middle School, led City Council in the Pledge of Allegiance

INVOCATION

Vice-Mayor Jones gave the invocation.

I. PROCLAMATIONS:

A. HARVEST HOUSE RECOGNITION AS A NC SENIOR CENTER OF EXCELLENCE

Mayor Bellamy recognized Mr. Joe Connolly, Director of the Land-of-Sky Area Agency on Aging, who presented the NC Senior Center of Excellence Award to Ms. Dee Black, Director of the Harvest House; and Ms. Amy Rickman, Program Supervisor.

B. RECOGNITION OF MR. JEFFREY GREEN, PUBLISHER OF THE ASHEVILLE CITIZEN-TIMES

Mayor Bellamy welcomed Mr. Jeffrey Green, Publisher of the Asheville Citizen-Times, and his family to the City of Asheville.

II. CONSENT AGENDA:

At the request of City staff, Consent Agenda "O" was removed from consideration by City Council.

At the request of Councilman Mumpower, Consent Agenda Items "D", "E", and "Q" were pulled from the Consent Agenda for further discussion and/or a separate vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 14, 2006, AND THE WORKSESSION HELD ON NOVEMBER 21 2006

B. RESOLUTION NO. 06-87 - RESOLUTION ESTABLISHING FAIR MARKET VALUE AND DIRECTING THE CITY CLERK TO ADVERTISE AN OFFER OF PURCHASE FOR UPSET BIDS REGARDING PROPERTY ON STATE STREET

Summary: The consideration of a resolution establishing fair market value and directing the City Clerk to advertise an offer of purchase for upset bids regarding property on State Street.

A bid has been received from Steven & Suzanne Williams in the amount of $15,000 for the purchase of land on State Street.

The land on State Street was acquired by the City by Commissioner's Deed dated June 29, 1932. There are discrepancies in the chain of title and title would have to be conveyed by non-warranty deed. The lot is 0.18 acre± and is parallelogram shaped. It has a moderate slope upward from the street. It is zoned RM-8 Residential Multi-Family Medium Density District, and it is suitable as a home site. The bid from Mr. & Mrs. Williams is in the amount of $15,000. Although the tax appraisal is $20,200, staff considers the offer to be realistic considering the impaired title. The Williams bid includes encumbering the property with a sewer easement to service the lot at the rear of the City's lot where the Williams plan to construct 4 to 5 units of infill housing on Pineview Street.

Pros:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.
- It will facilitate the development of 4 to 5 units of infill housing.

Cons: There is no negative impact.

Economic Development staff recommends adoption of a resolution establishing fair market value and directing the City Clerk to advertise an offer of purchase for upset bids regarding property on State Street.

RESOLUTION BOOK NO. 30 - PAGE 145

C. RESOLUTION NO. 06-[illegible] - RESOLUTION ESTABLISHING FAIR MARKET VALUE AND AUTORIZING THE CITY CLERK TO ADVERTISE AN OFFER OF PURCHASE FOR UPSET BIDS REGARDING PROPERTY ON DR. MARTIN LUTHER KING JR. DRIVE

Summary: The consideration of a resolution establishing fair market value and authorizing the City Clerk to advertise an offer of purchase for upset bids regarding property on Dr. Martin Luther King Jr. Drive.

A bid has been received from Ms. Elizabeth White in the amount of $7,350 for the purchase of land on Dr. Martin Luther King Jr. Drive.

The subject parcel is a proposed 0.08 acre cut-out portion of PIN 9648.07-58-1660 which is a 1.6 acre parcel that runs along Dr, Martin Luther King Jr. Drive and is part of the property where Water Maintenance is located. The subject parcel is triangular shaped and has a gentle slope upward from the street. It is zoned Regional Business District as is the adjoining property. The proposed parcel encompasses an area that Ms. White, who owns and resides on adjoining property, fenced in several years ago by mistake and has since used and maintained. The proposed purchase is to rectify the error by paying the City due compensation for the property.

The bid from Ms. White is in the amount of $7,350. The value of the parcel was extrapolated from the tax assessment for adjoining land in the amount of $28,500 for 0.31 acre which translates to a per acre value of $91,935. The bid amount represents .08 of that amount rounded to $7,350. Staff considers the offer to be realistic and the proposal to combine the subject parcel with Ms. White's parcel appropriate.

Pros:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will enable the purchaser to rectify an error in a mutually beneficial manner.

Cons: There is no negative impact.

Economic Development staff recommends adoption of the resolution directing the City Clerk to advertise an offer of purchase for upset bids regarding property on Dr. Martin Luther King Jr. Drive.

RESOLUTION BOOK NO. 30 - PAGE 146

D. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH DALTON'S HEATING, AIR CONDITIONING AND CONTROLS INC. FOR THE REMOVAL AND DISPOSAL OF THE OLD CHILLER AND INSTALLATION OF A NEW CHILLER AT THE PUBLIC WORKS FACILITY LOCATED AT 161 S. CHARLOTTE STREET

This item was pulled off the Consent Agenda for further discussion and/or a separate vote.

E. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL SERVICES CONTRACT WITH BROWN & CALDWELL FOR BIDDING AND CONSTRUCTION FOR WATER TREATMENT PLAN UPGRADES AT THE NORTH FORK AND BEE TREE WATER PLANTS

This item was pulled off the Consent Agenda for further discussion and/or a separate vote.

F. ORDINANCE NO. 3982 BUDGET AMENDMENT TO APPROPRIATE DEPT. OF JUSTICE BULLETPROOF VEST REIMBURSEMENT FUNDS FOR THE PURCHASE OF POLICE PATROL SAFETY EQUIPMENT

Summary: The consideration of a budget amendment, in the amount of $5,251, to appropriate Department of Justice Bulletproof Vest reimbursement funds for the purchase of police patrol safety equipment.

The Asheville Police Department currently participates in the Department of Justice Bulletproof Vest Reimbursement Program. This program is designed to off-set the tremendous cost involved in purchasing bulletproof vests for police officers. During the current fiscal year, the City of Asheville has collected $5,251 from the Department of Justice Bulletproof Vest Reimbursement Program. Adding these funds into the police (patrol) safety equipment budget line would assist in the purchase of additional bulletproof vests for Asheville Police officers.

This action conforms to the City Council's Strategic Operating Plan under Partnerships to Improve Critical Services and Infrastructure. Goal 2, Objective A: Research and develop strategies for securing significant new recurring revenue sources.

Pro:

- Reimbursement revenue to cover the rising cost of bulletproof vests for Asheville Police officers

Con: None noted.

City staff recommends City Council adopt the budget amendment, in the amount of $5,251, to appropriate Department of Justice Bulletproof Vest reimbursement funds for the purchase of police patrol safety equipment.

ORDINANCE BOOK NO. 23 - PAGE 139

G. RESOLUTION NO. 06-101 - RESOLUTION ADOPTING THE 2007 SCHEDULED CITY COUNCIL MEETINGS

Summary: The following schedule of the meetings of the Asheville City Council for 2007 be, and the same is, hereby established as follows:

City Council Formal Meetings
5:00 pm
2nd, 3rd and 4th Tuesdays of each month
Council Chamber – 2nd Floor
City Hall Building, Asheville, NC

City Council Community Meetings
7:00 pm
5th Tuesday of any month
Meeting places to be announced

Due to holidays, the following meetings are hereby cancelled: Tuesday December 18, 2007; and Tuesday, December 25, 2007.

RESOLUTION BOOK NO. 30 - PAGE 149

H. RESOLUTION NO. 06-202 - RESOLUTION AUTHORIZING PINE PROPERTIES INC. TO CONVEY 128 MCENTIRE ROAD IN RUTHERFORDTON, N.C., TO LEON D. AND ANGELINE J. MAST FOR THE SUM OF $370,000

Summary: The consideration of a resolution authorizing Pines Properties, Inc. to convey 128 McEntire Road.

No bid was received after advertisement for upset bids for the purchase of real property at 128 McEntire Road. This property was bequeathed to the City by Jake Rusher. It is an irregular shaped parcel comprising 23.79 acres±. It is improved with a three bedroom log house, a barn, several outbuildings and fencing. It is located in a rural area of Rutherford County. The offer from Leon D. and Angeline J. Mast is in the amount of $370,000. The offer was submitted through the listing agent, Scott Jackson of Odean Keever & Associates. The property was listed at $389,500 based on a market analysis at the time of listing. The real estate commission on the sale will amount to 6% or $22,200.

The Masts previously offered $370,000 for the property and after being advertised, an upset bid was received from Brad Ford in the amount of $398,800. Mr. Ford's offer endured advertisement and was approved by Council. A sale contract was executed, but subsequently Mr. Ford was unable to obtain financing and the sale contract was terminated. In accordance with the contract Mr. Ford's bid deposit was returned.

The Masts upon being made aware the property was again available submitted their bid again in the amount of $370,000. Pines Properties, Inc. advertised for upset bids pursuant to the bid from the Masts. The advertisement was published on November 17, 2006, and no upset bid was received.

Pros:

- The sale will be at fair market value as established by the upset bid process.
- The sale will generate revenue from the disposition of an un-needed asset.
- It will return property not needed for public use to private ownership.
- It will transfer responsibility for maintenance to the private sector.

Cons: There is no negative impact.

The proceeds from the sale of this parcel based upon the Will of Jake Rusher. The funds will be used for recreation purposes. First, they will be used to enhance the Jake Rusher Park and second, they will be used for payment to skate park. The balance of any funds from his estate will then be deposited into a capital fund to be used for future recreation development or land acquisition as deemed appropriate by Council.

Economic Development staff and Parks & Recreation staff recommend adoption of the resolution authorizing Pines Properties, Inc. to convey 128 McEntire Road to Leon D. and Angeline J. Mast.

RESOLUTION BOOK NO. 30 - PAGE 150

I. **RESOLUTION NO. 06-43 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH DPI CONSTRUCTION INC. FOR THE PROJECT KNOWN AS THE AVON ROAD SIDEWALK AND DRAINAGE IMPROVEMENTS**

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with DPI Construction, Inc., in the amount of $274,645.25, for the project known as Avon Road Sidewalk and Drainage Improvements.

In October 2006, City Council approved an additional $370,000 in the Capital Improvement Budget to construct sidewalk on New Haw Creek Road and Avon Road. City staff requested an extension from the N.C. Dept. of Transportation (NCDOT) for the Encroachment Agreement on New Haw Creek Road sidewalk, which expired in October 2006. Prior to approving the extension, NCDOT is requiring some significant changes to the design of the project. We anticipate this change and approval to take an additional two to three months.

In order to keep the project moving, City staff decided to break the project into two separate contracts, one for Avon Road and the other for New Haw Creek Road. We received informal bids on Friday, November 17, 2006, for Avon Road Sidewalk and Drainage Improvements. Three bids were received from Rock Grading & Paving, Inc., Tennoca Construction Company and DPI Construction, Inc. in the amounts of $346,380.00, $352,645.00 and $274,645.25, respectively. After a thorough review of the bid documents by the Engineering Department, DPI Construction, Inc., was found to be the lowest responsible bidder with a total bid of $ 274,645.25.

This project consists of the installation of approximately 1,215 linear feet of 6-foot wide concrete monolithic sidewalk and nearly 1,200 linear feet of 18-inch diameter stormwater pipe and other related appurtenances.

DPI Construction, Inc. is the grading and utility construction division of McCarroll Construction, Inc., a local general contractor with experience in site development projects. McCarroll Construction has also performed projects with similar scope for other municipalities in the past in a satisfactory manner.

Pros:

- The execution of this contract will allow the City of Asheville Transportation and Engineering Department to continue upgrading the pedestrian and stormwater infrastructure of the City.
- The bid amount of $ 274,645.25 for the construction of the Avon Road Sidewalk and Drainage Improvements is equitable and reflects the very lowest cost the City received during the two bidding processes.
- Construction of this sidewalk will enhance pedestrian safety and provide sidewalk connectivity to key area services such as the Haw Creek Area Library and Haw Creek Park.
- Construction of the proposed drainage improvements will enhance conveyance of stormwater run-off along this particular street, improving vehicular safety

Cons

- The only foreseeable disadvantage of adopting a resolution authorizing the City Manager to execute this contract is the temporary land and traffic pattern disturbances along the proposed construction corridor.

Staff recommends that City Council adopt a resolution authorizing the City Manager to sign a contract with DPI Construction Inc., in the amount of $274,645.25, for the project known as Avon Road Sidewalk and Drainage Improvements.

RESOLUTION BOOK NO. 30 - PAGE 151

J. RESOLUTION NO. 06-184 - RESOLUTION AUTHORIZING VERONA DRIVE, SPRINGMILL DRIVE AND TIVOLI ROAD IN WEST ASHEVILLE TO BECOME PUBLICLY MAINTAINED STREETS

Summary: The consideration of a resolution authorizing Verona Drive, Springmill Drive and Tivoli Road in West Asheville to become publicly maintained streets.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Verona Drive, Springmill Drive and Tivoli Road are developer-constructed streets that have an average paved width of 24 feet and a length of 0.04, 0.06, 0.05 miles, respectively. Engineering Department staff inspected these streets and found them to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Verona Drive, Springmill Drive and Tivoli Road will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

Pros:

- The City will receive Powell Bill funds from the NCDOT to maintain the roadway.

Cons:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council adopt a resolution authorizing Verona Drive, Springmill Drive and Tivoli Road in West Asheville to become publicly maintained streets.

RESOLUTION BOOK NO. 30 - PAGE 152

K. RESOLUTION NO. 06-25 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH MCGILL ASSOCIATES FOR THE DINGLE CREEK STORMWATER ENGINEERING ANALYSIS

Summary: The consideration of a resolution authorizing the City Manger to sign a contract with McGill Associates for the Dingle Creek Stormwater Engineering Analysis in the amount of $321,000; and the associated budget amendment, in the amount of $88,000, to complete this work.

In December 2004, City Council adopted a Stormwater Utility. As part of the budget, City Council endorsed a program for the expenditure of the funds. Of the approximate $2 million of expected revenue, $200,000 per year was programmed to prepare stormwater engineering analysis for watersheds.

Staff prepared a Request for Qualifications in the summer of 2006. Ten proposals were received. Based on qualifications, staff along with citizen input selected McGill Associates to perform this work.

In 2005, the City of Asheville received a grant from the Clean Water Management Trust Fund in the amount of $133,000 to assist in completing the Stormwater Engineering Analysis for the Dingle Creek Watershed. Staff budgeted an additional match for the grant of $100,000. The total cost of the work is $321,000. Staff is requesting a budget amendment in the amount of $88,000 to complete this work. This money would come from the Stormwater Utility Fund Balance.

On November 17, 2006, the Flood Damage Reduction Task Force met and recommended approval of this contract by consensus.

Staff has developed a question and answer format to help Council and the public understand the components of a Stormwater Engineering Analysis.

What is a Stormwater Engineering Analysis? A stormwater engineering analysis is a detailed engineering study that evaluates the stormwater drainage system in a watershed. In order to complete the analysis, the consultant must prepare an inventory of the drainage system. A hydraulic model is developed to analyze the capacity of the system. The model will indicate which pipes, ditches and/or streams need repaired and in what priority. The analysis also evaluates water quality concerns such as stream bank erosion, hazardous materials, etc.

What are the goals of a Stormwater Engineering Analysis? The goals of completing this analysis include the following:

- Developing a capital improvement program that evaluates upstream and downstream impacts of improvements;
- Prioritizing the storm drainage needs within the watershed;
- Developing a hydraulic model that can be used to determine improvements that need to be made as part of new development; and,
- Assisting in the justification for grant monies.

What are the deliverables of a Stormwater Engineering Analysis? The deliverables of this analysis include:

1. Detailed GIS Inventory of the Storm Drainage System in the watershed;
2. Hydraulic Model of the Watershed;
3. Capital Improvement Program of water quality and water quantity needs; and,

4. Detailed cost estimates for the improvements.

How do we prioritize what Watersheds get done in what order? Watersheds are prioritized based on flooding, funding opportunities, opportunity to impact development and water quality concerns.

Staff acknowledges that the cost of these studies is a significant investment. However, this information allows us to make better decisions in the future.

Pros:

- Completing the engineering analysis will allow us to make better decisions on how to prioritize capital improvement projects.
- Data from this analysis will allow the development community to determine the impact of their development on upstream and downstream property owners.
- The City will have a detailed inventory of the storm drainage system.

Cons:

- The cost associated with completing the work is significant. The Engineering Analysis must be completed by engineers that specialize in hydrology and hydraulics.

Staff recommends adoption of a resolution authorizing the City Manger to sign a contract with McGill Associates for the Dingle Creek Stormwater Engineering Analysis in the amount of $321,000; and the associated budget amendment, in the amount of $88,000, to complete this work.

RESOLUTION BOOK NO. 30 - PAGE 154

L. ORDINANCE NO. 3184 - BUDGET AMENDMENT FOR THE DINGLE CREEK STORMWATER ENGINEERING ANALYSIS

Summary: See Consent Agenda Item "K" above.

ORDINANCE BOOK NO. 23 - PAGE 141

M. RESOLUTION NO. 06-216 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH BROWN & CALDWELL FOR THE UPPER ROSS CREEK WATERSHED STORMWATER ENGINEERING ANALYSIS

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Brown and Caldwell for the Upper Ross Creek Watershed Stormwater Engineering Analysis in the amount of $200,000; and the associated budget amendment, in the amount of $50,000, to complete this work.

In December 2004, City Council adopted a Stormwater Utility. As part of the budget, City Council endorsed a program for the expenditure of the funds. Of the approximate $2 million of expected revenue, $200,000 per year was programmed to prepare stormwater engineering analysis for watersheds.

Staff prepared a Request for Qualifications in the summer of 2006. Ten proposals were received. Based on qualifications, staff along with citizen input selected Brown and Caldwell to perform this work.

The total cost of the work is $200,000. Staff is requesting a budget amendment in the amount of $50,000 to compliment the $150,000 already budgeted to complete this work. This money would come from the Stormwater Utility Fund Balance.

Ross Creek is listed on the State 303 D list as an impaired stream. This means that this stream has been identified as having poor water quality.

On November 17, 2006, the Flood Damage Reduction Task Force met and recommended approval of this contract by consensus.

Staff has developed a question and answer format to help Council and the public understand the components of a Stormwater Engineering Analysis.

What is a Stormwater Engineering Analysis? A stormwater engineering analysis is a detailed engineering study that evaluates the stormwater drainage system in a watershed. In order to complete the analysis, the consultant must prepare an inventory of the drainage system. A hydraulic model is developed to analyze the capacity of the system. The model will indicate which pipes, ditches and/or streams need repair and in what priority. The analysis also evaluates water quality concerns such as stream bank erosion, hazardous materials, etc.

What are the goals of a Stormwater Engineering Analysis? The goals of completing this analysis include the following:

- Developing a capital improvement program that evaluates upstream and downstream impacts of improvements;
- Prioritizing the storm drainage needs within the watershed;
- Developing a hydraulic model that can be used to determine improvements that need to be made as part of new development; and,
- Assisting in the justification for grant monies.

What are the deliverables of a Stormwater Engineering Analysis? The deliverables of this analysis include:

1. Detailed GIS Inventory of the Storm Drainage System in the watershed;

4. Detailed cost estimates for the improvements.

How do we prioritize what Watersheds get done in what order? Watersheds are prioritized based on flooding, funding opportunities, opportunity to impact development and water quality concerns.

Staff acknowledges that the cost of these studies is a significant investment. However, this information allows us to make better decisions in the future.

Pros:

- Completing the Engineering Analysis will allow us to make better decisions on how to prioritize capital improvement projects.

- Data from this analysis will allow the development community to determine the impact of their development on upstream and downstream property owners.
- The City will have a detailed inventory of the storm drainage system.

Cons:

- The cost associated with completing the work is significant. The Engineering Analysis must be completed by engineers that specialize in hydrology and hydraulics.

Staff recommends adoption of a resolution authorizing the City Manager to sign a contract with Brown and Caldwell for the Upper Ross Creek Watershed Stormwater Engineering Analysis in the amount of $200,000; and the associated budget amendment, in the amount of $50,000, to complete this work.

RESOLUTION BOOK NO. 30 - PAGE 155

N. ORDINANCE NO. 3410 - BUDGET AMENDMENT FOR THE UPPER ROSS CREEK WATERSHED STORMWATER ENGINEERING ANALYSIS

Summary: See Consent Agenda Item "M" above.

ORDINANCE BOOK NO. 23 - PAGE 143

O. BUDGET AMENDMENT FOR THE LEGAL DEPARTMENT TO INCREASE LEGAL SERVICES LINE ITEM

This item was removed from consideration by City Council.

P. RESOLUTION NO. 06-207 - RESOLUTION AUTHORIZING THE CHANGE IN WATER POLICIES TO REFLECT CHANGES IN THE NUMBER OF DAYS FROM 8 TO 15 BEFORE AN ACCOUNT IS ELIGIBLE FOR CUT-OFF FOR NON-PAYMENT; PAYMENT PLAN ARRANGEMENTS; AND ALL REFERENCES OF REGIONAL WATER AUTHORITY OF ASHEVILLE, BUNCOMBE & HENDERSON BE AMENDED TO READ "THE CITY OF ASHEVILLE"

Summary: The consideration of a resolution authorizing the change in Water Policies to reflect changes in the number of days before an account is eligible for cut-off for non-payment; payment plan arrangements; and all references of Regional Water Authority of Asheville, Buncombe and Henderson amended to read The City of Asheville.

Staff has been verifying current water policies ensuring all references to the Regional Water Authority of Asheville, Buncombe and Henderson were replaced with the City of Asheville as appropriate and the water policies did not conflict with the City Engineering Standards Manual, state mandated programs such as backflow and cross-connection. Staff through a cross-departmental team evaluated current billing and cut-off for non-payment policies.

A team made up of Water Resources, Engineering, City Administration and Finance Department's staff has reviewed current water billing policies. Staff has analyzed the advantages and disadvantages of changing current billing and cut-off for non-payment policies and any impact suggested changes will have on the water fund. Staff compared current billing and cut-off practices with ten public utilities and four private utilities.

PROS: These water policy changes reflect increased level of customer service by extending the utility bill grace period to a minimum of 15 days after the due day and administrative changes of the City of Asheville as the water provider replacing the Regional Water Authority references.

CONS: The change in the grace period from 8 days to 15 days could cause minor fluctuations in water fund revenue being generated by customers waiting until the end of the grace period to pay their bill.

Staff recommends City Council adopt the resolution authorizing the change in Water Policies to reflect changes in the number of days before an account is eligible for cut-off for non-payment from 8 to 15 days; allowing more payment plan arrangements; and all references of Regional Water Authority of Asheville, Buncombe and Henderson amended to read The City of Asheville.

RESOLUTION BOOK NO. 30 - PAGE 156

Q. MOTION TO REVIEW LEASE OF CITY-OWNED PROPERTY AT 224 LOUISIANA AVENUE TO US ARMY CORPS OF ENGINEERS

This item was pulled off the Consent Agenda for further discussion and/or a separate vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS PULLED OFF THE CONSENT AGENDA FOR FURTHER DISCUSSION AND/OR A SEPARATE VOTE

RESOLUTION NO. 06-199 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH DALTON'S HEATING, AIR CONDITIONING AND CONTROLS INC. FOR THE REMOVAL AND DISPOSAL OF THE OLD CHILLER AND INSTALLATION OF A NEW CHILLER AT THE PUBLIC WORKS FACILITY LOCATED AT 161 S. CHARLOTTE STREET

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Dalton's Heating, Air Conditioning and Controls Inc. for the removal and disposal of the old chiller and installation of a new chiller at the Public Works Facility, 161 South Charlotte Street.

The chiller at the Public Works Facility is approximately 15 years old and has reached the end of its functional life. The past few years numerous breakdowns have occurred resulting in a large amount of parts replacement, maintenance and repair time by the Parks and Recreation Department maintenance personnel. Funds are budgeted in the Public Work's 2006 – 2007 capital budget.

The Parks and Recreation Department received 3 bids as follows:

Dalton's Heating, Air Conditioning and Control	$54,590.00
R & W Inc.	$54,716.00
McNutt Services Group	$54,899.00

Dalton's Heating, Air Conditioning and Control was the lowest responsible bidder at the cost of bidder at the cost of $54,590.00.

Pros:

- Chiller repair costs will be reduced
- Improved reliability
- Lees maintenance personnel time for repair

Cons:

- Costly repairs will continue.
- Breakdowns will occur at an increased frequency.

The Public Works Department recommends City Council adopt the resolution authorizing the City Manager to enter into a contract with Dalton's Heating, Air Conditioning and Controls Inc. for the removal and disposal of the old chiller and installation of a new chiller at the Public Works Facility, 161 South Charlotte Street.

Councilman Mumpower expressed concern about the City including existing utilized City properties in a Request for Qualifications (RFQ) to offer City-owned property for redevelopment. And, since this property is in that RFQ, he was also concerned about spending $50,000 in a facility that will possibly be sold.

Councilman Newman felt that we need to take care of our facilities.

Councilman Davis said that with the RFQ we are asking the development community to look at the City's properties to see if there is a better use for our land.

Vice-Mayor Jones moved for the adoption of Resolution No. 06-[illegible]. This motion was seconded by Councilman Freeborn and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 147

RESOLUTION NO. 06-200 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL SERVICES CONTRACT WITH BROWN & CALDWELL FOR BIDDING AND CONSTRUCTION FOR WATER TREATMENT PLAN UPGRADES AT THE NORTH FORK AND BEE TREE WATER PLANTS

Summary: The consideration of a resolution authorizing the City Manager to enter into a professional services contract with Brown & Caldwell.

The Water Resources Department requires a professional engineering firm to handle the project management and bid and construction phase of the water treatment plant upgrades. Engineering design for the North Fork and Bee Tree water treatment plant upgrades has previously been prepared through another engineering contract with the engineering firm of Brown & Caldwell. Only one firm responded to the Request for Qualifications. Staff contacted numerous firms to find out why no one else submitted proposals and each firm stated that they would not submit proposals for design work their firm did not prepare. The design work was at a cost of over $1,000,000. Brown & Caldwell submitted a proposal and due to their previous design work and good standing with the City and department on previous engineering projects this firm was selected to continue this project. Part of this project includes looking at green power (hydroelectric) for the two plants. This is an opportunity for the City to pursue energy savings and ensuring future storm events do not restrict the flow of water from the treatment plants due to

downed power lines. Excess power would be sold to Progress Energy. Total cost is not to exceed $1,548,871, which is allocated in the current Fiscal Year 2006-07 budget.

Pros:

- This project will enhance the water system and ensure we continue to meet all federal and state mandated clean water regulations.
- Funds are allocated in the current year budget.

Cons: There is no negative impact.

City staff recommends City Council adopt the resolution authorizing the City Manager to enter into a professional services contract with Brown & Caldwell.

Councilman Mumpower moved for the adoption of Resolution No. 06-244. This motion was seconded by Councilman Freeborn and carried unanimously.

RESOLUTION BOOK NO. 30 - PAGE 148

MOTION TO REVIEW LEASE OF CITY-OWNED PROPERTY AT 224 LOUISIANA AVENUE TO US ARMY CORPS OF ENGINEERS

Summary: The consideration of review of a lease of City-owned real property at 224 Louisiana Avenue to the US Army Corps of Engineers.

Members of City Council have expressed interest in alternative vehicles for the lease between the City of Asheville and the United States of America Army Corps of Engineers for the property at 224 Louisiana Ave which is the Army Reserve Center. The site is an 8.857 acre tract on the west side of Louisiana Ave about 200' from its intersection with Patton Avenue.

The lease was approved on October 10, 2006, for a three year term of July 1, 2006-June 30, 2009, at an annual rate of $112,000 with no escalation clause.

A possible option for offering to renegotiate the current lease that could be explored would be to establish the lease at a beginning rate based on the previous lease which expired in June 2006 at an annual rate of $60,000. The City could offer to base the rate at the $60,000 with an annual adjustment based on the Consumer Price Index (CPI) of the most recent year of the lease. For example, the CPI for 2005 was 3.4%. The CPI is used by many government agencies to base cost of living adjustment payments.

Pros:

- Provide an opportunity for collaboration and partnership with the US Army Corps of Engineers and the local Army Reserve Center.

Cons:

- Loss of Revenue and lease terms below market rate.

City staff requests City Council provides direction to staff to offer the US Army Corps of Engineers to renegotiate the current lease for 224 Louisiana Avenue.

Mr. Fred English questioned why this item was on the Consent Agenda and not a public hearing.

Mr. Walter Plaue felt that this lease should not focus on costs, but should reflect the City's support toward our service members.

Councilman Newman said we need to be fair to the people who lease facilities from the City and also fair to the owners of the facilities - which are the taxpayers. When building and/or land leases expire, we need to ask some of our partners to contribute a little more. As we move forward, we need to make sure that we are getting the highest and best use out of our land and think through what we want to see in the future for that piece of property.

Councilman Mumpower moved to renegotiate the current 3-year lease at $60,000 with an annual adjustment based on the CPI. This motion was seconded by Vice-Mayor Jones and carried unanimously.

The following comment was heard by City Council after action had already taken place. Mr. Jim Reeves presented Council with an alternative proposal for the Army Reserve Center. He suggested Council leave the lease at the market rate and use a percentage of it for testing returning vets for depleted uranium poisoning. He presented Council information relative to exposure to depleted uranium.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED AT 1741 HENDERSONVILLE ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL ZONING FOR WEIRBRIDGE VILLAGE

ORDINANCE NO. 346 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 1741 HENDERSONVILLE ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL ZONING FOR WEIRBRIDGE VILLAGE

Mayor Bellamy opened the public hearing at 5:28 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to conditionally zone property located at 1741 Hendersonville Road from RM-6 Residential Multi-Family Low Density District to Highway Business District/Conditional Zoning for Weirbridge Village. This public hearing was advertised on November 14 and 24, 2006.

Ms. Cogburn said that the Weirbridge Village project supports the following goals of the City's Comprehensive Plan: (1) The goal of pursuing compatible infill development; (2) The goal of permitting and encouraging transit supportive density along and adjacent to major corridors and at logical transit nodes; (3) The goal of developing and using BMPs (rain gardens) to address the effect of development on stormwater runoff and water quality; (4) The goal of providing affordable housing; and (5) The goal of promoting the use of green building techniques.

The subject property, 20.66 acres, is located within the City limits, at the corner of Hendersonville Road and Racquet Club Road. The property currently contains a few homes and accessory buildings, but otherwise is undeveloped. Surrounding properties are both residential and commercial. To the north is the Racquet Club (a recreational facility) and the Racquet Club Village condominiums. Applebee's restaurant is on the northwestern corner of Racquet Club and Hendersonville Roads. Across Hendersonville Road are apartments and commercial properties. To the south, a low density multi-family development (Crowfields Condominiums) abuts the development and to the east another condominium development, South Oaks, is located. The

zoning in the area reflects the development; to the north and east, RM-16 and Highway Business, and to the south and west, RM-6.

The property owners, Sizemore Developers, LLC and Dawgbilt NC, LLC, are requesting that the property be rezoned from RM-6 Residential Multi-Family Low Density District to HB Highway Business District to allow for the development of a 336-unit multi-family development with commercial out-parcels along Hendersonville Road. The multi-family portion of the development is comprised of 16 buildings of 2 types. The developer is proposing a mix of one- two- and three-bedroom units for a total residential density of 20.75 units per acre. Highway Business zoning allows up to 32 units per acre. The commercial portion of the development is shown as traditional suburban commercial out-parcels abutting Hendersonville Road. Instead of separate curb cuts, the developer proposes to access all commercial parcels off a road that runs parallel to Hendersonville Road. Other access to the property is via a new entrance to the property along Hendersonville Road (to the south) and 3 entrances off of Racquet Club Road. The roads are proposed to remain private. A traffic impact analysis has been submitted by the developer. The developer has proposed a connection to Crowfields as a means to facilitate ingress and egress for the Crowfields community. Staff is supportive of this traffic management measure; however, it will require approval by the Crowfields Association. Staff will require a road stub-out at the site of the possible connection if the connection to Crowfields is not accepted.

The developer has submitted a proposal for the development of the commercial parcels that indicates there may be as many as 5 out-parcels but perhaps fewer than the illustrated 4. They propose restrictions that no commercial parcel will be greater than 3.5 acres (the entire commercial development area is approximately 5 acres in size). They also propose maximum gross floor areas for the buildings, limitations on uses, and signage restrictions. Restrictions on this portion of the development should be made a part of any approval on this conditional zoning request.

The residential portion of the development is comprised of 16 buildings covering approximately 16.19 acres of land. 112 one-bedroom units, 176 two-bedroom units and 48 three-bedroom units are shown. The developer is going for LEED certification with this project. Over half of the 647 parking spaces provided are garage spaces (388) leaving 259 surface parking spaces. The residential buildings are comprised of three stories with a garage level underneath. The developer is proposing that approximately 5% (17 units) in the project will be affordable, with an additional 5% considered by the developer to be "workforce" housing units.

The developer is proposing improvements to Racquet Club Road as part of the development. The proposal is to turn it into a landscaped boulevard with parking on the Weirbridge Village side of the street. With the widening of Racquet Club Road, the developer is indicating a need to reduce the front setback from 35 feet to 12.5 feet. With the sidewalk provisions, orientation of the buildings and parking along Racquet Club, staff does feel like this qualifies for a pedestrian oriented development and would recommend as part of this approval that the pedestrian oriented development design and reduced setback along Racquet Club Road be accepted from 35 feet to 12.5 feet.

Type-C buffers will be required on the southern side of the property adjacent to Crowfields and the western side adjacent to South Oaks.

Stormwater management has been a major issue in the past in this area where a number of creeks converge. The subject property contains two drainage channels and one creek. The developer is proposing to pipe Turtle Creek where it crosses the property but is showing open space area (with one road interruption) around the drainage on the western side of the property. The developers propose to incorporate rain gardens throughout the development for stormwater management.

At a meeting on October 16, 2006, the Technical Review Committee (TRC) reviewed the conditional zoning request and made a positive recommendation (with conditions) that the project be forwarded to the Planning and Zoning Commission. The developer has resubmitted since that time, addressing a number of conditions.

The Planning and Zoning Commission, at a meeting on November 1, 2006, reviewed the application and made a positive recommendation (6-1) for approval of this request subject to the conditions placed on the development by the TRC and subject to the following additional condition: (1) That the developer would work with staff to provide limitations on the commercial development that would be presented to Council as part of any approval of the proposal.

Prior to and at the Planning and Zoning Commission meeting, staff and the Commission received significant public comment on this project. Outside of the meeting staff has received 7 letters or calls in support of the project and over 15 letters or comments in opposition (citing density, height, traffic, and stormwater runoff as the major concerns). There were a significant number of speakers at the Planning and Zoning Commission meeting, most citing the aforementioned concerns about the project.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The developer is working with the N.C. Dept. of Transportation (NCDOT) to obtain a light at the intersection of Racquet Club and Hendersonville Roads to facilitate ingress and egress for this and surrounding developments. The project, if approved, must meet the technical standards set forth in the City's UDO and Standards and Specifications Manual.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The developer has proposed piping one stream along Hendersonville Road (will necessitate permitting by the Army Corps of Engineers) and proposes to leave open a drainage channel on the property. The developer is proposing the use of rain gardens for stormwater management throughout the residential portion of the project. The site, while over 2220 feet in elevation is not subject to the hillside ordinance because the average natural slope on the property is approximately 9%. Hillside requirements begin at a 15% slope.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   The use of the property immediately surrounding the site is multi-family residential and commercial, as is proposed for this property. The residential density, however, is greater than most of the surrounding residential developments.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

As stated above, the residential density proposed on this site is greater than the surrounding residential developments. The commercial out-parcels proposed would be similar to much of the suburban commercial strip development that is found along Hendersonville Road at present.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

The proposed use supports the 2025 goals as follows: (a) Permits and encourages transit supportive densities along and adjacent to major corridors and at logical transit nodes; (b) Pursues infill development; (c) Develops and uses BMPs to address the effect of development on stormwater runoff and water quality; (d) Provides affordable housing; and (e) Utilizes greenbuilding techniques.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

The proposed use is located along a major (five lane) thoroughfare in the City. Transit is available along this corridor and the developer proposes a transit shelter as part of the project. Other infrastructure is in place to support this development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

The developer has submitted a traffic impact analysis that is being analyzed by the City's Engineering Department.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- The proposed development is in keeping with the mix of uses found along Hendersonville Road.
- The residential density proposed is greater than that found in the surrounding area.
- The developer has provided access largely through internal circulation on private roads and is working with NCDOT to obtain a traffic light at the Racquet Club Road intersection to facilitate traffic ingress and egress.

A review of the subject proposal indicates that the proposed development continues the existing suburban style development pattern along Hendersonville Road. This style includes relatively low density commercial development along the road frontage in the form of single-use out-parcels and transitions to multifamily development at the part of the site not directly fronting on Hendersonville Road. Access control is provided through internal driveway access to all development, including the commercial out-parcels. Some City affordable housing, interparcel connectivity and green development goals are met by the proposed development. More "urban" development alternatives were explored with the developer to cluster development and reserve larger areas of green space (e.g., Biltmore Park, Gerber) but these were not pursued for a variety of reasons, primarily due to marketing and compatibility concerns. Much of the existing "character" of the site, including the mature vegetation will be lost with this proposed development pattern. Since the size and generally-undeveloped nature of the site is currently unique along the corridor, there has been public concern.

Staff finds that the proposed development is generally compatible with the surrounding development pattern and reflects a suburban style characteristic to much of the Hendersonville Road corridor. The development would contribute to meeting certain City goals and is not anticipated to create infrastructure or service impacts that cannot be mitigated by the on-and off-site improvements agreed to by the applicant. As a consequence, staff recommends approval of the proposed conditional zoning request subject to a variety of conditions provided below.

Recommended Special Conditions:

- Greater detail must be provided on the operation of the rain gardens and the establishment of a maintenance agreement concerning the rain gardens will be required.
- Because of flooding on adjacent properties due to urban stormwater run-off, stormwater management controls must be provided to control peak flows, which exceed those as required by the City of Asheville UDO. (25 year storm recommended).
- The proposed signal on Racquet Club Road must be installed prior to any certificate of occupancies being issued.
- A pedestrian signal shall be provided at the existing traffic signal, if not already included in the NCDOT pedestrian signal plan.
- Commercial uses must be further defined and architectural restrictions further delineated.
- A connection shall be made to the Crowfields Condominium property, if permitted; if not permitted, a road stub-out shall be provided for any future possible connection.
- A certain percentage of the units should be affordable and meet the City's requirements for affordability. This number (probably 5%) is being discussed with the developer who is committed to some affordable units.
- Type-C buffer adjacent to both the properties
- The pedestrian oriented design component along Racquet Club Road, which would allow for the reduction of the setback to 12.5 feet

Ms. Cogburn said that the developer has agreed with complying with all of the conditions.

Standard Conditions:

- The project shall comply with all conditions outlined in the TRC staff report.
- All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets.
- All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans.
- The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department.
- At the direction of the Planning Director, this Project will be reviewed by the TRC prior to issuance of any building [or grading, etc....] permits.

Mr. W. Louis Bissette Jr., attorney for the petitioner, felt that after Council hears the presentation, they will agree that Weirbridge Village can be a model for Asheville's smart growth policies. The project is innovative in many areas. The developer will spend approximately $5 Million on improvements to Racquet Club Road; the 25-year stormwater system; the LEED certified building design; the affordable and workforce housing units; and the new traffic signals, along with the Crowfields access easement, turn lanes and deceleration lanes. Smart growth and reasonable density in relatively flat areas, such as this, means less sprawl on our ridge tops and a better quality of life for our citizens. This project will produce an annual tax net gain of $594,594 for the City, as calculated in a letter from Mr. Tom Tveidt, Director of Asheville Metro Business Research Center. He provided Council with several letters of support from neighboring developments.

Mr. Clay Mooney, landscape architect with Design Associates, addressed the design of the stormwater system which, through the use of rain gardens throughout the site and other structural designs, will meet the 25 year storm event standards, not the City required 10 year storm event standards. As far as they know, no developer in Asheville has ever been asked to do that. The result, however, will be less stormwater impact downstream than exists today with the pasture land.

Mr. Gerald Green, with Greenplan, discussed density. The Highway Business District being requested permits a density of up to 32 units per acre and they are proposing 20.75 units per acre. This site is the appropriate location for dense residential development due to its amenities and attributes, some being, it is located on a major transportation corridor; it is located on a major transportation route (they are proposing a bus shelter as part of the development); it is located in close proximity to shopping, services and employment opportunities; it will be connected to adjacent property with the system of sidewalks along Racquet Club Road, Hendersonville Road, and internally to the site; pedestrian cross walks and signals will be provided at the intersection of Turtle Creek Road and Hendersonville Road and also at the intersection of Hendersonville Road and Racquet Club Road to provide safe pedestrian access to the major commercial and residential areas across Hendersonville Road; and enhanced access points with traffic signals for safe traffic management. Steps were taken in the planning of the project to ensure protection of site amenities, including siting of buildings to preserve existing trees, design of buildings to minimize grading, and underground parking to minimize impervious surfaces and to preserve green space. He said over 27% of the site will be preserved as open space. As Asheville continues to grow we must look at density in a different way in order to provide the housing and services for current and future residents. Rather than judging density in numbers they identified the impacts of the density and addressed those.

Mr. Ken Putnam, traffic engineer with Mattern & Craig, addressed the traffic concerns. He said the NCDOT is currently installing a synchronized traffic signal system along Hendersonville Road to improve traffic flow. In order to minimize the potential impact from the proposed development, the developer will provide the following enhancements, subject to review and approval by the City and the NCDOT: (1) limit the direct access onto Hendersonville Road to only one access point; (2) provide secondary access points along Racquet Club Road; (3) provide a right turn deceleration lane along the southbound approach of Hendersonville Road at Racquet Club Road and also at the main access point; (4) provide three egress lanes or existing lanes onto Hendersonville Road at Racquet Club Road and also at the main access point; (5) install a new traffic signal including the pedestrian device at Racquet Club Road; (6) revise the existing traffic signal including pedestrian devices, if needed, at Turtle Creek Drive; and (7) serve the commercial out-parcels internally with no direct access onto Hendersonville Road. In addition to the proposed development, the new traffic signal at Racquet Club Road would benefit seven distinct neighborhoods.

Mr. Rusty Pulliam, developer, spoke about his vision for the commercial part of the development and the voluntary restrictions which he is willing to place on this part of the project. He said the restrictions are (1) the number of commercial parcels will be limited to a maximum of five; (2) the size of any one commercial parcel will be limited to a maximum of 3.5 acres; (3) no big box retail stores will be permitted; (4) deed restrictions will be placed on the property to prohibit night clubs, bars, adult uses and dance clubs; (5) architectural standards will be placed on the design of the commercial buildings to require them to mirror the residential architecture of the Weirbridge Village residential condominium buildings located behind the commercial property. The exterior materials used on the commercial structures shall be the same as those used on the residential structures; (6) exterior lighting will be restricted to the same lighting fixtures and low impact lights as used in the residential condominiums behind the commercial property; (7) landscaping will meet with City of Asheville standards and be approved by the owner; and (8) no 24-hour uses, other than bank ATM's and pharmacies, will be permitted. In addition, additional

restrictions include (1) the size of any one commercial building will be limited to a maximum of 25,000 square feet of gross floor area; (2) the height of all commercial buildings will be limited to a maximum of 30 feet (two stories); (3) signage for the commercial development shall be limited to: (a) one development identification sign that will be architecturally compatible with the overall design of the development; (b) one monument style tenant identification sign per street frontage (maximum of 2 signs) with a size not to exceed 50 sq. feet per face and a height not to exceed 8 feet shall be permitted for each commercial building. The monument identification signs shall be architecturally compatible with the overall design of the development; and (c) one attached tenant identification sign shall be permitted for each commercial tenant. The maximum size for any one attached tenant identification signs shall not exceed 50 sq. feet per face and may be internally or externally lit; (4) outside speaker systems shall be limited to a low volume speaker for the bank drive through teller(s) and pharmacy drive through(s). The hours of operation of the bank teller speaker systems shall be limited to 8:30 a.m. - 6:00 p.m. Monday -Friday and 9:00 a.m. - Noon on Saturdays. The hours of operation of the pharmacy drive through speaker system shall not be limited; (5) no outdoor storage of merchandise, equipment, or other items shall be permitted; and (6) commercial uses shall be limited to financial institutions; pharmacies; restaurants; professional offices; retail sales; bakeries; barber shops and salons; bookstores; clinics, medical; delicatessens; florists, gift shops; grocery stores; and health and fitness facilities. He said that they will grant a permanent easement for Crowfields at no cost.

Mr. Chip Cassinger, developer, described the green-building construction techniques which will be utilized to make this project a national LEED certified model for multi-unit residential buildings. He also discussed the planned inclusion of 34 affordable housing and workforce housing units in Weirbridge Village, noting that all their units will be handicapped accessible. Regarding height, the City measures height from finished floor to top of the third floor, and their 3-story garden style buildings measure approximately 33 feet. The footprint on the ground does not exceed 10,000 sq. feet, which is a comparable footprint with Crowfields. He said that 60% of the parking is underneath.

Mr. Mack Cox, President of the Executive Committee of Crowfields Condominium Association, gave a brief history of Mr. Pulliam's development when it was originally proposed in February of 2006. He proposed to build 80 town homes on the back 10 acres and a commercial development on the front 10 acres. He also offered Crowfields access to a traffic light on his property if Crowfields would give him one acre of their prime frontage for his commercial use. The Crowfields Board of Directors overwhelming rejected the proposal. In July of 2006, Mr. Pulliam then proposed what is before Council today. He said new developments should not exceed zoning which is greater than existing surrounding neighborhoods. Crowfields is zoned RM-6 and the surrounding developments are zoned no greater than RM-16. He felt the density was too much and there were too many conditions yet to be resolved.

Mr. Bob Malkin said that the opposition is not opposed to development of the site, but how the site is being developed. He said that based on the developer's plan, 161 mature trees will be bull-dozed down, leaving maybe 10 trees left on the site. After the trees are cut, then the developer will grade the site flat. He questioned what would happen if the developer could not follow through with his plans after cutting down 161 trees and grading the land. He said that there is not enough parking on the site, so 35 cars will have to park on Racquet Club Road. He showed photos of other properties where this developer has ravaged the land noting that he has no environmental conscience. He then explained how the buildings will be 60 feet tall and will be incompatible to other area developments.

Mr. Paul Bidwell, attorney for Crowfields Condominium Association, explained that the developer's plan shows a 46 foot height which does not appear to include the garage or the roof peak. He said this plan is not compatible with the surrounding neighborhood nor is it smart growth. He felt the plan benefits only the developer and he could see no reason why the

developer couldn't develop the property in half the size. This project is not the right plan for this property, as the land deserves less development. He said that zoning is a promise to the community, noting that it can change, but it is some protection for the people who live in the area. He said there is no good reason to change the zoning to such a high density. He urged Council to ask the developer to come back with a more appropriately-sized development which is more compatible with the neighborhood. He urged Council not to approve the development plan at the expense of the quality of life for the people in the neighborhood.

The following individuals spoke against the conditional zoning for several reasons, some being, but are not limited to: density is too high for the property; height of the buildings are too high; no location set aside for children to play in; City should honor the zoning status of properties; and the commercial property fronting Hendersonville Road will be strip development:

Mr. Joe Brady, Asheville resident
Crowfields resident
Mr. Maloy Rash, Crowfields resident
Mr. Michael West, Crowfields resident
Ms. Anne Campbell, Crowfields resident
Mr. Stuart Wilson, Devonshire resident
Ms. Barber Melton, Vice-President of Coalition of Asheville Neighborhoods
Mr. Robert Philip, Crowfields resident

The following individuals spoke in support of the conditional zoning for several reasons, some being, but are not limited to: needed traffic improvements to Racquet Club Road; development will increase adjoining property values; developer has proven record of following through with development plans; property warrants the higher density; good traffic management plan for Crowfields; developer will provide external natural buffer screening and shrubs along the southern Weirbridge Village boundary with Crowfields; developer will provide a 25-year stormwater system; 5,807 people will be affected by the improvements to Racquet Club Road; project supports City's smart growth policies; plan is for infill development, which slows down urban sprawl; the plan of commercial use in the front and residential in the rear is similar to what is already in place on Hendersonville Road; and plan calls for underground parking:

Mr. John Crook, South Oaks resident
Mr. Buster Brown, developer
Mr. Miller Williams, former resident of Crowfields
Ms. Susan Roderick
Mr. Robert Fitch, Crowfields resident
Mr. Will Morris, co-owner of one of the units in Crowfields
Mr. Laneal Vaughn, owner of the Asheville Racquet Club
Mr. Neal Hanks, resident in Biltmore Park Subdivision
Mr. Otto Claude Smith, Crowfields resident
Mr. Robert Cox, Racquet Club Road resident
Mr. Charles Frederick, Regional President for Southern Community Bank & Trust

Mayor Bellamy closed the public hearing at 7:32 p.m.

Throughout discussion, Mr. Shuford responded to various questions and/or comments from Council, some being, but are not limited to: what was the reasoning behind why the Planning & Zoning Commission member voted against the development; when was the property zoned RM-6; why was the property zoned RM-6; what is the tax appraisal for the property; are working farms taxed at a much lower rate; and how will the Dingle Creek Stormwater Analysis affect this area.

Councilman Mumpower felt there were many persuasive arguments for this development plan, but was concerned with why we have zoning if we are willing to make abrupt leaps in density this dramatically.

Councilwoman Cape said that the 2025 Plan (compiled by the community in 2002) identifies several items as positive ways for us to build in our community, which this project adheres to, e.g., smart growth, infill development, transit orientation, green-building, etc. The footprint of the proposed buildings are essentially the same size as the Crowfields buildings, but instead of housing six families, they are housing 20 families in high energy efficient homes. She did question why one building couldn't be deleted in place of more open space, but overall she commended the developer for the plan.

Councilman Freeborn felt that it doesn't make sense to continue medium to low density development on Hendersonville Road. Even though the developer doesn't anticipate this being a family-oriented development, he suggested a playground facility be placed on the property. Another suggestion would be to include a $120 annual transit pass to the rent or to the condo association fee, which would go a long way in reducing the number of cars on Hendersonville Road.

In response to Vice-Mayor Jones' concern about screening, Mr. Mooney said they will have a 25-foot buffer and the final locations of plant materials will be adjusted by an on-site visit with a member of the Planning staff and the landscape architect. The purpose of that is to try to concentrate those materials where they have the most need. They will try to do a replication of what is existing on the Crowfields side.

Upon inquiry of Vice-Mayor Jones, Ms. Cogburn said that technical height in the UDO is approximately 38 feet and is measured from the primary entrance (in terms of fire access) to the ceiling of the highest livable space. It is true that if you stand at the garage level on the lower side and look to the very top of the roof, you are getting close to 60 feet, but 60 feet is the height that is allowed in the Highway Business District.

When Vice-Mayor Jones asked about enforcement, Planning & Development Director Scott Shuford said that one enforcement technique if a violation should occur is that we do not issue a Certificate of Occupancy. City Council has authorized an additional person to his staff and that person will be able to make sure the conditions established are known up front by the developer and the contractor, and will meet with them on-site throughout the construction process.

Upon inquiry of Councilman Davis about maintenance of the rain gardens, Mr. Chad Pierce in the City's Engineering Department, explained that after the rain gardens are installed, we will require an inspection and a recorded maintenance agreement, one provision which is an annual report. If the system is not working properly and the homeowners do not fix it, then the City has the option to go in, make the correction, and then put a lien on the property.

Councilwoman Cape wanted to make sure that the LEED aspects of this project are real and want to make sure they are part of the conditions of this project.

Councilman Newman asked if there is a technology that we can use prior to approving projects that tells how much more capacity the roads can bear before they become a low level standard. City Traffic Engineer Anthony Butzek responded that we can utilize traffic modeling to make some predictions. In addition, we can look at best management practices from other cities regarding development along certain corridors, e.g., improving pedestrian access, transit and bicycle access.

There was discussion regarding a condition requiring the buildings be LEED certified before being issued a Certificate of Occupancy. Mr. Shuford understood the LEED certification process contains a component that you have to demonstrate that you are achieving certain things and the only way to do that is to get the buildings occupied. Mr. Cassinger explained that after the project is completed, the National LEED Council reviews the entire project. He suggested allowing the TRC to verify the number of points met in order to achieve the LEED certification. City Attorney Oast suggested the condition be that prior to the issuance of final site approval that the developer demonstrate to the TRC sufficient LEED elements associated with the site plan to achieve a minimum level of 30 points, understanding that the LEED certification cannot be obtained until after the project is built. Councilman Newman said that as the points are calculated that we do it in a very conservative way.

Mr. Mooney responded to Mayor Bellamy regarding the erosion control measures taking place during construction, the percentage of the site being preserved as open space, and the minimum parking requirements.

In response to Mayor Bellamy, Mr. Shuford said that if the developers do something above the underlying RM-6 zoning, they will have to come back to City Council. If the conditional zoning is not acted on in a timely fashion, the property reverts to its original zoning.

Councilman Newman moved for the adoption of Ordinance No. 3411, to conditionally zone property located at 1741 Hendersonville Road from RM-6 Residential Multi-Family Low Density District to Highway Business District/Conditional Zoning for Weirbridge Village, subject to the following conditions: (1) The project shall comply with all conditions placed on the development by the TRC; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department; (5) At the direction of the Planning Director, this Project will be reviewed by the TRC prior to issuance of any building [or grading, etc....] permits; (6) Greater detail must be provided on the operation of the rain gardens and the establishment of a maintenance agreement concerning the rain gardens will be required; (7) Because of flooding on adjacent properties due to urban stormwater run-off, stormwater management controls must be provided to control peak flows, which exceed those as required by the City of Asheville UDO. (25 year storm recommended); (8) The proposed signal on Racquet Club Road must be installed prior to any certificate of occupancies being issued; (9) A pedestrian signal shall be provided at the existing traffic signal, if not already included in the NCDOT pedestrian signal plan; (10) Commercial uses must be further defined and architectural restrictions further delineated; (11) A connection shall be made to the Crowfields Condominium property, if permitted; if not permitted, a road stub-out shall be provided for any future possible connection; (12) A certain percentage of the units should be affordable and meet the City's requirements for affordability. This number (probably 5%) is being discussed with the developer who is committed to some affordable units; (13) That the developer would work with City staff to provide limitations on the commercial development with said commercial development restrictions being a part of any approval of the proposal; (14) Type-C buffer adjacent to both the properties; and that (15) the pedestrian oriented design component along Racquet Club Road, which would allow for the reduction of the setback to 12.5 feet be accepted; and (16) Prior to the issuance of final site approval that the developer demonstrate to the TRC sufficient LEED elements associated with the site plan for the residential component of the project to achieve a minimum level of 30 points, understanding that the LEED certification cannot be obtained until after the project is built. This motion was seconded by Councilman Freeborn.

Councilwoman Cape asked if there was a condition that could be crafted to eliminate speculative grading if the developer does not move forward with the plan or cannot obtain financing for the project. City Attorney said that Council can incorporate certain requirements into the conditional zoning ordinance, noting that any condition has to be agreed to by the developer. He suggested a condition that no grading permits be issued until we receive some indication that construction financing has been committed to. Mr. Pulliam agreed with that condition.

Councilman Newman and Councilman Freeborn agreed to include in their original motion a condition that no grading permits be issued until we receive some indication that construction financing has been committed to.

Councilman Mumpower felt that this is a good project; however, his decision falls on whether zoning is real or not and until then, it is our responsibility to error in fairness of practicalities.

The motion made by Councilman Newman and seconded by Councilman Freeborn (including the condition regarding financing) carried on a 6-1 vote, with Councilman Mumpower voting "no."

At 9:01 p.m., Mayor Bellamy called for a short recess.

At 9:20 p.m., Councilman Mumpower moved to excuse Councilman Freeborn from the rest of the meeting due to illness. This motion was seconded by Vice-Mayor Jones and carried unanimously.

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR "HOMESTAYS" (CURRENTLY KNOWN AS "BED AND BREAKFAST HOMESTAYS") IN SINGLE-FAMILY RESIDENTIAL ZONING DISTRICTS

ORDINANCE NO. 3412 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR "HOMESTAYS" (CURRENTLY KNOWN AS "BED AND BREAKFAST HOMESTAYS") IN SINGLE-FAMILY RESIDENTIAL ZONING DISTRICTS

Mayor Bellamy opened the public hearing at 9:20 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance to provide for "homestays" (currently known as "bed and breakfast homestays") in single-family residential zoning districts. This public hearing was advertised on November 17 and 24, 2006.

This code amendment provides for "homestays" (currently known as "bed and breakfast homestays") in single family residential zoning districts as uses by right subject to special requirements. Since the initiation of proactive enforcement on illegal short-term (less than 30 days) rentals in various Asheville neighborhoods, staff has been meeting with a focus group of realtors, B&B owners, Tourism Development Authority staff, and Coalition of Asheville Neighborhood (CAN) members to discuss areas for compromise. One area of apparent agreement is the provision of homestays as uses by right subject to special requirements in single family residential zoning districts. Bed and breakfast homestays are currently allowed as uses by right subject to special requirements in multifamily zoning districts.

A bed and breakfast homestay is defined as: a private, owner-occupied residence with one to three guest rooms where overnight accommodations and a morning meal are provided to transients for compensation and where the use is subordinate and incidental to the main residential use of the building. This definition would be applied to "homestays".

Section 7-16-1 provides the conditions under which uses by right subject to special requirements can be established. Bed and breakfast homestays must meet the following requirements:

- Current use districts: RM-6, RM-8, RM-16.
- No displays of goods, products, services, or other advertising shall be visible from outside the building.
- Shall be carried on by a resident of the property.
- A maximum of one full-time equivalent (one FTE) non-resident of the dwelling may be employed.
- On premise retail sales shall not be a component of the bed and breakfast homestay.
- A maximum of 25 percent of the gross floor area of the dwelling unit may be used for the bed and breakfast homestay. For the purpose of calculating the area of the structure devoted to the bed and breakfast use, only the floor areas of the bedroom and bathroom areas used by the bed and breakfast guests shall be considered in such calculations.
- No activities other than lodging, a morning meal, and an evening and/or afternoon refreshment shall be provided.
- Activities shall be provided for overnight guests only.
- Off-street parking shall be provided as required by subsection 7-11-1(c) of this chapter. Parking shall be located on the same lot on which the bed and breakfast homestay is located, at the rear of the lot and screened with vegetation from adjacent properties and from the street.
- No accessory structures shall be used to accommodate guests.
- The owner shall reside in the principal structure.
- The length of stay of guests shall not exceed 14 days.
- No home of less than 2,500 heated square feet shall be used for a bed and breakfast homestay.
- Signage shall be limited to a single sign, not to exceed four square feet, attached to the home.
- Exterior lighting shall be residential in nature and shall not be directed towards adjacent properties.
- Bed and breakfast homestays shall be located a minimum of 500 feet from other bed and breakfast homestays and bed and breakfast inns. In calculating the 500 foot distance between bed and breakfast establishments, measurements shall be taken from the closest property line of the lot of the existing bed and breakfast establishment to the closest property line of the lot of the proposed bed and breakfast homestay. Existing, legally established bed and breakfast homestays that do not meet this separation requirement of 500 feet are permitted to expand to the maximum limits allowed under this chapter, al long as all applicable development standards are met.

This amendment allows the added flexibility for these extremely restricted uses to be accommodated in <u>all</u> residential districts. Additionally, the length of stay is proposed to change from 14 to 30 days and a prohibition on external signage in single family residential districts is proposed to increase neighborhood compatibility.

A suggestion was made by a citizen to increase the distance between homestay uses to 1,000 feet. A request has also been received for additional short-term rental uses in residential districts.

The amendment has been routed to Coalition of Asheville Neighborhoods (CAN), CREIA, and Council of Independent Business Owners for review and comment.

Pros:

- The City's rich architectural heritage can be shared with more visitors.
- There are many neighborhoods and properties that can benefit from the positive effects of these uses, just as Montford has.
- The regulatory limitations on these uses mitigate their impacts.
- There would be an opportunity for persons negatively affected by the City's short-term rental enforcement efforts to legitimately establish a homestay use.

Cons:

- This would allow an Edwin Avenue property previously denied by City Council to likely qualify as a homestay.
- An additional nonresidential/commercial use would be allowed in single family zoning districts.

On October 4, 2006, the Planning and Zoning Commission recommended partial approval of the proposed code amendment by a vote of 6-1 (Weeks opposed). The Commission was concerned about the expansion of "commercial" uses like homestays into single family districts so their recommendation was to delete the portions of the ordinance dealing with expansion of the uses and retain the change in nomenclature. One proposed ordinance represents the ordinance recommended by the Commission. Another version of the ordinance is the ordinance change originally prepared by City staff. City staff also requests that Council provide direction to staff concerning whether additional efforts should be undertaken to "legalize" short-term rental of properties in residential areas.

In summary, Mr. Shuford asked Council for direction on the following: (1) change the name of "bed and breakfast homestay" to "homestays; (2) increase the allowable length of stay from 14 days to 30 days; (3) extend homestay uses into the RS districts (if so, staff recommends that a prohibition on signage be included); and (4) provide for some relaxation of the 500 foot separation requirement, for example: where homestays are located in physically-discrete neighborhoods without common street connections or neighborhoods separated by major roads, water bodies, railroad rights-of-way or other significant physical barriers, the planning and development director may waive the separation requirement for homestay uses in such circumstances.

Ms. Barber Melton, Vice-President of CAN, explained how their vote was to support the amendment, but only two votes separated the final vote. Spacing was important in addition to the commercial intrusion into residential neighborhoods.

Ms. Elizabeth Ann Wyndelts spoke in favor of the ordinance. She did feel that parking should be addressed in that she felt there should be no on-street parking allowed.

Mayor Bellamy closed the public hearing at 9:30 p.m.

Councilman Davis could not be supportive of this amendment in that he feels it was crafted as an effort to work around the reasons why a bed & breakfast was denied on Edwin Place about a year ago. In addition, he was concerned about the Planning & Zoning Commission discussion which ultimately they only approved the name change.

Councilman Newman said that Council didn't have an overall policy last year when the matter on Edwin was considered, but now we have a policy.

After Mr. Shuford replied to Councilwoman Cape how the 2500 square foot home standard was arrived at, she explained how we should be looking for different ways for people to make a living in our community and this amendment provides that option for people to supplement their income in their own home. In addition, she was interested in having the 2500 square foot limit be evaluated because it seems prejudicial for those who do not live in large homes.

Councilman Mumpower said that we are talking about a regulated activity when there are all kinds of things that can go on in someone's home that we have no way of regulating at all. This regulated activity would provide some opportunity for people to make some money, for people to come to Asheville, and in a sense expand our housing stock. He questioned why we would want to have a 500 feet separation and why cap the square footage requirement. As long as it's regulated activity, people are a lot better off in the neighborhood with something that we can control.

Vice-Mayor Jones moved to adopt Ordinance No. 3412, to (1) change the name of "bed and breakfast homestay" to "homestays; (2) increase the allowable length of stay from 14 days to 30 days; (3) and extend homestay uses into the residential-single family districts, with a prohibition on signage. This motion was seconded by Councilwoman Cape.

Mayor Bellamy felt that the vote from the Planning & Zoning Commission is rare and explained her reasoning why perhaps the ordinance is not as thought out as some of the other wording amendments.

At the suggestion of Councilman Newman, it was the majority of Council's decision to support City staff in developing a vacation rental policy in the context of owner-occupied homes, similar to this policy.

The motion made by Vice-Mayor Jones and seconded by Councilwoman Cape carried on a 4-2 vote, with Mayor Bellamy and Councilman Davis voting "no."

City Attorney Oast said that because the ordinance failed to reach the 2/3 vote of the full Council, it is required to come back to Council for a second vote at their next formal meeting.

ORDINANCE BOOK NO. 23 - PAGE 149

C. PUBLIC HEARING TO CONSIDER RENAMING THE EXISTING STREET OF "HOLIDAY INN DRIVE" LOCATED OFF HIGHWAY 240 EAST TO "RESORT DRIVE"

RESOLUTION NO. 06-208 RESOLUTION RENAMING THE EXISTING STREET OF "HOLIDAY INN DRIVE" LOCATED OFF HIGHWAY 240 EAST TO "RESORT DRIVE"

Mayor Bellamy said that on May 23, 2006, the petitioners requested this public hearing be continued to July 25, 2006, in order to address street signage. That request was granted. On July 7, 2006, the petitioner requested the public hearing be continued to September 12, 2006. That request was granted as well. In addition, on September 12, 2006, the petitioners requested the public hearing be continued to November 28, 2006, in order to address the cost of highway signs in their budget. That request was granted.

Mayor Bellamy opened the public hearing at 10:02 p.m.

Ms. Abby Moore, Emergency Address Coordinator, said that this is the consideration of a resolution renaming the existing street of "Holiday Inn Drive," located off Highway 240 East, to "Resort Drive." This public hearing was advertised on May 12 and 19, 2006.

The owners of Crowne Resort have petitioned the City of Asheville to rename "Holiday Inn Drive" to "Resort Drive." City staff has reviewed the proposed name and found no conflicts that would impede emergency service response. The primary purpose of establishing a name for any street is to facilitate emergency response. Staff researched the street data and has determined that this name is not duplicated. The adoption of the new street name is to enhance emergency response to the citizens and for easy of use for the owners of Crowne Resort. The cost will be borne by the developer.

Pros:

- The street will be utilized to access the existing business and infrastructure to the Crowne Resort.
- Assignment of specific addresses, utility connection, and potential emergency response will be enhanced with specific the street name.
- All cost related to renaming of street will be borne by the applicant.
- Elimination of corporate names for street name assignment due to change in corporation name changes.

Cons:

- There are no negative effects of for assignment of "Resort Drive" to this existing road.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the city's strategic operation plan. This action complies with the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure: Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

City staff recommends City Council adopt a resolution renaming the existing street of "Holiday Inn Drive," located off Interstate 240 East, to "Resort Drive."

Mayor Bellamy closed the public hearing at 10:03 p.m.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 06-208. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 157

D. PUBLIC HEARING TO CONSIDER A REQUEST BY THE ST. DUNSTAN'S COMMUNITY TO CREATE AN HISTORIC PRESERVATION OVERLAY DISTRICT FOR THE ST. DUNSTAN'S NEIGHBORHOOD

ORDINANCE NO. 3413- ORDINANCE TO CREATE AN HISTORIC PRESERVATION OVERLAY DISTRICT FOR THE ST. DUNSTAN'S NEIGHBORHOOD

Mayor Bellamy opened the public hearing at 10:04 p.m.

Historic Resources Director Stacy Merten said that this is the consideration of an ordinance to create an historic preservation overlay district for the St. Dunstan's neighborhood. This public hearing was advertised on November 14 and 21, 2006.

Ms. Merten said that the Historic Preservation Section of the *Asheville City Development Plan 2025 (ACDP 2025)* encourages neighborhood livability and maintenance of property values through the restoration and rehabilitation of existing and future historic district. The establishment of a new local historic district will provide a mechanism for design review of new construction and will insure that new development is compatible with the existing historic character and density of the neighborhood which will help to protect the quality of life for neighborhood residents as well as protect the value of property.

She said that a zoning study for the St Dunstan's neighborhood was initiated several years ago to down zone the neighborhood from RS-8 to RS-4 The Planning staff did not recommend in favor of the rezoning, primarily due to the fact that the rezoning would result in a large number of non-conforming properties with regard to lot size and building setbacks.

She said that the St. Dunstan's neighborhood has been working with the Historic Resources Commission (HRC) over the past 18 months to develop an inventory of the community's historic resources and to document the history of the community as required by state law in order to prepare a report on the historic significance of the community. We have also worked with the State Historic Preservation Office to establish the period of significance and establish the appropriate district boundaries. The neighborhood would like to include a number of non-contributing properties that are located at the edges of the district, so that these structures will also have to undergo design review for any future alterations.

The report finds that the neighborhood, which is located south of downtown Asheville on a promontory overlooking the Swannanoa River, represents a relatively intact example of architectural styles prevalent during Asheville's economic expansion in the early 20th century. The architecture of the buildings within the small enclave is unique in that it represents a variety of styles, materials and construction methods from the period of significance. One of the most interesting and unique features of the residential area is a stone wall constructed of huge cut boulders that define the circular tip of the hill overlooking Biltmore Village. The area is locally significant under National Register criteria C.

The HRC staff has worked with the neighborhood to draft guidelines for the district. These will be adopted by the HRC once the district receives final approval by City Council. All future alterations and new construction will then be subject to design review by the HRC. Density concerns may be addressed through the guidelines.

Pro: Design review will protect the neighborhood from incompatible modifications to existing historic structures and infill development.

Con: Local designation will add another layer of review to the development process.

Based on the above findings and the analysis provided in the report, staff recommends in favor of the local historic designation of the St. Dunstan's Neighborhood.

Ms. Merten said that since the Planning & Zoning Commission meeting, owners of Lots 183 and 188 has requested not to be included in the designation. As these specific properties are non-contributing and they are on the edge of the district, staff has no problem in recommending they not be included. In addition, the owner at 13 St. Dunstan's Circle asked that her property be excluded from the district; however, Ms. Merten could not support that request as her property is in the middle of the district.

Ms. Vicki Schomer, owner of the bed & breakfast on St. Dunstan's Circle, could not support this designation in that the overlay will make it practically impossible to make any energy efficient retrofits to homes.

Ms. Sharon Tabor, former owner of 25 St. Dunstan's Circle, spoke in favor of the designation in that the guidelines were established by the neighborhood and they have been available for the community to review since April of 2006. We did allow for energy efficient windows and a tremendous effort has been made in the construction business in the last 20 years to develop doors, windows, etc. that are energy efficient.

Mr. Mike Byer, St. Dunstan's area resident, spoke in support of the overlay district.

Mayor Bellamy closed the public hearing at 10:11 p.m.

Upon inquiry of Councilwoman Cape about solar panels, Ms. Merten said that the Montford guidelines state that solar panels are allowed but they cannot be visible to the street. She said that the concept of preservation is about preserving old buildings. One of the biggest concerns is windows and we do allow storm windows, so there are other ways to achieve energy efficiency.

In response to Councilman Newman about including solar panels in these guidelines, Ms. Merten said that these guidelines are developed, but not yet adopted by the HRC, so that is something that can be considered. In fact, if approved by Council, she plans to have another community meeting and specifically review the important issues. She said that another issue they could work on is to distinguish between historic buildings and new construction. New construction could certainly meet all green building standards. We are talking about just the historic building themselves and many changes can be made in the interior.

Councilwoman Cape suggested, and the majority of Council agreed, that the guidelines include an option for energy technologies on homes to make them more livable and more energy efficient.

Vice-Mayor Jones said that in the future, she would like to discuss amending the other three local districts guidelines to include the option for energy technologies on homes as well.

Mayor Bellamy suggested Ms. Merten review the Charleston, S.C., and Savannah, Georgia, models on how they balance preservation and environmental issues.

Councilman Mumpower felt that we should create elite communities very carefully and feels it is a mistake under most circumstances. He felt that Asheville is fortunate to have adequate natural and economic motivations to preserve historic properties without government intervention.

When Councilman Newman stated that he would be more informed if he saw a copy of the draft guidelines, Ms. Merten had no problem in sharing those guidelines noting that they are modeled closely after the Montford guidelines.

Upon inquiry of Councilman Davis, Ms. Merten said that landmark designations and historic preservation overlay districts are two mutually exclusive processes.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Jones moved for the adoption of Ordinance No. 3413, establishing an historic overlay zoning district for the St. Dunstan's neighborhood. This motion was seconded by Councilwoman Cape and carried on a 4-2 vote, with Councilman Newman and Councilman Mumpower voting "no."

City Attorney Oast said that because the ordinance failed to reach the 2/3 vote of the full Council, it is required to come back to Council for a second vote at their next formal meeting.

ORDINANCE BOOK NO. 23 - PAGE 152

E. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF SOUTHRIDGE SHOPPING CENTER TO HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 3414 - ORDINANCE TO INITIALLY ZONE THE SOUTHRIDGE SHOPPING CENTER TO HIGHWAY BUSINESS DISTRICT

Mayor Bellamy opened the public hearing at 10:29 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to initially zone the Southridge Shopping Center to Highway Business District. This public hearing was advertised on November 14 and 21, 2006.

The North Carolina General Assembly, in 2005, approved legislation adding properties on Airport Road to the corporate limits of the City of Asheville. This bill was enacted at the request of Southridge Associates, LLC, developers of the shopping area and out-parcels at the intersection of Airport Road and Rockwood Road. The effective date of annexation for two of these parcels was October 31, 2005. The effective date for the remaining four parcels is October 31, 2006. These parcels are currently under the zoning jurisdiction of Buncombe County and are zoned "Employment" under the Limestone Township Ordinance. The four parcels that are the subject of this initial zoning total 47.36 acres in size.

Other properties in the Airport Road area that are within the City's jurisdiction (such as the Holiday Inn Hotel and Carabba's Restaurant) are zoned Highway Business District. Staff proposes the same zoning for these properties.

At a meeting on October 16, 2006, the City's Technical Review Committee voted unanimously to recommend approval of this initial zoning. At their meeting on November 1, 2006, the Planning and Zoning Commission recommended approval of this initial zoning. No one commented on the proposal at either meeting. There have been telephone inquiries, but no comments on this proposal.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Zones property recently taken into the City of Asheville in consideration of the surrounding zoning and land use and current land use and the City's Comprehensive Plan.
- Some could be concerned with additional Highway Business zoning along Airport Road.

The Planning and Development staff recommends approval of this initial zoning.

Mayor Bellamy closed the public hearing at 10:30 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3414. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 155

F. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED AT ONE VOLVO DRIVE FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO INDUSTRIAL DISTRICT/ CONDITIONAL ZONING

ORDINANCE NO. 3415 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT ONE VOLVE DRIVE FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO INDUSTRIAL DISTRICT/ CONDITIONAL ZONING

Mayor Bellamy opened the public hearing at 10:31 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to conditionally zone property located at One Volvo Drive from RS-2 Residential Single-Family High Density District to Industrial District/Conditional Zoning. This public hearing was advertised on November 14 and 21, 2006.

Ms. Cogburn said that the subject property is part of the existing campus associated with the Volvo Construction Equipment operations on Hendersonville Road. Presently, the property can only be accessed from the Volvo site, however, the proposal is that a new gated road would be developed connecting this portion of the Volvo campus with Long Shoals Road. Volvo has been in discussions with N.C. Dept. of Transportation (NCDOT) concerning this connection which would be serviced with a traffic light. The property can be viewed off of Lance Lane and Atkins Street. The surrounding properties to the north, east and south are primarily residential in nature and in zoning. To the south and west there is the existing Volvo facility and vacant land owned by Progress Energy as part of their Lake Julian property.

Two parcels totaling 3.7 acres are the subject of this conditional zoning request. The applicant wishes to rezone this portion of their property from RS-2 Residential Single-Family Low Density District to Industrial District/Conditional Zoning for the purpose of expanding their operation; specifically to allow for the outdoor storage of manufactured construction equipment. The property is currently vacant. The need for this space (for this purpose) is precipitated by operations expansions underway at the Volvo facility and by the requirements of the Foreign Trade Zone status of the operation there.

In addition to the road connection to Long Shoals, the applicant plans to clear and grade a portion of the property to create the aforementioned secure graveled storage area for finished product. The applicant is showing a sixty (60)-foot undisturbed area on three sides of the property at present but will work with the City as the project progresses to ensure a Type D buffer in these areas with as much undisturbed area as is possible. The applicant has met with the surrounding property owners to inform the residents of their plans.

At their meeting on November 6, 2006, the City of Asheville Technical Review Committee (TRC) reviewed the conditional zoning request and made a positive recommendation (with

conditions) that the project be forwarded to the Planning and Zoning Commission. The Committee added the following conditions: (1) That the property owner considers combining all parcels into one single parcel encompassing the entire Volvo campus; and (2) That the location and design of the gated connection to Long Shoals Road be detailed for approval by the City Traffic Engineer and Fire Marshal.

At a meeting on November 16, 2006, the Asheville Planning and Zoning Commission reviewed the conditional zoning request and recommended approval (5-0) with the conditions as set forth by the Technical Review Committee. No one (except Volvo representatives) spoke at the meeting. Staff received one comment prior to the meeting from a neighboring resident concerned about the impact of the development on wildlife and a letter of support for the project from the Asheville Area Chamber of Commerce.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The project, if approved, must meet the technical standards set forth in the City's UDO. The existing site plan shows compliance with most applicable development standards and the applicant will continue working with the City staff on full compliance.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The proposed road location is designed to avoid detrimental impacts to the Lake Julian area and the applicant proposes to disturb the natural vegetated state of the property as little as is possible.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   The adjoining properties already co-exist with the Volvo operation. While this is an expansion of their operation, it is a low impact expansion and the adjacent residential properties will be heavily buffered from this impact.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

   As previously stated, this area is already an area of Asheville and Buncombe County that experiences a mix of residential and industrial and public utility operations. There is no additional building proposed as part of this expansion.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

The proposed development of this land conforms to the economic development goals of both the City's comprehensive plan as well as the City's strategic plan. (See specific references above).

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

All technical aspects of the project have or can be met by the applicants.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

The proposed use will not increase traffic in the area. The applicant will be working with City staff and NCDOT to ensure that no traffic hazards will be created with the addition of the gated connection to Long Shoals Road.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Proposes and supports the appropriate low impact expansion of an existing major industrial operation.
- The landscape plan shows a significant undisturbed area surrounding the portion of the property on which the operation will take place.
- Some may consider this application a further intrusion of industrial development into a residential area.

Staff recommends approval subject to the conditions placed on the development by the Technical Review Committee including the added conditions: (1) That the property owner considers combining all parcels into one single parcel encompassing the entire Volvo campus; (2) That the location and design of the gated connection to Long Shoals Road be detailed for approval by the City Traffic Engineer and Fire Marshal. (Turnaround provided as well).

The following standard conditions shall also apply:

- Any site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets.
- All major existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans.
- Actual improvements to the site must comply with the conceptual site plan presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department.
- At the direction of the Planning Director, this Project will be reviewed by the TRC prior to issuance of any zoning [or grading, etc....] permits.

Mr. Mike Connor, representing Day Associates, spoke in support of the conditional zoning.

Mayor Bellamy closed the public hearing at 10:36 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3415, to conditionally zone property located at One Volvo Drive from RS-2 Residential Single-Family Low Density District to Industrial District/Conditional Zoning, subject to the following conditions: (1) The project shall comply with all conditions placed on the development by the TRC; (2) That the property owner considers combining all parcels into one single parcel encompassing the entire Volvo campus; (3) That the location and design of the gated connection to Long Shoals Road be detailed for approval by the City Traffic Engineer and Fire Marshal. (Turnaround provided as well); (4) Any site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (5) All major existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (6) Actual improvements to the site must comply with the conceptual site plan presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department; and (7) At the direction of the Planning Director, this Project will be reviewed by the TRC prior to issuance of any zoning [or grading, etc....] permits. This motion was seconded by Vice-Mayor Jones and carried on a 5-1 vote, with Councilman Mumpower voting "no".

ORDINANCE BOOK NO. 23 - PAGE 159

G. PUBLIC HEARING TO CONSIDER REZONING PROPERTY LOCATED ON LEXINGTON AVENUE AND UNDER THE I-240 BRIDGE FROM NEIGHBORHOOD CORRIDOR DISTRICT TO CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 3416 - ORDINANCE TO REZONE PROPERTY LOCATED ON LEXINGTON AVENUE AND UNDER THE I-240 BRIDGE FROM NEIGHBORHOOD CORRIDOR DISTRICT TO CENTRAL BUSINESS DISTRICT

Mayor Bellamy opened the public hearing at 10:41 p.m.

Urban Planner Alan Glines said that this is the consideration to rezone property located on Lexington Avenue and under the I-240 Bridge from Neighborhood Corridor District to Central Business District. This public hearing was advertised on November 14 and 21, 2006.

Mr. Glines said that that Strategic Plan mentions parking needs as an item to be addressed in the downtown area and a goal of enhancing core services to promote cleanliness and vibrancy. With City management of this N.C. Dept. of Transportation (NCDOT) property, the site can be cleaned and maintained in better fashion. The area is considered a gateway into the downtown area from points north.

He said that this request is being made by the City of Asheville. The City has and agreement with the NCDOT to take over and manage the parking area under the I-240 bridge. The area has been a 'no-mans land' of sorts for years. Some of the activities occurring there have generated a number of complaints. The City and NCDOT have arrived at an agreement to allow for the City to maintain and manage the area under the bridge. This agreement limits the use of the area to a parking facility and related public facilities such as landscaping, signage, lighting and artwork. To create a conforming parking area, the property needs a rezoning to allow a stand-alone lot.

The Central Business District has been developed strengthen the downtown area as the center of business and culture in the western North Carolina region.

The Neighborhood Corridor District was developed to foster medium density mixed-use development. Stand-alone parking lots are not an allowed use in the district.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- The parcel is being taken over by the City of Asheville for management.
- The rezoning would allow uses compatible with the Central Business District which forms the southern end of the property and its identity.
- Use of the property will comply with City regulations and requirements.
- The Central Business District recognizes the need for support services and facilities to enhance the vitality of the downtown area.

The Planning and Zoning Commission at their November 1, 2006, meeting voted to recommend approval of the rezoning request from NCD to CBD. Staff concurs with this recommendation.

Mayor Bellamy closed the public hearing at 10:43 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Mayor Bellamy asked that Councilman Newman, member on the Transportation Advisory Committee, see how we can work with the N.C. Dept. of Transportation on more creative uses of their rights-of-way and vacant land.

Councilwoman Cape moved for the adoption of Ordinance No. 3416, and find that the request is reasonable based on information provided in the staff report. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 164

H. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING DEVELOPMENT AND DESIGN STANDARDS APPLICABILITY

ORDINANCE NO. 3417 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE REGARDING DEVELOPMENT AND DESIGN STANDARDS APPLICABILITY

Mayor Bellamy opened the public hearing at 10:45 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an amendment to the Unified Development Ordinance to clarify standards and codify interpretations concerning the applicability of development and design standards. This public hearing was advertised on November 14 and 21, 2006.

The City of Asheville's Unified Development Ordinance (UDO) currently provides that certain developments must bring the entire site into compliance with the development regulations found in Article XI of the UDO. These regulations have to do with parking, loading, access, landscape and buffering, open space, traffic impact analysis, and sidewalks. The developments enumerated that must bring the entire site into compliance are the following:

- Any new public or private development with the exception of single or two-family housing developments.
- Changes of use to a higher impact use.
- Renovations with a total cost exceeding fifty (50) percent of the appraised (ordinance previously referred to assessed) value of the building according to the Buncombe County tax records.
- Expansions exceeding fifty (50) percent of the pre-expansion gross floor area or paved surface.
- Existing unpaved parking lots that are paved over or existing paved lots that are demolished and repaved.

These provisions concerning applicability, although pertaining to all the standards found in Article XI, are found in the landscape and buffering section of that article making it difficult for developers and citizens to know the particulars concerning applicability. This wording amendment moves the language concerning requirements for full compliance to the beginning of Article XI and makes them consistent for all requirements of this article, except where enumerated. The amendment also adds definitions for "renovation" and "expansion" and "appraised value."

Additionally, it has long been interpreted by the Planning and Development Department that "new development" includes the use of a building or property that has been vacant for a period of more than one hundred and eighty (180) days. This provision is consistent with the provisions concerning nonconforming situations found in the Unified Development Ordinance. The proposed wording amendment codifies this interpretation. The wording amendment also adds provisions for overcoming the presumption of cessation of use (due to vacancy for one hundred and eighty (180) days) through demonstration of substantial good faith efforts to continue the use.

This proposed amendment also clarifies the interpretation that the nonconforming provisions of Section 7-17-7, concerning parking and loading facilities, control when in conflict with Article XI applicability standards.

This amendment has been routed to CAN, CREIA, and CIBO for review and comment. Staff received some questions from one citizen prior to the Planning and Zoning public hearing on this matter. No one commented at the Planning and Zoning Commission meeting on this matter.

Pros:

- Codifies past staff interpretations on issues concerning the applicability of design and development standards.
- Clarifies design and development standards in the ordinance by moving language to a more appropriate code section and by adding definitions.
- Provides interpretation for overcoming the presumption of cessation of use through demonstration of good faith efforts to continue a use.

Cons

- Some may feel that allowing property owners to overcome the presumption of the cessation of use leads to continuation of many nonconforming uses.

At its meeting on November 1, 2006, the Planning and Zoning Commission unanimously (7-0) recommended approval of this wording amendment.

Staff recommends adoption of an ordinance to amend the UDO to clarify standards and codify interpretations concerning the applicability of development and design standards.

270

Mayor Bellamy closed the public hearing at 10:46 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3417. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 168

I. **PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING THE URBAN VILLAGE DISTRICT DEVELOPMENT STANDARDS**

ORDINANCE NO. 3418- ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE REGARDING THE URBAN VILLAGE DISTRICT DEVELOPMENT STANDARDS

Mayor Bellamy opened the public hearing at 10:50 p.m.

Urban Planner Alan Gilnes said that this is the consideration of an amendment to the Unified Development Ordinance regarding the Urban Village District development standards. This public hearing was advertised on November 14 and 21, 2006.

The Urban Village District is written to develop walkable pedestrian oriented mixed-use districts designed around an arrangement of connecting streets. A goal of the district is to encourage a lively pedestrian environment. The wording amendment concerns two areas of the ordinance that deal with setbacks and window openings.

The setbacks generally require that buildings be placed up to 15' from the back of curb. Several special provisions are provided for additional setbacks for things such as outdoor dining areas (25'), institutional uses (75') or multi-family residential buildings (25'), etc. A circumstance has come up during project review concerning topographic challenges and a change in grade across the face of a building. In this instance the buildings are setback up to 40 feet from the back curb and include a retaining wall separating the building from the street. In order to accommodate this fairly common problem of grade change and the use of retaining walls, staff is providing this amendment to the ordinance to provide some practical flexibility.

The proposed amendment to section 7-8-23(8) would allow a building to be setback up to 40 feet from back of curb for topographic reasons subject to the following requirements:

- A pedestrian zone and sidewalk is provided at the back of the curb meeting UV standards and include street trees and other streetscape enhancements;
- The top of the retaining wall (excluding handrails, etc.) does not exceed 5 feet above (or below depending on the specific topographic grade) the sidewalk level;
- The area above (or below) the retaining wall and adjacent to the building includes uses to encourage a lively pedestrian space and shall be considered an active pedestrian level;
- Building frontages facing this active pedestrian level shall meet fenestration requirements as described in the ordinance.
- No more than 50% of the length of the façade of the building is separated from the main sidewalk level with the use of a retaining wall.

The wording amendment to the window and doorways section 7-8-23(11)(c) is designed to provide more flexibility in consideration for fenestration for street-facing facades of buildings. Upon review of other mixed-use type ordinances in the UDC, staff found the most useful language to be the statement "windows, doors and other openings" as read from the Central Business District ordinance. The inclusion of "windows doors and other openings" allows consideration of covered balconies, arcades and other openings in the calculation which complement the goals of a variety of fenestration along the façade of buildings along with the more usual windows and doors. This has worked well in the central business district ordinance and should be useful in the Urban Village District and other mixed-use districts.

For the second floor and above, similar language is proposed.

For the Urban Village section, staff proposes to reduce in the openings requirement from 40% down to 30% of the second and upper story wall surfaces. This will reduce the requirement by 10%. Staff came to this conclusion after reviewing a proposal of the Biltmore Park Town Center Urban Village and determined that the facades met the pedestrian interest goal even though they provided only 30% window openings. This reduction in window openings did not seem to harm the interest in the building facades as viewed from the street and sidewalk level. Staff is also proposing to allow residential-only buildings that are identified on the approved Master Plan to have their ground level openings reduced to 30%.

Pros:

- This amendment seeks to provide some flexibility for situations where topography makes placement of the building at the back of the sidewalk difficult
- This amendment protects the goals of pedestrian orientation and activity of the ordinance by limiting the use of retailing walls to just 50 % of a particular facade.
- The areas separated by the wall and adjacent to the building will be treated as an active pedestrian space and should be designed with that in mind.
- The changes concerning to the windows and doorways section to include the language 'windows, doors, and other openings' has been used successfully in other sections of the code and meets the intent of providing interest to the façade.
- The changes to the openings percentages to upper story windows of building and the allowance for a reduction for residential-only buildings to 30% is expected to provide more design flexibility without harming the vitality of the urban village district.

Cons:

- Separation of the pedestrian from the front of building may lessen the experience and the pedestrian nature of the district.
- Designers and engineers should try to minimize the use of retaining walls to situations where there is no other feasible solution to the topographic issues.
- There is no design criteria established for the retaining walls.

At their meeting in November 1, 2006, the Planning and Zoning Commission to recommend approval of the changes to the urban village district. Staff concurs with this recommendation.

Mayor Bellamy closed the public hearing at 10:54 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 2418. This motion was seconded by Councilman Mumpower and carried unanimously.

272

IV. UNFINISHED BUSINESS:

A. STATUS OF ROCK HILL ROAD SEPTIC SYSTEM

City Engineer Cathy Ball updated Council on the Rock Hill Road Septic System, which was discussed on November 21, 2006.

She said that City staff met on site with Tom Hartye and Ed Bradford with the Metropolitan Sewerage District (MSD) and Ken Castelow and Steven Jones with the Buncombe County Health Department on Thursday, November 16, 2006. Mr. Jones has been the case manager on this issue since September 18, 2006. He received an anonymous call from someone saying that the septic system at 236 Rock Hill Road had failed. Mr. Jones met with Mr. Author Edington on site and determined that the septic system had failed. He issued a permit to Mr. Edington to relocate the septic field to the side yard on this same property. This change means that the sewer from the basement would need to be pumped to the side yard (maybe 3 feet in elevation.) After further research, some of the key facts are as follows:

- Mr. Author Edington does not live at this location. It appears that this is rental property. Mr. and Mrs. Edington live at 129 Graham Lane.
- As stated above, according to the Health Department the septic system can be repaired on the existing property. Mr. Jones with the Health Department has designed and permitted this repair. The Health Department had no issue with stormwater runoff from the road.
- The cost of repairing the septic system is minimal ($7,000) as opposed to extending the public sewer system.
- Programs are available through the Clean Water Management Trust Fund, Mountain Housing Opportunities and EPA. The Clean Water Management Trust Fund and EPA programs are administered through the Land of Sky Council of Governments. These funds are structured as "forgivable" loans.
- Mr. Jones cannot confirm that other septic systems in the area were failing. He is planning to follow up on this matter.

City staff will be glad to assist Mr. Edington with contracting the agencies mentioned above to determine if he is eligible for the "forgivable" loans.

Staff also recommends that the request to extend public sewer to all of the locations listed at the November 21, 2006, worksession be evaluated as part of the annual budget process due to the financial impacts of this decision. Staff will coordinate this evaluation with the MSD.

Mr. Edington, son of the owners, felt that to site the septic tank in the front yard will also cause the system to fail since water drains down Graham Lane, over the curb and into their front yard.

Councilman Mumpower said that even though $7,000 is a lot of money, in all fairness the Edingtons own two homes and they are doing a lot better than a lot of other people. He felt that many people in Asheville have problems with septic tanks and he didn't feel the City is in the position of taking care of everyone's septic tank problems.

Ms. Ball reviewed with Council the drawing from the Health Department which recommended siting the septic tank in the side yard of the same property.

In response to Councilman Mumpower, Ms. Ball said that this is a unique circumstance in that 98% of the City is covered with public sewer system. She didn't think it was unique about replacing the septic tank. The Health Department did not see a concern of stormwater runoff at the new location. However, because of the location of the plumbing in the house, it would require pumping to the septic field.

In response to Councilman Newman, it is Ms. Ball's understanding from the Health Department that if the septic tank is relocated to the side of the house, there is a high degree of probability that it will be successful at least for the life of the tank as long as maintenance is provided.

Upon inquiry of Councilwoman Cape, Ms. Ball said that the City is responsible for maintenance of Rock Hill Road, not Graham Lane, which is a private street. In order to address Councilwoman Cape's concern of keeping water off the property, if so directed, they will review the curb across the Edington drive to make sure it is adequate to keep drainage from going down the drive and make sure it goes into the existing ditch.

Vice-Mayor Jones asked that future discussion take place about how we develop in areas where we know there are these type problems. City Manager Jackson said that we will work with the Health Department as we look at future building permits.

In response to Councilman Davis about this being a stormwater issue, City Manager Jackson said that our Public Works Department went out and cleaned out the culvert that appeared to have some sort of blockage.

It was the consensus of Council to instruct City staff to (1) make minor improvements to the curb to keep drainage from going down the Edingtons drive; and (2) assist Mr. Edington with contracting the agencies mentioned above to determine if he is eligible for the "forgivable" loans.

After a short discussion, it was the consensus of Council to instruct our Planning & Development Director to brief Council on annexation policies regarding sewer systems, and possible options for Council to consider to assist existing and/or future residents that are not on the sewer system. This information will be useful to Council during the budget deliberations.

V. NEW BUSINESS:

VI. OTHER BUSINESS:

Councilman Mumpower unveiled the November Asheville Drug Commission poster.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Heather Raybum urged Council to vote to send a Notice of Violation to Staples for enforcement of the Unified Development Ordinance. Mayor Bellamy stated that a letter has been sent to Staples, with language that this is a City Council concern, inviting them to attend a near certain date Council meeting and be prepared to address the issues raised, e.g., signs, pedestrian amenities to soften the flat wall in some form of green-screening, etc.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 11:31 p.m.

Keisha Lipe
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday – December 12, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Cape gave the invocation.

I. PROCLAMATIONS:

2006 MAYOR BELLAMY STATEMENT

Mayor Bellamy thanked the community for allowing her to serve as Mayor. She thanked City Council for working with her and help move our community forward. Over the past year, City Council has focused on addressing some core basic services, some being, but are not limited to (1) approval of a $2.5 Million budget amendment to address critical capital needs including the Civic Center roof, street and sidewalk construction, public safety communication enhancements and fleet replacement; (2) commenced construction of two new fire stations, improving the City's standard of cover for fire and emergency medical services; (3) graduated 26 officers from two police academies produced in partnership with the City of Asheville and Asheville-Buncombe Technical Community College; current class of 24 cadets is set to graduate in 2007; (4) completed 12 sidewalk projects and 56 street paving projects; (5) implemented service enhancements within the Asheville Transit System including extended evening service hours and a 90-day fare free promotional program which produced a 60% increase in ridership; (6) added five new 30-foot low floor buses to Asheville's transit system which will improve access for elderly and handicapped riders; (7) began implementation of a strategic capital improvement plan for the water system and refinanced approximately $42.0 Million in water revenue bonds for a net present value savings of $2.2 Million; (8) received positive results from the American Waterworks Association QualServe peer assessment of the City's water system (designed to help water utilities achieve superior performance); (9) awarded an $820,000 grant from the N.C. Rural Center for initiatives that further the Wilma Dykeman Riverway Plan; (10) initiated a zoning sturdy of the area covered by the Wilma Dykeman Riverway Plan; proposals for rezoning certain areas will be presented to the Planning & Zoning Commission for consideration in early 2007; (11) continue support of the HUB Project with Council representation on the Community & Economic Development Alliance and staff support on the HUB Cabinet; (12) developed a Downtown Parking Action Plan including a schedule and funding strategy for providing public parking in downtown Asheville; (12) developed plans to construct and open public restrooms in downtown Asheville, construction will commence in early 2007; (13) co-sponsored a community event with Roger Brooks to learn more about Wayfinding opportunities in Asheville, working closely with the Tourism Development Authority and other partners to develop a Request for Qualifications for distribution in early 2007; and (14) continued a successful relationship with the new owners of the Asheville Tourists by partnering on renovations to McCormick Field. This work represents a significant investment in the lives of the people who live, work and play in Asheville. She believed that by working to address essential strategic areas, we will have a better tomorrow.

Mayor Bellamy said that for 2007, she would like to better communication with the community and City Council. After we complete our winter retreat and decide the important issues that we will address as a Council, she will work with staff to schedule the policy discussions for the year - that way as a community and Council we will be better equipped for policy discussions as well as become more involved. Additionally, she looks forward to working with Council in 2007 to (1) develop a Comprehensive Affordable Housing Plan; (2) develop a Comprehensive Plan to address drugs and crime in our community; (3) a Comprehensive Plan to address concerns for our youth in the community; (4) work to make development sustainable; (5) enhancement of our transit system; (6) reduce the number of chronic homeless on our streets; (7) protect our children from internet predators; and (8) many other issues. She committed to the community and Council to focus on people, policies and progress over pride and polarization. She didn't know about tomorrow, but knows who holds tomorrow. It is with that faith that she looks forward to a wonderful and prosperous 2007.

AWARDS

On behalf of the City of Asheville, Mayor Bellamy was honored to present the Gold Award for Municipal Excellence for the Cultural Renaissance Arts Program at the W.C. Reid Center, sponsored by the National League of Cities and CH2M Hill, to Mr. Lavon Griffin and Mr. David Mitchell. Mr. Mitchell thanked the City Council and Parks & Recreation Department staff for their support.

Also on behalf of the City of Asheville, Mayor Bellamy accepted the National League of Cities Award for 50 years of membership and dedicated service in shaping and advocating national municipal policy and helping to strengthen and promote communities of all sizes.

II. CONSENT AGENDA:

At City staff's request, Consent Agenda "F" was removed from the Consent Agenda.

At Council's request, Consent Agenda items "K", "L," "M" and "Q" were removed from the Consent Agenda for discussion and/or separate vote.

At City staff's request, Consent Agenda "R" was removed from the Consent Agenda for a motion to continue.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 28, 2006

B. RESOLUTION NO. 06-209- RESOLUTION AUTHORIZING THE MAYOR TO CONVEY LAND ON STATE STREET

Summary: The consideration of a resolution authorizing the Mayor to convey land on State Street.

On November 28, 2006, City Council authorized advertising for upset bids pursuant to a bid from Steven & Suzanne Williams in the amount of $15,000 for the purchase of land on State Street. The advertisement was published on December 1, 2006, and no upset bids were received.

The land on State Street was acquired by the City by Commissioner's Deed dated June 29, 1932. There are discrepancies in the chain of title and title would have to be conveyed by non-warranty deed. The lot is 0.18 acre± and is parallelogram shaped. It has a moderate slope upward from the street. It is zoned Residential Multi-Family Medium Density District, and it is

suitable as a home site. The bid from Mr. & Mrs. Williams is in the amount of $15,000. Although the tax appraisal is $20,200, staff considers the offer to be realistic considering the impaired title. The Williams bid includes encumbering the property with a sewer easement to service the lot at the rear of the City's lot where the Williams plan to construct 4 to 5 units of infill housing on Pineview Street.

Pros:

1. The sale will be at fair market value as established by the upset bid process.
2. It will return property not needed for public use to the tax rolls.
3. It will transfer responsibility for maintenance to the private sector.
4. It will facilitate the development of 4 to 5 units of infill housing.

Cons: There is no negative impact.

Economic Development staff recommends adoption a resolution authorizing the Mayor to convey land on State Street.

RESOLUTION BOOK NO. 30 – PAGE 158

C. RESOLUTION NO. 06-210 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY LAND ON MARTIN LUTHER KING JR. DRIVE

Summary: The consideration of a resolution authorizing the Mayor to convey land on Martin Luther King Jr. Drive.

On November 28, 2006, City Council authorized advertising for upset bids pursuant to a bid from Elizabeth White for land on Martin Luther King Jr. Drive in the amount of $7,350.00. The advertisement was published on December 1, 2006, and no upset bids were received.

The subject parcel is a proposed 0.08 acre cut-out portion of PIN 9648.07-58-1660 which is a 1.6 acre parcel that runs along Martin Luther King Jr. Drive and is part of the property where Water Maintenance is located. The subject parcel is triangular shaped and has a gentle slope upward from the street. It is zoned Regional Business District as is the adjoining property. The proposed parcel encompasses an area that Ms. White, who owns and resides on adjoining property, fenced in several years ago by mistake and has since used and maintained. The proposed purchase is to rectify the error by paying the City due compensation for the property.

The bid from Ms. White is in the amount of $7,350. The value of the parcel was extrapolated from the tax assessment for adjoining land in the amount of $28,500 for 0.31 acre which translates to a per acre value of $91,935. The bid amount represents .08 of that amount rounded to $7,350. Staff considers the offer to be realistic and the proposal to combine the subject parcel with Ms. White's parcel appropriate.

Pros:

1. The sale will be at fair market value as established by the upset bid process.
2. It will return property not needed for public use to the tax rolls.
3. It will enable the purchaser to rectify an error in a mutually beneficial manner.

Cons: There is no negative impact.

Economic Development staff recommends City Council approve a resolution authorizing the Mayor to convey land on Martin Luther King Jr. Drive.

RESOLUTION BOOK NO. 30 – PAGE 159

D. REPORT ON MILLS RIVER WETLANDS RESTORATION

Summary: Staff was approached by representatives from Henderson County Soil and Water Conservation, Carolina Mountain Land Conservancy, and RiverLink concerning the possibility of establishing a wetlands along part of the City-owned property at the Mills River Water Treatment Plant located in Horseshoe, N.C., along the confluence of the Mills River and French Broad River.

Staff met with representatives who are working through the Wetlands Reserve Program to develop projects with a focus of restoration of wetlands in the Mills River area. A portion of the City-owned property seems to have been a natural wetlands area at some period in the past. The location of the property between both rivers seems to make it a good candidate for wetlands restoration. Staff will be meeting with these representatives to discuss locations of current piping from the river intakes to the treatment plant and any impediments that a restored wetlands area could have on operations at the plant. Soil testing and sampling of the property will need to take place to verify whether the area is suitable for further consideration for wetlands restoration.

PROS:

- The potential benefits to the City are additional protection along the river corridor through environmental efforts and also to reduce the potential of flooding along the intake road area during storm events.
- Grant funds would be pursued for this project with no City or local funds expended.

CONS:

- At this time there does not appear to be any cons for this potential project to proceed.

Staff recommends further analysis of the project through the Wetlands Reserve Program including allowing soil testing and samples to be taken to determine the feasibility of continuing to pursue wetlands restoration for part of the City-owned Mills River property. The City is under no obligation to continue this project after soil testing is completed and any future projects would be contingent on grant funding being obtained. Staff will update Council on the progress of this project in the March 2007 time frame.

It was the consensus of Council to complete further analysis of the project through the Wetlands Reserve Program including allowing soil testing and samples to be taken to determine the feasibility of continuing to pursue wetlands restoration for part of the City-owned Mills River property.

E. ORDINANCE NO. 3419- BUDGET AMENDMENT TO INCREASE THE HEALTH CARE BUDGET TO REFLECT UPDATED FISCAL YEAR 2006-07 REVENUE AND EXPENDITURE PROJECTIONS

Summary: The consideration of a budget amendment to increase the health care budget by $194,000 to reflect updated Fiscal Year 2006-07 revenue and expenditure projections.

During the month of November 2006, the City completed its annual open enrollment period during which time employees were allowed to make changes to their benefit selections for the 2007 calendar year. In preparation for open enrollment, staff completed an analysis of recent revenue and expenditure trends in the health care fund. Using the data from this analysis and the benefit selections made by employees during open enrollment, staff computed an updated estimate of the expected revenues and expenses in the health care program for the remainder of Fiscal Year 2006-07. Based on this analysis, staff is recommending that the employee health

care contribution revenue budget be increased by $194,000. This additional revenue will be used to cover claims expenses which are also expected to exceed the original budget estimates.

PROS:

- Provides a more accurate estimate of expected Fiscal Year 2006-07 revenues and expenditures in the health care program.

CONS:

- None.

City staff recommends City Council approve a budget amendment to increase the health care budget by $194,000 to reflect updated Fiscal Year 2006-07 revenue and expenditure projections.

ORDINANCE BOOK NO. 23 - PAGE 175

F. RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LEASE AGREEMENT WITH ONTARIO INVESTMENTS FOR REPLACEMENT OF MOWING EQUIPMENT AT THE MUNICIPAL GOLF COURSE

This item was removed from consideration at this meeting.

G. RESOLUTION NO. 06-211 - RESOLUTION REAPPOINTING MEMBERS TO THE BOARD OF DIRECTORS OF VICTORIA OF ASHEVILLE INC.

Summary: The terms of Assistant City Manager Jeff Richardson, Chief Financial Officer Ben Durant and City Attorney Bob Oast as members to the Board of Directors of Victoria of Asheville Inc. expired on November 29, 2006. This resolution will reappoint Mr. Richardson, Mr. Durant and Mr. Oast to each serve a three year term respectively, terms to expire November 29, 2009, or until their successors have been appointed.

RESOLUTION BOOK NO. 30 - PAGE

H. STATUS OF ROADWAY IMPROVEMENTS BY TARGET CORPORATION

Summary: In 2003, Target was issued a Certificate of Occupancy. They were required to post a bond in the amount of $350,000 to complete roadway improvements determined to be necessary by the completed traffic study. City staff has subsequently been involved in ongoing efforts to encourage Target to complete the necessary improvements. While progress has been slow, Target now appears to be making good faith efforts to complete the required

Two specific off-site roadway improvements were required to mitigate Target's traffic impact: (1) Installation of a traffic signal at the intersection of River Hills Road and Circuit City/Pier One; and (2) Addition of a second eastbound left-turn lane on Swannanoa River Road at S. Tunnel Road.

1. Traffic Signal

This project has been completed. The traffic signal was activated on November 22 and is fully operational. Several minor punch list items are still to be completed, but this project is 99.9% complete.

2. Turn Lane

Target has agreed to a completion deadline for this project, including all elements required, barring circumstances outside of their control, by May 31, 2007.

280

If Council wishes to impose a deadline for completion of the improvements, staff recommends May 31, 2007.

It was the consensus of City Council to impose a deadline of May 31, 2007, for the completion of the Target improvements.

I. **ORDINANCE NO. 3420- BUDGET AMENDMENT FOR STATE OF N.C. DEPT. OF HEALTH & HUMAN SERVICES APPROPRIATION OF FUNDS FOR THE HARVEST HOUSE**

Summary: The consideration of a budget amendment, in the amount of $15,368, for an appropriation from the State of North Carolina, Department of Health and Human Services, Division on Aging and the Land of Sky Regional Council/Area Agency on Aging through the Senior Center General Purpose Funding for the Harvest House.

Funds will be used to make improvements to Harvest House including new HVAC, repair gutters and renovate restroom.

Pros:
- Replace old HVAC system in lower level of center that is inadequate in heating and cooling that area of the center.
- Improve gutters to alleviate water leaks into building and to prevent future damage.
- Renovate restroom to improve accessibility and overall use.

Cons:
- None

The Parks and Recreation Department recommends City Council to approve the budget amendment, in the amount of $15,368, to establish a budget for improvement at the Harvest House.

ORDINANCE BOOK NO. 23 – PAGE 177

J. **ORDINANCE NO. 3421- BUDGET AMENDMENT FOR THE STATE OF N.C. DEPT. OF HEALTH & HUMAN SERVICES APPROPRIATION FOR FUNDS FOR THE SENIOR OPPORTUNITY CENTER**

Summary: The consideration of a budget amendment, in the amount of $15,367, for an appropriation from the State of North Carolina, Department of Health and Human Services, Division on Aging and the Land of Sky Regional Council/Area Agency on Aging through the Senior Center General Purpose Funding for Senior Opportunity Center.

Funds will be used to make improvements to the Senior Opportunity Center to create a new main front entrance into the center.

Pros:
- Renovate the main front entrance of the center making it fully accessible and improve overall use.

Cons:
- None

The Parks and Recreation Department recommends City Council to approve the budget amendment, in the amount of $15,367, to establish a budget for improvement at the Senior Opportunity Center.

ORDINANCE BOOK NO. 23 - PAGE 179

K. RESOLUTION SUPPORTING THE N.C. STATE UNIVERSITY WATER QUALITY GROUP'S EFFORTS TO OBTAIN A RESEARCH AND MONITORING GRANT FOR THE INSTALLATION OF A GREEN ROOF AT THE CIVIC CENTER

This item was removed from the Consent Agenda for discussion and/or a separate vote.

L. RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH MOTOROLA INC. FOR THE PURCHASE OF RADIOS FOR THE ASHEVILLE TRANSIT SYSTEM

This item was removed from the Consent Agenda for discussion and/or a separate vote.

M. BUDGET AMENDMENT TO PURCHASE UPDATED RADIOS FOR THE ASHEVILLE TRANSIT SYSTEM

This item was removed from the Consent Agenda for discussion and/or a separate vote.

N. RESOLUTION NO. 06-214- RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS UNDER THE N.C. OFFICE OF JUSTICE PROGRAMS OF THE DEPT. OF JUSTICE

Summary: The consideration of a resolution authorizing the City Manager to accept grant funds under the North Carolina Office of Justice Programs of The Department of Justice (JAG); and the associated budget amendment, in the amount of $99,967, to accept these funds.

The City of Asheville has been awarded a grant from the JAG in the amount of $99,967 to be shared with Buncombe County Sheriff's Department. Asheville Police Department (APD) and the Buncombe County Sheriff's Department have signed a Memorandum of Understanding and APD will be the grant funds administering agency. There is no local match and the City Of Asheville's portion of the grant is $59,980. The purpose of the grant program is to improve the police equipment in the area of crowd control and officer safety for the Asheville Police Department. The amount of the Asheville Police Departments of the grant funds will be equal to $59,980.00

45	Taser X26E units (w/holsters)	Each: $799.95	Total: $35,997.75
120	Taser replacement cartridges	Each: $18.97	Total: $ 2276.40
1	Package Appliqués for helmets	Each: $155.00	Total: $ 155.00
50	Eyeglass prescription inserts	Each: $70.00	Total: $ 3,500.00
35	V-Top shin guards	Each: $85.00	Total: $ 2,975.00
35	Torso Protectors	Each: $350.00	Total: $12,250.00
2	Pepper Ball Projectors	Each: $400.00	Total: $ 800.00
2	40 MM Gas Projectile Units	Each: $250.00	Total: $ 500.00
4	Training chemical certification	Each: $250.00	Total: $ 1,000.00
	Estimated Freight		Total: $ 1,000.00
		Grand Total:	$60,454.15

Pros:

- Will contribute to the reduction of crime by improving the effectiveness of police officers while working special events.
- By reducing injures to law enforcement as well as the public, this will aid in quality of life issues.
- Officer safety will be increased through proper training of the officers.

- By using these grant funds for this needed equipment, APD officers will have the items they need to properly respond to violent group incidents, that budget constraints would not allow otherwise.

Con:

- The City of Asheville and the APD would be required to maintain the upkeep of the equipment, replacing equipment when needed.

This action complies with City Council's Strategic Operating Plan Goal 3: Strong City and County Partnerships. This joint grant allows the City and the County to work together on an improvement initiative.

City staff recommends City Council adopt a resolution authorizing the City Manager to accept grant funds under the North Carolina Office of Justice Programs of The Department of Justice (JAG; and the associated budget amendment, in the amount of $99,967, to accept these funds.

RESOLUTION BOOK NO. 30 – PAGE 163

O. ORDINANCE NO. 3423- BUDGET AMENDMENT TO ACCEPT GRANT FUNDS FROM THE N.C. OFFICE OF JUSTICE PROGRAMS OF THE DEPT. OF JUSTICE TO ASSIST THE ASHEVILLE POLICE DEPARTMENT IN THE PURCHASE OF CROWD CONTROL EQUIPMENT

Summary: See Consent Agenda "N" above.

ORDINANCE BOOK NO. 23 – PAGE 183

P. RESOLUTION NO. 06-215- RESOLUTION AMENDING RESOLUTION NO. 06-171 TO AMEND THE MEMBERSHIP STRUCTURE OF THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT

Summary: The City Council has the authority, pursuant to NCGS 160A-146, to make changes to advisory boards and commissions. City Council has determined it is in the public interest to change the membership of Sustainable Advisory Committee on Energy & the Environment to change the membership from one member with demonstrated expertise in the field of energy management, to one member currently employed with Progress Energy.

Therefore Resolution No. 06-171 be, and is hereby amended to change Sec. I.A. *Membership* to read as follows:

"A. One member currently employed with Progress Energy as the Regional Vice President (or other appropriate official) or his/her designee;"

RESOLUTION BOOK NO. 30 – PAGE 164

Q. SECOND READING OF ORDINANCE NO. 3412, AN ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR "HOMESTAYS" (CURRENTLY KNOWN AS "BED AND BREAKFAST HOMESTAYS") IN SINGLE FAMILY RESIDENTIAL ZONING DISTRICTS

Summary: This item was removed from the Consent Agenda for an individual vote.

R. **SECOND READING OF ORDINANCE NO. 3413, AN ORDINANCE TO CREATE AN HISTORIC PRESERVATION OVERLY DISTRICT FOR THE ST. DUNSTAN'S NEIGHBORHOOD**

Summary: This item was removed from the Consent Agenda for a motion to continue.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES AND/OR DISCUSSION

RESOLUTION NO. 06-213- RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH MOTOROLA INC. FOR THE PURCHASE OF RADIOS FOR THE ASHEVILLE TRANSIT SYSTEM

ORDINANCE NO. 3422 - BUDGET AMENDMENT TO PURCHASE UPDATED RADIOS FOR THE ASHEVILLE TRANSIT SYSTEM

Summary: The consideration of a resolution authorizing the City Manager to execute an agreement with Motorola Inc. for the purchase of radios, and the associated budget amendment, in the amount of $115,000, to purchase updated radios for the Asheville Transit System (ATS).

The Asheville Transit System depends on the City's radio system for its communications. That system has recently been updated to provide better coverage. Further, the current transit system radios are 10 years old and replacement parts are no longer available for these radios. The Asheville Transit System needs to replace 23 radios at a total cost of $115,000. Federal capital funding of $92,000 is available to cover 80% of this expense. The remaining 20% or $23,000 will be funded with motor vehicle license fee revenue that was set aside in prior years as a matching source for capital projects. Motorola has offered a $7,900 discount on these radios if ordered by December 15, 2006. This discount is occasioned by a year end inventory reduction on the part of Motorola. Federal funds are available to fund this purchase, and matching funds are already accumulated. The opportunity to save $7,900 has accelerated the purchase schedule.

This action complies with the City Council Strategic Plan through Goal 2, Objective A, Task #2: Leverage outside funding to achieve multiple Transportation goals where possible.

Pros:

- A fully functional communications system between elements of transit operations, police, emergency medical help, and any other city department.
- ATS will be able to communicate between buses with equipment which should be current for next ten years.

Con: None

City staff recommends City Council approve a resolution authorizing the City Manager to execute an agreement with Motorola Inc. for the purchase of radios, and approve the associated budget amendment, in the amount of $115,000, to purchase updated radios for the Asheville Transit System.

Manager of Transit and Parking Services Bruce Black responded to various questions/comments from Council, some being, but are not limited to: what is the regular replacement schedule for the radios; what other capital items can we use these federal funds for; will the radios enhance our ability to track buses in real time; and is it counter productive to buy the radios at this time if we go to a GPS tracking system.

Councilman Mumpower moved to approve Resolution No. 06-213. This motion was seconded by Councilman Freeborn and carried unanimously.

Councilman Mumpower moved to approve Ordinance No. 3422. This motion was seconded by Councilman Freeborn and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 162

ORDINANCE BOOK NO. 23 - PAGE 191

RESOLUTION NO. 06-212- RESOLUTION SUPPORTING THE N.C. STATE UNIVERSITY WATER QUALITY GROUP'S EFFORTS TO OBTAIN A RESEARCH AND MONITORING GRANT FOR THE INSTALLATION OF A GREEN ROOF AT THE CIVIC CENTER

Summary: The consideration of a resolution supporting North Carolina State University Water Quality Group's efforts to obtain a Research and Monitoring Grant for the installation of a green roof at the Civic Center.

The City of Asheville is in the process preparing a Request for Proposals to provide construction documents for replacing the Civic Center Roof. One of the options being explored is replacing the existing roof with an environmentally sensitive "green" roof.

The North Carolina State University Water Quality Group is prepared to request a grant from North Carolina Department of Water Quality for a Research and Monitoring grant for the installation of the green roof.

This resolution supports their efforts to obtain this grant on behalf of the City. This resolution does not commit the City to any financial obligation.

Pros:

- If the grant is awarded it will assist in the cost of the installation of the environmentally friendly roof.
- There is no cost or commitment to the City.
- The grant would assist in education the public on the installation of the green roof system.

Con: There is no negative impact.

City staff recommends City Council approve a resolution supporting North Carolina State University Water Quality Group's efforts to obtain a Research and Monitoring Grant for the installation of a green roof at the Civic Center.

Councilman Mumpower said that the people who originally installed the roof (Carlyle and Company) happen to be people that have the state of the art process for creating a green roof right now and we essentially know what we can do already. He felt we didn't need to spend any money to address something that has already been addressed.

There was a brief discussion about the timing of this grant opportunity vs. the timing of receiving proposals back to the City.

Councilman Davis questioned if the City would be put in a negative light if the City received the grant and then decided not to do a green roof and turn the grant down. Mr. John Calabria, from the N.C. State University Water Quality Group, did think that if the City received the grant and then turned it down, it would have negative consequences from this grant source. He did state that the grant cycle is at the end of the year and is site specific. City Engineer Cathy Ball also responded that the City could apply for the grant now and then if Council determines not to build a green roof, the City could advise the grant agency of that before any award is granted, and hopefully the City's credibility might not be hurt.

Mayor Bellamy asked if a green roof was installed would the Water Quality Group be able to conduct their research and monitoring. Mr. Calabria said that they would prefer to be involved in the front end because it would be difficult to set up the monitoring strategy after the roof is already placed and there are a lot of things that would be hard to retrofit.

Councilman Freeborn moved for the adoption of Resolution No. 06-212. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 161

SECOND READING OF ORDINANCE NO. 3412, AN ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR "HOMESTAYS" (CURRENTLY KNOWN AS "BED AND BREAKFAST HOMESTAYS") IN SINGLE FAMILY RESIDENTIAL ZONING DISTRICTS

Mayor Bellamy said that the public hearing on this matter was held on November 28, 2006, and because the ordinance failed to reach the 2/3 vote of the full Council, the matter needed to be brought back for a second vote.

Councilman Davis could not be supportive of this amendment in that he feels it was crafted as an effort to work around the reasons why a bed & breakfast was denied on Edwin Place about a year ago.

Councilman Mumpower said that we are talking about a regulated activity when there are all kinds of things that can go on in someone's home that we have no way of regulating at all.

After a brief discussion about signage in order to identify the homestay in the neighborhood, the majority of Council instructed Planning staff to (1) research the options of allowing some type of discreet signage that would identify the facility; and (2) devise a way for people who are interested in opening up a homestay to be able to find out if they would qualify regarding the spacing requirements.

Councilwoman Cape moved for the adoption of the second reading of Ordinance No. 3412. This motion was seconded by Councilman Mumpower and carried on a 4-3 vote, with Mayor Bellamy, Councilman Freeborn, and Councilman Davis voting "no."

ORDINANCE NO. 23 - PAGE 149

SECOND READING OF ORDINANCE NO. 3413, AN ORDINANCE TO CREATE AN HISTORIC PRESERVATION OVERLY DISTRICT FOR THE ST. DUNSTAN'S NEIGHBORHOOD

Mayor Bellamy said that the public hearing on this matter was held on November 28, 2006, and because the ordinance failed to reach the 2/3 vote of the full Council, the matter needed to be brought back for a second vote.

At staff's request, Vice-Mayor Jones moved to continue the second reading of Ordinance No. 3413 to January 9, 2007. This motion was seconded by Councilwoman Cape and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED AT 138 SPRINGSIDE ROAD FROM INSTITUTION DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/ CONDITIONAL ZONING FOR THE DEVELOPMENT OF A SENIOR HOUSING RENTAL COMMUNITY

ORDINANCE NO. 3424- ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 138 SPRINGSIDE ROAD FROM INSTITUTION DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/ CONDITIONAL ZONING FOR THE DEVELOPMENT OF A SENIOR HOUSING RENTAL COMMUNITY

Mayor Bellamy opened the public hearing at 6:15 p.m.

Urban Planner Kim Hamel said that this is the consideration of an ordinance to conditionally zone property located at 138 Springside Road from Institutional District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for the development of a senior housing rental community. This public hearing was advertised on December 1 and 8, 2006.

The project is supported by numerous goals and strategies in the plan relating to infill development, smart growth policies and affordable housing. The project utilizes "new zoning tools" (Conditional Zoning and Density Bonus incentive) to create a sustainable high-density residential development within the City Limits. Although, transit service is not currently available on Springside Drive, the site is located within one mile of transit service along Hendersonville Road. The development also proposes a drop-off area that can be utilized for an independent shuttle service.

This project will make a significant contribution to meeting the needs for affordable rental housing outlined in the Consolidated Strategic Housing and Community Development Plan 2005-2010. All units within this development will be affordable for households with less than 60% area median income and some will be affordable to households with as little as 30% area median income. Affordability will be assured for 30 years under the terms of the federal and state Low Income Housing Tax Credit programs.

The project site is located within the City limits just off of Springside Road. Two single-family residences, one vacant and one occupied, currently exist on the site. Properties surrounding the property include: Buncombe County Schools, specifically TC Roberson, zoned Institutional to the south and west; a high density multi-family apartment complex, zoned Institutional to the east; single family dwellings zoned RS-4 and RM-6, and Cedar Forest Condominiums, zoned RM-6 to the north.

In February 2006, the Asheville City Council approved a Conditional Zoning request from Institutional District to RM-16 Residential Multi-Family High Density District/Conditional Zoning with a 200% density bonus for the construction of an 84-unit senior housing development on this

site. The project was granted approval for local trust fund monies and also applied for federal housing tax credits but was denied. The developer or designated appointee is seeking to reapply for the federal housing tax credits in the coming year proposing essentially the same project only with a decrease in the total number of units.

The proposed changes to the project include the following:

- Previous application was approved for 84 units a density of approximately 28 units/acre. The current application proposes a reduction of 21 units for a total of 63 units, a density of approximately 21 units/acre;
- Reduced number of stories from 4 stories to 3 stories in height;
- A reduction in the number of parking spaces from 70 to 64 spaces;
- An increase in the overall open space provided for the project and the addition of a bio-retention rain garden that will assist with mitigating stormwater run-off, and serve as an amenity to the project.
- A reduction in the amount of density bonus approved from 200% to 125%. The project amenities, affordable housing rates, building design and enhanced landscaping features proposed on the original application are still applicable to this project qualifying it for the density bonus provision.

The building is proposed at 3 stories at a maximum height of 40-feet and will consist of 37 one-bedroom apartments, and 26 two-bedroom apartments. (All units are to be leased at a rate below the City's maximum affordable rental rate.) The building is oriented towards the street with pedestrian connections to the proposed sidewalk along Springside Road and to the proposed walking trail provided as an amenity to the residents. A 64-space parking lot and required bicycle parking is located behind the building towards the rear of the lot. Landscape buffers, parking lot landscaping and open space is being provided to meet the City's standards.

The building elevation illustrates traditional design with exterior features reminiscent of arts and crafts style architecture. Details include: an open porch area, gabled rooflines with moderate to deep overhangs, changes in building materials between floors, and double-hung windows. The exterior building materials and colors shown on the elevation (brick veneer and vinyl siding) may be enhanced to include stonework detailing in place of brick materials.

Based on the proposed plans and elevations provided by the applicant, staff feels that the project qualifies for the requested 125% density bonus by providing an exceptional development through:

- Affordable housing: <u>all</u> units within the development are proposed at a rate *below* the City's maximum affordable rental rate, meeting the needs of those (specifically seniors) with a household income of less than 60% of median income.
- Higher quality building design (see elevation details above)
- Enhanced landscaping: additional landscape materials and an increase in the size of plant materials above the City's Standard requirement will be provided.
- Project amenities: walking trails, benches, garden area with gazebo

On Monday, October 2, 2006, the Technical Review Committee (TRC) reviewed the proposed master plan and recommended approval of the project subject to the conditions outlined in the staff report. These conditions will be addressed upon submittal of detailed site plans to TRC.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use

permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements once the conditions enumerated by the Technical Review Committee are met. The project must meet the technical standards set forth in the UDO, the City Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The project site consists of two single-family dwellings that will be demolished in order to construct the proposed development. The property in its current state is relatively flat, grading of the site and removal of existing vegetation will be necessary in order to meet the stormwater and erosion control requirements and overall development of the site, as proposed.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The proposed development is reasonably compatible with the surrounding uses and is not expected to injure the value of adjoining or abutting property.

   The building is to be designed with enhanced architectural features and is likely to have a positive affect on adjoining and abutting properties. In addition, landscape buffers are proposed around the perimeter of the site, which will assist in mitigating any negative impacts the development may have on the surrounding area.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** Although the proposed development is (to a degree) larger in scale and greater in density than the existing development in the area, the project proposed is no larger than what would be allowed under the current Institutional zoning. The proposed use appears to be reasonably compatible with the other uses surrounding the site and with the established zoning in the area. (A rezoning to RM-16 is considered a "down-zoning" from Institutional district.)

   Additionally, the building is to be designed with enhanced architectural features that are likely to contribute to the character of the neighborhood. Landscape buffers are proposed around the perimeter of the site, which will assist in mitigating any negative impacts the development may have on the surrounding area.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The project is supported by numerous goals and strategies in the plan relating to infill development, smart growth policies and affordable housing. The project utilizes "new zoning tools" (Conditional Zoning and Density Bonus incentive) to create a sustainable high-density residential development within the City Limits. Although, transit service is not currently available on Springside Drive, the site is located within 1 mile of transit service along Hendersonville

Road. The development also proposes a drop-off area that can be utilized for an independent shuttle service.

This project will make a significant contribution to meeting the needs for affordable rental housing outlined in the Consolidated Strategic Housing and Community Development Plan 2005-2010. All units within this development will be affordable for households with less than 60% area median income and some will be affordable to households with as little as 30% area median income. Affordability will be assured for 30 years under the terms of the federal and state Low Income Housing Tax Credit programs.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** Development on the site will require final technical approval from all applicable departments including representatives of the Water Resources, MSD, Engineering, Fire and Building Safety Departments. The conceptual plans for the development have been reviewed by the City's Technical Review Committee, which found that adequate services and facilities are available for the proposed development.

   While transit service is not currently provided on Springside Road, the site is located within a mile of several bus stops along Hendersonville Road. The development also proposes a drop-off area that can be utilized by an independent shuttle service.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The City's Traffic Engineer has reviewed the proposal and determined that the project will not create any traffic issues.

Based on the information contained in this report, staff finds that the applicant's request is reasonable.

On Wednesday, November 1, 2006, the Asheville Planning and Zoning Commission reviewed the request and voted unanimously to approve the project subject to the conditions outlined in the staff report.

Considerations:

- This project utilizes Conditional Zoning and the density bonus provision in order to provide an exceptional development project through affordable housing, enhanced site and building design, and project amenities.
- To date staff has not received any negative comments or opposition to this project.
- The project makes a significant contribution to meeting the need for affordable rental housing in the City of Asheville.
- The project supports numerous goals and strategies outlined in the City's 2025 plan as it relates to smart growth, infill and sustainable development.
- The project provides an opportunity for infill residential development on property that is currently under-utilized.
- The revised application produces a building that is more in scale with other buildings currently found in the immediate area.
- City transit does not currently provide service along Springside Road.

Mr. Gerald Green, representing Shelter Development, spoke in support of this project in that it will provide senior housing in Asheville. He said that the neighboring Library and High School are also amenities for the senior citizens in that the High School JROTC would like to be involved in providing programs for residents of this housing development. He felt this development will be an asset to the community.

Mayor Bellamy closed the public hearing at 6:21 p.m.

When Vice-Mayor Jones asked why the NC Financing Agency would want to reduce the number of affordable units, Mr. Darryl Jones, representing Shelter Development, said that it had to do with the scoring by the State.

Councilman Mumpower supported affordable housing for seniors, but if we are going to subsidize something with taxpayer dollars, he felt we have the responsibility to be careful with those dollars and beauty shops and other amenities to him represent excess.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3424, to conditionally zone property located at 138 Springside Road from Institutional District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for the development of a senior housing rental community, subject to the condition that all TRC conditions are met. This motion was seconded by Councilman Freeborn and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 - PAGE 115

B. PUBLIC HEARING TO CONSIDER APPLYING THE MANUFACTURED HOUSING OVERLAY ZONING TO 24 LOTS CURRENTLY ZONED RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT LOCATED ON CASE ROAD, FAITH ROAD, ALBANY GRAY ROAD AND CHARLIE ARTHUR ROAD

ORDINANCE NO. 3425- ORDINANCE TO APPLY THE MANUFACTURED HOUSING OVERLAY ZONING TO 24 LOTS CURRENTLY ZONED RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT LOCATED ON CASE ROAD, FAITH ROAD, ALBANY GRAY ROAD AND CHARLIE ARTHUR ROAD

Mayor Bellamy opened the public hearing at 6:25 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to apply the Manufactured Housing Overlay Zoning to 24 lots currently zoned RM-8 Residential Multi-Family Medium Density District located on Case Road, Faith Road, Albany Gray Road and Charlie Arthur Road. This public hearing was advertised on December 1 and 8, 2006.

Mr. Shuford said that the Asheville City Development Plan 2025 (ACDP) does not directly address the subject of manufactured homes except to note that more than 50% of new homes in Buncombe County outside of Asheville are mobile homes. It goes on to say that on rented land, the owners are effectively tenants with little security while the value of the units depreciate over time. The ACDP also, however, describes in significant detail the pressing problem of providing affordable housing and draws a correlation between affordable housing and economic development. While manufactured (or mobile) homes may not be an appreciating investment or provide the most security for our citizens, they do provide an affordable form of housing. The MH-Overlay allows for this affordable housing with the opportunity for land ownership.

These lots and other areas were brought into the City of Asheville's extra-territorial jurisdiction (ETJ) in 2001; notes from public meetings at that time indicate that residents from

other affected areas in vicinity of Sardis Road and the east side of Brevard Road (Possum Trot) expressed a desire to retain the ability to establish manufactured housing, however, there appears to have been no such request from the residents of the subject area. The initial zoning in 2001applied the RM-8 Residential Multi-Family, Medium Density District zoning which best reflects the residential uses and existing density; it can be speculated that the lack of interest from the public is the likely reason for the omission of the Manufactured Housing Overlay at that time.

A recent citizen request prompted staff to perform a field survey of the subject area for the additional application of an overlay that would allow for manufactured homes, not normally permitted in the RM-8 zoning district. Staff discovered that of the 24 lots identified in this report, 21 were occupied. Of the 21 occupied lots, 13 (or approximately 62%) contained one or more manufactured homes. Additionally, manufactured homes were found to be scattered in less developed areas directly around this community and appear to be a relatively common form of housing.

Without the manufactured housing overlay, additional manufactured homes could not be established on the existing lots thereby limiting housing choices to either modular or traditional stick-built homes. The Manufactured Housing Overlay was established to expand the range of housing opportunities available to the residents of Asheville while assuring that the manufactured housing is compatible with the existing homes in the area. The Overlay establishes standards for the individual manufactured homes while also establishing a procedure for identifying areas where the overlay may be applied. The individual standards for manufactured homes are dictated by those established by the Department of Housing and Urban Development and must also meet all applicable state building codes. Evaluation of a new manufactured home's ability to comply with those standards are evaluated on an individual basis through the review procedure established for single family home permits; responsibility for issuing all site and building permits for properties located within the City's ETJ was assumed beginning in July of this year. This analysis focused on those standards established for identifying areas appropriate for the Manufactured Housing Overlay and are as follows:

1. ***Manufactured homes located on individual lots and meeting the development standards set for in subsection 7-9-5(c) above would be architecturally compatible with the existing site-built homes in the area.***
   There appear to be approximately six site-built homes in the area that are compatible with the majority of the manufactured homes in size, height, orientation, and materials.

2. ***Manufactured homes should be located in the area prior to its designation as a manufactured housing district and should comprise at least 20 percent of the homes in the area.***
   The existing manufactured homes in the subject area comprise approximately 62% of the residential structures.

3. ***Vacant land should be available upon which to locate manufactured homes.***
   Some vacant land is available upon where new manufactured homes could be located. Additionally, under the existing RM-8 zoning, a number of lots in the study area are large enough to support additional units.

4. ***The area should be a minimum of five acres.***
   The total acreage included in the study area is 17.53 acres.

In summary, staff research and field investigations supports the application of the Manufactured Housing Overlay zoning to the 24 properties identified in this report.

On November 16, 2006, the Planning & Zoning Commission reviewed this request and voted (5-0; 2 commissioners absent) to approve the zoning overlay. There were a number of residents in support of the zoning overlay, none opposed.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Application of the Manufactured Housing Overlay does not prohibit the addition of modular or site-built homes.
- The Manufactured Housing Overlay provides additional housing opportunities not currently available.
- A significant number of lots are large enough to support more than one residential unit.

Cons:

- Road infrastructure is not built to City of Asheville standards.
- The creation of additional lots by subdivision, without extending public infrastructure, is extremely limited.

Staff recommends approval of this request. The Council may choose to reduce the area but may not increase it without additional advertising.

Ms. Lucinda Jordon, property owner on Case Road, spoke in support of the Manufactured Housing Overlay.

Mayor Bellamy closed the public hearing at 6:28 p.m.

Councilwoman Cape said that manufactured homes are affordable housing for many people in our community. In addition, more and more manufactured homes are made energy efficient that will really provide a level of affordability long term and there are a lot of moves in this country to look at mobile home communities.

Councilman Mumpower appreciated the City demonstrating some flexibility because mobile homes do represent affordable housing. He wondered if it might be good to look at other opportunities for us to create additional possibilities for this affordable housing resource at Council's retreat.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3425, to approve the zoning map amendment to include the addition of the Manufactured Housing Overlay zoning as noted in the Exhibit A zoning map attached to the ordinance; and find that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 189

C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON DAVENPORT ROAD AND IDENTIFIED AS DAVENPORT SUBDIVISION PROJECT, FOR A PROPOSED 16-LOT SUBDIVISION

ORDINANCE NO. 3426- ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON DAVENPORT ROAD AND IDENTIFIED AS DAVENPORT SUBDIVISION PROJECT, FOR A PROPOSED 16-LOT SUBDIVISION

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:31 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Nathan Pennington submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Pennington said that this is the consideration of the issuance of a conditional use permit for property located on Davenport Road, and identified as Davenport Subdivision Project, for a proposed 16-lot subdivision.

This review concerns a proposed 16 lot major subdivision with a development standard bonus for a reduction in lot size, width, setbacks and modifications to road and sidewalk design. Pursuant to Section 7-16-2(b)(17) of the Unified Development Ordinance (UDO), development standard bonuses for residential zoning districts are reviewed as a conditional use.

The subject site is located in west Asheville, within the City of Asheville's corporate limits, at 149 Davenport Rd. The subject site consists of two parcels comprising approximately 2.83 acres in area (Attachment to City Exhibit 3 - Aerial Map). Both lots are zoned RS-8 Residential Single-Family High Density District.

The subject site is bounded to the north by single and multi-family residences and Davenport Road zoned RS-8, to the east by a single-family residence and West Asheville Park zoned RS-8, to the south by the park and a single-family residence zoned RS-8, and to the west by a church, vacant land and single-family residences zoned RM-8 and RS-8.

The RS-8 zoning district was created to establish a high density per acre for single-family dwellings where public infrastructure is sufficient to support such development and to stabilize and protect the district's residential character in areas of existing high density single-family development while promoting a suitable environment for single-family living.

At their November 20, 2006, meeting the Technical Review Committee (TRC) approved this project subject to the conditions in the staff report.

Section 7-16-2(d)(17)(c) provides that in order to promote exceptional development projects, the City Council may permit the alteration of development standards for projects that

exhibit exceptional site and/or structure design that is appropriate to the architectural and/or environmental context of the surrounding neighborhood. The applicant must meet a minimum of three items as listed on the "Exceptional Development" Checklist. The applicant has chosen to meet this requirement by incorporating the following four standards into the project design: Significant use of green building techniques, enhanced stormwater management, environmentally sensitive design to preserve existing vegetation and pedestrian orientation and amenities (Attachment to City Exhibit 3 - Site Plan).

Staff has received 4-5 communications from property owners concerned that the proposed development will create increased traffic, add to Davenport Road being used as a 'cut-through' to other roads in the vicinity and worsen safety concerns for pedestrians.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case pursuant to Section 7-16-2(c) of the UDO. Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   This has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The area of the property to be developed has previously been disturbed by past grading and development. No stark topographical changes exist on the property. Rhododendron Creek running through the western portion of the property will remain undisturbed and improved for a future greenway connection. The proposed project is thus compatible with the topography and natural features.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   Staff feels that the proposed project would have no discernible effect on surrounding property values.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The proposed development would mesh with other single-family residences, and would thus be in harmony with the neighboring area.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The application of exceptional development standards and the incorporation of a greenway easement mesh with the spirit and smart growth policies as described in both the Asheville Development Plan 2025 and the Strategic Operating Plan.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The development will gain access from Davenport Road which is a city maintained street. In addition, technical review from other departments has not revealed any problems for providing an urban level of service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Project will require modifications to site development standards including reductions in lot size, width, setbacks, road construction and sidewalk design.
- The development will incorporate exceptional development standards into the design.
- A greenway connection is being provided along Rhododendron Creek adjacent to the West Asheville Park.
- High density infill development and stormwater best management practices would further the goals and objectives of the comprehensive and strategic operating plan.

Staff recommends approval of the proposed project and Conditional Use Permit subject to the conditions in the City Council and TRC staff reports. Additionally, staff recommends approval to the development standard modifications listed above.

Mr. David Tuch, Land Planner with Equinox Environmental Consultation & Design Inc., explained how the Davenport site provides infill development; meets City's smart growth goals; creates a healthy housing project; and complies with the City's comprehensive Plan. He said the exceptional development checklist requires 3 items, but the following four items are being provided: (1) green building techniques (Applicant Exhibit 2) - (a) passive solar design; (b) efficient framing techniques; (c) construction waste reduction; (d) compact and tightly sealed construction; and (e) low or non-toxic finishes; (2) stormwater management - (a) narrow roads to reduce imprevious surfaces; (b) porous pavers; (c) bio-swale; and (d) bio-retention area; (3) preservation of existing vegetation - (a) preservation of hardwood forest; (b) preservation of riparian buffers; and (c) stream protection; and (4) pedestrian oriented amenities - (a) 30-foot greenway easement; (b) road design to promote pedestrian safety; and (c) the "Woonerf" (Street for Living). He reviewed the preliminary master plan and showed the architecture of the homes. He explained their request for a modification to the sidewalk requirement since (1) the square is oriented for the pedestrian; (2) it is a difficult site location; and (3) they are proposing a stamped concrete crosswalk makes a better connection. Another modification request is for the one-way road to be 14-feet instead of the required 16-feet. He explained that is not a fire code issue; 16-feet width would encourage two-way traffic; a modification would reduce construction impact; and there are numerous examples of one-way streets in Ashevile that are 14-feet or less. In addition, he said that there was a staff recommendation that a greenway connection be built from the development to the proposed greenway easement. Regarding that, he said that they are providing a greenway easement and the timeline for greenway construction unknown and will give potential buyers the impression that construction is not finished (Applicant Exhibit 1)

Mr. Jody Goukas, developer, spoke in support of the conditional use permit.

After rebuttal, Mayor Bellamy closed the public hearing at 6:42 p.m.

There was a brief discussion about the modification requests, with Assistant City Manager Jeff Richardson stating that staff has no concerns with the modification requests.

Councilwoman Cape suggested staff review the adopted Greenway Master Plan to see if property is developed on those lots in the greenway area if it is required that an easement must be granted.

Regarding the "T" turnaround for fire trucks, Councilwoman Cape pointed out a possible secondary "T" turnaround on the site plan.

Councilman Mumpower moved for the adoption of Ordinance No. 3426, approving the Conditional Use Permit adopting the proposed master plan, with the requested modifications to lot size, width, setbacks, road construction and sidewalk design for the Davenport Subdivision subject to (1) the conditions recommended by City staff; (2) The project shall comply with all conditions outlined in the TRC staff report; (3) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (4) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (5) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Deviation from these plans may require reconsideration; and (6) At the direction of the Planning Director, this Project may be required to be reviewed by the TRC prior to issuance of any building or grading permits. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 192

D. PUBLIC HEARING TO CONSIDER A PROPOSED AMENDMENT TO THE 2006 CONSOLIDATED STRATEGIC PLAN TO DESIGNATE WEST RIVERSIDE WEED AND SEED AREA AS A COMMUNITY DEVELOPMENT BLOCK GRANT NEIGHBORHOOD REVITALIZATION STRATEGY AREA

RESOLUTION NO. 06-216 - RESOLUTION TO AMEND THE 2006 CONSOLIDATED STRATEGIC PLAN TO DESIGNATE WEST RIVERSIDE WEED AND SEED AREA AS A COMMUNITY DEVELOPMENT BLOCK GRANT NEIGHBORHOOD REVITALIZATION STRATEGY AREA

Mayor Bellamy opened the public hearing at 7:06 p.m.

Community Development Director Charlotte Caplan said that this is the consideration of a resolution to amend the 2006 Consolidated Strategic Plan to designate West Riverside Weed & Seed area as a Community Development Block Grant (CDBG) Neighborhood Revitalization Strategy Area. This public hearing was advertised on December 1 and 8, 2006.

Asheville's West Riverside neighborhood, which includes the Pisgah View and Burton Street neighborhoods has recently been designated and funded by the U.S. Department of Justice as a national Weed and Seed program area. It would be advantageous also to have this area designated by HUD as a CDBG Neighborhood Revitalization Strategy Area (NRSA).

NRSAs are target areas where CDBG funding is used strategically to foster community-based initiatives addressing housing, economic development and human service needs. As incentives, HUD provides certain flexibilities in the use of CDBG funds in NRSAs.

The groundwork needed for the NRSA designation has been covered in planning the Weed and Seed program. Likewise, reports generated for the Weed and Seed program will cover HUD's reporting requirements as well.

HUD Requirements:

1. The proportion of low-moderate income residents in an NRSA must be in the upper quartile of all city census tracts: for Asheville that is 55%. The West Riverside area has 57.3 % LMI.

2. A neighborhood revitalization strategy must be made part of the City's Strategic Five-year Housing and Community Development Plan. This requires a public hearing and formal amendment to the current strategic plan, adopted in 2005. The necessary public notice for this has been given.

3. After Council action, the proposed NRSA plan (in this case the Weed and Seed Plan) must be submitted to HUD for approval.

Pros:

- Additional flexibility in using CDBG funds within the designated area
- Encouraged by HUD nationally

Cons:

- None

Staff recommends approval of a resolution to amend the City's Consolidated Strategic Housing & Community Development Plan to designate the West Riverside Neighborhood as a Neighborhood Revitalization Strategy Area.

Mayor Bellamy closed the public hearing at 7:08 p.m.

Councilman Mumpower felt that a good effort was made to engage the Weed & Seed Program in this community and looked forward to turning this into something real.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 06-216. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 165

E. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE PERMIT FOR BROADWAY MIXED-USE PHASE II LOCATED AT 237 BROADWAY STREET FOR A DEVELOPMENT WHICH WILL INCLUDE RESIDENTIAL, OFFICE, RETAIL USES AND A RESTAURANT

At staff's request, Vice-Mayor Jones moved to continue this public hearing until January 9, 2007. This motion was seconded by Councilman Newman and carried unanimously.

CLOSED SESSION

At 7:10 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) to discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, providing that any actions authorizing the payment of economic development incentives will occur in open session. The statutory authorization is contained in G.S. 143-318.11 (a) (4); and (2) to consult with an attorney employed by the City about matters which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville, State of North Carolina and County of Buncombe. The statutory authorization is contained in G.S. 143-318.11 (a) (3). This motion was seconded by Councilman Freeborn and carried unanimously.

At 7:45 p.m., Vice-Mayor Jones moved to come out of closed session. This motion was seconded by Councilman Freeborn and carried unanimously.

F. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING CHANGES TO THE SIGN CODE TO ALLOW FOR CITY COUNCIL APPROVAL OF SIGNAGE PLANS FOR LARGER-SCALE DEVELOPMENTS

ORDINANCE NO. 3427 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE REGARDING CHANGES TO THE SIGN CODE TO ALLOW FOR CITY COUNCIL APPROVAL OF SIGNAGE PLANS FOR LARGER-SCALE DEVELOPMENTS

Mayor Bellamy opened the public hearing at 7:46 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) regarding changes to the Sign Code to allow City Council approval of signage plans for larger-scale developments. This public hearing was advertised on December 1 and 8, 2006.

Staff has been approached by Biltmore Farms/Crosland developers about a creative signage plan for the Biltmore Park development. As the development's signage plan was being prepared, it was noted that many of the way-finding signs desired for the development were not allowed. Staff suggests that there be an adjustment to the UDO for larger developments to allow for City Council approval of signage plans that deviate from "basic" sign requirements providing key city goals were met and there were topographical or site design constraints or needs which warranted the deviations.

The amendment was prepared to create a new Section 7-13-10 to allow for the creation and processing of signage plans for the following development types:

- Urban Village projects
- Level III projects
- Commercial, industrial, or mixed use developments containing five or more acres in area.

Pros:

- Provides an alternative to the variance process for addressing the unique signage requirements for large scale developments.
- Promotes City goals for way-finding, pedestrian-orientation, and business identification.
- Allows for creative signage solutions.

Con:

- Adds additional staff and Council responsibilities.

The Planning and Development staff recommends City Council approve an ordinance amending Chapter 7 of the Code of Ordinances of the City of Asheville to establish a new section 7-13-10 for Signage Plans.

Mayor Bellamy closed the public hearing at 7:49 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3427. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 177

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. PRESENTATION OF THE FISCAL YEAR 2006 COMPREHENSIVE ANNUAL FINANCIAL REPORT

Chief Financial Officer Ben Durant said that at the conclusion of each fiscal year, an annual audit of the city's financial statements is conducted. The purpose of the audit is to obtain reasonable assurance that basic financial statements are free of material misstatement; to examine evidence supporting the amounts and disclosures in the financial statements; and to assess accounting principles used and the overall presentation of the financial statement.

Mr. Brian Broom, Director of Dixon Hughes, said that the City has been issued a "clean" audit. Specific findings and results of the Fiscal Year 2005-06 audit are as follows: (1) An unqualified opinion of the financial statements of the City has been issued; (2) No matters involving the internal control over financial reporting and its operation were considered to be material weaknesses; and (3) No instances of non-compliance or other matters that are required to be reported under governmental auditing standards were identified.

City Manager Jackson said that enhancing the automation for preparation of our financial statements is not our highest investment opportunity at this point in time, but it is something they noted. He said that we will come up with a plan to invest and upgrade our financial management systems to make sure that we are working effectively and also using state of the art technology for all manners of financial reporting.

At the suggestion of Councilman Mumpower, Councilman Newman, Chair of the Revenue and Finance Committee, said that they would review the City's AA bond rating and what we might do to get a higher bond rating.

It was the consensus of Council to accept the Fiscal Year 2006 Annual Audit and Comprehensive Annual Financial Report.

B. RESOLUTION NO. 06-217- RESOLUTION ADOPTING THE CIVIC CENTER ACTION PLAN INCLUDING THE SCHEDULE FOR CAPITAL IMPROVEMENT AND MAJOR MAINTENANCE

When Councilman Mumpower asked and was informed that this agenda item was not officially reviewed by the Civic Center Commission, he said that Council has been fussing for years for a role for that Commission and we made a commitment that when there is a Civic Center matter that we run it by the Civic Center Commission to at least give them the opportunity to offer an opinion.

Councilman Davis, liaison to the Civic Center Commission, explained how even though this item, in the format it is being presented, has not been taken to the Civic Center Commission they have seen it in essence. They in fact provided the first list in the form of their White Paper, which itemized a lot of the deferred maintenance items.

After a short discussion on whether to refer this matter to the Civic Center Commission for review prior to any Council action, Councilman Mumpower moved to defer action on this matter until the Civic Center Commission has had an opportunity to review it and at such time as the Mayor chooses, to place the matter back on Council's agenda. This motion died for a lack of a second.

Councilman Davis said that it's important that the community know that we are not just letting the Civic Center sit there. This Council has shouldered the responsibility to start giving attention to the many items that need attention. We have also looked very closely at the options we have. It is very clear that there is not the money, or the ability of City taxpayers, to fund a new arena at another place. The realistic part is that the Civic Center we have is in a good location, it sits well with the City of Asheville and is good for the downtown. With that in mind, we had four items that were identified: (1) repair and improve the existing Civic Center - which City Council has indicated they wished to do; (2) repair and improve the Civic Center and study the feasibility of a new performing arts center as part of the mixed-use redevelopment; (3) abandon the existing Civic Center and build a new arena outside the City; and (4) abandon the existing Civic Center and build a new arena outside the City and study the feasibility of a new performing arts center. We would also like to proceed with Option No. 2 of with studying the feasibility of the Parkside site for a performing center. There is always that possibility that we as a region could come together and there would be something built outside the City. The Tourism Development Authority (TDA) was interested in helping when we were looking to build a new facility, and it is incumbent upon us to seek revenues from that source to repair what we have. In fact, the Warren Haynes concert has people coming from 42 states and that is definitely a tourism development piece. He hoped Council would consider putting this on our legislative request instead of a pay-as-you go situation. We could save on construction costs and make the building better at the same time if we have the funding mechanism to do it.

City Manager Jackson said that there are a variety of ways to approach the capital funding needs for the Civic Center. Earlier this year the Civic Center Task Force completed an extensive review of the alternative improvement options.

Regardless of the alternative eventually implemented, further consideration should be given to maintaining the existing physical structure. This includes addressing deferred maintenance items, potential safety issues, and replacing outmoded equipment essential for continued event production and patron attendance.

With this in mind, staff developed a capital improvements plan for the venue. As part of this planning, deferred maintenance and repair items were identified and segregated from facility upgrades. The capital improvements for deferred maintenance starts on a systematic methodical year fixed allocation which for the Civic Center arena amounts to $7.8 Million. There are also facility upgrades amounting to $7.3 Million, but we are not suggesting to Council a capital improvement program that gets to this type of upgrade since they might be ripped up if Council did a whole scale renovation. The Task Force has also recommended the following business

investments: upgrade all concession stands, install separate HVAC system in Banquet Hall, completely renovate Banquet Hall, install freight elevator, rebuild the east end of the arena, and rebuild the stage area of the auditorium, which amount to $25 Million. The total full project list (deferred maintenance projects - $7.8 Million; the facility upgrades - $7.3 Million; and the business investments - $25 Mil) totals $40.1 Million. The first cut for the Capital Projects request list for the next five-plus years, beginning in 2006-07, is replacing the arena roof ($1.5 Million) and the replacement of a standby transformer ($45,000). If we had a recurring source, we would systematically, over the next years address at least the $7.8 Million deferred maintenance projects, and then move into the other ones at such time in the schedule that Council is ready to make upgrades to the existing facility - but we would not get to those facility upgrades for the five years, or until Council has consensus on a major investment. With existing revenue streams, we feel like $400,000 a year for the next five years is doable. For 2007-08 we would replace smoke hatches, repair damage to concourse and replace floor seating in the arena for a total of $360,000. For 2008-09, we would replace motor generator system and replace all spot lights for a total of $400,000. For 2009-10, we would add more power/production space in arena, replace portable stage and convert locker rooms into dressing rooms for a total of $345,000. For 2010-11, we would replace light 1000 watt fixtures in the arena, replace T12 lamps with T8 and replace exterior doors for a total of $350,000. And, for 2011-12, we would replace emergency generator and install dimmers on arena lights for a total of $440,000. We are making an attempt to address the most important investments from the overall deferred maintenance list. All of this is subject to the Civic Center Commissions review and recommendation and this Council's actual approval of the budget on an annual basis. The draft resolution of Council's general direction is that Council adopt the Civic Center Capital Improvement Plan and to continue to evaluate the feasibility of locating a new performing arts hall within a mixed-use development at Parkside and continue to pursue a regional partnership for replacement or renovation of the Thomas Wolfe Auditorium, depending upon a sustaining source of revenue for future operation and maintenance coming about as a result of regional partnerships.

City staff recommends approval of a resolution adopting the Civic Center Action Plan including the schedule for capital improvement and major maintenance.

Mr. Dwight Buckner, President of the Asheville Downtown Association, said that the Asheville Downtown Commission has adopted the following resolution "The Asheville Downtown Commission supports the Civic Center as a necessary asset to promote civic entertainment, tourism, and economic development. The Downtown Commission supports protection and maintenance of the current Civic Center complex, while any discussions are held to determine future options for the Civic Center/Thomas Wolfe. The Downtown Commission urges legislative support for the City and County to assist with funding options for the required deferred maintenance and repairs of the Civic Center in downtown Asheville." He said that a similar resolution will be considered by the Asheville Downtown Association.

Mr. Dennis Justice said that if Council decides that sports should not be in the building that should be reflected in the policy. He thinks one of the reasons the sport teams failed is because of the condition of the building. He did think the action plan should be brought forth before the Commission. He supported a two building solution.

Mr. John Martin, with the Asheville Area Center for Performing Arts, spoke in support of this Action Plan preserving the existing Civic Center and also supported evaluating the feasibility of a new performing arts center location.

Councilman Freeborn moved to approve Resolution No. 06-__, adopting the Civic Center Action Plan of the limited deferred maintenance list of $1.5 Million in 2006-07 and approximately $400,000 in the next five years (totaling approximately $3.4 Million), and to include studying the

feasibility of a new performing arts center as part of the mixed-use redevelopment. This motion was seconded by Councilman Davis.

Councilman Newman didn't want to declare that sports are inappropriate in the Civic Center because there are a lot of different kinds of sports that people are excited about bringing to the Civic Center. He liked the fact that if we have to stand on our own, we have a plan to fix the facility. He wondered if we could fix the facility faster than just $400,000 a year out of our General Fund. If a performing arts center turns out to be a viable project, he didn't want to make investments in the facility that we would end up having to tear out after just putting them in. He asked if any of the items listed in the deferred maintenance list or in the facility upgrades list would be resources not well spent if a performing arts center goes forward.

City Manager Jackson said that the $400,000 a year is a realistic minimum figure (we could manage $1 Million a year). However, if we only spend $400,000 a year, we will never go beyond the deferred maintenance list. We would not be able to make upgrades. We do not anticipate getting into the facility upgrades list in the five-year period unless there is a significant change in policy direction. He said that none of the limited deferred maintenance list would be wasted dollars if a performing arts center turns out to be a viable project.

Councilman Newman felt that if we really want to fix the facility up and did the entire deferred maintenance list and the facility upgrade list, that would total approximately $15 Million. Ideally, if none of those investments would be unwise with the scenario of potentially having a performing arts center, then we should reach out to the community and say here is what we think would be great to happen at the Civic Center. If this is a plan that Council wants, then we should make a commitment of how we are going to do it on our own and then we should also ask for our County and State to be partners with us and give us additional tools to do all the deferred maintenance and facility upgrades now. The way most other communities across the state have funded their civic center is the hotel occupancy fee. If this is the plan we want, if we had a 1-cent hotel occupancy fee (which is approximately $1.3 Million a year), then basically it would fund basically the entire deferred maintenance and the facility upgrades.

Upon inquiry of Councilwoman Cape, City Manager Jackson said that if there is not a significant new revenue source available to us, we would be prepared to do the limited deferred maintenance list of $1.5 Million in 2006-07 and approximately $400,000 in the next five years. There is also the preferred plan of deferred maintenance which is approximately $1 Million for the next five years. When staff was asked what they can realistically manage if the City had the resources to responsibly address the deferred maintenance list, the $1 Million a year was the response. If regional partners came to the table to help address the facility, the $1 Million a year deferred maintenance list is what we would recommend.

Upon inquiry of Councilwoman Cape, Mayor Bellamy said that at Council's retreat a discussion is scheduled for a planning calendar for City Council and the community to know what is coming to Council in advance.

Upon inquiry of Councilman Mumpower, City Manager Jackson said that he has not talked with Buncombe County or our State representatives about this plan.

Councilman Mumpower felt we are moving in the right direction, in terms of the feasibility and realism in trying to fix what we have. He wondered if there are other ways to create opportunities to enhance attractiveness as well as efficiencies, e.g., a design competition. That said, he would not support the motion because we are voting on a $40 Million full project list plan without official review by our appointed Civic Center Commission.

Vice-Mayor Jones supported the limited deferred maintenance list of $1.5 Million in 2006-07 and approximately $400,000 in the next five years.

City Manager Jackson suggested we title the limited deferred maintenance list "City-Funded Capital Improvement Plan" and the $1 Million a year deferred maintenance list "Project Requests with Regional Partnerships." In addition, the resolution should be amended to include that City Council will pursue regional funding partnerships to accomplish the "Project Requests with Regional Partnerships." He said the $40 Million full project list is presented to Council only to qualify how the numbers were arrived at, noting that the Civic Center Commission did see this list.

Mayor Bellamy preferred to approve the limited deferred maintenance list of $1.5 Million in 2006-07 and approximately $400,000 in the next five years, totaling approximately $3.4 Million over 2006-07 - 2011-12.

Councilman Davis hoped that we can maintain the entire $40 Million full project list as objectives we want as a goal and hoped that we would be willing to be flexible with the plan, if necessary.

The motion made by Councilman Freeborn and seconded by Councilman Davis to approve Resolution No. 06-217, adopting the Civic Center Action Plan of the limited deferred maintenance list of $1.5 Million in 2006-07 and approximately $400,000 in the next five years (totaling approximately $3.4 Million), and to include studying the feasibility of a new performing arts center as part of the mixed-use redevelopment carried on a 6-1 vote, with Councilman Mumpower voting "no."

Councilman Newman suggested a motion to (1) request participation with Buncombe County and the State legislators to implement both the entire deferred maintenance plan and the facility upgrades, totaling approximately $15 Million (which are identified on the full project list), noting that we are open to talking about different ways to do that, however, a hotel occupancy fee has been used for civic centers across the state and we would request that Asheville have a 1-cent hotel occupancy revenue for the deferred maintenance and facility upgrades; and (2) request feedback from the Civic Center Commission about the details of the plan.

Councilman Mumpower felt that until we have some kind of full plan (other than maintaining what we already have) that we can sell to the community, Buncombe County and State legislators, spending $14 Million seems short-sighted and he could not support the motion. He did note that he would have voted in favor of the first motion, but voted against it because we did not allow the Civic Center Commission to review it first.

Councilman Newman moved that that it is the sense of Council that (1) we would like to move forward with implementing both the entire deferred maintenance plan and the facility upgrades, totaling approximately $15 Million (which are identified on the full project list); (2) we are going to need partners with Buncombe County and the State legislators to move forward with implementing both the entire deferred maintenance plan and the facility upgrades; (3) we believe the 1-cent hotel occupancy fee would be sufficient for that plan; and (4) we would like to get feedback from the Civic Center Commission on that direction as well as studying the feasibility of a new performing arts center at Parkside or elsewhere in the downtown area, before we take a final vote. This motion was seconded by Councilman Davis.

Mayor Bellamy could not support the motion of the 1-cent hotel occupancy fee being used only for the deferred maintenance and facility upgrades, because if the Parkside project comes alive, that would be an opportunity to use that dedicated fund.

Councilman Newman was open to amend his motion to clarify that the 1-cent hotel occupancy fee could be used for other things, but the 1-cent hotel occupancy fee would basically cover the deferred maintenance fee and facility upgrades. If the performing arts center goes forward, it will require a lot of private money and the mixed-use development portion will help bring the costs down.

Councilman Mumpower questioned if a motion was necessary since we are making a lot of assumptions about the 1-cent hotel occupancy fee.

It was the majority of Council's consensus to charge Councilman Davis, as liaison to the Civic Center Commission, to advise the Civic Center Commission that this is the direction Council wants to move forward in and ask them for their input as soon as possible, after which City Council will take a final vote.

RESOLUTION BOOK NO. 30 – PAGE 167

C. RESOLUTION NO. 06-218 - RESOLUTION APPROVING THE ACQUISITION OF MCCORMICK HEIGHTS APARTMENT COMPLEX FROM ASHEVILLE MOUNTAINSIDE, LLC, AND ESTABLISHING A PUBLIC HEARING WITH REGARD TO AN INSTALLMENT PURCHASE IN COMPLIANCE WITH N.C. GENERAL STATUTES

City Manager Jackson said that this is the consideration of a resolution approving the acquisition of McCormick Heights Apartment Complex from Asheville Mountainside, LLC, and establishing a public hearing on January 9, 2007, with regard to an installment purchase in compliance with North Carolina General Statutes.

The McCormick Heights apartment complex is located at 56 Ardmion Road and 54 Hunt Hill Place adjacent to property owned by the City of Asheville. The property is situated north and northeast of Memorial Stadium, McCormick Field and the City's Purchasing Office and Warehouse. The complex sits on an 8.45 acre site and consists of 100 residential units spread over 17 buildings. Although all of the rents would be considered affordable in the market, 60 of the units are required to be affordable to households with income less than 60% of area median. The complex is in need of substantial repairs and currently only 41 of the units are occupied. The complex has failed to reach market potential and is not economically viable in its current configuration.

Asheville Mountainside, LLC, is a limited partnership consisting of CaroHome LLC, a subsidiary of Progress Energy, controlling partner and Mountainside Assisted Housing, Inc. an affiliate of the Housing Authority of the City of Asheville, managing partner. Asheville Mountainside, LLC was formed to purchase and renovate the property in the mid and late 1990s. A variety of financing was utilized including low income housing tax credits, a first mortgage from Mechanics and Farmers Bank of Durham and Community Development Block Grant (CDBG) and HOME program rehabilitation loans.

The proposed purchase agreement is in the amount of $2,250,000. That amount would be sufficient to clear the following debts on the property: the first mortgage of $1,765,000 and the balances due to the City on the CDBG and HOME rehabilitation loans. It is recommended that the purchase be funded by refinancing the existing first mortgage for a term of 4 years and 11 months and paying the remainder in cash from the fund balance.

The property was appraised by Thomas Steitler, MAI, in January 2005 at an "as is" value of $1,650,000. A supplemental letter to the appraisal dated September, 2005 indicated that if the property were able to achieve 90% occupancy and maintain the same expense profile the

property would be worth $2,500,000. Although this latter assumption is not achievable given the current condition and design of the complex it reflects a marketability of the property for redevelopment. The agreed upon price of $2,250,000 compares favorably to nearby land sales for residential development in the Central Business District even when the cost of demolition is considered which is estimated at between $250,000 and $400,000.

The property is located in a desirable residential area due to its proximity to employment, shopping, dining, educational, entertainment, cultural and recreational amenities of downtown. Redevelopment of the property in a market competitive design with a mix of affordable and market rate as well as rental and owner-occupied units spread across a broad range of market prices would have the best chance for success. This potential for redevelopment would be enhanced by the combination of the property with adjacent City owned property to create a parcel of about 20 acres.

The fact that McCormick Heights is no longer economically viable places at risk a significant number of affordable housing units. It is reasonably certain that if the City does not purchase the property, it will be purchased by a private developer for redevelopment as high end residential units and the affordable units will be lost. By acquiring McCormick Heights the City has the opportunity to direct redevelopment so as to ensure replacement of the affordable housing that would otherwise be lost and do so within a more desirable and market competitive community.

In anticipation of the redevelopment the City can assist with the relocation of the existing tenants to mitigate hardship. It is expected that the relocation would take place over a 6 month period after closing during which time the Housing Authority would continue to manage the property under an agreement with the City. CDBG funds could be made available to cover moving expenses and the City could contract with the Affordable Housing Coalition to implement the relocation assistance.

Pros:

1. The price for the land is justified by comparison to recent nearby sales for residential development.
2. The acquisition will give the City the opportunity to direct redevelopment so as to replace needed affordable housing.
3. It is a voluntary sale at a fairly negotiated price.
4. It will ensure relocation of the tenants in a manner that mitigates hardship.
5. It will provide the opportunity of combining City owned land for a net gain of housing of various market levels close to downtown.

Cons:

1. The acquisition will require a substantial appropriation of funds.
2. The City will be responsible for relocation of tenants.
3. The City will be responsible for demolition of the existing structures.

Approval of the resolution will establish $2,250,000 as the acquisition price for the property and authorize the Mayor to execute all documents necessary to complete the transaction.

306

Staff recommends adoption of a resolution approving the acquisition of McCormick Heights Apartment Complex from Asheville Mountainside, LLC, and establishing a public hearing on January 9, 2007, with regard to an installment purchase in compliance with North Carolina General Statue.

Supplemental information provided by Planning & Development Director Scott Shuford shows that the steady loss of affordable rental units in and near downtown has been of concern for several years. With the exception of the Griffin and Woodfin Apartments, almost all new and renovated housing in this area has been unaffordable to people at or below median income. Yet maintaining an appropriate mix of housing options in the downtown area is one of the pillars of the Asheville's Comprehensive Plan.

Retaining affordable housing, and preferably affordable rental housing, on the McCormick Heights site should therefore be a consideration in any redevelopment plan. The existing 8 acre site has been developed for 100 units in one and two story buildings, at a density of 12 units per acre. When it was purchased and renovated in 1998, it was intended to provide a mix of 60 affordable units and 40 market rate units. However, the layout and design are not attractive and offer few resident amenities. The "market rate" units have in practice rented for little more than the rent-controlled units: it has never operated as a truly mixed income development.

A more attractive development of similar density could be designed, but the land and construction costs would make it hard to achieve a mixed-income development with a similar number of affordable rental units. However, acquisition of the property by the City provides an opportunity to combine the site with two City-owned adjoining parcels to the south and east, as follows:

Site A: approximately 4.5 acres of flat land currently used in part as the City's central purchasing stores and in part as an under-utilized recreation area.

Site B: approximately 6 acres of undeveloped land above Memorial Stadium, potentially accessible from the McCormick Heights site.

The combined site would provide almost 20 acres, which could be developed with a mix of housing types and densities suitable to the terrain to provide between 250 and 350 units of housing with good amenities, while simultaneously allowing the preservation of much of the steeper area as passive recreation. With appropriate incentives, it should be possible to combine both affordable rental and homeownership opportunities with market rate homes. The location and views will ensure premium prices for the market rate units that could be used to cross-subsidize the affordable homes. An increase in the tax base of at least $40 million can be expected.

Supplement information provided by Community Development Director Charlotte Caplan shows that under the McCormick Heights Redevelopment Plan, 41 families currently living at McCormick Heights will be required to relocate to another permanent residence. The City of Asheville recognizes that moving can be a disruption to these families and is dedicated to making the transition as smooth and easy as possible.

Should the purchase of the McCormick Heights property be approved by City Council, City staff recommends implementing a Housing Counseling Program to guide residents through the moving process by providing residents with the resources and coaching to make the right housing choices for their families. Under this proposed plan, the City give residents six months in which to make their individual plans. Counseling and financial assistance will be provided to each household to: (1) Identify available housing; (2) Find a suitable residence for their move; (3) Pay for moving costs; and (4) Pay for initial costs such a rent and utility deposits.

Staff is developing a detailed Housing Counseling Program that outlines the roles and responsibilities of both the City and McCormick Heights residents. With City Council's approval of the land purchase, residents will receive detailed information about the program at an on site meeting scheduled for Thursday, December 14, 2006.

In order to successfully implement this program during the next six months, staff proposes contracting with the Affordable Housing Coalition of Asheville and Buncombe County (AHC). The AHC has more than 15 years of experience in providing housing counseling, educational and supportive services to those in search of a home.

The Housing Authority of the City of Asheville will also continue to partner with the City by continuing to operate McCormick Heights during the six month Housing Counseling Program. HACA will also take applications from residents who wish to relocate to public housing developments, giving them priority as displaced tenants.

Preliminary budget estimates indicate that the Housing Counseling Program will require up to $85,000 in funding, which can be allocated from CDBG funds.

Pros:

- Provision of adequate time and resources to ensure a smooth housing transition for current McCormick heights residents,
- The ability to contract with the Affordable Housing Coalition to provide residents with housing counseling services.

Cons:

- Loss of the opportunity to use the recommended CDBG funds for other purposes.
- Requires staff oversight of the ongoing housing counseling program through June 30, 2007.

Staff recommends City Council approval to continue developing the Housing Counseling Program. With City Council's approval, City staff will bring a CDBG budget amendment forward for consideration in January.

Mr. Gene Bell, Executive Director of the Housing Authority of the City of Asheville, gave a brief history of the property after they renovated it. He said that the criminal element was a major deterrent to get market-rate people in and the initial pro forma that they had was not as realistic as it should have been. It assumed a 93% occupancy rate and at the time we thought that because of the proximity and newness of the renovated property we would be able to rent it, but we were not able to do that. Therefore, we incurred a significant amount of debt on the property and tried to sell it. When properties get that stigma over a long period of time, it is very difficult to do anything to the property and have it viable. So the suggestion to demolish the property is the only viable alternative to make that site work.

Upon inquiry of Councilwoman Cape, Chief Financial Officer said that City Council will hold a public hearing on this matter on January 9, 2007, and that the City will need approval by the Local Government Commission as well.

Councilman Mumpower felt that we have essentially surrendered a public housing development to drug dealers, criminals, and others who destroyed the safety of that development. He felt that crime has destroyed this facility and we have not done the kind of job we should have been doing in terms of protecting people. We should not be satisfied with this failure. He felt that to create more density at the same location before we fix the real problem is disaster. Every

public housing project that we have is not safe and we need to fix that problem first. He felt the City of Asheville does not have a good history with development and believes we are wasting our money to try to do it again.

Vice-Mayor Jones said that there is a giant demand for affordable housing and many of the housing developments are not crime-ridden. Developers, with a vision similar to what we will be asking for, have built developments that have a high quality of life. She said this Council is very concerned about crime and remains committed to the public housing safety commitments.

Mayor Bellamy said that there are two large notebooks full of police response calls to McCormick Heights, showing that we have not ignored them. We are trying to address these issues, but the Court system is what has failed. She said the police cannot solve all the ills in our society. She said that we need to partner with existing residents to develop a comprehensive plan to address drugs and crime in all neighborhoods, especially in public housing.

Councilwoman Cape noted that Asheville's failures with public housing has happened all across the county when you isolate people in single level incomes together - it doesn't offer a neighborhood. Other redevelopment plans have shown that you go back in and re-create neighborhoods. We have learned with the HOPE 6 Program that you can take these areas, make distinct changes, make areas where people can live together and have new neighborhoods without replicating the same problems.

It was the majority of Council's consensus to charge the Public Safety Committee bring back to Council a comprehensive plan to address drugs and crime in all neighborhoods, especially in public housing.

Vice-Mayor Jones said that she would be looking for the Police Chief's leadership in addressing the comprehensive plan in addressing these issues.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 06-218. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 169

At 9:37 p.m., Mayor Bellamy called for a short recess.

D. RESOLUTION NO. 06-219- RESOLUTION APPROVING A $160,000 HOUSING TRUST FUND LOAN TO SKYLOFT ASHEVILLE, LLC, FOR CONSTRUCTION OF FOUR UNITS OF AFFORDABLE HOUSING ON ALEXANDER DRIVE

Community Development Director Charlotte Caplan said that this is the consideration of a resolution approving a $160,000 Housing Trust Fund (HTF) loan to Skyloft Asheville, LLC.

On June 27, 2006, Skyloft Asheville, LLC received conditional zoning approval of its condominium development on Alexander Drive with the stipulation that 7 of the 69 units be sold affordably. Phase I of construction will include the first 4 of these affordable units as well as 20 market-rate units.

The two-bedroom affordable units will range in size from 780 – 850 square feet. They will be offered at the HTF sales price limit of $120,000, well below the estimated construction cost of

$162,000 per unit. The discounted sales price is being subsidized mainly by the market-rate units in Phase I, not by Housing Trust Funds. Soft second HTF loans will be available as a further subsidy to families with income below 80% Area Median Income.

This is an infill project in close proximity to public transit and downtown jobs and services. The developer has responded to community needs by incorporating affordable units, a bus shelter, and extra sidewalks. The design includes green building features, underground parking, and more green space than required. The developer has used a density bonus to make efficient use of land. Financing has been committed, with a significant equity contribution, a conditional use permit has been approved, and grading is underway.

The managing partners of Skyloft Asheville, LLC, lack development experience on this scale. However, they have assembled an experienced development team and have already tackled many of the difficult issues that new developers face.

The Housing and Community Development Committee reviewed the application on November 20, 2006, and has recommended awarding a HTF loan in the amount of $160,000 on the following terms: two year construction loan at 2% interest, with up to $25,000 per unit available as soft second mortgages for eligible families (i.e. those with income less than 80% of area median). Currently over $750,000 is available in the Housing Trust Fund.

Pros:

- Creates four units of affordable housing;
- Supports smart-growth policies;
- Exemplifies voluntary inclusion of affordable units within a market-rate project.

Cons: None

Staff recommends approval of a resolution to approve $160,000 loan from the City's Housing Trust Fund to Skyloft Asheville, LLC.

Upon inquiry of Councilman Mumpower, Ms. Caplan explained the soft second mortgage loan.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 06-219. This motion was seconded by Vice-Mayor Jones and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 170

E. RESOLUTION NO. 06-220- RESOLUTION AMENDING THE HOUSING TRUST FUND GUIDELINES

Planning & Development Director Scott Shuford said that this is the consideration of a resolution to amend the Housing Trust Fund Guidelines.

The Housing and Community Development Committee has reviewed the guidelines for the City's Housing Trust Fund (HTF), which were established in September 2000 and last significantly updated in October 2004. At its November 2006 meeting, the Committee noted the following issues:

- Construction costs across the nation have increased by about 25% over the past 3 years. In Charlotte (the closest city for which cost data is available) the increase has been closer to 40%.
- Existing house prices in Asheville have risen by 36% in the same period. It is likely that the price of developable land has risen by a similar amount.
- The use of our Housing Trust Fund and Fee Rebate programs by developers of homes for sale has declined sharply since 2004:

Year	Units with HTF Loans	Fee Rebate Units
2004	42	43
2005	7 (4 on hold)	35
2006 to Nov 30	0	11

The rapid increases in land and construction costs have made the current HTF and Fee Rebate program price limits unachievable except for the lowest quality factory-built homes. The current price limits were set in October 2004, with a 3-bedroom house capped at $135,000, which was then just affordable to a household at 80% AMI. Based on purchasing power alone no increase would be called for – the small rise in median incomes since then has been more than offset by interest rate increases. However, keeping up with construction cost inflation would call for a new 3-bedroom limit of at least $150,000.

Pros:

- Increased price limits will restore the fund's availability to developers;
- Increased loan amounts per unit will help to offset construction cost increases;
- Increased loan subsidy will assist low-income homebuyers;
- Equity sharing helps buyers maximize first mortgage while preserving value of HTF loan portfolio in real terms.

Cons:

- Homes priced close to the new limits will be less affordable.

The following changes are recommended by the committee with immediate effect:

1. Increasing the FY 2007 price limits for both the HTF and Fee Rebate programs as follows:

Size	Existing Limit	Proposed Limit
0-bedroom (efficiency)	95,000	110,000
1-bedroom	110,000	120,000
2-bedroom	120,000	135,000
3-bedroom	135,000	150,000
4-bedroom	150,000	150,000*

* The HCD Committee recommends the same price limit for 3- and 4-bedroom homes.

2. Increasing the maximum HTF construction loan amount from $40,000 per unit to $50,000 (repayable within 2 years unless assumed by buyer)
3. Increasing the maximum amount of HTF construction loan assumable by a low-income buyer from $25,000 to $30,000.

4. Deferring all payments on homebuyer loans until resale of the home, but making the interest rate equal to the rate of price appreciation of the home so that loans retain their real value relative to housing prices. Also called "equity sharing", this keeps the HTF "whole" and allows us to provide the same level of help to future families. Having no monthly payments on the HTF loan allows the buyer to maximize conventional mortgage financing.

5. Increasing the maximum HTF loan for rental development from $25,000 per unit to $30,000

No change is recommended in the $500,000 maximum loan amount per development (set in April 2006)

Mr. Rod Hubbard, developer who has provided 168 affordable housing units over the last year in Asheville, requested the fee rebate structure as follows: increasing the limit of one bedroom from $100,000 to $105,000, the two-bedrooms from $120,000 to $130,000 and the three-bedrooms from $135,000 to $140,000. These increases are less than what staff is recommending, not that he doesn't support staff's recommendation because he does, but the reason why he is able to sell his units for less than the staff's recommendations is because of density. However, if he was a single-family home builder and was building one, two or three units at a time, then there would be no way he could sell his units at an affordable housing rate.

Mr. Mike Vance, Home Ownership Manager for Mountain Housing Opportunities, supported staff's recommended increase in the Housing Trust Fund price caps.

Councilman Mumpower understands the rationale of the resolution but could not support the resolution as he felt that $150,000 doesn't define affordable for most people. We are essentially reaching into the pocket of people who are struggling to make it on their own merits and putting that into the pockets of people who are asking for a subsidy. In other countries where land values are very expensive, people think on a smaller scale and he wondered if we haven't reached a point in Asheville about how big a bedroom really needs to be or how much space we need to be subsidizing with tax dollars for people who can't afford to pay for it themselves.

Mayor Bellamy felt that this is a way to enhance the tools in our toolbox for affordable housing. Because we don't have a comprehensive affordable housing plan, this does need support. She agreed that we do need to look at smaller and more density, but we need to do it in a comprehensive manner. In 2007 she will establish a Mayor's Task Force on Affordable Housing with the only charge being to create an affordable housing plan. She felt this plan can be complimentary to what staff is already working on. She invited Council to give her names for the Task Force, noting that final membership would be determined by only her.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Jones moved for the adoption of Resolution No. 06-220, as outlined by City staff. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 171

F. FUTURE LEED CERTIFICATION AND GOAL FOR ENERGY AND FUEL CONSERVATION

Councilman Newman said that in anticipation of the formation of our Sustainable Advisory Committee on Energy and the Environment (Committee), Councilwoman Cape and he

had the following two basic policy questions they would like Council to consider (1) whether or not Council would like to make a decision that we would commit to incorporating green building practices in future municipal facilities that we construct, as well as during significant rehabilitation of public facilities; and (2) setting a goal for energy and fuel conservation for the City in the future. The basic idea that we want Council to consider is if we are interested in the idea of potentially doing green building in the future through the Leadership in Energy and Environmental Design (LEED) certification process, and setting some energy and fuel conservation goals for the future, that we would advise our City Manager that we are interested in those two questions and ask him to work with our newly formed Committee to look at those two questions and bring back specific recommendations for Council to consider sometime in the first quarter of 2007. As we have seen, there is a lot of interest in green building in the community. We think it makes sense for Asheville to exercise that leadership commitment as well and the LEED certification process is a nationally recognized, most objective recognized process for doing that. The idea of setting an energy and fuel conservation role is that if we set a goal, as we make all future decisions around facilities and vehicle purchases, it will challenge and encourage us to think about ways to do that to make it safe, save us costs while at the same time improving air quality.

When Mayor Bellamy felt that the questions being asked are actually defining the work of the Committee, Councilwoman Cape responded that it was up to the Council to set the policy for the City to make the LEED commitment and let the Committee look at the parameters of what is the best LEED standard to use. The reason for going with the LEED certification instead of saying "green building" is that it is much more specific, more attainable and there are real benefits to it, opposed to "green building" which is very vague.

Mayor Bellamy felt this is good background information; however, she was concerned that we are asking for policy direction without being given all the information. She would prefer to have the comprehensive data the Council agreed upon on July 18, 2006, in that one of the things that the Committee would be charged to do is "Those issues regarding green building, environmentally and energy sustainability in Asheville are (1) should the City adopt a LEED policy that all new municipal buildings of 5,000 square feet are certified under the LEED certification process." She would prefer to have the research from the Committee first, e.g., why did we choose 5,000 square feet, what types of LEED standards have other cities adopted, and what are the benefits.

Councilwoman Cape said that buildings account for 48% of our energy use and buildings create the most CO2 emissions. She explained what that LEED is the Leadership in Energy and Environmental Design (LEED) Green Building Rating System which is the nationally accepted benchmark for the design, construction, and operation of high performance green buildings. LEED gives building owners and operators the tools they need to have an immediate and measurable impact on their buildings' performance.

LEED promotes a whole-building approach to sustainability by recognizing performance in five key areas of human and environmental health: (1) sustainable site development; (2) water savings; (3) energy efficiency; (4) materials selection; and (5) indoor environmental quality.

LEED provides a roadmap for measuring and documenting success for every building type and phase of a building lifecycle. The GSA says that LEED is the most credible building rating system and cites at least five reasons for its conclusions about the LEED system (1) LEED applies to all GSA project types, including new and existing buildings, interiors, and other areas covered by USGBC standards; (2) it "tracks the quantifiable aspects of sustainable design and building performance," a major focus of federal programs under the impetus of the Government Performance and Results Act and a general demand for performance measurement; (3) training professionals verify LEED; (4) it has a "well-defined system for incorporating updates, "which

LEED is now undergoing through a far-reaching LEED 3.0 update; and (5) LEED is "the most widely used rating system in the U.S. Market."

The following federal agencies who require LEED certifications on their new buildings include NASA, US Air Force, US Navy, US Army, GSA (United State's largest landlord), Environmental Protection Agency, Department of Interior, Department of Energy, Department of Agriculture and US Forest Service.

The following states require LEED standards on State supported building projects: Arizona, California, Colorado, Connecticut, Hawaii, Maryland, Michigan, New Jersey, New Mexico, Nevada, Oregon, Rhode Island, Wisconsin and Washington. She also said that a partial listing of the many cities that have adopted LEED standards for their own buildings include: Albuquerque, New Mexico; Chicago, Illinois; Arlington, Virginia; New York, New York; Chapel Hill, North Carolina; Dallas, Texas; Gainesville, Florida; Clayton, Missouri; Pleasanton, California; Madison, Wisconsin; Fort Collins, Colorado; Pasadena, California; Phoenix, Arizona; Grand Rapids, Michigan; Omaha, Nebraska; Houston, Texas; Kansas City, Missouri; Cranford, New Jersey; Issaquah, Washington; Long Beach, California; Portland, Oregon; Denver, Colorado; San Diego, California; Calabasas, California; Boston, Massachusetts; Boulder, Colorado; Normal, Illinois; Atlanta, Georgia; Eugene, Oregon; San Jose, California; and Cincinnati, Ohio.

She explained that every building built today will have a direct impact on our energy use now and in the future. Best practices in a growing number of cities, states and agencies point to the use of LEED to ensure that the choices made today will have a net positive effect on energy security, fiscal responsibility and community stewardship.

Councilwoman Cape asked Council to make a commitment to make all municipal buildings LEED certified and that we task the new Committee with researching and presenting to Council the alternatives for the perimeters of this policy direction.

Councilman Newman moved that we give direction to the City Manager to work with the new Committee on the following two public policies and to develop recommendations on each of these two policies for Council to consider sometime by the end of the first quarter of 2007: (1) the establishment of an energy and fuel conservation goal (that is ambitious and achievable) for the City over a defined period of time with benchmarks to achieve that goal; and (2) that the City of Asheville make a commitment to have future municipal facilities to be LEED certified, with recommendations on what level they think would be appropriate, the costs and benefits of the different level of certifications. This motion was seconded by Councilwoman Cape.

Councilman Mumpower felt that the following language the staff prepared in the draft resolution was fair and even-handed and was proper process to provide public input on this major decision: "The City of Asheville has a strong commitment to protecting the environment. The City of Asheville has a long-standing commitment to promoting economic development of the City and region through quality of life enhancements. The City of Asheville recognizes the direct connection between environmental protection, economic development, and local and regional quality of life. The City of Asheville supports regional, state and federal programs to reduce pollution, improve energy efficiency, and reduce dependence on fossil fuels. The City of Asheville currently supports green building through permit fee rebates and preferential regulatory processing. The City of Asheville has adopted a comprehensive plan for the City's future growth and development, the Asheville City Development Plan – 2025 ("ACDP"), and this plan strongly supports a program of green building in the City. The City of Asheville has adopted a strategic operating plan ("SOP") for the City's immediate future and this plan strongly supports a program of green building in the City. The City of Asheville has contributed significant staff and financial resources to developing and implementing the ACDP and SO. Therefore, that the City of Asheville adopts the following Green Building Policy and reaffirms the green building goals and

strategies of the ACDP and SOP, both of which have been officially adopted by the City of Asheville.

GREEN BUILDING POLICY

The City of Asheville is committed to a comprehensive green building program and will support that program in the following ways:

- Public and private development projects that significantly incorporate green building techniques will be supported through permit fee rebates, expedited development review, economic development incentives, opportunities for density and/or intensity bonuses, and other appropriate means.
- City of Asheville development projects will include an evaluation of applicable green building techniques to determine the feasibility for inclusion based on an analysis of cost of construction, environmental and energy benefit, lifecycle and maintenance costs, among other considerations.

The City Manager for the City of Asheville is directed to use the staff and fiscal resources necessary to implement this policy through the City capital improvement program, regulatory processes, permitting and development review procedures, budget process, economic development incentives, and other means appropriate." However, he felt that the two public policy directions being requested lay a heavy hand of government on people without proper input and procedure and also turns it over to a board that he feels will be "stacked." He felt that all of Council is in favor of green construction, but was concerned about the policy process.

Councilwoman Cape responded to the comment of the "stacked" Committee. She said that Council spent four weeks interviewing candidates and they had amazing applicants apply for this new Committee. She couldn't understand why Councilman Mumpower felt the Committee was "stacked" when he didn't participate in the interviews.

Councilman Davis liked the idea of developing a strategy for reducing fuel consumption, but was concerned that we are putting policy in place before the Committee is formed. He didn't feel qualified to make a decision about LEED certification on all municipal buildings until he knows the specifics about it.

Councilwoman Cape explained that the new Committee is not going to take the place of the policy decisions of this Council.

Mayor Bellamy stated that the project that came before Council in West Asheville said nothing about LEED certification, but we held it as a good project. She wondered if the City could afford its buildings to be LEED certified. We are asking our community to embrace green incentives and that is good, but she felt we need to do it step by step and not force-feed a certain level. She wanted to make sure that as Council makes a policy that the community can embrace and feel comfortable with it, because when we come back with a higher cost, we must explain why to the community. She felt that benchmarking is good, but just to say the building has to be LEED certified is taking too giant of a step.

The motion made by Councilman Newman and seconded by Councilwoman Cape carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no."

G. ORDINANCE NO. 3428- ORDINANCE PROHIBITING REGISTERED SEX OFFENDERS FROM ENTERING PUBLIC PARKS

City Attorney Oast said that this is the consideration of an ordinance prohibiting registered sex offenders from entering public parks.

In recent years, public concern about sexual offenses against vulnerable segments of the population – especially children – has intensified. In response, many states, including North Carolina, have adopted laws requiring that persons convicted of certain sex-related offenses register with local authorities, and that registry is available to the public. Additionally, some states have enacted laws prohibiting registered sex offenders from living within a specified distance of certain facilities. Effective December 1, North Carolina prohibits registered sex offenders from living within 1000 feet of a school or child day care center.

Some communities, including communities in North Carolina, have gone further, and prohibited sex offenders from entering their public parks. Woodfin and Fletcher are two communities near Asheville that have adopted such ordinances. These ordinances were adopted in 2005 and are too new to have much of an enforcement history. However, staff has learned that Woodfin and Fletcher have taken the affirmative step of notifying any registered sex offender within their corporate limits of the requirements of this ordinance.

Such ordinances, being relatively new, have been the subject of legal and constitutional debate nationally. The Woodfin ordinance was recently challenged on several constitutional bases, and was upheld in Buncombe County Superior Court. This decision has been appealed to the North Carolina Court of Appeals, but there has been no decision yet.

The ordinance is based on ordinances obtained from Woodfin and Fletcher, and from Kernersville in Forsyth County. It has not been reviewed by the Police Department or the Public Safety Committee.

Given the public interest in these laws, the State may take action in the coming legislative session to strengthen its law and to provide for uniformity in local ordinances. Staff is currently investigating whether any further amendments will be introduced.

Pros
- Helps address public concern about sex offenders having access to places where children or other vulnerable populations congregate.
- Complements newly effective State law.
- Consistent with ordinances in surrounding communities.

Cons
- May discourage sex offenders from registering
- May be difficult to enforce effectively (depends on knowing who offenders are)

If Council is satisfied with the ordinance as drafted, it may be adopted. As an alternative, Council may refer the Ordinance to the Public Safety Committee for further review and refinement.

Rev. Christopher Chiaronmonte spoke against the ordinance because he felt the Supreme Court will determine that this is an unconstitutional law and it will cost the both the City and the alleged offender money.

Vice-Mayor Jones felt that this sends a strong message about our City. When she questioned if we would expand this in terms of residents who actually live in proximity of public parks, City Attorney Oast said that the State of North Carolina is looking into enacting something similar to this on a state-wide level and that he would look into that particular issue.

City Attorney Oast responded to Councilman Freeborn about what constitutional issues were challenged in the Woodfin ordinance. He feels that this is a defensible ordinance and if the Woodfin ordinance gets invalidated, he would advise our Police Department to not enforce the ordinance until further direction.

Police Chief Bill Hogan responded to Councilman Freeborn regarding how he envisioned the Police Department enforcing this ordinance.

Councilman Freeborn felt it would be good to have a link on our website to the N.C. Registry of Sex Offenders. He would even be willing to expand the ordinance to prohibit known sex offenders from passing out Halloween candy and decorating the outside of their homes at Christmas as parents take their children around to see the lights.

Councilman Mumpower suggested that this type ordinance could have gone through the Public Safety Committee. Therefore, it was the consensus of Council to direct the Committee review the other issues discussed surrounding this ordinance.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3428. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE *199*

H. RESOLUTION NO. 06 - 221 - RESOLUTION APPOINTING MEMBERS TO THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY AND THE ENVIRONMENT

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Sustainable Advisory Committee on Energy and the Environment.

City Council instructed the City Clerk to arrange the interviews: At Large Category: Lack Zemp, Sylvia Farrington, Jonathan Barnes, Cathy Holt, Sasha Vrtunski, Kathryn Gubista, Bruce Mulkey, Catherine Shane, Vic Fahrer, John Wilson, Keith Bamberger, Marjorie Vestal and Leah Karpen. Mr. Chad Leatherwood was unable to attend the interview. In addition, Margie Meares was a candidate but an interview was not necessary. Real Estate Development Industry: David Spector, Robert Sweetser and Mark Matthews. Construction Industry: Tabetha Reyes and Peter Waskiewicz. Energy Management: Yuri Koslen. Operation of a Business: Christopher Gilbert, Michael Murphy and Jane Mathews.

Vice-Mayor Jones reminded Council that the membership on the Committee was changed to replace one member with demonstrated expertise in the field of energy management, to one member currently employed with Progress Energy.

Councilman Mumpower said that since he did not participate in the interview process, he would not be casting a vote on any of the candidates.

After Council spoke highly of the candidates, the following votes were taken: (1) In the At Large Category Lack Zemp received 4 votes, Sylvia Farrington received 6 votes, Jonathan Barnes received 3 votes, Cathy Holt received 1 vote, Sasha Vrtunski received 6 votes, Kathryn Gubista received 1 vote, Bruce Mulkey received no votes, Catherine Shane received no votes, Vic Fahrer received no votes, John Wilson received 1 vote, Keith Bamberger received no votes,

Marjorie Vestal received 1 vote, Leah Karpen received 1 vote, Chad Leatherwood received no votes, and Margie Meares received 4 votes. (2) In the Real Estate Development Industry David Spector received 3 votes, Robert Sweetser received 1 vote and Mark Matthews received 2 votes. (3) In the Construction Industry category, Tabetha Reyes received 4 votes and Peter Waskiewicz received 2 votes. (4) In the Energy Management category Yuri Koslen received 1 vote. (5) In the Operation of a Business Category Christopher Gilbert received no votes, Michael Murphy received no votes and Jane Mathews received 6 votes.

Therefore, Lack Zemp, Sylvia Farrington, Jonathan Barnes, Sasha Vrtunski and Margie Meares were appointed as at-large members. David Spector was appointed as the representative in the real estate development industry. Tabetha Reyes was appointed as the representative of the Construction Industry. And Jane Mathews was appointed as the representative in the Operation of a Business category. All were appointed to each serve a three year term respectively, terms to begin in January 2007 and expire in January of 2010, or until their successors have been appointed.

RESOLUTION BOOK NO. 30 – PAGE 175

VI. OTHER BUSINESS:

Councilman Mumpower thanked the volunteers in the current project from the For Our Kids Program.

Councilman Freeborn noted that since we no longer have a municipal mulch pit for City residents to contact the Public Works Department and they will deliver a free load of mulch.

The following claims were received by the City of Asheville during the period of November 17-30, 2006: Crystal Fender (Water), Christine Boggan (Streets), Stan Poole Fire), Tony McCoy (Transit Services), Robin Barnett (Sanitation) and Barbara Parker (Fire). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Rev. Christopher Chiaronmonte felt the City ordinance banning panhandling in City parks is not defensible.

Ms. Grace Curry asked Council to consider that any time there is to be a change in city ordinances that impact all neighborhoods, that there be a broad public notice given for the purpose of informing the residents and for soliciting their input. Mayor Bellamy asked that the City Manager instruct the Neighborhood Coordinator and the Planning & Development Director of this request and how we might address the issue.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 11:09 p.m.

Keisha Lyse
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – January 9, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: Councilman Bryan E. Freeborn

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF DAVID HERBERT

On behalf of the City of Asheville, Mayor Bellamy thanked Mr. David Herbert who has led the citizen effort in providing bus service to the Social Security Administration facility by working with City staff, writing letters to our legislative delegation and by providing free rides to the Social Security facility.

B. PROCLAMATION PROCLAIMING JANUARY 2007 AS "RADON AWARENESS MONTH"

Councilman Davis, liaison to the WNC Regional Air Quality Agency, read the proclamation proclaiming January 2007, as "Radon Awareness Month" in the City of Asheville. He presented the proclamation to Ms. Ashley Featherstone, Engineering Supervisor of the WNC Regional Air Quality Agency, who briefed City Council on some activities taking place during the month.

C. RECOGNITION OF THE WORKSITE PHYSICAL ACTIVITY INCENTIVE PROGRAM

City Wellness Coordinator Destiny Mattson and County Wellness Coordinator Susan McDonald explained the Worksite Physical Activity Incentive Program which goal is to make activity a habit. The Moveabout Program begins March 5, 2007, through May 14, 2007. Mayor Bellamy encouraged participation in this program.

D. ANNOUNCEMENT

On behalf of City Council, Mayor Bellamy thanked Traffic Engineer Anthony Butzek for his work with the City of Asheville. Mr. Butzek will be moving to Portland, Oregon, to accept another position. She also welcomed Mr. Ken Putnam who will become the City's new traffic engineer.

II. CONSENT AGENDA:

At the request of Councilwoman Cape, Consent Agenda Item "D" was removed for discussion.

At the request of Councilman Mumpower, Consent Agenda "E" was removed for an individual vote.

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON DECEMBER 12, 2007**

B. **RESOLUTION NO. 07-01 - RESOLUTION AUTHORIZING THE CITY CLERK TO PUBLISH A NOTICE REGARDING THE EXCHANGE OF EXCESS RIGHT-OF-WAY ON HAYWOOD STREET FOR RIGHT-OF-WAY ACROSS REAL PROPERTY LOCATED ON ROBERTS STREET**

RESOLUTION BOOK NO. 30 – PAGE 177

C. **RESOLUTION NO. 07-02 - RESOLUTION DIRECTING THE CITY CLERK TO ADVERTISE AN OFFER OF PURCHASE FOR UPSET BIDS REGARDING PROPERTY ON MCDOWELL STREET IN THE EAST RIVERSIDE REDEVELOPMENT PROJECT**

Summary: The consideration of a resolution directing the City Clerk to advertise an offer of purchase for upset bids regarding property on McDowell Street in the East Riverside Redevelopment Project.

The bid of CHSA Building Partnership (CHSA) in the amount of $17,400 for the purchase of Disposal Parcel 152 of the East Riverside Redevelopment Project, (PIN 9648.10-35-6031), is not less than the tax value of $17,400.

Disposal Parcel 152 is a 0.08 acre rectangular shaped lot on the east side of McDowell Street about 450 feet south of the intersection with Choctaw Street. The land slopes upward from McDowell Street to the rear line. It is covered with natural vegetation consisting of grass, small trees and brush. The parcel is zoned Institutional and the character of the surrounding neighborhood is primarily medical offices. The highest and best use for the subject parcel would be assemblage with an adjoining parcel.

CHSA owns the adjoining property where the medical offices of Carolina Hand Surgery Associates, P.A. are located. The proposal would combine Disposal Parcel 152 with property owned by CHSA for potential expansion of the existing development.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. G. S. 160A-269.

Pros:

1. The sale will be at fair market value as established by the tax appraisal and the upset bid process.
2. It will return property not needed for public use to the tax rolls.
3. It will transfer responsibility for maintenance to the private sector.
4. It will facilitate expansion of existing development.

Cons: There is no negative impact.

City staff recommends adoption of a resolution directing the City Clerk to advertise an offer of purchase for upset bids regarding property on McDowell Street in the East Riverside Redevelopment Project.

RESOLUTION BOOK NO. 30 – PAGE 176

D. RESOLUTION OF INTENT TO PERMANENTLY CLOSE A PORTION OF VANCE GAP ROAD AND SET A PUBLIC HEARING FOR FEBRUARY 13, 2007

This item was removed from the Consent Agenda for discussion.

E. SECOND READING OF ORDINANCE NO. 3413, AN ORDINANCE TO CREATE AN HISTORIC PRESERVATION OVERLY DISTRICT FOR THE ST. DUNSTAN'S NEIGHBORHOOD

This item was removed from the Consent Agenda for an individual vote.

F. RESOLUTION NO. 07-04 - RESOLUTION AMENDING THE MANAGEMENT AGREEMENT WITH URTV, INC.

Summary: The City entered into a Management Agreement with URTV Inc. in November of 2004 and said agreement will expire in November, 2009. URTV, Inc. receives public funding and this Board feels all URTV Inc. Board of Director's meetings should be open to the public. The City and the Board of Directors for URTV have agreed to amend the Management Agreement between the parties dated the 23rd day of November, 2004, to include the requirement that URTV will comply with the North Carolina Open Meetings Law, set forth in Article 33C of the North Carolina General Statutes Sections 143-318.10 et seq.

Councilwoman Cape noted that the URTV Board has been conducting themselves in an open fashion and this action is to amend the agreement to formally include that provision.

RESOLUTION BOOK NO. 30 – PAGE 180

G. RESOLUTION NO. 07-05 - RESOLUTION AMENDING CITY COUNCIL'S RULES AND PROCEDURE REGARDING THE ORDER OF BUSINESS

Summary: The consideration of a resolution amending Council's Rules of Procedure to provide a place on the agenda for the consent agenda, and for certain presentations and reports.

The proposed amendment to Rule 8 of Council's rules of procedure changes the Order of Business (the agenda) in two ways:

1. Adds a place on the agenda for the Consent Agenda, reflecting Council's long practice. Placing items on a consent agenda has long been specifically permitted by Rule 5, but the Order of Business has somewhat curiously never listed the Consent Agenda in the Order of Business.

2. Adds an item for Presentations and Reports. Since Council will no longer be holding regular worksessions, a place was needed on the agenda for presentations and reports (such as committee reports) that were previously given at worksessions.

The placement of these items on the Order of Business is a suggestion, Council may want to consider scheduling Presentations and Reports after the Consent Agenda, rather than before, as many City staff with items on the consent agenda attend the Council meetings only for that purpose, the Consent Agenda usually does not consume much time, and seating is frequently at a premium.

If Council desires to make this amendment to the City Council's Rules of Procedure, adoption of the resolution is recommended.

It was the consensus of City Council that the Agendas contain the following Order of Business: Proclamations; Consent Agenda; Presentations and Reports; Public Hearings; Unfinished Business; New Business; Other Business; Informal Business and Public Comment; and Adjournment.

RESOLUTION BOOK NO. 30 – PAGE 181

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS PULLED OFF THE CONSENT AGENDA

RESOLUTION NO. 07-03 RESOLUTION OF INTENT TO PERMANENTLY CLOSE A PORTION OF VANCE GAP ROAD AND SET A PUBLIC HEARING FOR FEBRUARY 13, 2007

Summary: The consideration of a resolution of intent to permanently close a portion of Vance Gap Road and set a public hearing for February 13, 2007.

N.C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Brian Cauthren on behalf of Zealandia Holdings, LLC, has requested the City of Asheville permanently close a portion of Vance Gap Road that runs between their properties (also known as Old Chunns Cove Lane).

The Public Works Department staff has researched and determined this portion of Vance Gap Road is not City maintained. Closure of this portion of street will not deny any of the adjoining property owners reasonable means of ingress and egress as Zealandia Holdings, LLC owns all adjoining property along the portion requested to be closed.

Pros:

- The closure allows the property to be used to its maximum potential.
- There will be no future compromise of ingress/regress to other property

Cons:

- In consideration of the location of the unopened right-of-way, staff can find no potential challenges regarding the closure of the alley.

City staff recommends that City Council adopt the resolution setting a public hearing for February 13, 2007, to close a portion of Vance Gap Road.

At the suggestion of Councilwoman Cape, it was the consensus of City Council to have City staff include the Greenway Commission in the review process of all potential road and right-of-way closings prior to City Council consideration.

Councilwoman Cape moved for the adoption of Resolution No. 07-03. This motion was seconded by Councilman Mumpower and carried unanimously.

E. SECOND READING OF ORDINANCE NO. 3413, AN ORDINANCE TO CREATE AN HISTORIC PRESERVATION OVERLAY DISTRICT FOR THE ST. DUNSTAN'S NEIGHBORHOOD

Mayor Bellamy said that the public hearing on this matter was held on November 28, 2006, and because the ordinance failed to reach the 2/3 vote of the full Council, the matter needed to be brought back for a second vote.

On December 12, 2006, a motion to continue this matter until January 9, 2007, was unanimously approved.

Councilman Mumpower felt that when the City creates an historic preservation overlay district we are providing special privileges to a neighborhood and at the same time we are exerting greater controls over other people's use of their properties. He feels like this is a heavier hand and an administrative responsibility that doesn't serve the City strongly.

Councilman Newman was concerned about the increased cost of construction to build homes in this historic overlay area. He asked if an analysis could be performed on what it would cost to build a home in the historic overlay district vs. building the same home in an area that did not have an historic overlay district. He would like to have that analysis information in future requests for this type of overlay.

Mayor Bellamy noted that the City Council Planning & Economic Development Committee (PED) will be reviewing the Unified Development Ordinance and any ordinances that would hinder affordable housing and suggested this issue be addressed by that Committee.

Councilman Davis, Chair of the PED, felt that this action should be postponed in order to allow the PED Committee time within which to review the matter.

Councilwoman Cape was supportive of the study, but noted that this is the community asking for the overlay.

Councilman Newman's major concern is the bigger policy issue for the community in that we have a lot of old unique neighborhoods that might have the potential to qualify for this overlay.

Councilman Mumpower moved to continue the second reading of Ordinance No. 3413 until such time as the PED Committee has had an opportunity to perform their work relating to ordinances that hinder affordable housing. This motion was seconded by Councilman Davis and carried on a 5-1 vote, with Vice-Mayor Jones voting "no."

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE PERMIT FOR BROADWAY MIXED-USE PHASE II LOCATED AT 237 BROADWAY STREET FOR A DEVELOPMENT WHICH WILL INCLUDE RESIDENTIAL, OFFICE, RETAIL USES AND A RESTAURANT

ORDINANCE NO. 3429 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR BROADWAY MIXED-USE PHASE II LOCATED AT 237 BROADWAY STREET FOR A DEVELOPMENT WHICH WILL INCLUDE RESIDENTIAL, OFFICE, RETAIL USES AND A RESTAURANT

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy explained that this public hearing was originally scheduled on December 12, 2006, but was continued to this date. She then opened the public hearing at 5:43 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of the issuance of a conditional use permit for Broadway mixed-use Phase II located at 237 Broadway Street for a development which will include residential, office, retail uses and a restaurant.

The project site is located on Broadway Street at the corner of Elizabeth Street. The development consists of four parcels totaling 1.38 acres, all zoned NCD (Neighborhood Corridor District). Properties surrounding the site include a mix of residential, commercial and warehouse uses, zoned NCD along the north, east and south sides of the property, and a mix of residential uses, zoned RM-8 to the west of the site (Attachment to City Exhibit 3 - Aerial Map).

The proposed project is being reviewed as a Level III project due to the timing and permitting of Phase One, known as The Pioneer Building located across the street at the corner of Broadway and Bordeau Street. Phase One of the development, also owned by Boulevard Development Group was reviewed as a Level II project and is currently under construction. The ordinance requires that properties developed by the same owner within a 3 year period and also located within 1,500 feet of the proposed site are evaluated as one development. The Pioneer Building and the proposed development meet the size threshold together for a Level III review. (Refer to Section 7-5-8(a)(1)b.)

The main, Phase II project proposes two mixed use buildings that are located on the periphery of a structured courtyard and plaza area. This area will serve as the primary open space for the development providing a social gathering area with outdoor seating and other pedestrian amenities. The center plaza area between the two buildings leads to a stairway that provides a connection to the planned Reed Creek Greenway that sits below the development.

- Building A-1 proposes a footprint of 11,942 square feet, is 4 stories in height and consists of approximately 11,232 square feet of retail on the first floor, 10,087 square feet of office on the 2nd floor, and 19,486 square feet of residential use consisting of 18 units on the 3rd and 4th floors. (Five of the units will be 700 square feet or less and with two units meeting the affordable housing standard.)
- Building B-2 proposes a footprint of 11,931 square feet, is 4 stories in height and consists of approximately 6,675 square feet of retail and 5,245 square feet of office on the first floor, and

32,214 square feet of residential use consisting of 26 units proposed on the remaining 3 floors. (Seven of the units will be 700 square feet or less with three units meeting the affordable housing standard.) (Attachment to City Exhibit 3 - Site Plan)

The development proposes a total of 78 parking spaces that are provided in an underground parking deck that is accessed from Elizabeth Street; a secondary egress is proposed onto Broadway at the southern end of the property. The parking deck area also provides for two off-street loading bays and a disposal area.

Reed Creek, a tributary of the French Broad River flows along the west side of the property. The developer has been working with the City's Parks and Recreation staff to allow a portion of the property to be used as a section of the Reed Creek Greenway. This area of the site is adjacent to residentially zoned land and requires the equivalent of a 20-foot Type B buffer. The developer has asked that staff consider an alternative to the buffer requirement in this area in order to ensure the safety of pedestrians using the greenway and to also provide an effective buffer to the adjacent residentially zoned properties.

The first phase project, the Pioneer Building, also a mixed use development is permitted and under construction. The project consists of 13,106 square feet of commercial space (retail and office) and twenty two residential units including six units at 700 square feet or less and two units meeting the affordable housing standard. In addition, a public courtyard/ plaza area and parking deck are also part of this project. (Attachment to City Exhibit 3 - Elevation Drawings)

Both of these projects were reviewed and approved by the Asheville Downtown Commission where flexible development standards was granted to allow an increase in building height to a maximum of 53-feet. The Pioneer Building Phase One was also granted flexible development standards for open space and an increased setback along Broadway Street.

On October 2, 2006, the Asheville Technical Review Committee (TRC) approved the project subject to the conditions outlined in the staff report. Most of the conditions are relatively minor and will be addressed in detail upon final submittal of plans to the TRC following Council decision.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements once the conditions enumerated by the Technical Review Committee are met. The project must meet the technical standards set forth in the UDO, the City Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The applicant is incorporating the slope of the property in the design of the proposed building. The majority of grading will occur along the west side portion of the property where the topography drops towards the creek. In order to minimize excessive

disturbance to the entire site an underground parking deck is proposed to serve the development rather than creating surface parking. The developer is also making an effort to minimize disturbance near the creek where the greenway connection is proposed. Any vegetation removed in this area will be replaced by required buffer plantings.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
These two projects proposed along the Broadway corridor will likely spur additional development and promote vitality in the area by bringing in a mix of uses and increased density and by including a number of pedestrian amenities to enhance the livability of the entire area. An improved streetscape, sidewalks and greenway connection will likely have a positive affect on the surrounding area by increasing the value of adjacent or abutting properties.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
Both projects meet the goals and intent of the NCD district. Each project is intended to enhance and fit in with the surrounding area providing a neighborhood scaled development designed for the pedestrian. The building façades, as viewed from Broadway, incorporates window and door openings, a mix of building materials, and other building fenestration treatments to assist in reducing the overall size and scale of the building making it more pedestrian-oriented. Each project offers outdoor courtyard and plaza areas that are well landscaped providing an enhanced streetscape and attractive outdoor seating areas. Landscape plantings will be provided along the greenway where adjacent to the residentially zoned property. Staff will work with the developer, Parks and Recreation staff and the Police Department to ensure that the type and location of plantings provided in this area offers a safe environment for the pedestrians using the greenway and also provide an effective buffer to adjacent properties.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The City's smart growth initiative, contained in the comprehensive plan, encourages mixed use developments and compatible, higher density commercial and residential development. The plan notes that new-urbanist projects are encouraged to provide greater densities and a mix of uses along commercial corridors where the infrastructure is in place to support the development. This type of mixed-use development provides a pedestrian friendly environment and supports public transportation.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
Development on the site will require final technical approval from all applicable departments including representatives of the Water Resources, MSD, Engineering, Fire and Building Safety Departments. The conceptual plans for the development have been reviewed by the City's TRC, which found that adequate services and facilities are available for the proposed development. Several transit stops are located within very close vicinity to the project sites.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

The project has been reviewed by the City's Traffic Engineer and has determined that the project is not expected to create a traffic hazard or cause undue traffic congestion.

On November 1, 2006, the Asheville Planning and Zoning Commission reviewed the project and made a positive recommendation (7-0 vote) to approve the project subject to the conditions outlined by staff. They also granted a variance (6-1 vote) that allows a reduction in the amount of window fenestration on Building 1-A (along Elizabeth Street) from 40% to 21%.

Considerations:

- To date staff has not received any negative comments or opposition to this project.
- These two projects have the potential of being positive catalysts for other development opportunities along the Broadway Corridor.
- Several transit stops are located within walking distance to both project locations.
- The two projects together will provide 7 (seven) affordable housing units and 18 units that are 700 square feet or less.
- The Phase II project provides the City with a potential section of the Reed Creek Greenway.
- The project addresses many of Council's adopted Goals and Visions for Asheville.
- The building, although designed to work with the topographic issues along Elizabeth Street, creates the need for use of a large retaining wall along the sidewalk where pedestrian activity and interaction is expected.

Both projects meet the goals and intent of the Neighborhood Corridor District. Each project is intended to enhance and fit in with the surrounding area providing a neighborhood scaled mixed-use development that will promote vitality and increase pedestrian activity in the area.

Staff recommends approval of the project subject to the following conditions:

1. The project shall comply with all conditions outlined in the TRC staff report.
2. The developer shall work with City staff in providing an effective and safe landscape buffer between the development, greenway and adjoining residential properties along the west side of the development.
3. The applicant shall continue working with the City's Parks and Recreation staff to determine the final location for the section of Reed's Creek Greenway proposed with this project.
4. All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets.
5. All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the final site, landscape and grading plans.
6. The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may require reconsideration of this request.
7. If determined necessary, this project may be reviewed by the TRC prior to issuance of any building, grading or zoning permits.

Mr. Kevin Kerr, developer, spoke in support of the permit in that their vision is to create an urban pedestrian friendly development with as much green space as possible.

Mr. Mitchel Sorin, architect, said that the concept is that the buildings interrelate around the courtyard and for the site to interact with the greenway. He encouraged Council to look at the bigger picture and encourage the N.C. Dept. of Transportation to allow on-street parking because the pedestrian oriented environment between I-240 and Chestnut Street is a lot different than Chestnut Street going north.

After rebuttal, Mayor Bellamy closed the public hearing at 5:54 p.m.

In response to Councilwoman Cape, Ms. Hamel explained the landscape buffer, especially for the residential area behind the development. She said that regarding the buffer, where the greenway is proposed, they have been approached by the developer to work with them and the Police Department to look at how to make landscaping more safe. The developer has asked to sit down with the Police, Planning and Parks & Recreation Departments to look at how they can accommodate the Type-B buffer required, ensuring that the type of plantings and species that are selected also provide a safe environment for the people using the greenway.

Upon inquiry of Councilwoman Cape about the dumpsters location, Ms. Hamel said that they are located above the greenway area behind the retaining wall. Ms. Hamel also noted that the location of the greenway on the site plan is the initial proposed location and that the developer will work with the Parks & Recreation Department for the final greenway location. Mr. Kerr also responded that regarding the dumpster, they have designed an enclosed area which will be a compactor and also a recycling area and will not be visible from the greenway.

In response to Councilwoman Cape about the retaining wall, Mr. Chris Eller, civil engineer, said that the wall is a small retaining wall to accommodate the grade change.

Mayor Bellamy felt it was important that the Elizabeth Street residents not be in a similar situation as the residents on Maxwell Street regarding a dumpster, noise and landscaping. And, to accommodate that, we may need a smaller greenway, higher wall, different vegetation, more trees, etc.

In response to Mayor Bellamy, Councilman Mumpower suggested a condition that staff create assurances that noise and other neighborhood intrusions are appropriate minimized by this project. The developer acknowledged that he would agree to the condition.

Councilwoman Cape suggested a thin green greened buffer around the dumpster, recognizing the neighborhood behind the project.

In response to Councilman Newman, City Manager Jackson said that there has already been a preliminary analysis done about on-street parking on Broadway and the N.C. Dept. of Transportation has been advised about the City's interest in proceeding with this. He said staff will present Council with some design principles in approximately two weeks.

When Councilwoman Cape asked if the City could take any action with the fairly blighted building next to the project, City Attorney Oast said that we do have the right to ask the property owner to paint the graffiti off the building and if there are any building code violations, we can advise the property owner.

Councilman Mumpower moved for the adoption of Ordinance No. 3429, granting a conditional use permit for Broadway mixed-use Phase II located at 237 Broadway Street for a development which will include residential, office, retail uses and a restaurant, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) The developer shall work with City staff in providing an effective and safe landscape buffer between the development, greenway and adjoining residential properties along the west side of the development; (3) The applicant shall continue working with the City's Parks and Recreation staff to determine the final location for the section of Reed's Creek Greenway proposed with this project; (4) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (5) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the final site, landscape and grading plans; (6) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may require

reconsideration of this request; (7) If determined necessary, this project may be reviewed by the TRC prior to issuance of any building, grading or zoning permits; and (8) Staff create assurances that noise and other neighborhood intrusions are appropriate minimized by this project. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 201

B. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR THE BUNCOMBE COUNTY PARKING GARAGE LOCATED ON WOODFIN STREET, FOR A PROPOSED SEVEN STORY GARAGE AND APPROXIMATELY 245,000 SQUARE FEET IN SIZE

ORDINANCE NO. 3430- ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE BUNCOMBE COUNTY PARKING GARAGE LOCATED ON WOODFIN STREET, FOR A PROPOSED SEVEN STORY GARAGE AND APPROXIMATELY 245,000 SQUARE FEET IN SIZE

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:15 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of the issuance of a conditional use permit for the Buncombe County parking garage located on Woodfin Street for a proposed seven story garage and approximately 245,000 square feet in size (City Exhibit 3 - Location Map).

Mr. Glines said that the Comprehensive Plan notes the need for structured parking in a variety of locations in the downtown area. Parking structures are encouraged because of their efficient use of land and improvement over surface parking lots. Garage structures can be less disruptive to the pedestrian environment than the same number of parking spaces provided on surface lots fronting on City streets. Parking structures are encouraged to be wrapped in retail or office uses. The Buncombe County proposal is locating the garage internal to the block and would maintain the land by the street for a future infill building.

The Strategic Operating Plan lists the goal of encouraging public-private partnerships to address downtown parking needs. The proposal by the County will serve some of the need for parking. As proposed the majority of the spaces will be reserved for County workers during the week. For a smaller number of spaces on week days, after hours and weekends, the deck will be available for public parking.

The proposal for review is for a parking garage located adjacent to the Health Department. This parcel is a through lot with frontage along both College Street and Woodfin Street. The proposed garage will be located in the 'L' of the Health Department Building using what is currently a surface lot. The 650 spaces will be used primarily for Buncombe County employees. But some limited number of spaces will be available for public parking. It may be expected that after hours the deck would be available to downtown visitors or for special events. The garage may serve an important role in providing parking during these times

The site plans provided show access to the garage from both Woodfin Street and College Street (City Exhibit 4 - Site Proposal A). The access point along Woodfin Street has been the subject of much planning and design from the County's design team and staff and City staff. The optimal plan would be to have the Woodfin Street exit align with Central Avenue through an improved signalized intersection (City Exhibit 5 - Site Proposal B). To do this, access will be needed from the Renaissance Hotel property. Both City and County staff agree that this is the optimal alignment. The Renaissance Hotel has a driveway and loading dock along this property line. Staff recommends that if the City is able to secure use of the hotel property for the stated purpose then Buncombe County would construct the intersection improvements and provide the traffic signal. The back up plan (and the original submittal) will be that a driveway is used for garage access along Woodfin Street at its current location (offset from Central Avenue). Although traffic will function at Woodfin Street with the driveway, there could be some difficulty making a left turn at the afternoon peak period. On the other side of the garage, there will also be a driveway provided along College Street. This driveway would allow right-in / right-out only access onto College Street.

The garage structure is not located directly along the street. It is setback from College by over 100 feet (Attachments to City Exhibit 3 - Views from College and Woodfin Streets) (City Exhibit 6 - View from Green; City Exhibit 7 - Perimeter Trellis). From Woodfin Street the garage is wrapped by the Health Department Building. The area in front of the garage along College Street will be used for a driveway access to the garage and for a green space in front of the entrance to the Health Department. Staff would like to consider the garage proposal as a two-phase proposal. The 'Phase One' of the project will be the garage and green space. The 'Phase Two' portion will be a building to be located along College Street in the 'place holder' green space. This future building will provide County office space expansion and provide an active use along the street.

The Downtown Commission reviewed the design of the structure and approved it at their November 10, 2006, meeting. They noted that the site on the internal area of a block is the ideal location for the garage use since it is close by without over powering the street or nearby buildings. The Downtown Commission did support the concept that the green space would be used at a future date for a building site and they recommended some public art at the College Street entrance to the garage.

This project is a conditional use permit (CUP) because of the scale of the project and because it is a governmental use located in the Central Business District. In addition to the seven standards used to evaluate CUP projects, several additional standards are used to review governmental uses in the Central Business District. The conditional use standards apply to this review as well as the additional requirements for governmental uses located in the Central Business District.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

330

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
The proposal is being reviewed for safety by the reviewing agencies including City and Buncombe officials.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
The site is an infill site using a paved parking lot. This use of the lot for a parking garage is an appropriate use of the lot given the context in the downtown area of the city.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
The garage is expected to be a benefit to nearby uses and the downtown area. Although during the week the garage will be used mostly by County workers but evenings and weekends the garage could be used by the public which should be a benefit to nearby uses.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The garage will be out of view for the most part by the Health Department Building. Along the edges of the building trees will provide additional screening. The site for the garage in the interior of the block provides a buffer by distance and reduces the massing and bulk of the structure.

5. **That the proposed use or development of the land will generally conform to the *comprehensive plan, smart growth policies, sustainable economic development* strategic plan and other official plans adopted by the City.**
The need for additional structured parking has been identified and discussed for some time. Partnerships to provide this parking have been identified as a Strategic Plan goal. Although the City of Asheville is not directly involved in this project it fits in well with these goals and plans.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
Being located in the downtown area, infrastructure is in place to provide service to this use.

7 **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The project is being constructed to better handle the existing parking needs generated by the County facilities. The designers of the project are working to mitigate any traffic congestion created by patrons exiting the garage at the afternoon rush hour. The parking need exists already and this project is not expected to cause undue traffic congestion or create a traffic hazard.

Section 7-16-2(d)(13) provides several additional conditional use findings that government uses located in the Central Business District must meet:

- **The proposed location for the use or building will not unduly or unreasonably restrict the availability of key land for private development.**

The garage is appropriately located on property already owned by Buncombe County and should make other private parcels in the Central Business District available for redevelopment.

- **No alternative location for the building or use exists within areas previously developed for government buildings and/ or uses.**
  This proposal is a redevelopment site on an existing surface lot. This conditional finding is written to encourage location of such uses on exactly this kind of site. The placement of the garage will add value and efficiency to the government uses in the area.

- **If a new structure is proposed in the areas covered by the design review guidelines, the ability of the structure's design to comply with the downtown design review guidelines for new construction shall be a factor in the review of the request. New structures in these areas must substantially comply with the design guidelines as determined by the Asheville City Council.**
  The design for the garage was reviewed and approved by the Downtown Commission at their November 10, 2006, meeting. The structure will be mostly shielded by the Health Department structure and surrounding uses. The drawings and elevations and site plan will become part of the regulating documents if the project is approved.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

This Level III Conditional Use Permit for the Buncombe County garage was recommended 6-0 for approval by the Planning and Zoning Commission at their December 6, 2006, meeting with staff conditions included as requirements. Staff concurs with this recommendation and encourages the Site Proposal B of the shared driveway with the Renaissance Hotel. No members of the public attended to discuss the proposal.

Considerations:

- Parking downtown has been identified as a need for the community.
- The parking garage will allow Buncombe County to consolidate some their facilities and make other property available for other uses.
- The project review team and staff from Buncombe County are working to provide an improved intersection access at Woodfin Street and Central Avenue.

Mr. Jon Creighton, Assistant County Manager of Buncombe County, spoke in support of and the need for this project. The deck will be a positive for Courthouse employees and patrons, people going to City Hall, and downtown patrons. We feel the design will be completed in early April of 2007 and hope to have it completed in summer of 2008.

Mr. Keith Hargrove, architect, summarized the design and site considerations involved in the project. Of the 650 spaces, 66% will be retained for the County and 34% will be revenue generating. He explained how they are attempting for the building to be as efficient as possible.

After rebuttal, Mayor Bellamy closed the public hearing at 6:31 p.m.

Upon inquiry of Councilman Newman about plans for the site of the future building, Mr. Creighton said that there is not a plan at this time but they are trying to preserve that site for future court needs.

All of Council thanked Buncombe County for working with the City on providing parking in our downtown area.

Councilman Mumpower moved for the adoption of Ordinance No. 3430, granting a conditional use permit for the Buncombe County Parking Garage located on 35 Woodfin Street, adopting the proposed plan subject to the following conditions: (1) The project shall comply with all conditions outlined in the Technical Review Committee staff report; (2) The median opening at College and Davidson will be partially closed, allowing left turns only from College to Davidson, blocking other left turn and U-turn movements with final design approved by the City traffic engineer; (3) If the City of Asheville is able to secure the use of land from neighboring property owners to allow the alignment for the shared garage driveway with Central Avenue, then Buncombe County would provide design plans, intersection improvements and the traffic signal meeting City requirements; (4) If the City is unable to provide this access then the County would be able to use the existing driveway onto Woodfin Street but make improvements to provide dual exiting lanes with the final design approved by the City traffic engineer; (5) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (6) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department; and (7) At the direction of the Planning Director, this Project will be reviewed by the TRC prior to issuance of any building and grading permits." This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 208

C. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING FOR PROPERTY LOCATED AT 723 FAIRVIEW ROAD FROM RS-8 RESIDENTIAL SINGLE FAMILY HIGH DENSITY DISTRICT TO OFFICE II DISTRICT/CONDITIONAL ZONING FOR A PROPOSED OFFICE BUILDING INCLUDING SHARED PARKING WITH A CITY RECREATIONAL FACILITY

At the request of City staff, Councilman Mumpower moved to continue this public hearing until January 23, 2007. This motion was seconded by Councilman Davis and carried unanimously.

D. PUBLIC HEARING TO CONSIDER THE INTENT TO PURCHASE 8.45 ACRES ON OR NEAR HUNT HILL PLACE AND ARDMION PARK DRIVE, HAVING AN ADDRESS OF 56 HUNT HILL PLACE AND BEING KNOWN GENERALLY AS MCCORMICK HEIGHTS

At the request of City staff, who are still negotiating the plan and contractual terms, Councilman Mumpower moved to continue this public hearing until January 23, 2007. This motion was seconded by Councilman Davis and carried unanimously.

E. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO CHANGES TO THE BILLBOARD STANDARDS

Mayor Bellamy opened the public hearing at 6:35 p.m.

City Attorney Oast said that this is the consideration of an amendment to the Unified Development Ordinance to regulate the removal, relocation and reconstruction of qualified signs within the qualified sign overlay. This public hearing was advertised on December 29, 2006, and January 5, 2007.

Back in September of 2004, acting pursuant to a new provision in the general statutes, the City Council adopted amendments to the sign ordinance allowing for removal and relocation

of "qualified signs" within certain designated areas. The relocated signs must comply with certain area, spacing and height limitations, but replacement was otherwise permitted on a sign-by-sign basis.

The proposed amendment would allow for the areas of more than one qualified sign to be combined into one larger sign, as long as the area of the new sign did not exceed the combined area of the signs being replaced. The new sign may also not exceed 380 square feet, which is the limit established for all replacement signs.

The proposed amendment also removes the prohibition on back-to-back signs, but does not otherwise relieve any sign from the spacing and height limitations. It will also allow more than one sign on a pole facing the same direction.

Pros.
- Creates potential for reduction in number of signs, without permitting an increase in the area
- Adds flexibility that may enable more use of the new ordinance
- Does not allow a larger sign to be broken up into smaller ones

Cons.
- Area of some qualified relocated signs may be larger than would have been possible otherwise.

If Council approves of the proposed amendment, Council may adopt it.

Mayor Bellamy closed the public hearing at 6:39 p.m.

In response to Councilwoman Cape, City Attorney Oast agreed that the sign company can get more sign face, but they can't get more square footage.

Upon inquiry of Councilwoman Cape, City Attorney Oast said that electronic billboards are not allowed in our community.

In response to Vice-Mayor Jones, City Attorney Oast said that the City doesn't verify the content of billboards. He said that complaints should be filed with the Consumer Protection Division of the Attorney General's Office.

Throughout discussion, City Attorney Oast responded to various questions/comments from Council. As a result of that discussion, the majority of Council instructed City Attorney Oast (1) for a visual presentation; (2) inclusion of a provision that the square footage cannot be banked; (3) research into a provision that if the sign company takes advantage of this flexibility to move their sign into an area that is more commercially valuable to them that they lose a little of their square footage by a certain percent; and (4) information about the size of standard billboards.

Councilwoman Cape moved to continue this matter until January 23, 2007. This motion was seconded by Vice-Mayor Jones and carried unanimously.

IV. UNFINISHED BUSINESS:

A. BUNCOMBE COUNTY HUMAN SERVICES REPORT

Ms. Mandy Stone and Mr. Jim Holland, with Buncombe County Human Services, said that Buncombe County is looking at a re-organization of human services and appreciated the

opportunity to present this information to the City. At this time, they explained in detail the current and future realities of the program, while adhering to their mission of (1) encouraging independence and self-sufficiency by providing basic care and protection while promoting self-reliance; (2) addressing the current and changing needs of individuals by making efficient use of available resources; (3) responding effectively to needs of individuals and families by providing flexibility in service delivery; (4) maximizing the effectiveness of County services through collaborative planning, development and evaluation of human services programs; and (5) enhancing human services programs through collaboration with community partners.

After Ms. Stone responded to various questions from Council, on behalf of City Council, Mayor Bellamy thanked Ms. Stone and Mr. Holland for their informative presentation.

CLOSED SESSION

At 7:21 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) to establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property on Swannanoa River Road and McCormick Heights by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 160A-318.11 (a) (5); and (2) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; May 1st We Are One America Committee; State of North Carolina; County of Buncombe. The statutory authorization is contained in G.S. 160A-318.11 (a) (3). This motion was seconded by Vice-Mayor Jones and carried unanimously.

At 7:55 p.m., Vice-Mayor Jones moved to recess the closed motion to return to the formal meeting, noting that the closed session would continue at the end of the formal meeting. This motion was seconded by Councilman Mumpower and carried unanimously.

B. RESOLUTION NO. 07-06- RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH REAL ESTATE RESEARCH CONSULTANTS FOR PROJECT MANAGEMENT FOR THE DEVELOPMENT OF CITY-OWNED PROPERTY

Economic Development Director Sam Powers said that this is the consideration of a resolution authorizing the City Manager to enter into an agreement with Real Estate Research Consultants for Project Management Professional Services.

In preparation for development of the City Owned Property Request For Qualifications (RFQ) as per the direction from City Council at its November 21st work session, staff reviewed the qualifications of four firms that specialize in real estate advisement and project management services to public agencies. The firms are located in Baltimore, Memphis, Orlando, and Charlotte. The Charlotte firm was felt to be qualified, but the firm is currently active as a developer in two real estate development projects in Buncombe County, and staff did not enter into discussions with the firm for that reason. After reviewing credentials for the three other firms, contacting references, and telephone interviews with principal staff from the three firms, staff felt that Real Estate Research Consultants (RERC), located in Orlando, Florida, provided the best level of qualifications and experience to assist the City with project management associated with structuring and development of the RFQ process.

Staff has negotiated a preliminary scope of work required to develop and market the RFQ. Additionally we have worked to negotiate a professional services fee for the RFQ portion of the project. The negotiated fee for Phase One is a $55,000 plus expenses based on an hourly

rate contract with a not to exceed clause. Staff will work with the firm in development of a fee structure for respondents in phase two, the RFP process, which would recover some costs.

Timeline (after Notice to Proceed):

Market Scan	January 10-31
Develop and Finalize RFQ document	January 10-31
RFQ marketing and advertisement period	February 1-March 31
Review and Evaluation of Respondent SOQs	March 31-April 30
Invitations for Selected Developer RFPs	May 2007

Pros

- Upfront work by the project manager and staff will create a basis for initial screening and a more directed end submittal by qualified developers.
- The firm has a vast amount of experience in public/private development projects and can provide assistance in expectations about the developer's role in responding to capacity and constraints.
- The firm has a much broader access to potential interested and qualified development teams than the city would have on its own.
- Project management assistance can help structure the RFQ/RFP process to help recover administrative costs

Cons

- City will be required to provide compensation to consultant prior to cost recovery in Phase 2.

Our goal is to (1) achieve best response from national level develop teams with opportunities for local developers to respond and/or team; (2) receive creative responses that meet the goals established by City Council; (3) provide certainty and yield to incent developer interest in participation; and (4) more direction provides better control of expectations and outcome of the process.

The Phase I tasks include (1) establish market and physical framework; (2) criteria development for RFQ; and (3) prepare RFQ describing procedures and criteria.

City staff recommends that City Council adopt a resolution authorizing the City Manager to enter into an agreement with Real Estate Research Consultants for Project Management Professional Services.

Throughout considerable discussion, Mr. Powers and City Manager Jackson responded to various questions/comments from Council, some being, but are not limited to: what specific properties are included in the RFQ and if any of those are properties have current facilities, when will Council receive the information about relocation costs, etc.; are the Real Estate Research Consultants realtors; is there an estimate of what the second phase would cost; is this the process that other communities use to market their properties; is it possible to hire a project development coordinator on a limited basis; and what will happen to the contract if one of the properties is taken off the table.

Councilman Mumpower appreciated the creativity of this initiative, but didn't think the dollars and benefits will compensate for the cost of moving and building new facilities to replace what we have. In addition, some of the things that we are trying to do will put a lot of controls on the people who will come in and develop these properties.

Mayor Bellamy felt that if we are going to put these key City properties out, she wanted someone or some firm accountable consistently throughout the entire process to make sure that the City's interests are protected.

Councilman Davis felt it was a major step to identify the available property, some with strategic goals. At this point we are risking $55,000 for a professional in the area to come back and say these are the items you are looking for and if we are not serious about this, this is the time to back off. If we don't move forward with some of those, we will lose credibility. He thinks we need to take a hard look and say do we really want to market all the available property or are we only interested in developing a couple of properties.

Mr. Powers explained that the consultant brings a level of expertise and a level of doing these types of tasks on a daily basis for multiple clients vs. our ability to do them once in a lifetime. The team that the consultant assembles exceeds our ability to do that in-house and because they do it every day, they know the tricks of the trade and with their negotiating skills with developers, they get the best deal for the client - in this case, the public body. It is very expensive, but if we are successful in getting the kind of end product that Council is interested in seeing on even one of these pieces of property, the fee would pay for itself several times over.

Councilman Newman felt that Council has already given the City Manager direction on the kinds of outcomes we wanted to see, e.g., workforce housing, green building, etc., understanding that every piece of land is not well suited to achieve each of those goals.

When Mayor Bellamy asked when Council would have the opportunity to talk about what they would like to see on each individual property, Mr. Powers said that the first task will be for the project manager to evaluate potential uses based on the input received from Council at their worksession, look at the market feasibility and financial feasibility, evaluate achievability given location and economic thresholds, and evaluate public sector participation.

Mayor Bellamy asked who will be reading the proposals once they are received. Mr. Powers suggested a mix of staff, stakeholders and elected officials. He felt City Council should ultimately determine who they feel is best qualified, with input from the City Manager, to make those evaluations. Staff would determine the criteria involved and what we think are thresholds for evaluation, but the evaluators should be up to Council to decide. Mayor Bellamy felt the proposals should be reviewed by a subcommittee of key people in the community who have experience in what we should look for in taking us down this road.

In response to Mayor Bellamy, City Manager Jackson said that this contract is for Phase I and it takes you to a clear point where we would have to evaluate whether it is something we can take over or come back to Council and ask for them to be retained for Phase II. The alternative to that would be to go to engage them for a turn-key project at a fee base that would be variable with a not-to-exceed amount. That would be through Phase I and Phase II or beyond. You could do a yearly contact and then have it renewable for another year to carry you through. Since this will be a multi-year program, you could structure this as you do a multi-year service agreement.

Mayor Bellamy said that the contract needs to include an out-clause if they are not performing at an appropriate level and requested a log of their work.

Upon inquiry of Councilman Davis, Mr. Powers said that we are proposing to engage them for a scope of work that includes a market scan of the properties we propose and their review of their professional expertise on the achievability of those projects.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Jones moved for the adoption of Resolution No. 07-06. This motion was seconded by Councilman Davis and carried on a 5-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 30 – PAGE 181

C. RESOLUTION NO. 07-07 - RESOLUTION AUTHORIZING CITY STAFF TO BEGIN THE PROCESS FOR A WATER FUND REVENUE BOND IN THE APPROXIMATE AMOUNT OF $35 MILLION

Chief Financial Officer Ben Durant said that this is the consideration of a resolution authorizing city staff to begin the process for a Water Fund Revenue Bond in the approximate amount of $35 million.

City Council requested that staff develop an option for financing the water system Capital Improvement Program (CIP) that uses debt issuance and a lower CIP fee.

Consultants previously recommended that the City invest at least $66 million into the water capital improvements programs over a six year period to begin addressing the water system's infrastructure needs. Initially, the City proposed to fund this investment through a six-year pay-as-go financing strategy. Based on further direction from Council, staff analyzed the option of combining a pay-as-go financing strategy with debt issuance. As a result of this analysis, staff has determined that the City can fund a portion of the $66 million capital improvements program with $35 million in revenue bond issue which must be approved by the North Carolina Local Government Commission (LGC) prior to any bond issuance. The LGC requires that design and construction bids be obtained prior to any bond issuance taking place.

The schedule for design, construction cost bids, LGC approval is:

1. Design of projects: March 1, 2007 – August 31,2007
2. Construction bids: September 1 – September 30, 2007
3. LGC approval: October – November, 2007

Staff will be coming back to Council concerning the CIP fee charges after approval by the LGC for revenue bond financing.

PRO: The Water Fund has sufficient debt capacity for a $35 million revenue bond issue.

CON: The annual debt service payments from a bond issue will become a fixed cost in the operating budget that could potentially limit the water fund's operating flexibility in addressing declining revenues resulting from the loss of major water system users.

Staff recommends adoption of a resolution authorizing city staff to begin the process for a Water Fund Revenue Bond in the approximate amount of $35 million.

When Councilwoman Cape asked what is the projected cost of the financial feasibility study, Mr. Durant said that the consultants would be part of the financing team and that cost would be negotiated when we send out the Request for Qualifications. He would, however, look at prior financings and provide Council with a ballpark figure.

Councilman Mumpower felt that we should wait to resolve our legal dilemma with our state legislators over the Water Agreement prior to prior to beginning this process.

In response to Councilwoman Cape, City Attorney Oast said that the money for the financing team comes from the revenue bond proceeds.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Jones moved for the adoption of Resolution No. 07-07. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 183

D. LEGISLATIVE AGENDA UPDATE

City Attorney Oast said that this is a continuation of discussion begun in November of 2006 of legislative initiatives and requests for potential action during 2007 session of North Carolina General Assembly

At its November 9, 2006, meeting, Council began initial consideration of its legislative agenda for the 2007 session of the N. C. General Assembly. The purposes of that report were to review legislative action from last year, and to begin considering initiatives or requests for 2007. This report will provide Council with additional information as to some matters, focusing on items appropriate for action at the State level, and suggest some topics for consideration of legislative action.

A. Communication with legislators. While the City Council and members of the delegation do not always agree with each other, members of the delegation that he has spoken with have emphasized the need and desirability for better and more frequent communication. One member of the delegation has suggested that Council schedule a meeting to which the local delegation is invited. The 2007 session begins on January 24, and if such a meeting is to occur it will be easier to schedule before the session begins, when the legislators' duties require their presence in Raleigh. A special meeting for this purpose would be appropriate, if Council desires. However, such a meeting could be scheduled at any time, and visits to Raleigh and communication via other means is invited. Council's retreat is now scheduled for January 19-20, which permits a discussion of legislative proposals prior to the convening of the session, and this may present an opportunity – however limited – for discussions with members of the delegation.

B. Bill submission deadline. The deadlines for getting proposed legislation to the legislature's bill drafting staff and for introduction are established by each house after the session convenes. Although that exact deadline cannot be predicted, if the past long sessions are any indication, these deadlines will probably be in mid-March. However, there is always a flurry of activity as the deadlines approach, and early submission of proposals is encouraged and appreciated.

C. Legislative initiatives by other bodies.

1. Chamber of Commerce. At its meeting on December 18, 2006, the Legislative Task Force of the Asheville Area Chamber of Commerce adopted the draft legislative agenda for the Chamber. This agenda was adopted by the Chamber's Executive Committee on December 21, and is scheduled for action by the Chamber Board on January 12. The Council can review this document for items that the City can lend its support to.

2. League of Municipalities. The November 2006 Staff Report attached a copy of the N.C. League of Municipalities' legislative agenda, adopted in October, and review of that agenda is encouraged as well.

D. City of Asheville legislative agenda for 2007.

1. Prior requests affecting Asheville. As to Council's initiatives of last year, several items specific to Asheville were requested, but not acted on. These include repeal of the Sullivan Act and establishment of a funding source for the Asheville Civic Center. At Council's direction, similar action will be requested again this year. However, establishing a funding source for the Civic Center may be an appropriate topic to discuss with the local delegation before action is requested. The delegation has indicated that they would like to see the plans for the Civic Center more fully developed, and be more involved in local discussions, before establishing a funding source.

   It should be noted that the delegation did introduce legislation and obtain action on our request for annexation of some property near the airport, and settling the annexation/utility franchise tax issue with Progress Energy.

2. Prior requests for action of general interest. Council also requested action on some matters not specific to Asheville. At Council's direction, action will be requested again this year as to items with respect to which action was not taken, or with respect to which action was taken, but not as requested by Council. These items include:
   - Land for Tomorrow initiative
   - Increase funding for criminal justice
   - Increase in the minimum wage
   - Review of child care reimbursement amounts for Buncombe County
   - Support campaign funding, reform to allow local grants to implement public financing of local elections.
   - Revise State tax laws relative to the homestead exemption for elderly homeowners

3. New requests (general). Council has recently expressed interest in several other matters. For the most part, these are matters that may be more appropriately addressed by general rather than local law, but have been discussed at the State level, and Council may wish to take an official position on one or more of them. These include:
   - Strengthening criminal laws dealing with sexual predators, especially as related to children
   - Obtaining legislation to strengthen the City's ability to regulate development on steep slopes, including transfer of development rights
   - Obtain stronger legislative authority to encourage the provision of affordable housing
   - Obtain stronger legislative authority to encourage environmentally sensitive design
   - Obtain stronger legislation to deal with illegal immigration at the local level (e.g., ability to deny business licenses, other permits)
   - Obtain stronger legislative authority for regulation of trees and vegetation

4. New requests (local). Clearly of local concern are some annexation issues with respect to which legislation may be necessary:

- Renew the request for action to allow for voluntary annexation of properties that may not otherwise quality for voluntary annexation due to their proximity to other incorporated municipalities. This would address the recurring situation with the area near the airport.
- Annexation of some isolated parcels between Asheville and Woodfin, near the UNC-A campus.

5. Issues for further research. Council or staff may become interested in legislative initiatives in other areas, and whether those initiatives would be of benefit to Asheville. One such initiative is described below. Council may learn of others. Further research or investigation on such items can be performed at Council direction.

   - Establish authorization and funding for a program to allow for enforcement of City's "quality of life" ordinances (noise, solicitation, junk vehicles, minimum housing, etc.), similar to existing programs in other N.C. cities.

The foregoing summary constitutes a beginning point for Council discussion and direction. There is no requirement for Council to take action before the General Assembly convenes, but action should be taken soon enough as to allow for timely submission to the local delegation.

This matter is before Council for further discussion and/or direction as appropriate. Once the legislative action items have been settled on, a resolution will be prepared, to be supplemented with supporting materials and transmitted to members of the delegation.

Vice-Mayor Jones wanted to be very supportive of the County's needing help in the human services area, but pointed out that an item on the Chamber's priorities is to provide critical Medicaid relief for North Carolina counties and increased state funding for payments to Medicaid providers. She was concerned that that proposal might potentially harm municipalities. In addition, in the League's priorities there is a statement that the League will seek additional dedicated funding for affordable housing. There is a positive conservation beginning regionally about some local opportunities and she wanted to make sure that is included, in particular the real estate transfer tax for helping our community in affordable housing and construction. Regarding the homestead exemptions, she would like that clarified to read "Expand eligibility for homestead exemptions for elderly homeowners". Regarding living wages, if given the opportunity through how the City collects business privilege tax, would the City be able to give a rebate back to businesses in Asheville that provide a living wage as an incentive to pay their people a living wage.

Councilman Mumpower said that there is a continued problem with a delay in our State Bureau of Investigation lab that was supposed to be resolved last year, but still has not been resolved. It takes approximately 7 months by the time you send a drug analysis off until you get it back, which dramatically delays our ability to prosecute. It was the consensus of Council to ask staff to consult with the Police Chief about any weak links in the State support system that we might highlight, noting the delay with the State Bureau of Investigation lab.

Councilman Newman said that Council has said in the past that we would like a revenue source for the Civic Center but don't want that to be an increase in sales tax. In addition, he wondered if the City should send a letter to the Land for Tomorrow State Study Commission stating that City Council has endorsed the Land for Tomorrow Initiative. Finally, he said that the current State policy regarding the homestead exemption gives property tax relief for lower income senior citizens. Other states have a much broader policy about giving tax relief not only for lower income senior citizens, but structuring property taxes in a way to give relief to all lower income

residents and middle-class families as well. We should encourage our legislators in North Carolina to look at.

Mayor Bellamy said that this item will be on the City Council's retreat agenda and each request will be voted on separately.

V. NEW BUSINESS:

A. RESOLUTION NO. 07-08 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A WHOLESALE WATER CONTRACT WITH THE CITY OF HENDERSONVILLE, N.C.

City Manager Jackson said that this is the consideration of a resolution authorizing the Mayor to enter into a wholesale water agreement contract with the City of Hendersonville.

Staff has been negotiating with City of Hendersonville staff to enable Asheville to sell wholesale water to Hendersonville on a daily basis. The wholesale water purchase agreement allows Hendersonville to purchase 1,000,000 gallons of finished water per day from the Asheville Mills River Water Treatment Plant and up to 2,000,000 gallons per day with a 30 day written notice. Hendersonville agrees to pay a minimum daily charge for 1,000,000 gallons. This agreement is for 20 years and renewable on an annual basis thereafter. The wholesale water rate increases will be tied to the Consumer Price Index (CPI) of the previous calendar year.

PROS:

- This agreement will help offset the loss revenue of major industrial customers of the Asheville water system.
- This agreement will generate over $395,000 of revenue for the water fund.

CONS: There are no cons for this proposal. This is excellent opportunity for regional cooperation which is beneficial to both cities.

Staff recommends City Council adopt a resolution authorizing the Mayor to enter into a wholesale water agreement contract with the City of Hendersonville.

Throughout discussion, City Manager Jackson and Water Resources Director David Hanks responded to various questions/comments from Council, some being, but are not limited to: is the 20-year commitment too long; how much does it cost to produce water at the Mills River Plant and at the North Fork Plant; are we able to renegotiate our wholesale contracts; is the wholesale rate the same for all wholesale customers; what happens if we determine the wholesale rate is too low; is there any opportunity for increases to wholesale customers; who sets the wholesale rate structure; how will any cost of production increases affect the agreement; and what constitutes "good cause" in the termination provision.

Councilman Mumpower felt we should not enter into any water agreements until our legal dilemma with the State legislators is resolved.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Jones moved for the adoption of Resolution No. 07-08. This motion was seconded by Councilman Davis and carried on a 5-1 vote, with Councilman Mumpower voting "no."

342

B. RESOLUTIONS STATING THE INTENT OF THE CITY TO ANNEX THE BILTMORE LAKE AREA, SARDIS ROAD AREA AND SCHENCK GATEWAY AREA AND SETTING THE PUBLIC INFORMATION MEETINGS ON FEBRUARY 26, 2007, AND THE CITY COUNCIL PUBLIC HEARINGS ON MARCH 27, 2007

At the request of the City Manager, Councilman Mumpower moved to delay this action in order to allow additional time within which to perform additional analysis and associated service requirements. This motion was seconded by Councilwoman Cape and carried unanimously.

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of December 1-22, 2006: Dale Anderson (Parks & Recreation), Scot Padgett (Water), Terry Medford (Water) and Cameron Lewis (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Stewart and Mr. Reid Thompson, Maxwell Street residents, individually spoke to Council about their problems associated with the loading dock at Greenlife Grocery on Merrimon Avenue. Mayor Bellamy said that City Council will be discussing this issue at the January 16, 2007, meeting.

At 9:56 p.m., Councilman Mumpower moved to continue the closed session. This motion was seconded by Councilman Davis and carried unanimously.

At 10:13 p.m., Councilwoman Cape moved to come out of closed session. This motion was seconded by Councilman Mumpower and carried unanimously.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:13 p.m.

Kesha Lipe
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – January 16, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; Assistant City Attorney Martha McGlohon; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Freeborn gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF DR. MARTIN LUTHER KING JR. DAY

Mayor Bellamy recognized January 15, 2007, as "Dr. Martin Luther King Jr. Day."

II. CONSENT AGENDA:

Councilman Mumpower asked that Consent Agenda Item "I" be removed from the Consent Agenda for discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 9, 2007

B. RESOLUTION NO. 07-09- RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH BUCKEYE CONSTRUCTION COMPANY FOR NEIGHBORHOOD ENHANCEMENT WATER SYSTEM IMPROVEMENTS PHASE II PROJECT

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Buckeye Construction Company in the amount of $ 1,062,966 for Neighborhood Enhancement Water System Improvements Phase III Project and the associated budget amendment.

Sealed informal bids were received by the Water Resources Department on November 7, 2006 for the Neighborhood Enhancement Water System Improvements Phase III. Three bids were received with Buckeye Construction Company submitting the low bid price of $ 1,062,966. A summary of all bids received follows:

NEIGHBORHOOD ENHANCEMENT WATER SYSTEM IMPROVEMENTS PHASE III

Buckeye Construction Company Canton, North Carolina	$ 1,062,966.00
Payne, McGinn & Cummins, Inc. Travelers Rest, South Carolina	$ 1,182,677.50

EMATS, Inc.
Cedar Bluff, Virginia $ 1,435,892.50

These bids have been reviewed by McGill Associates, the engineer for the project, and McGill has recommended award of the low bids to Buckeye Construction Company. The bids have been reviewed by the Office of Economic Development for compliance with the City of Asheville's Minority Business Program and Ms. Brenda Mills, Coordinator, indicates that the bids received conform to the City's Minority Business Plan.

PRO:

- This project involves the installation of approximately 13, 100 linear feet of 6-inch and 8-inch waterlines on eight (8) different streets within the water service area; replacing an equal amount of old 2-inch waterline. These new waterlines will dramatically improve water service to existing customers, provide fire protection for the adjoining properties and reduce maintenance and operation expenses. Approximately $ 600,000 of grant funds is appropriated for this project. This money will be lost if it is not expended on this project.

CON:

- Failure to approve award of this contract will result in the loss of approximately $ 600,000 of State grant funds. This loss would delay the replacement of these old, undersized waterlines which are in very poor shape and are causing customer service issues.

City staff recommends City Council approve a resolution authorizing the City Manager to sign a contract with Buckeye Construction Company in the amount of $ 1,062,966.00 for Neighborhood Enhancement Water System Improvements Phase III Project and the associated budget amendment.

RESOLUTION BOOK NO. 30 – PAGE 185

C. ORDINANCE NO. 3431 - BUDGET AMENDMENT TO REFLECT REPROGRAMMING FUNDING FOR THE BUCKEYE CONSTRUCTION COMPANY'S CONTRACT FOR THE WATER RESOURCES DEPARTMENT

Summary: See Consent Agenda "B" above.

ORDINANCE BOOK NO. 23 - PAGE 214

D. RESOLUTION NO. 07-10 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH HOBSON CONSTRUCTION COMPANY FOR THE US 70 WATERLINE BRIDGE CROSSING AND THE HOMINY CREEK WATERLINE CROSSING PROJECTS

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Hobson Construction Company, in the amount of $ 261,001.30, for the US 70 Waterline Bridge Crossing and the Hominy Creek Waterline Crossing Projects and the associated budget amendment.

Sealed informal bids were received by the Water Resources Department on November 30, 2006 for the US 70 Bridge Crossing and the Hominy Creek Bridge Crossing. Two bids were received for each project and are summarized as follows:

US 70 WATERLINE BRIDGE CROSSING

Hobson Construction Company Arden, North Carolina	$ 36,701.30
Buckeye Construction Company Canton, North Carolina	$ 166,994.00

HOMINY CREEK WATERLINE CROSSING

Hobson Construction Company Arden, North Carolina	$ 224,300.00
Buckeye Construction Company Canton, North Carolina	$ 280,300.65

These bids have been reviewed by McGill Associates, the engineer for the project, and McGill has recommended award of the low bids to Hobson Construction Company. The bids have been reviewed by the Office of Economic Development for compliance with the City of Asheville's Minority Business Program. In a letter, Brenda Mills, Minority Business Coordinator, approves the minority outreach efforts by both Hobson and Buckeye for these projects.

PROS:

- During the storm resulting from hurricane Francis, the waterline under the Swannanoa River at the US 70 bridge over the Swannanoa River was washed out. This waterline was replaced temporarily with a waterline on the deck of the bridge. The N.C. Dept. of Transportation (NCDOT) is pressing for this temporary waterline to be removed and installation of this new permanent 8-inch waterline under the bridge will accomplish that.
- The Water System Master Plan includes a 24-inch waterline on Brevard Road. Portions of this waterline have been completed and others will be completed in the upcoming NCDOT project to widen Brevard Road from I-40 to I-26. The small section of 24-inch waterline included in this project is necessary to complete this eventual Brevard Road transmission line which will address current serious water flow issues on Brevard Road.

CONS:

- Failure to proceed with the installation of the 8-inch waterline on the US 70 Bridge will result in the loss of a significant feed on the eastern side of our distribution system. NCDOT will require that we remove the temporary waterline from the deck of the bridge and without its replacement this water supply will be lost.
- Connection of a 24-inch transmission main between the water supplies of Mills River and North Fork is in the current Water System Master Plan. Without this part of that transmission main, the ability to transfer water between these two (2) supplies will be limited and the existing fire flow deficit on Brevard Road will not be addressed.

City staff recommends City Council approval of a resolution authorizing the City Manager to sign a contract with Hobson Construction Company, in the amount of $ 261,001.30, for the US 70 Waterline Bridge Crossing and the Hominy Creek Waterline Crossing Projects and the associated budget amendment.

E. ORDINANCE NO. 3432 - BUDGET AMENDMENT TO REFLECT REPROGRAMMING FUNDING FOR THE HOBSON CONSTRUCTION COMPANY'S CONTRACT FOR THE WATER RESOURCES DEPARTMENT

Summary: See Consent Agenda "D" above.

ORDINANCE BOOK NO. 23 - PAGE 217

F. RESOLUTION NO. 07-11 - RESOLUTION APPROVING AN ACQUISITION FOR PARCEL 3 IN THE AZALEA ROAD/SWANNANOA RIVER GREENWAY PROJECT

Summary: The consideration of a resolution approving an acquisition for parcel three in the Azalea Road/Swannanoa River Greenway Project.

Negotiations for certain real property in the Hominy Creek/Amboy Road Greenway Project have produced an agreement that proposes an increase in Just Compensation in order to acquire the property.

The Azalea Road/Swannanoa River Greenway Project begins at Azalea Road Park and follows the East bank of the Swannanoa River to Gashes Creek Road and then crossing the Swannanoa River it crosses Gashes Creek Road and follows Gashes Creek Road to Swannanoa River Road then turning North follows Swannanoa River Road for a distance of about 800 feet. The proposed trail will be paved and about twelve (12) feet wide.

The project proposes easements over 9 parcels, 5 of which have been acquired. Negotiations are being pursued on the remaining 4 easements. An agreement has been reached on one of the easements which proposes an increase in the just compensation in exchange for a fee simple conveyance instead of an easement.

The agreement on Parcel 3, owned by Viewpointe Homeowners Association (VHA), (PIN 9668.09-15-4163) calls for payment of $6,130 for fee simple conveyance of the easement area instead of by easement. The proposed acquisition was for an easement, but the negotiations snagged over the question of liability. The proposed fee simple purchase of the property resolves the VHA concerns. The original offer for the easement based on an appraisal dated August, 2004, was $2,500. The proposed settlement was derived as follows: the appraisal of the Viewpointe property dated 8/16/2004 estimates the fee value of the affected portion of the property was $5,066. Because the acquisition will be fee simple instead of an easement, the fee value of $5,066 has been updated at a rate of 10% per year increase for the two years since the appraisal rendering the sum of $6,130.

Just Compensation was established December 7, 2004, based on appraisals by Benjamin Beasley, MAI and reviews by Joseph Moore. The proposed increase is as follows:

Parcel #	Total Area (acres)	Easement (acres)	Easement Just Compensation	Fee Simple Just Compensation
3	9.51	0.106	$2,500	$6,130

Approval of the resolution will increase Just Compensation for fee simple acquisition of the easement area over parcel 3 in the Azalea Road/Swannanoa River Greenway and approve the proposed agreement.

PROS:

- A significant portion of the greenway trail will be acquired.
- The proposed increase in Just Compensation is fair and reasonable.
- The fee simple acquisition will eliminate a property owner concern.
- The agreement is voluntary and does not involve eminent domain.

CON:

- The only negative is a fee simple acquisition removes the property from the tax rolls whereas an easement would not.

Economic Development staff recommends adoption of a resolution approving a resolution approving an acquisition for parcel three in the Azalea Road/Swannanoa River Greenway Project.

RESOLUTION BOOK NO. 30 – PAGE 186

G. RESOLUTION NO. 07-12 - RESOLUTION APPROVING AN ACQUISITION FOR EASEMENTS OVER PARCELS 9 AND 12 IN THE HOMINY CREEK/AMBOY ROAD PROJECT

Summary: The consideration of a resolution approving an acquisition for easements over Parcels 9 and 12 in the Hominy Creek/Amboy Road.

Negotiations for Certain parcels in the Hominy Creek/Amboy Road Greenway Project have produced an agreement that proposes an increase in Just Compensation in order to acquire the property.

The Hominy Creek/Amboy Road Greenway Project begins at the West end of Carrier Park and follows Amboy Road and the West bank of the French Broad River to Hominy Creek Park. It is generally a crescent shape approximately 1 mile in length and averages about 20 feet wide. The proposed trail will be paved and about 12 feet wide. It will be installed generally in the same location as an existing unofficial foot path used by fishermen and hikers. All of the land within the project is in the flood plain.

The project proposes easements over 9 parcels. Three of the easements have been acquired including the two largest parcels comprising over half of the trail distance. Negotiations are being pursued on the remaining easements. Agreements have been reached with two property owners which propose an increase in the just compensation as follows:

The agreement on Parcel 9, owned by Tony Wilson, (PIN 9638.18-30-0014) calls for a cash payment of $6,500 and incidental site improvements consisting of a paved driveway valued at about $36,000 for a total package value of $42,500. .

The agreement on Parcel 12, owned by Max and Flora Wilson, (PIN 9638.18-40-1264) calls for a cash payment of $3,500 and incidental site improvements consisting of a paved parking area valued at about $13,500 for a total package value of $16,500. .

The additional pavement is incidental to the greenway construction and will be included at the time of construction of the greenway. The pavement will contribute to stabilization of driveways and parking areas adjacent to the greenway.

Just Compensation was established December 7, 2004, based on appraisals by Benjamin Beasley, MAI and reviews by Joseph Moore. The proposed increases are as follows:

Parcel #	Total Area (acres)	Easement (acres)	Established Just Compensation	Proposed Just Compensation
9	2.85	0.49	$5,200	$6,500
12	2.25	0.11	$2,300	$3,500

Approval of the resolution will increase Just Compensation for the easements over parcels 9 and 12 in the Hominy Creek/Amboy Road Greenway and approve the proposed agreements.

PROS:

- A significant portion of the greenway trail will be acquired.
- The proposed increase in Just Compensation is fair and reasonable.
- The additional pavement proposed will contribute to the stability of the area immediately around the trail and enhance the trail experience.
- The agreements are voluntary and do not involve eminent domain.

CON:

- The only negative is that the cost of asphalt is likely to increase in the future, as would construction cost in general.

Economic Development staff recommends adoption of a resolution approving an acquisition for easements over Parcels 9 and 12 in the Hominy Creek/Amboy Road.

RESOLUTION BOOK NO. 30 – PAGE 140

H. RESOLUTION N O. 07-13 - RESOLUTION ACCEPTING DEDICATION OF TRIPLE H DRIVE IN THE SAND HILL ROAD AREA TO BECOME A PUBLICLY MAINTAINED STREET

Summary: The consideration of a resolution accepting dedication of Triple H Drive in the Sand Hill Road area to become a publicly maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Triple H Drive is a developer-constructed street that has an average paved width of 24.5 feet and a length of 0.15 miles. Engineering Department Staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Triple H Drive will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

Pros:

- The City will receive Powell Bill funds from the N.C. Dept. of Transportation to maintain the roadway.
- Homes will be constructed on this roadway increasing the tax base in the City of Asheville.

Con:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council adopt a resolution accepting dedication of Triple H Drive in the Sand Hill Road area to become a publicly maintained street.

RESOLUTION BOOK NO. 30 – PAGE 191

I. RESOLUTION AUTHORIZING THE PURCHASE OF STREET LIGHTING FOR BILTMORE VILLAGE FROM A SOLE SOURCE UTILIZING NC RURAL CENTER GRANT FUNDS

This item was removed from the Consent Agenda for discussion.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Freeborn and carried unanimously.

ITEMS PULLED OFF THE CONSENT AGENDA FOR DISCUSSION

RESOLUTION NO. 07-14 - RESOLUTION AUTHORIZING THE PURCHASE OF STREET LIGHTING FOR BILTMORE VILLAGE FROM A SOLE SOURCE UTILIZING NC RURAL CENTER GRANT FUNDS

Summary: The consideration of a resolution authorizing the purchase of street lighting for Biltmore Village from a sole source utilizing NC Rural Center Grant Funds.

The goal of the Biltmore Village Development Plan is to preserve and restore the original pedestrian oriented design of Biltmore Village. The guidelines for the Village require that new lighting in pedestrian areas of the Village be in the historic style with underground wiring. City staff and Biltmore Village merchants have worked to have the historic lighting reproduced and made available to the general public. The manufacturer and sole source of supply for this lighting is Jefferson Lighting and Brassworks of Lynchburg, Virginia. Their product line is distributed in North Carolina by L.A.M.P.S., Inc. of Knightdale.

NC General Statute Article 143-129 identifies the procedures for the letting of formal public contracts and includes exceptions to the requirements of the Article. Section (e)(6) of those procedures states that the governing body of a political subdivision of the State shall approve the purchase of apparatus, supplies, materials or equipment when "(ii) a needed product is available from only one source of supply or (iii) standardization or compatibility is the overriding consideration."

PROS:

- Utilization of the sole source award exception to formal bidding processes as allowed under 143-129(e)(6) will permit materials to be received for timely installation.
- Utilization of the sole source award exception to formal bidding processes will maintain compatibility and standardization of the historical aesthetics of Biltmore Village
- All new and retrofitted Biltmore Village lights will have a 250 watt metal halide lamp which will provide increased night visibility and safety to pedestrians and vehicles.

CON:

- In order to maintain historical infrastructure there are severe limitations to competitive bidding. Since the Biltmore Village light is a customized specification and there is only one supplier, it is difficult to ascertain if the pricing received is "fair"

Staff recommends Council approval of a resolution authorizing the purchase of street lighting for Biltmore Village from a sole source utilizing NC Rural Center Grant Funds.

Councilman Mumpower was concerned that there is no cost sharing involved by the businesses and others who profit from the existence of the village and also the use of state tax supported dollars.

Upon inquiry of Mayor Bellamy, Planning & Development Director Scott Shuford explained how the money being allocated is through a planning grant we received regarding the flooding issue.

Vice-Mayor Jones moved for the adoption of Resolution No. 07-14. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 193

III. PRESENTATIONS & REPORTS:

A. ASHEVILLE FILM COMMISSION PRESENTATION

Ms. Alison Watson, Chair of the Asheville Film Commission (AFC), said that the mission of the Asheville Film Commission is to support the city as a "film friendly" town and to support media arts in the area. The AFC will support the WNC Film Commission; URTV's Public Access Station and the Media Arts Project and assist local filmmakers in finding resources and promoting their work, through our WNC Film Seeds Program.

She reviewed the following accomplishments from 2006:

- **Successfully launch the WNC Film Seeds Program** - This is a program that collects vouchers from local businesses (food, hotel rooms, printing, equipment rentals, general discounts) and will be given to low budget films in the area to offset costs.

- **Advocacy and support to Feature Films** - The AFC brought a proposal to city council to waive meters and barricades, bringing a $1.5 million feature to Asheville. The AFC assisted four other films shot in the area by finding equipment, helping in location scouting and hiring crew.

- **Support of the Asheville Film Festival** - Assisted in finding sponsors and creating awards for the AFF. Volunteered at events and parties. Served as an advisory board and general liaison.

- **Support of URTV's Public Access** - The AFC was responsible for a membership drive among board members. We also contacted groups in the community to provide content.

- **Support the Media Arts Project and HUB Goals** - Volunteered at Off the MAP events held at the Fine Arts Theatre. Helped in placing local talent with full-time and contract jobs in the media arts industry that the MAP advertised. Worked with the MAP on how to best serve HUB goals for economic development when dealing with film and the media arts community.

- **Support the 48 Hour Film Project** - Volunteered during the event and screenings to follow. Assisted in promoting the event.

She then outlined the goals of the Film Commission, being: (1) Continue supporting the WNC Film Commission; (2) Continue supporting the MAP and URTV; (3) Launch a new website; (4) Advertise and take applications for the WNC Film Seeds Program; and (5) Assist local filmmakers and films in the area through advocacy and industry connections.

Ms. Watson explained why she felt the Film Commission should be placed in the Economic Development Department other than in the Parks & Recreation Department.

Ms. Watson and Mr. Butch Kisiah, Superintendent of Recreation, responded to various questions/comments from Council, some being, but are not limited to: what is the Film Commission's role with the Film Festival planning; what is the Film Commission's perspective in collaborating with others who would like to get into the film festival business; regarding the start-up time of the Film Festival, are there any plans to start sooner than after the Bele Chere Festival; where does the dialogue for the Film Festival happen; and should the Film Festival remain a City responsibility or should we out-source the Festival.

City Manager Jackson said that he would provide Council with a report regarding a proposal from AdvantageWest regarding the Film Festival.

Mayor Bellamy announced that on the fifth Tuesdays of any month, we will have the opportunity for the community to talk about certain issues. Starting this month, one of the first topics will be Bele Chere. After hearing the public comments, Council can decide the direction on those issues either by staying the course or going in a different direction.

At the request of Vice-Mayor Jones, it was the consensus of Council to instruct the City Manager to investigate the pros and cons of the moving the Film Commission out from Parks & Recreation Department into Economic Development Department and to provide Council with a report.

On behalf of City Council, Mayor Bellamy thanked Ms. Watson and the entire Film Commission for their hard work.

IV. PUBLIC HEARINGS:

V. UNFINISHED BUSINESS:

A. GREENLIFE GROCERY/MAXWELL STREET RECOMMENDATIONS

Councilman Newman and Councilman Freeborn said that this is an update to City Council on their progress related to Greenlife Grocery and mitigating truck traffic on Maxwell Street.

Councilman Newman said that since December, 2006, they have been working with City staff to explore alternatives for reconfiguring Greenlife's delivery area as well as traffic calming alternatives for Maxwell Street. Their goals were (1) to look at possible design ideas to restore more of the buffer on Maxwell Street; and (2) to get the large trucks off Maxwell Street as well as their maneuvering on Maxwell Street to get to the loading dock. They also looked at ways to restore the residential parking on Maxwell Street and they also looked into the site visibility triangle concern. We have discussed these options with the owners of Greenlife Grocery, members of the community, as well as the owners of the property on which Greenlife is located. This is no means a perfect solution to the concerns, but it seems to go a long way towards

addressing them. If the option for redesign of the loading dock is what Council is interested in, there would need to be a rezoning process for one lot next door to Greenlife which will need to go through the Planning & Zoning Commission.

Councilman Freeborn explained the two options. The preferred option is to reconfigure Greenlife's driveway and parking lot so that large trucks would enter and maneuver into Greenlife's loading area without entering Maxwell Street or the adjacent sidewalk. This option would also entail reconfiguring and bolstering the buffer between Greenlife and Maxwell Street. Essentially it will give us a 17-foot buffer and will remove large trucks from Maxwell Street. The current entrance on Maxwell Street would be shifted and become part of the buffer. This option will need to go through the rezoning process. The second option is traffic calming. We could put in traffic calming measures along Maxwell Street that would make it physically impossible for large trucks to be on Maxwell Street and impossible for them to maneuver the trucks back into the loading dock. Staff feels the traffic calming measures would cost approximately $30,000 and if Council chooses to pursue that option, staff will have to come back with a design and an actual budget request. He asked that Council listen to the proposals along with public comment and then decide on which option they would like to proceed with.

Using a site plan, Assistant Director of Planning & Development Shannon Tuch presented detailed information on the Greenlife's site reconfiguration regarding buffering, privacy fence, relocation a small house, reconfiguration of the loading dock and parking.

Using a map, Traffic Engineer Ken Putnam presented information about alternative traffic control measures for Maxwell Street should loading area reconfiguration not be the option Council wants to pursue. Essentially, there would be a median island in the curve that would physically block the large trucks from accessing Maxwell Street or making any backing maneuver on it. In addition, at Broadway there could be a gateway island that would also restrict large truck movements onto Maxwell Street as well. In doing that, there would be some removal of parking spaces to accommodate the islands.

Councilman Newman reiterated that the preferred option would be redesigning of the loading dock. And if that option moves forward, then the traffic calming approach is not necessary. A couple of more items that can be looked at, as the process goes forward, is to get all of the commercial trucks off Maxwell Street and with this general design idea, it may be possible to redesign the loading dock so that the smaller delivery trucks also come in off of Merrimon Avenue. But doing that might mean the buffer in that area of the store would need to be reduced because you would need to have room for two different kinds of trucks to park there. One scenario is you would still have smaller delivery trucks on Maxwell Street with a bigger buffer and the other one would be all the trucks off Maxwell Street but the buffer would be somewhat compromised. These scenarios are still a work in progress.

Councilman Freeborn said that if Greenlife decides they want to pursue the reconfiguration of the loading dock option, it is their recommendation that they submit an application for rezoning and site redesign within 30 days of this meeting and if they do not submit that application that Council agree to look at the traffic calming at the February 27, 2007, meeting.

Throughout considerable discussion, Councilmen Freeborn and Newman and City staff responded to various questions/comments, some being, but are not limited to: why not use both options; how do you avoid staging on Maxell Street; how will the truck drivers be made aware of the changes; could we still restrict large trucks from entering Maxwell Street via traffic calming measures in addition to the reconfiguration of the load dock option; the island at the end of Maxwell Street would not be user friendly for cars; could we make Maxwell Street a one-way street and they couldn't turn off of Broadway; when the truck manipulation software was used for the loading dock reconfiguration, was it charted for the trucks to get getting back out of the

loading dock; concern that after the expense of the reconfiguration of the loading dock takes place, residents may still have concerns with the smaller trucks, noise, etc. from Greenlife; where will the staging of the trucks take place; maybe not relocate the small house but demolish it all together and use that relocation area to stage other trucks off Merrimon Avenue; safety concerns of pedestrians and vehicles when large trucks are maneuvering in the parking lot near the front door of Greenlife; suggestion to have the area where the small house is located designated for unloading of small trucks and have them cart their produce across the parking lot to Greenlife; how often do tractor trailers and some straight trucks back into the loading dock; and if we asked Greenlife to put in two bays, what would be a minimum buffer.

Mr. John Swann, owner of Greenlife, addressed some of the concerns addressed by Council. He said that large trucks do not use Maxwell Street to approach the loading dock or for staging. Their procedure now is that when a large truck comes in, the manager goes out into the parking lot and he guides the truck. With the new configuration, they do have the opportunity to continue that procedure. Regarding staging, we do have the ability, and have done so on occasions, to waive the truck off and tell them to come back at a later time. We will work harder on scheduling the deliveries. Most supermarkets operate with a primary supplier that supplies 80-95% of the product in the store, however, Greenlife's primary vendor supplies them with about 35% of the products, noting they have 400 vendors that they buy from. This plan takes tractor trailers off Maxwell Street and moves the entrance over. This plan does not address the straight trucks, except we may be able to squeeze in a secondary ramp by the loading dock so that small trucks (van size trucks) can do the pallet-loads off the truck. We still have the issue of compactors in the back that still need to be serviced and the small truck deliveries. Regarding unloading the smaller trucks in another area and carting the produce across the parking lot, it is not feasible to do that since they buy tractor trailer loads full of produce. They have looked at satellite facilities and it is not economically feasible to do that due to issues regarding material handling, liability, timing and the number of trucks it takes for a satellite facility.

In response to Mayor Bellamy's request that no trucks be allowed on Maxwell Street, Mr. Swann said that their plan removes tractor trailers on Maxwell Street which is about 1/3 of the truck traffic that Greenlife receives. The other 2/3's are small trucks that are unloaded by hand.

Councilman Freeborn said that he and Councilman Newman were working under the assumption that it was the large trucks that were a concern of the community and they did not address small trucks.

When Mayor Bellamy asked if Councilmen Freeborn and Newman would look at this issue again to address some of the concerns raised, Councilman Freeborn felt they needed direction from Council on whether small delivery trucks could travel on Maxwell Street.

In response to Councilwoman Cape, Ms. Tuch explained the buffering to accommodate the additional second loading area for a smaller truck in the same space. The option calls for 17 feet of buffer and we would need an 8 feet for that second loading area. That would leave us with 9 feet of buffer and the minimum width requirements without alternative compliance is 10 feet. They would have to get alternative compliance and this probably isn't the best site to consider alternative compliance. Mr. Swann also responded that there are two large trees that they are trying to not cut down and if you add any more width, we will get into the possibility of having to cut the trees.

Councilman Davis wondered if Greenlife could use the existing dock with the buffer for the smaller deliveries and build a walkway and a one bay on the south end of the store that could be accessed by large trucks. Mr. Swann responded that they looked at that option in depth. The problem is that corner of the building is the grade, which is about 15 feet above Bordeau Street. Not only is it very expensive, in order to get the large trucks to that location would eliminate most

of the parking area in the parking lot. In addition, we are beginning the thoughts of expanding the store and if we do, that would be the area they would expand into.

Mr. Benjamin Gilliam liked the proposal to get the large trucks off Maxwell Street. He suggested a building a second dock for the small trucks on the south end of the building about half the length of the building, so the topography would not be so steep.

Mr. Fred English suggested making Maxwell Street one-way.

Ms. Hillary Stewart, resident on Maxwell Street, was concerned about the other 2/3 trucks on Maxwell Street.

Upon inquiry of Vice-Mayor Jones, Mr. Swann said that he is amenable with the reconfiguration of the loading dock, however, it does not solve the problem of straight trucks.

In response to Vice-Mayor Jones, Mr. Swann said that if an expansion should occur, they would pull the retail part of the store in the south end direction, leave the back end the same, and turn the café' into a loading bay.

There was a brief discussion of the David Owen's report regarding City Council's ability in this case to prohibit trucks off residential streets. Mayor Bellamy said that we can do something with traffic calming, but we can't reclassify Maxwell Street because the project is already in place and received the proper permits.

When Councilman Freeborn asked if City Council has the authority to redesign a street, Assistant City Attorney McGlohon said that Council does have the authority to regulate local streets. However, there may be some concerns with inverse condemnation issues of state control and whether or not the state has attempted to preempt local control as it relates to interstate commerce, where you go to the point of restricting traffic on local streets to the point that the business cannot make a reasonable use of that street.

Councilman Freeborn wondered if we could instruct City staff to bring something back to Council on February 27, 2007, that shows a street redesign of Maxwell Street taking all trucks off Maxwell Street.

Councilman Newman said that if the majority of Council feels that no design should be considered that doesn't get all delivery trucks off Maxwell Street, then that would be helpful to know. It was his impression that the main goal was to get all large trucks off Maxwell Street, with a sub-goal of getting all trucks off Maxwell Street.

Councilman Mumpower said the compromise is to get the large trucks off Maxwell Street, not all trucks and felt that was fulfilled by this option with room for improvement.

Mayor Bellamy noted that small trucks have to service Greenlife for trash and recyclables. Councilman Freeborn agreed that City Sanitation trucks have to pick up trash for the Maxwell Street residents as well.

Assistant City Attorney McGlohon said that Council may want to instruct the legal staff to research the issue of prohibiting all service trucks on residential streets, given that Council does have the authority to regulate streets. There appears to be a middle area where there may be some state control or federal regulations as it relates to interstate commerce.

Councilwoman Cape supported all trucks off Maxwell Street and a smaller buffer with a variance.

Councilman Davis didn't think that we can keep all small trucks off Maxwell Street. Since he didn't think there was going to be 100% satisfaction by the residents and Greenlife, getting to the middle ground of the getting the large trucks off Maxwell Street is a good direction.

It was the consensus of Council to instruct the City Manager to prepare a memorandum to City Council before February 27, 2007, regarding clarification on our signs and what we are trying to do with the no truck signs on Maxwell Street.

Councilman Freeborn said that they report back to Council on February 27, 2007, and encouraged anyone with ideas to contact him.

B. STAPLES UPDATE

Mayor Bellamy said she was charged with sending a letter to Staples requesting a written response regarding the building's signage, landscaping and pedestrian amenities by December 31, 2006. On January 2, 2007, she received confirmation from Ms. Mylissa Tsai that Staples had received the letter and was developing a response. She read the following letter which was received today from Mr. Ted Frumkin, Vice-President, Real Estate, Staples: "Since Staples arrived in Asheville, we have made great efforts to consider and include input from city residents, our neighbors and various special interest groups regarding our store. I am writing to update you on our response to your letter. We are excited to share that we plan to enhance our property with a new landscaping design. A detailed plan will be available shortly. It incorporates a majority of the suggestions recommended by the local landscape designer hired by our Asheville charity partner, Quality Forward. The design will include a green screen along the brick wall to soften the look from the street, which has been the source of comment. The new landscaping will also enhance the experience of those pedestrians who use the sidewalk along our store. We are confident that Asheville residents will be pleased with the design. It is Staples policy to work with each community that we enter when coming up with a building design and site plan. We have and will continue to adhere to the building codes of the communities where we do business including Asheville. As you are aware, our real estate and construction teams worked closely with the city building officials and design review board of Asheville in the design and construction of our store. We gladly made changes to our original design to meet their input and satisfy their requirements. We received all required permits and approvals in the construction of our store, its signage and surround areas. We seriously considered all input from the citizens groups in Asheville before deciding on a final plan of action. We feel that even the most drastic changes to our building and signage will not satisfy every citizen. In exploring the request to change our signage, we found that it would require significant investment. Therefore, we do not plan to change a sign that was approved by the city, and according to our local lawyer, is in compliance with all of Asheville codes. It is a privilege to be a part of the Asheville community. Contrary to some of the recent publicity, our store is enjoying strong sales and good comments from our local customers. Our store has created jobs and benefits small businesses, students and educators in Asheville. We will continue to focus our efforts on contributing to the greater good of Asheville - by fostering small business growth, supporting youth and education, encouraging recycling, and more. Since we believe well-received, we are happy to work with you to announce this news. Please feel free to call me at (508) 253-0542 or Mylissa Tsai in our Public Relations Department at (508) 253-4648 with any questions."

It was the consensus of City Council to schedule a closed session with our City Attorney to discuss the City's options in bringing the sign into compliance with our existing ordinance.

C. PRESENTATION FOR PUBLIC ARTIST OF THE YEAR PROGRAM

RESOLUTION NO. 07-15- RESOLUTION TO ACCEPT THE GUIDELINES FOR THE "PUBLIC ARTIST OF THE YEAR" COMPETITION OF THE PUBLIC ART BOARD

Mr. Kenn Kotara, Vice-Chair of the Public Art Board, said that the Public Art Board is requesting City Council's approval of a resolution to accept the guidelines for the "Public Artist of the Year" competition of the Public Art Board.

The Public Art Board unanimously approved the establishment of the "Public Artist of the Year" competition that will recognize an artist or group of artists that have significantly contributed to public art in Asheville. The program will result in the commissioning of an art piece designated for a prominent location in Pritchard Park specifically designed for public art.

The artwork will be valued at $10,000 or more and will be located at the west end of the Pritchard Park that is high in pedestrian traffic and utilizes the existing outdoor space framed by the park's architecture. Funds to support the project have been generated from an outside funding source.

PROS:

- Recognizes the significant contributions of the arts and artists on the creatively unique culture of Asheville
- Contributes to the city's art collection
- Enhances the appeal of Pritchard Park and improves the western gateway to the downtown area
- Encourages involvement of local businesses and corporations in the city's public art program and its process
- Demonstrates the commitment of the city to support the arts and artists in the region and community

CONS:

- Lack of inclusion of all artistic genres

This recommendation is keeping with the City of Asheville Strategic Plan by contributing to the: (1) "Livability" of Asheville by recognizing the importance of the arts and artists on the life of the City of Asheville; (2) "Sense of Place" of Asheville and the need to educate citizens and visitors of its uniquely artistic and creative character and contributions of local citizens through the arts; (3) "Vibrancy" of Asheville's art scene and its commitment to the development and enhancement of the public art collection; and (4) "Participation" of Asheville citizens in the pubic art process as programmatic and financial contributors.

This is a Deed of Gift to the City of Asheville from generous individuals and businesses from the Asheville community.

The Parks and Recreation Department recommends City Council approval of a resolution to accept the guidelines for the "Public Artist of the Year" competition of the Public Art Board.

Mr. Kotara then said that the Public Art Board facilitates the duties and responsibilities of the Public Art Program as outlined in the Public Art Master Plan, to include: (1) provide public art in public buildings and public spaces; (2) promote Asheville as an "arts destination" and use public art as a major attraction for cultural tourism and economic development; (3) educate the citizens and visitors about the local culture and history through art; and (4) encourage the use of public art projects.

The Public Art Board (1) raises funds to match City of Asheville appropriations; (2) approves subject matter of public art; (3) administers the procedure for the selection of public art to include public input meetings and staff review; (4) recommends to City Council the acceptance of gifts; (5) inventories public art to insure conditions and standards are met; (6) recommends maintenance, repair and deaccessioning when appropriate; and (7) recognizes the significant contribution of artists to the culture and economy of Western North Carolina.

The goals of the Public Artist of the Year Program is to (1) recognize the significant contributions of artists to the life of visual arts and public art in Asheville and Western North Carolina; (2) commission site-specific artwork at Pritchard Park in the first year, and additional locations throughout the City of Asheville in subsequent years; (3) collaborate with regional arts agencies; (4) respond to Asheville's unique sense of neighborhood culture; and (5) enhance he concept of Pritchard Park.

The site design will be in the heart of downtown Asheville; in a high pedestrian and vehicular traffic area; will utilize existing outdoor space framed by the park's architecture; and will be in the western gateway into downtown Asheville.

The budget for the Public Artist of the Year program will be $10,000, which will include estimated costs, artists' fees, fabrication, insurance, shipping, transportation, and documentation of the work.

The selection criteria includes (1) Western North Carolina resident for at least one year; (2) demonstrate creative, innovative approach in comparable projects; (3) understanding of locale's sense of place; (4) openness to working collaboratively with project team members and city staff; and (5) ability to complete a project of this scale.

The selection process will include (1) submission of a Request for Qualifications (RFQ) to include a letter of interest; description of conceptual approach to this project; resume/vitae; images of past work; and references; (2) three member Selection Panel consisting of local artist/administrator, local business owner, regional/state artist/administrator will interview three finalists; (3) Selection Panel recommends one artist/artist team, and one alternate to the Public Art Board for review and approval; (4) Public Art Board recommends "Public Artist of the Year" to City Council for approval; (5) Artist/artist team contracted to develop design for the project; (6) final design approved by Public Art Board; (7) Public Art Board recommends final design approval to City Council; and (8) artwork fabricated and installed in coordination with Public Art Board and City staff.

When Councilman Mumpower asked about the Public Art Board's Plan to raise $10,000, Mr. Kotara said that under City Resolution No. 99-133 the Public Art Board should receive $55,000 annually and we only received it one time and that was six years ago. We would like to use some of those funds, noting that any dollars that we use from that must be matched through our own fund-raising efforts, e.g., Postcards from the Ledge, and granting agencies through the Parks & Recreation Department.

Councilman Mumpower felt the guidelines for the Public Arts of the Year should include a sentence stating that the Public Art Board will be charged with the responsibility for raising half of this amount and that the City Council, through whatever means they deem appropriate, will be responsible for the other half.

Councilman Mumpower also felt that the Selection Panel should be expanded because three does not have a proper balance in assuring fairness.

Vice-Mayor Jones said she would feel more comfortable with this effort if the funds are raised before the contest is launched.

Vice-Mayor Jones said that when she interviewed members for the Public Art Board that she did not ask them about fund-raising abilities or interest. She feels like she is saddling a Board with a responsibility that not all members signed up for. She also felt trepidation about City Council approving the artist/artist team in that she didn't have that expertise. She was concerned about using taxpayer dollars for something we might not be proud of because $10,000 is probably on the low end of the scale for a good piece of public art.

Mr. Kotara felt that the $10,000 offers a chance for an artist to be very creative and the location may offer some compelling piece of artwork that helps us to reconfigure our viewpoints of what public art is. He felt that Pritchard Park is a smaller site and that $10,000 is a good amount. He wondered if next year we could offer more depending on the neighborhood.

Councilwoman Cape said that she didn't see anything in the RFQ about the artist understanding how public art has to function in the community, especially from a safety standpoint. She also felt that it needs to be clarified that this is a permanent piece of art. She was primarily concerned about the process of this and hoped that in the future that Council would have the opportunity to not have the publicity precede the City Council decision-making process. She also felt that $10,000 with collaboration with the arts community could be leveraged into a lot of other things and was also concerned about asking the Public Art Board volunteers to have to fund-raise.

In response to Councilman Davis, Mr. Kotara said that the City does have the latitude of not choosing an artist if they do not receive a design that is suitable.

Councilman Mumpower's interest in this was to make sure that we start using the clout of Asheville to recognize artists and to get some public art in Asheville. With the assistance of the Public Art Board we have one piece but we need more. The $10,000 doesn't really offer much in the form of fair compensation for a civic-minded artist's willingness to contribute to the public art of the City. But, it does represent a token of our appreciation for that contribution and it also represents an opportunity for someone to get some serious recognition as an artist. He hoped that we don't bring this to Council for approval and that we also don't take it to the Downtown Association because the danger of politicizing this comes from having too small a panel with too small of a representation. That Selection Panel should have final approval authority. Regarding the dollars, as one who brought this idea before the Council, he offered to assume personal responsibility for raising the first $10,000 and he has done so and will be prepared with that money this year when we need it. He believed that we should not ask taxpayers to fund this effort and asked the Public Art Board to be responsible for raising half of these monies and for the Council to assume the responsibility for raising the other half of the monies. That is a more fair way to treat forced taxpayer dollars.

Councilman Freeborn supported the Public Artist of the Year Program. He supported adding two more members to the Selection Panel and let them be the final approval authority on the artist.

Councilman Newman confirmed that if this goes forward in subsequent years, the arrangement will be that the City contributes $5,000 and the Public Art Board and/or other sources raise at least $5,000 more. He, too, agreed in adding two more members to the Selection Panel and let them be the final approval authority on the artist.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved to adopt Resolution No. 07-15, approving the proposal submitted with the following modifications: (1) the City of Asheville will be responsible for raising 50% of the award funds and the Public Art Board will be responsible in raising the other 50%, with exception of the first year where those funds have been raised and no contribution by the City or the Public Art Board is necessary; and (2) expand the Selection Panel to five members as chosen by the Public Art Board as defined by the Public Art Board; and (3) we conduct this activity as a 3-year pilot project and at the end of that time it be brought back to the Council for further consideration. This motion was seconded by Councilman Davis.

Councilwoman Cape asked that the motion be amended to reflect that the Public Art Board have final design approval, not City Council. Councilman Mumpower and Councilman Davis agreed to that amendment.

Upon inquiry of Councilman Mumpower, Cultural Arts Superintendent David Mitchell said that we have already received 14 submissions from a variety of very reputable artists in Asheville.

There was a brief discussion about the process on this issue and why the publicity preceded the City Council decision-making process. Mayor Bellamy felt that as policy-makers it erodes the policy-makers ability to do their job when staff steps ahead of Council and we should not have to fear an issue having reached the public eye before Council makes a decision on it. City Manager Jackson said that he would research the minutes to investigate whether this matter was approved by Council allowing the Public Art Board to move forward. In addition, Mayor Bellamy instructed the City Clerk to provide Council with the minutes when this issue was discussed.

Vice-Mayor Jones did not feel good about the process and would vote against the motion.

Councilwoman Cape is very interested in creative initiatives but she wanted to honor the process and make sure that the things that we stand for in the community are supported by the rest of Council.

At the request of Mayor Bellamy and by a show of hands, City Council unanimously supported the idea of a Public Artist of the Year for the City of Asheville.

The amended motion made by Councilman Mumpower and seconded by Councilman Davis carried on a 5-2 vote, with Vice-Mayor Jones and Councilwoman Cape voting "no."

RESOLUTION BOOK NO. 30 – PAGE 195

At 7:30 p.m., Mayor Bellamy announced a 15-minute recess.

D. OPPORTUNITIES FOR PUBLIC SAFETY PARTNERSHIP WITH HOUSING AUTHORITY OF THE CITY OF ASHEVILLE

Police Chief Bill Hogan explained opportunities for public safety partnerships with the Housing Authority and other challenges. He outlined the police service to the Housing Authority neighborhoods, with the ultimate cost of service to the Housing Authority being $1,712,596.

Over the past 12 months from December of 2005 to November of 2006, there have been City-wide 739 arrests - 334 dealers; public housing 308 arrests - 151 dealers; public housing accounts for 41.6% of the arrests; 70 habitual felon charges with 48 of the charges coming from drug arrests; past two years displaced dealers; and felony arrest = 3 hours/misdemeanor = 1.5 hours.

He then benchmarked Asheville's drug arrests compared to other cities, mainly in North Carolina.

The DEA Task Force has the following statistics: 16-month investigation; 32 people indicted - 27 arrested; facing sentences of 10 years to life; 27 kilos of cocaine seized; 6 pounds of methamphetamine seized; $750,000 US currency seized; and these were major suppliers to Asheville.

In the Housing Authority (from December 24, 2006 - January 7, 2007), the Drug Suppression Unit has the following statistics: 6 felony arrests - 5 drugs; 15 felony warrants - 12 Order For Arrest (OFA); 17 misdemeanor arrests; 16 misdemeanor warrants - 14 OFA; 31 traffic citations - 15 Driving While License Revoked; and 85 total arrests in Housing Authority neighborhoods.

The Police Department is working with the Housing Authority by (1) regular meetings to discuss strategies (ban lists, ID cards, gated community, publish arrests, tow unlicensed vehicles, lighting, cameras, litter, Are You Okay Program, etc.); (2) researching the High Point Drug Market Elimination Model; and (3) examining dedicated patrol for housing.

Future analysis and plans include patrol workload analysis and response time study; examine additional patrol beats reference response time; workload analysis of Criminal Investigative Divisions and Communications Center; examine dedicated Traffic Safety Unit (38% of workload); examine dedicated Downtown Police Unit (19% of workload); examine Police Housing Authority Unit - 2 officers 24/7 (2 Sergeants and 10 officers = $864,247); examine Police Saturation Patrol for Public Housing - 8 officers 24/7 (2 Lieutenants, 12 Sergeants and 80 officers = $6.7 Million); Public Housing Task Force (Community Oriented Government); consider Crime Prevention Officer for Task Force ($84,735); and new drug testing equipment evaluation.

Councilman Mumpower said that when he first decided he was going to confront Asheville's open air drug market, he received a lot of comments from people wanting him to be careful that the system or the dealers would come after him. About one hour prior to this meeting, he received an e-mail from the City Manager and Police Chief accusing him of endangering the safety of our officers, resulting from an incident Friday night around Midnight when he stopped at the West Asheville substation to report drug activity in Deaverview and Pisgah View. He suggested to the City Manager and the Police Chief that if he has in any way violated the law as a City Councilman he has no special privilege and they should arrest him and charge him. If he has not, bringing that up one hour before this meeting would seem to be an act of intimidation and they picked the wrong person.

He proceeded by saying that the City of Asheville is struggling with a problem of corruption - the corruption of indifference. An indifference to an open air hard drug market that is corrupting everyone's future. We must strengthen our efforts to fight back. A starting place is for you and me to hold up our hand, say enough, and get involved, somewhere, doing something to turn concern into action. Those who manage our public housing must also find the courage and resources to make that housing conditional upon responsible conduct. Our legislators must look harder at an overwhelmed and under-funded state court system that is ranked 48th in the country and fails us all in holding people accountable for their crimes. Finally, our police can't carry the day, but they must lead the way by refusing to surrender any neighborhood to drug crime. Together, we must all work to defeat those trafficking in hard drugs. Our future, for now, is in our hands - tomorrow it will be in theirs.

The reality is that we have an open air "tailgate market" for hard drugs throughout Asheville. It is consistent in all of our public housing developments and many other vulnerable

neighborhoods. The activity is visible, enthusiastic, and unafraid. We cannot maintain a police substation in our public housing developments due to vandalism and threat factors. We have closed at least two during his tenure. We are asking people to live there but we can't maintain stations there. Asheville has evolved into a regional resource for hard drugs. Our open air market offers an excellent model of Asheville's diversity. Black males street deal most hard drugs, white males and females purchase most hard drugs and illegal Hispanic aliens are the distributors of most hard drugs. The harms at all levels are profound and growing. The turning point for him personally, was that in December of 2006, we surrendered - City Council accepted that we had lost McCormick Heights Public Housing Development to thugs, drugs, and related crimes.

As Chair of the City Council Public Safety Committee and Chair of the Asheville-Buncombe Drug Commission, he has (1) raised concerns privately (closed session) and publicly with Council; (2) met with the City Manager and Police Chief to discuss concerns and realities; (3) collaborative discussion with the Housing Authority and he sensed there was an absence of urgency and concern and authentic effort; (4) a declined request to have weekly Police Department drug intervention observation opportunities - to fairly assess efforts; and (5) Plan B - find out more for himself - 30 visits in 30 days. He then said that since January 1, 2007, he made 30 random visits to public housing developments and vulnerable neighborhoods on different days and times. The following occurred: (1) he was directly solicited drugs 20 times; (2) he witnessed drug buys and active dealers 5 other times; (3) there were only 5 times where there was no visible activity; (4) the "tailgate market" was just as active at 7:00 a.m. as 7:00 p.m. or 12:00 p.m.; and (5) there was a police presence noted in 5 of the 30 visits - often with no impact. He was wearing a suit and driving the same visit for 22 of those visits and most of those dealers seemed to be operating out of residences in public housing. His conclusion is that regardless of our efforts to "try," we are failing to protect public housing and other vulnerable neighborhoods and have essentially surrendered entire communities to the destructive impacts of hard drug dealers, users, and their protectors. Our enforcement pressures on dealers and the users who fund them are criminally inadequate.

He explained the negative impacts of the open air hard drug market on our community. Our hospital system is overwhelmed with physically and mentally ill drug patients who come for community-funded patches and then return to their addiction. Our children in public housing are bombarded with dysfunctional cultural exposures to drug and thugs models behavior that they in turn bring to school with rippling harm to everyone's children. If you have your home or car broken into, the odds are that hard drugs were the motivation behind that property crime. Far too many families are being destroyed by members who become addicted to crack, pain killers or methamphetamine. Our social service and judicial systems are overwhelmed in their efforts to protect the abused and neglected children usually from home struggling with the impact of hard drugs. Our elderly, disadvantaged and working poor in public housing are forced to live in dangerous and frightening circumstances on a daily basis making a mockery of the intent and responsibilities of government sponsored housing.

He feels the solutions are (1) timely and proper funding for support for our judicial system by our state legislators; (2) make sure that public housing is only available to those who behave in civil fashion, abide by the rules of the development, and refuse to provide refuge for those who traffic in hard drugs; (3) everyone must stand up and say "enough" to the harm and turn fear and complacency into action; and (4) our police must recognize that they are failing to match the creativity, enthusiasm, and persistence of drug dealers and users and, with support from the City Council and community, renew their dedication. This solution is a City government responsibility.

He said that public safety is government job one. He did not believe that our city and police administration (1) have educated us as to the essential surrender of entire neighborhoods in Asheville and to the full extent of our hard drug problems; (2) have adequately assured the

manpower levels necessary to protect all our citizens - whether in Pisgah View or Kimberly Avenue - from the harms of an open air drug market; (3) have made appropriate requests for funding and other needed supports; and (4) have creatively, enthusiastically, and persistently responded to their mandate to enforce our laws - especially as it relates to hard drug traffic. He did believe that our city and police administration are choosing to stand behind hollow statistics that portray the real world realities of an unrestrained drug market.

He felt that City Council should provide a mandate that we will surrender no more neighborhoods to the harms of hard drugs and task our city and police administration to exert their fullest energies to determining effective intervention strategies, manpower and resource needs, and quality assurance measures that find us, this time next year, celebrating the passage of an open air drug market in Asheville.

We need to (1) pursue proactive (fully manned Drug Suppression Unit) vs. reactive (police cars driving around developments) intervention strategies; (2) look to New York and other cities who have implemented quick response harassment strategies which target users (where the money comes from) as well as dealers (where the money goes to) constantly; (3) enhance our concentrated, random, and persistent small unit actions - keep the traffic off guard 24 hours a day - everywhere; and (4) remember our goal to make buying hard drugs in Asheville so unpleasant and risky that we reduce the pool of new user recruits and save lives and our future in the process. Above all else, we need to get creative because they are smart, but so are we. We need to (1) learn from other cities; (2) administratively encourage initiative; (3) partner with bus drivers, cab drivers, service workers, Housing Authority staff, neighbors, and others to keep us informed; and (4) make sure that when people call with a drug tip that there is always a response, always follow-through, and always a tracked outcome.

These are things we can do right now: (1) We can hold a candle light vigil at Pack Square in the coming month for those who have lost loved ones to drug addiction and death, those who have been harmed by drug crime, those who live in proximity to drug crime, and all those who care. Bring us together and build the will and hope necessary to fighting back; (2) establish a Drug Action Team comprised of the Chief of Police, Sheriff, Chief Justice, Chief Judge, District Attorney, Drug Commission Chair and others. Their charge would be to find better ways to find our system of justice work better than the drug trafficking system that is currently more effective than we are; and (3) look to the people to fund it all - the users with special initiatives that create consequences that discourage the development of a new generation of addicts. We are not assigning people consequences and therefore too many people are being destroyed by hard drugs.

Having done his best to shine light on the realities of our hard drug intervention failures, the time for confrontation has now passed. If there is a need for future blame - let is be his for not acting sooner and with more dedication. What has not passed is the time of accountability. Together we must now recommit to attacking and winning against the harms of hard drugs. Our police officers have the talent and skills - if we have the will.

The following individuals spoke in support of confronting the open air hard drug market in Asheville:

Mr. John Hayes, President of the Asheville Branch of the NAACP
A parent
Mr. Chad Nesbitt
Ms. Kara Dilworth, President of the Residents Council at Deaverview Apartments
Ms. Selina Sullivan
Mr. Steven Duncan

Mr. David Nash, Deputy Director of the Housing Authority, said that the U.S. Dept. of Housing and Urban Development will only be funding 76% of the recognized needs. They are again faced with severe funding difficulties. The reality is that they won't have that much money to put in a security team in the coming year as they have in the past. He thanked City Council for their support over the years and thanked the police officers and Police Chief for their efforts to help control crime in public housing. We support a request for additional funding for police officers to focus their efforts in public housing because safety is the number one concern of our residents.

Police Chief Hogan responded to various questions/comments from Council, some being, but are not limited to: what is the core issue of the drug problem; should we look to the police alone to solve the drug problems; is it harder to deal with the supply or demand of drugs; and would the Police Housing Authority Unit of 2 officers 24/7 be an overlay of existing personnel or would other things be changed in response to having that added layer of presence in public housing neighborhoods.

When Councilman Freeborn asked if money and resources were not a question what would be the solution in going forward, Police Chief Hogan said that if we are looking for the police to solve all the social issues, it is a saturation patrol, but again, we can start in public housing but still need to address other neighborhoods. That is a tremendous amount of money. The reason we want to try the High Point model is because it breaks the distribution chain in a particular neighborhood and they have had success in them not coming back.

Mr. Gene Bell, Executive Director of the Housing Authority, responded to various questions/comments from Council, some being, but are not limited to: what is the core issue of the drug problem in public housing; does public housing represent concentrated poverty; are we asking the people that we are losing to drugs what it would take not to participate; and do you think there is a way for us as a community to still provide people that are not able to find work housing without concentrating them all in one location.

When Councilman Freeborn asked if money and resources were not a question what would be the solution in going forward to combat the drug problem in public housing, Mr. Bell responded that the first thing he would do would be to ensure adequate day care for the children and have everyone employed. Part of the problem would then be resolved.

Councilman Newman said that as a country we need to do more to reward work and make it obvious that the benefits of being employed clearly outweigh the benefits of not so that people don't pursue other alternatives. He would like for the City to work with the Housing Authority in looking for ways to make that clear.

Councilman Newman stated that the standard he would like to see in public housing is for mothers to know it's safe for their children to go outside and play. He believes that a lot of people live in fear and we need to provide the kind of presence so that people feel safe. The information he is looking for is how can we work to do that and what resources do we need to do that.

Councilwoman Cape said that people need all sorts of work. We need a lot of entry level jobs where people in these housing communities can work, recognizing that some women have to be at work at 6:00 a.m. and school doesn't start until 8:30 a.m. and they don't want to leave their children alone for that time. We need to work as a community to see how we can make these jobs work for these people. There is a lot of collaborative conversations that she would like to see us be a part of, e.g., Mission Hospitals is doing some summer recruiting for kids and they will be applying for the Community Development Block Grant funds for that process. The Chamber of Commerce did a job fair, but it wasn't for entry level jobs. She suggested a job fair for 8th and 9th graders about why it's worth staying in school. She challenged us to step up to

the HUB because they are interested in understanding the economic impact of public housing, jobs, and poverty in our whole economic picture. While it is a big problem, we cannot do it with police enforcement alone. There must be a multi-level approach and she is dedicated to that.

Councilman Mumpower moved to charge our city and police administration to develop in collaboration with community partners a comprehensive, strategic and operational plan to eliminate our open air drug market in all Asheville neighborhoods. This motion was seconded by Councilman Davis.

Councilman Davis said that regarding McCormick Heights, he is pleased we are going to develop that property as mixed income housing and that is a good step towards the future. He felt that with the assets allocated, the Police Department has done a good job, but agreed that we need to get to a different place and that includes a number of facets. He thinks the Housing Authority staff is doing a good job, but there needs to be more emphasis on the maintenance of the public housing buildings. There are a lot of people doing a lot of good things, but it's just not as effective as it needs to be and we need to work harder on that problem.

Vice-Mayor Jones agreed with the idea of a comprehensive plan, but the Police Chief has said that even if it was full saturation, elimination in all neighborhoods is not possible without state and federal changes. We need bigger help. The Police Chief said that $6.7 Million would help public housing, but then just shuffle the problem around without some bigger holistic models. Mr. Bell said that he wanted everyone to work and have access to affordable day care. Even if we don't want to hear what people have to say, we need to keep those people close and listen if we are going to win. While we are not there, she thinks we have come a long way.

Councilman Newman moved to amend the motion to (1) affirm our support for Police Chief Hogan and the men and women of the Asheville Police Department, expressing our full confidence in their dedication to protect the public safety of the citizens and have confidence in their professionalism to achieve that goal; and (2) instruct our City Manager to explore opportunities to create job opportunities and ways to reduce poverty in Asheville's neighborhoods. This motion was seconded by Councilwoman Cape.

Councilman Mumpower was not willing to accept Councilman Newman's motion as a amendment because he believed we are distracting ourselves from the main motion by going off in specific areas that do not serve our chief priority, which is to charge our police and city administrators in coming up with a plan and working with others in going after our open air drug market. He clarified that he is asking that we eliminate our open air drug market, which is quite different than the entire drug problems in Asheville.

Councilman Freeborn asked for an addition to the motion amendment to instruct the City Manager to explore affordable day care as well as job opportunities. Councilman Newman and Councilwoman Cape would accept the addition into their motion amendment.

Councilman Davis felt that we should keep the motion simple and not cloud the issue with amendments.

City Manager Jackson said that we welcome putting together a comprehensive program and to work in partnership with the Housing Authority. The suggestions made fall in line with the whole holistic approach. It will be dealing with jobs and social issues, but it doesn't mean we can take care of it in one year. He interprets the general direction of Council is to work with Mr. Bell and the Housing Authority to come up with holistic comprehensive long-range strategies. There are some completely different ways to change neighborhoods, bring mixed incomes, bring pride into those neighborhoods, make them safer, and make police presence in the neighborhoods more efficient and more effective. He also suggested that there are different roles for the City to

play. We can't do it all. One thing we should do is to have a strong partnership with the City and Housing Authority. It's time for us to compile those in an overall comprehensive plan and identify where we lead, support or get out of the way.

The amended motion to amend the main motion made by Councilman Newman and seconded by Councilwoman Cape carried on a 5-2 vote, with Councilman Davis and Councilman Mumpower voting "no."

Councilman Newman believed that the City did not give up on McCormick Heights. The City didn't own that property or control over the people operating it. We said that if it is going to be sold that we would like to preserve some affordable housing in that part of our community. A majority of Council is looking for ways to partner with people to do a redevelopment of that part of our community that will transform that part of our city from a place that was formerly a very isolated area of low income housing and transforming it into a neighborhood that includes housing that is affordable to lower and middle incomes with a much wider range of people from different economic backgrounds. It will be safer and it will be more economically vibrant and a contributory part of our community. Council is going to do what it takes to increase the safety of our neighborhoods through law enforcement, plus a transformation of neighborhoods, plus helping to create opportunities for people.

Mayor Bellamy could not negate anything anyone said. The reality is that we do need to increase police presence, but she didn't know at what level. The problem is if our police aren't as efficient or effective as they need to be, that is the City Manager's problem. If they need more bullet-proof vests, etc., Council is here to give them those tools. As Mayor, she wants to make sure that Council is making good policy and we are giving our police force the tools that they need. We all care about living in safe neighborhoods. The Housing Authority has put rules in place but they can't get enforcement. So when we come to a plan, she wants to make sure we listen to Mr. Bell and when we come up with a plan, the City needs to support the Housing Authority and stand behind the plan. We all care about this community and just because there was not unanimous support the amendment doesn't mean that we don't care about public housing.

At the request of Mayor Bellamy and by a show of hands, City Council unanimously supported safe neighborhoods.

Councilman Mumpower stated that we lost an affordable housing development (McCormick Heights) to crime and safety issues and he saw no concern about that from City Council. There was no call to rededicate our efforts in any way to address the loss of an entire development.

At the request of Mayor Bellamy and by a show of hands, no one on City Council raised their hands in support of an open air drug market in Asheville.

At the request of Mayor Bellamy and by a show of hands, City Council unanimously supported the elimination of the open air drug market in Asheville.

The amended main motion to (1) charge our city and police administration to develop in collaboration with community partners a comprehensive, strategic and operational plan to eliminate our open air drug market in all Asheville neighborhoods; (2) affirm our support for Police Chief Hogan and the men and women of the Asheville Police Department, expressing our full confidence in their dedication to protect the public safety of the citizens and have confidence in their professionalism to achieve that goal; and (3) instruct our City Manager to explore opportunities to create job opportunities and affordable health care and ways to reduce poverty in

Asheville's neighborhoods carried on a 5-2 vote, with Councilman Davis and Councilman Mumpower voting "no."

VI. NEW BUSINESS:

A. CONSIDERATION OF APPOINTMENTS TO THE ALCOHOLIC BEVERAGE CONTROL BOARD, BOARD OF ADJUSTMENT, COMMUNITY RELATIONS COUNCIL, DOWNTOWN COMMISSION, ECONOMIC DEVELOPMENT ADVISORY COMMITTEE, FIREMEN'S RELIEF FUND, GREENWAY COMMISSION, METROPOLITAN SEWERAGE DISTRICT BOARD, PUBLIC ART BOARD, RECREATION BOARD, TRANSIT COMMISSION AND TREE COMMISSION

It was the consensus of Council to instruct the City Clerk to (1) prepare the proper paperwork to reappoint Ken Kaplan; and (2) arrange the following interviews for vacancies on the Alcoholic Beverage Control Board: Wiley Neal Evans, DeRothea G. Williams and William C. Dickason.

It was the consensus of Council to instruct the City Clerk to prepare the proper paperwork to reappoint Lee McElrath (Alternate). Vice-Mayor Jones said that she would investigate the attendance process for Alternate members on the Board of Adjustment prior to filling the second vacancy.

It was the consensus of Council to instruct the City Clerk to arrange the following interviews for vacancies to the Community Relations Council: Martha Swindell Brown, Sharon West, Craig White, Amanda Hendler-Voss, Clare Hanrahan, Michael Vavrek, Ira Naiman and Shirley Schultz.

It was the consensus of Council to instruct the City Clerk to (1) prepare the proper paperwork to reappoint Peter Alberice, Jesse Plaster, John Rogers and Guadalupe Chavarria; and (2) readvertise for one month in order to give the Downtown Commission the opportunity to see if there are some people that possess certain qualities that would be helpful for the Commission; and (3) advise Council of the specific requirements for members and include those qualifications necessary in the advertisements.

At the request of Sustainable Economic Development Advisory Committee Chairman Chuck Tessier, it was the consensus of Council to instruct the City Clerk readvertise for two months for the vacancies on that Committee.

It was the consensus of Council to instruct the City Clerk to prepare the proper paperwork to reappoint Leesa Gibbs to the Firemen's Relief Fund.

After Vice-Mayor Jones said that City Council would need a formal letter from Mr. Jack Saye requesting the Greenway Commission be expanded and that Mr. Yuri Koslen (who did not apply to serve) be appointed, it was the consensus of Council to instruct the City Clerk to (1) prepare the proper paperwork to reappoint Phyllis Styles; (2) arrange the following interviews for vacancies on the Greenway Commission: Glen Locascio, Hartwell Carson and Dawa Clark.

It was the consensus of Council to instruct the City Clerk to prepare the proper paperwork to reappoint Mayor Terry Bellamy to the Metropolitan Sewerage District Board.

It was the consensus of Council to instruct the City Clerk to (1) prepare the proper paperwork to appoint Harry Harrison; and (2) arrange the following interviews for vacancies on the Public Art Board: Julie Calhoun-Roepnack and Lisa Messa.

It was the consensus of Council to instruct the City Clerk to arrange the following interviews for vacancies on the Recreation Board: Scott Barnwell, Carolyn Stanberry and Adam Pittman.

It was the consensus of Council to instruct the City Clerk to prepare the proper paperwork to appoint Yuri Koslen and reappoint Hanna Miller, Andrew Goldberg, Ryan Pickens and Karen Austin to the Transit Commission.

It was the consensus of Council to instruct the City Clerk to (1) call Ms. Catherine Shane to see if she would be interested in serving and if so, prepare the proper paperwork to appoint Ms. Shane; and (2) arrange the following interviews for vacancies on the Tree Commission: Bill Hascher, Laura Uberbacher and Mary Carol Koester.

B. APPOINTMENT OF LIAISON TO THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY AND THE ENVIRONMENT

It was the consensus of City Council to prepare the proper paperwork to appoint Councilwoman Cape as liaison to the Sustainable Advisory Committee on Energy and the Environment.

C. RESOLUTION NO. 07-16 - RESOLUTION ALLOCATING $670,000 IN HOUSING TRUST FUND LOANS FOR AFFORDABLE HOUSING DEVELOPMENT

At the request of Mayor Bellamy, Councilman Freeborn moved to excuse Mayor Bellamy for the rest of the meeting. This motion was seconded by Councilman Mumpower and carried unanimously.

At this time, Mayor Bellamy turned the meeting over to Vice-Mayor Jones.

Ms. Charlotte Caplan, Community Development Director, said that this is the consideration of a resolution allocating $670,000 in Housing Trust Fund loans for affordable housing development.

The following three Housing Trust Fund applications have been evaluated by the HTF review panel and recommended for approval by the Housing and Community Development Committee at the January 8 meeting. Currently over $1.35 million is available in the Housing Trust Fund. The requests are summarized below.

1. Carolina Cornerstone Construction; 27 Jeffress Ave; $50,000 HTF loan; 1 unit

Terms: 2% interest, 2 year term; up to $30,000 available as a soft second to eligible homebuyer

Strengths: The applicant has extensive affordable housing construction experience. The developer is doing this job at cost (i.e. no profit or developer fee) to make the home affordable to a low-income employer and his family who are being displaced from a mobile home park.

Concerns: CCC has less experience as a developer, but this is a small project and construction represents most of the work.

2. Mountain Housing Opportunities; The Glen Rock; $500,000 HTF loan; 60 units

Terms: 2% annual interest payments, with principal repayment deferred for 20 years

Strengths: MHO has successfully developed several similar Tax Credit projects in Asheville. The proposed rents are exceptionally affordable, with some units being affordable to households with

income below 40% AMI. Tax credit regulations require long-term affordability. This affordable housing will be part of a larger redevelopment plan on this site which weeks to connect the revitalizing River Arts District and the Southside Community.

Concerns: The project is contingent on tax credit approval in July 2007. However, if tax credits are awarded, the development will then likely proceed successfully.

3. Tim and Wendy Vorst; 4 Haywood Terrace; $120,000 HTF loan; 4 units

Terms: 2% interest, 30 year term

Strengths: The developer has an excellent track record with Housing Trust Fund projects, with timely completion of projects and rents remaining affordable. The estimated development costs are low and the developer is contributing significant equity to the project.

Concerns: The units are not particularly energy efficient and long-term affordability (beyond the required 3 years) will not be guaranteed.

Pros:

- Assists with the development of 85 units of affordable housing;
- Completed projects will increase the tax base by over $4.5 million

Cons: None

Staff recommends approval of the HTF loans listed above.

Vice-Mayor Jones said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 07-16. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 196

VII. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of December 22, 2006 - January 11, 2007: Charter Communication (Water), Lane Godsey (Water), Marcie Swoveland (Parks & Recreation), Britt Jacobs (Police), Noel Calloway (Sanitation), Alan Robinson (Water), Jennifer N. Briggs (Police) and Chad Hockenberry (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

IX. ADJOURNMENT:

Vice-Mayor Jones adjourned the meeting at 10:08 p.m.

Leesha Lipe
CITY CLERK

MAYOR

Friday – January 19, 2007 - 12:45 p.m.
Saturday - January 20, 2007 - 8:30 a.m.
Municipal Building - Asheville, NC

Retreat

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

Mayor Bellamy welcomed everyone to the City Council retreat. She then introduced Mr. Andy Atkinson who will be the facilitator for this meeting. He in turn reviewed the agenda, the role of the facilitator and the ground rules.

At 1:03 p.m., Councilman Newman moved to go into closed session (1) to establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 160A-318.11 (a) (5); and (2) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; State of North Carolina; County of Buncombe. The statutory authorization is contained in G.S. 160A-318.11 (a) (3). This motion was seconded by Vice-Mayor Jones and carried unanimously.

At 1:55 p.m., Councilman Freeborn moved to return to the formal meeting and continue the closed session on January 20, 2007, if needed. This motion was seconded by Vice-Mayor Jones and carried unanimously.

Chief Financial Officer Ben Durant gave the financial overview. He explained the quarterly report for fiscal year through December 2006. Since the first quarter budget report, the General Fund has been amended five times, resulting in an overall increase in the budget of $3,131,265.

Regarding revenues, through December 31, 2006, the City has collected $28,759,482 in General Fund revenue, which represents approximately 36.3% of the total General Fund revenue budget. At this point in the prior fiscal year, the City had collected $23.55 Million in General Fund revenue, which represented approximately 31.5% of the revenue budget. Based on current trends, staff anticipates that Fiscal Year 2006-07 year-end revenue will exceed budget by $1,635,051.

Regarding expenditures, General Fund expenditures through December 31, 2006, total $38,451,127 or 47.2% of the budget. At this point in the prior fiscal year, expenditures were at $35.84 Million or 47.0% of the budget. Based on current trends, staff anticipates that Fiscal Year 2006-07 year-end expenditures will come in under budget by $1,049,872. The budget savings are primarily attributable to normal attrition and other managed cost savings that occur throughout the year.

Regarding Fund Balance, the City has budgeted $2.22 Million in Fund Balance in Fiscal Year 2006-07. This includes $593,987 budgeted to cover prior year encumbrances that rolled over from Fiscal Year 2005-06, along with $1,628,872 appropriated in the current year. However, revenues are expected to exceed budget by $1.63 Million and expenditures are projected to come under budget by $1.05 Million. This result will produce a combined positive effect of $2.68

Million, which will more than offset the $2.22 Million in budgeted Fund Balance. Therefore, based on year end revenue and expenditure estimates for Fiscal Year 2006-07, unreserved fund balance is projected to increase by $462,064 to $24,253,932, which will equate to 30.1% of estimated year-end expenditures.

The Fund Balance analysis is that the final audited, unreserved Fund Balance for the General Fund on June 30, 2006, was $23,791,868 or 31.0% of year-end expenditures. $2,222,859 in Fund Balance has been appropriated to balance the Fiscal Year 2006-07 revised budget. As a result, the revised Fiscal Year 2006-07 budget shows a decrease n Fund Balance to 27.2% of expenditures. However, based on year end revenue and expenditure estimates for Fiscal Year 2006-07, Fund Balance is now projected to increase by $462,064 to $24,253,932, which will equate to 30.1% of estimated year-end expenditures. The City's Financial Management Policy recommends the City maintain a Fund Balance equal to 15% of the current-year budget expenditures.

At the request of City Manager Jackson, and after a short discussion, it was the consensus of Council to acknowledge that City staff has met their financial goals with the cost reduction program and approved the City Manager accelerating their recruitment process.

Mr. Durant then reviewed the following enterprise funds: Water Fund, Civic Center Fund, Parking Fund, Transit Fund, Golf Fund, Stormwater Fund and Festivals Fund. In addition, he reviewed the following major capital projects: Azalea Park; Aston Park; Memorial Stadium and Mountainside Park Renovations; Reed Creek Greenway; Reid Center Renovations; Richmond Hill Park; I-26 Amboy Road Greenway Extension to Hominy Creek Park; New Fire Stations (Old Haywood & Rocky Ridge Roads); Grove Park Traffic Improvements; Fiscal Year 2006-07 General Street & Sidewalk Program; Amboy Road Greenway Connector - TEA 21; Haw Creek/Avon Road Sidewalks; Patton Avenue Sidewalk; and the Civic Center Arena Roof. He then reviewed with Council the investment report.

After Mr. Durant reviewed with Council the long-range (six-year) financial planning, noting that this review is to give Council just a first glance and is not final by any means, he responded to various questions/comments from Council, some being, but are not limited to: why do we have ballfield lights at UNC-Asheville; how much, including labor and materials, does the City spend on streets and sidewalks; update on the Clingman Avenue Streetscape Plan; options for fleet replacement; are we not investing any additional funds in greenway development until the next three budget years; do we track how many people use the tennis courts and ballfields and if they are not being actively used, could we use that property for something different; and request for an update on the Parks & Recreation Facilities Master Plan, with inclusions of softball fields, a rugby field, a BMX Bike Park and a roller derby.

It was the consensus of Council to clarify that they want to spend a minimum of $400,000 for the next six years for on-going maintenance on the Civic Center.

Vice-Mayor Jones said that we are facing a child obesity crisis and she would like to see more playgrounds in the budget.

Mayor Bellamy said that City Council will have the opportunity to add/delete things to the Capital Improvement Plan during the budget process.

Mr. Durant reviewed the forecast for next year. He said the Fiscal Year 2007-08 revenue projects are as follows: (1) Property Taxes: Based on current year tax base information received from Buncombe County and growth trends in recent years, staff is projecting a 3.5% increase in property tax revenue; (2) Sales Tax: During the first half of the current fiscal year, sales tax revenue has grown by 9.0%. The N.C. League of Municipalities expects that sales tax growth will

slow to 5.0% for the remainder of this fiscal year, and that this growth rates will continue into Fiscal Year 2007-08; (3) Investment Earnings: Based on Fiscal Year 2006-06 investment earnings, and collections to date in the current fiscal year, staff is projecting a $312,500 increase in this revenue source; and (4) Charges for Services: Staff is projecting a 5.0% increase in Fiscal Year 2007-08. Most of this growth is the result of an increase in the fire protection charge paid by the Town of Biltmore Forest based on its post-revaluation property values. The Fiscal Year 2007-08 expenditure projects are as follows: (1) Personnel costs: Staff is currently projecting a 7.0% increase in personnel costs. The budget projections include a 1% cost of living and a 3.0% average merit increase for employees. The projections also include an additional $450,000 to fund year two of the market basked pay plan adjustment. Another factor affecting personnel costs is the budgeting of a full year's worth of costs for 22 positions (18 firefighters and 4 development review staff) that were only budgeted for half the year in Fiscal Year 2006-07; (2) Operating Costs: Budget projections include a 3.0% increase in operating costs to account for increases in supply and material costs; and (3) Capital Reserve/Debt Service Funding: Based on the long-range Capital Improvement Plan, budget projections include a 3.0% increase in pay-as-you-go funding compared to the adopted Fiscal Year 2006-07 budget. Please note that the revised Fiscal Year 2006-07 budget includes $2.5 Million in one-time capital funding that Council approved in October of 2006. Staff is also recommending that $2.0 Million in Fund Balance be appropriated in Fiscal Year 2007-08 for high priority capital needs, but this appropriation is not included in the financial forecast. He then explained the long-range revenue and expenditure projections as follows: (1) long-range revenue projections are based on historical trend data and assume that the economy continues to expand at a modest pace; (2) long-range expenditure projections assume that the City will continue to move toward full implementation of the market-based pay plan that was begun in Fiscal Year 2006-07. For that reason, personnel costs show a 6% increase in Fiscal Year 2008-09 and Fiscal Year 2009-10; and (3) The only capital improvement project in the draft Capital Improvement Plan that is expected to have a significant impact on future operating budgets is the construction of Fire Station 12. Eighteen additional firefighters will be needed to staff this station once it is complete. The costs for these additional firefighters, however, is not included in the financial forecast at this point due to the uncertainty surrounding annexation timetables and possible legal challenges that may delay the effective date of the annexation. Once the Annexation Services Plan is adopted by Council, staff will update the financial forecast to include both the revenues and expenditures connected to the annexation.

In response to Councilman Newman, Mr. Durant said that 65% of the City's budget is personnel costs.

Councilman Newman understands that personnel it is an operational aspect, but with all the infrastructure needs and the need for good employees, he encouraged the City Manager to manage personnel costs as best as he can.

When Mayor Bellamy asked to look at alternatives for firefighters, Councilman Freeborn said that the City Council Revenue & Finance Committee is looking at that. Vice-Mayor Jones asked City staff look at the variety of options available.

Upon inquiry of Mayor Bellamy, Assistant City Manager Jeff Richardson said that staff will perform a financial analysis on a separation allowance for firefighters and report back to Council.

Regarding Council's Strategic Plan, City Manager Jackson said that one year ago Council set strategic goals with community input and we have come a long way on some of those issues. He asked Council to work on that framework and let staff know if they are going in the right direction with key projects. Council needs to determine where they want to be one year from now. Staff will take Council's priorities and start working through what are the most prevalent,

common interest things and then work through to where Council wants to be at the end of the year.

Councilwoman Cape distributed to Council goals and strategies the Sustainable Economic Development Advisory Committee would like Council to consider.

City Council discussed the policy topic prioritization and goal setting. Mr. Atkinson compiled Council's issues as follows and gave six dots to each Council Member and asked them to place one dot by their most important issue for this year (numbers after each issue signifies how many Council Members supported that issue), noting that just because an issue did not receive a vote or did not reach the top five, did not mean that it is not an on-going issue for City staff:

Asheville Civic Center - 1; Bus shelters and benches - 0; Parking for downtown - 2; Bathroom kiosks for downtown - 0; Traffic management - 2; Planning & Zoning issues (a) One Stop Permitting; (b) How much regulation; and (c) Unified Development Ordinance - 3; Enforcement of existing laws - 0; Curtail active open air drug market - 3; Use public safety as an economic tool - 0; Elimination of aggressive panhandling and other issues with homeless - 1; Provide tax relief for Asheville families - 3; Maintain Fund Balance - 0; Funding of non-profits - 0; Implementation of employee salary pay plan - 2; Inequity of retirement for firefighters - 0; Water issue with State/County - 0; Consolidation with County - 1; Energy and the environment ("Green Construction") - 5; River District - 0; Housing issues - 3; Funding stream for Transit System - 4; Cooperation/partnership with County - 1; Jobs - 2; Basic City services improvement - public safety, streets, etc. - 2; Sidewalks and greenways - 5; and Cleaner/litter - 1.

The top three issues were: Sidewalks and greenways; Energy and the environment; and Funding stream for Transit System. Council was given an additional two dots to come up with five issues, which resulted in the following: Planning & Zoning - 2; Curtail active open drug market - 3; Tax relief for Asheville families - 5; and Housing issues - 4.

The five top issues were as follows: Sidewalks and greenways; Energy and the environment; Funding stream for Transit System; Tax Relief for Asheville families; and Housing issues.

After considerable discussion about whether Council wanted to focus on the top five issues just arrived at or to update their goals and visions, it was the consensus of Council to reaffirm City staff's continuance to work on their goals and visions. City Council then reviewed each goal and updated it when necessary. Throughout the updating, discussion surrounded youth programs; an improved Civic Center website; an awareness and educational component of ordinances; expansion of community policing; attention on downtown maintenance/cleanliness; the need to put sidewalks where appropriate; fully leveraging funds to create greenways, etc.; redevelopment issues; pursue downtown parking; partner with other agencies, e.g., Chamber of Commerce; visualization technology tools; collaborate with Buncombe County on a variety of issues; land use policies, in particular, farm land and tailgate areas; funding strategies for transit; annexation; building incentives; guiding principles of the Unified Development Ordinance; addressing the issue of where new housing needs to be; equitable distribution of amenities for neighborhoods; traffic calming/pedestrian safety; traffic modeling to enhance future planning; long-term tax relief; comprehensive housing policy, e.g., public housing issues, HOPE 6, collaboration with public housing; establish an ambitious energy conservation goals; maintaining greenspace preservation as housing growth continues; economic development modeling; private incentives for energy conservation; Performing Arts Center; Greenway Master Plan update; explore bikeways where possible; expand employment opportunities for City employees regardless of educational level; and collaborate on a regional basis, e.g., Hendersonville water sales, continuing to work together on public safety, and transfer development rights.

At 5:25 p.m., Mayor Bellamy said that the City Council retreat will continue at 8:30 a.m. on January 20, 2007.

Saturday – January 20, 2007 - 8:30 a.m.
Municipal Building - Asheville, NC

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

Mayor Bellamy welcomed everyone to the continuation of the City Council retreat.

Each Council explained their priorities for the year as follows:

Mayor Bellamy:

- Dollar-Wise Program
- Breast cancer awareness
- You Are Important Initiative
- Mayor's Committee for Youth
- Uniform Pilot Project
- Recruitment Roundup
- Women in Leadership
- Elected Women's Initiative
- We Grown Our Own
- Mayor's Committee for Housing
- Bonding Options

Councilman Mumpower:

- For Our Kids Program
- Top-A-Stop Program
- Job One Program in Shiloh
- Drug Commission
- Elimination of Open Air Drug Market
- Uphold responsibilities as a conservative representative
- Memorial Stadium

Councilman Newman:

- Energy Conservation Goal
- Incentives for the private sector around green building
- Living Wages Policy and help foster that in the business community (earned income tax credits)
- More funding for greenways and sidewalks
- Civic Center move forward
- Possible to restore racing in the Asheville area
- Political parties involvement in City elections

- Help businesses comply with recycling
- More funding for Pedestrian Plan
- Leverage MPO funds for sidewalks and greenways for 2009-15 Councilman Davis:

- Civic Center image improvement
- Memorial at the Asheville Speedway
- What is urban vs. suburban
- Work to attract athletic events
- Feasibility study to restore racing in the Asheville area
- Be a bigger player in the bio-tech area
- River District improvements (e.g., boat ways)
- Lack of employer health care
- Visualization of recycling containers in City Hall

Vice-Mayor Jones:

- Enhance current initiatives
- Help working people afford to live (e.g., tax relief and affordable housing)
- Collaboration with the County
- Clean-Up efforts
- Child abuse issues (raise awareness of sexual preditators on the internet)
- Look at ways to reduce diabetes - (e.g., school lunches)

Councilman Freeborn:

- Continuing Airport development (racetrack, economic development)
- Bus stops on our state roads
- MPO funding for greenways and sidewalks
- Transit route study
- Building and strengthening regional transportation partnerships
- Follow through on independent Airport Authority

Councilwoman Cape:

- Support community initiatives
- How can we be a part of climate dialogue (e.g., energy efficiencies, alternative energies)
- Balance development and conservation
- Work with builders who are willing to build larger bus stops
- Recycling bin contest
- Matching kids and people (e.g., Room at the Inn Program)
- Housing initiatives
- Visualization in terms of using tools of technology to be better communication
- Youth Fairs
- Child care issues
- Additional green building in Asheville
- Civic Center
- Discussion of Lexington Avenue
- River District

Discussion surrounded the need for better communication between Council Members. Several ideas were discussed, e.g., Council to make a note of what they did in a week and pass it out at the Tuesday council meeting for update information only; and use of e-mail for updates

only with no debate. Council Members did indicate that they supported the Mayor meeting monthly with Council Members one on one. It was the consensus of Council that each Council Member make their own commitment to the best communication style that fits them, with the goal of sharing the most relevant information. It was also the consensus of Council to (1) receive a synopsis of the City-County meetings from the City Manager; and (2) receive a copy of the Mayor's weekly or monthly schedule.

Discussion surrounded how the Council's priority items would come before full Council. Several examples of scenarios were discussed as well as suggestions. After discussion, it was the consensus of Council that in order to place an item on the agenda that the idea go through a committee, if relevant, the City Manager or the Mayor. The committee is the place for Council to have dialogue with staff and start fleshing out the ideas. Regardless of whether there is a relevant committee or not, the idea will be placed on Council's agenda for a presentation to see if Council is interested in pursuing it.

It was affirmed by City Council that (1) Council can't direct City staff, but only give direction to the City Manager, City Attorney and City Clerk, and then only by 2/3's majority of Council; (2) Council can ask questions of department directors and express their opinions to them; and (3) if it is other than brief, simple information requests, any meetings or conversations with department directors should be requested through the City Manager.

Vice-Mayor Jones felt that this is a topic that needs to be discussed in the new City Council orientation.

Mayor Bellamy said that it is her responsibility to decide what to put on the agenda. She has instituted a process that when Council asks for an issue to be placed on the agenda, it is put in a file and she will schedule it on an agenda. In addition, she has instituted a procedure whereby the first Friday of each month the City Clerk will send each Council member a draft of what is coming before Council that month.

Mayor Bellamy said that Council will know when the strategic plan items will be on the agenda after the strategic plan is adopted by Council, which should be in February.

It was the consensus of Council to notify the Assistant City Manager on all operational and service requests.

After discussion regarding the Council/staff roles, it was the consensus of Council to ask that the City Manager to make sure that his staff is properly briefed on Council's power and endorsement of Council to set boundaries and at any time they feel that they are being told what to do, that they are safe in standing up for their position and that the City Manager and Council will back them up.

City Manager Jackson said that his department directors have had extensive discussions on understanding of the roles and limitations. One thing is the Council priority list is very gray in that staff runs into the problem of whether an item is a Council Member's priority or if it is one of Council's overall goals. We want to keep the overall goals moving but at the same time staff doesn't want to be a hurdle or an impediment or even to appear like that because sometimes they don't know how far they can go. They spend hours on a case by case basis because there are no hard-fast rules. So the more Council can articulate these issues the more clarify it will be for staff for to interpret Council's wishes as well as possible.

At 10:14 a.m., Mayor Bellamy announced a 10-minute break.

Discussion surrounded Council meeting time management issues. Several suggestions were identified, e.g., Council be succinct in their questions; Mayor asking that the discussion is irrelevant and focus on the issue; Mayor announcing that the meeting is running too long and for Council to be brief in all comments; Mayor to announce that each topic be no more than a specific number of minutes for Council debate; Council does not have to explain why they voted the way they did; Mayor can sensor a Council Member; Council does not need to take a disproportionate amount of time if they feel they are in the minority; a system where Council Members push a button and the Mayor will call on them in order; ration equally the debate time; if a Council Member is not passionate about an issue, just cast the vote; and have the Mayor look at the different items and make a best guess about how much time it will take to move through those - then the Mayor can say on each item that Council try to spend no longer than so many minutes on the question and then at the end of that time, the Mayor could say are we ready to vote or spend a little more time on that.

Mayor Bellamy said that she will call on Council Members who raise their hand to speak.

At the suggestion of Mayor Bellamy, it was the majority of Council's wishes to end the Council meetings at 10:00 p.m.

Mayor Bellamy also asked that Council not put staff in the middle of the debate. If it is a direct question to staff, then the Mayor will call upon them.

Councilman Davis said that the reality is that we all got elected and are representing constituents. Let's cherish that time, talk wisely and keep your eye on the clock.

City Attorney Oast said that a mechanism in City Council rules is a motion to call the previous question. A Council Member can move to call the previous question after a motion has been made and after there has been at least 20 minute of debate and every member of Council has had an opportunity to speak once. After the motion is made to call the question, it should be seconded by 2/3's majority of Council (which motion is not debatable), however, the practice that we follow is not unusual and unless an objection is raised, the debate is closed.

After City Council discussion on the City Council Subcommittee review, it was the consensus of Council to continue the City Council Subcommittees for another year.

At the request of Vice-Mayor Jones, City Manager Jackson said that staff will e-mail Council all the City Council Subcommittee agendas and staff reports prior to the subcommittee meeting.

Upon inquiry of Mayor Bellamy, each Council Chair of each Council Subcommittee committed to remaining Chair of that Subcommittee until the end of the year when the entire Council starts the Board/Commission member and liaison process.

Councilman Newman wondered if it would be relevant for the City Council Revenue & Finance Committee to take a lead role in the budget process. It was the majority of Council's decision to continue the budget process in its current fashion.

After City Council discussion, it was the consensus of Council to schedule the following Council forums on the 5th Tuesdays, beginning January 30, 2007: Bele Chere, Civic Center, Film Commission, and the Homeless. Council's role will be to listen. City Council affirmed to structure the meeting where it is time limited.

Mayor Bellamy ended the retreat with the following quote by Marianne Williamson: "Our deepest fear is not that we are inadequate. Our deepest fear is that we are powerful beyond

measure. It is our light, not our darkness that most frightens us. We ask ourselves, Who am I to be brilliant, gorgeous, talented, fabulous? Actually, who are you not to be? You are a child of God. Your playing small does not serve the world. There is nothing enlightened about shrinking so that other people won't feel insecure around you. We are all meant to shine, as children do. We were born to make manifest the glory of God that is within us. It's not just in some of us; it's in everyone. And as we let our own light sine, we unconsciously give other people permission to do the same. As we are liberated from our own fear, our presence automatically liberates others." Mayor Bellamy adjourned the meeting at 11:32 a.m.

Keisha Lipe
CITY CLERK

Jerry M Bellamy
MAYOR

Tuesday – January 23, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and Deputy City Clerk Phyllis Corns

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Mumpower gave the invocation.

I. PROCLAMATIONS:

II. PRESENTATIONS & REPORTS:

III. CONSENT AGENDA:

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 16, 2007**

B. **RESOLUTION NO. 07-17- RESOLUTION APPOINTING COUNCILWOMAN ROBIN CAPE AS THE LIAISON TO THE ENERGY AND ENVIRONMENT COMMITTEE**

RESOLUTION BOOK NO. 30 – PAGE 197

C. **RESOLUTION NO. 07-18 - RESOLUTION AUTHORIZING THE CITY MANAGER TO CONVEY AN EASEMENT OVER A PORTION OF CITY-OWNED PROPERTY IN THE EAST RIVERSIDE REDEVELOPMENT PROJECT TO TILMAN AND SABRINA JACKSON FOR A PRIVATE RESIDENTIAL SEWER LINE**

Summary: The consideration of a resolution authorizing the City Manager to convey an easement over a portion of city-owned property in the East Riverside Redevelopment Project to Tilman and Sabrina Jackson.

Tilman and Sabrina Jackson have requested an easement over a portion of City-owned property in the East Riverside Redevelopment Project Area for a private residential sewer line.

The City owns property (a portion of PIN 9648.10-25-8823) located between Tolula Lane and Choctaw Street and Town Branch approximately 400 feet west of McDowell Street. The current and anticipated use of the portion of the property impacted by the sewer is for park green space with plans for an improved greenway path along Town Branch.

Tilman and Sabrina Jackson purchased property from the City adjacent to the greenway parcel in March, 2006 and are planning to erect a single family dwelling. Due to the location of water lines and sewer lines the requested easement would provide the most direct and efficient

route to the sewer main. The easement would be solely for the purpose of installing and maintaining the sewer line and would not restrict the City from constructing a greenway path or planting trees which is the proposed use of the City's property.

The City recently obtained an appraisal of its property in the amount of $130,000 reflecting a per square foot value of $1.72. The easement comprises an area of approximately 1,165 square feet. The easement value is calculated at 50% of the land value rendering an easement value of $1,001.90 rounded to $1,000.

Pros:

- The easement will enable the Jacksons to proceed with construction of a new home on their property which will increase the tax base, generate economic activity, further smart growth objectives of urban densification and provide needed housing.
- The easement will provide the most practical and efficient access to the public sewer.

Con:

- The disadvantage is the land within the easement area (1,165 sq. ft.) cannot be built upon or planted with large trees

Approval of the resolution will authorize conveyance of the easement to Tilman and Sabrina Jackson for the purpose of a private residential sewer line.

Community Development, Parks & Recreation and Water Resources staff recommends adoption of a resolution authorizing the City Manager to convey an easement over a portion of city-owned property in the East Riverside Redevelopment Project to Tilman and Sabrina Jackson.

RESOLUTION BOOK NO. 30 – PAGE 198

D. RESOLUTION NO. 07-19 - RESOLUTION REAPPOINTING LEESA GIBBS AS A MEMBER OF THE FIREMEN'S RELIEF FUND

RESOLUTION BOOK NO. 30 – PAGE 199

E. RESOLUTION NO. 07-20- RESOLUTION REAPPOINTING MAYOR TERRY BELLAMY AS A MEMBER TO THE METROPOLITAN SEWERAGE DISTRICT BOARD

RESOLUTION BOOK NO. 30 – PAGE 200

F. RESOLUTION NO. 07-21 - RESOLUTION REAPPOINTING HANNA MILLER, KAREN AUSTIN, ANDREW GOLDBERG, RYAN PICKENS AND APPOINTING YURI KOSLEN TO THE ASHEVILLE TRANSIT COMMISSION

RESOLUTION BOOK NO. 30 – PAGE 201

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Newman moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Jones and carried unanimously.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE INTENT TO PURCHASE 8.45 ACRES ON OR NEAR HUNT HILL PLACE AND ARDMION PARK DRIVE, HAVING AN ADDRESS OF 56 HUNT HILL PLACE AND BEING GENERALLY KNOWN AS McCORMICK HEIGHTS

Mayor Bellamy said that his public hearing was originally scheduled for January 9, 2997, but continued, at staff's request, to this date. At the request of City staff, and in order for staff to continue their on-going due diligence, it was the consensus of Council to withdraw this public hearing and reschedule at a later date.

In a similar matter, Mayor Bellamy said that many people had attended this meeting with the understanding that City Council would consider relocation assistance funds for the tenants of McCormick Heights.

City Manager Jackson said that staff recommended postponing action on the relocation assistance funds until after the due diligence, regarding the City's intent to purchase McCormick Heights, by City staff was completed, whether the deal was consummated or not. Council does have the option to amend the 2006 Consolidated Annual Action Plan at this meeting for that issue because in the public hearing notice, it included a proposal for housing assistance to tenants of McCormick Heights Apartments. The public hearing for the other amendments to the 2006 Consolidated Annual Action Plan is scheduled for this meeting as well.

Councilman Mumpower questioned the appropriateness of creating a plan of relocation assistance before we have some certainty about the City's purchase of the property. He questioned if our offer to relocate the residents was predicated on our purchasing the property and if there are questions about our ability to purchase the property, would that not alter our willingness to spend taxpayer dollars to relocate residents if the property is purchased by an alternate developer.

Mayor Bellamy said that regardless of whether the City purchases the property or not, some tenants cannot afford to move on their own. She cited the instance where the tenants of a Merrimon Avenue home were forced to move and the City assisted them with relocation, even though the City did not purchase the property.

Councilwoman Cape's understanding is that the City considered purchasing the property because the Housing Authority is going to shut that apartment complex down. So, regardless of whether the City steps in or not, the tenants are being told they have to move out.

After it was determined that a June 30, 2007, date was the eviction date of the tenants, Councilman Davis said that there is time for the City to put more thought into a relocation assistance proposal.

Vice-Mayor Jones said that the City will not walk away from their commitment to help tenants with their relocation.

Community Development Director Charlotte Caplan said that staff had considerable discussion with the Affordable Housing Coalition and with the Housing Authority about the likely needs for assistance, and this was predicated on the City buying the property. This is the package of assistance that we felt appropriate to recommend to Council under the circumstances of the City purchasing the property. The City contract with the Affordable Housing Coalition to manage this process. They would go door to door and describe what they have to offer and offer their services. They would then meet one on one with every tenant at the tenant's convenience and explore the tenants housing needs, financial needs and suggest appropriate housing options for that tenant. There is a range of housing options available depending on the tenant's

circumstances. A lot of the tenants already have Section 8 vouchers which are transferable to other property. Also, the Housing Authority has sufficient housing units in their public housing for anyone to move into and the Affordable Housing Coalition is knowledgeable and skilled at locating other rental opportunities. After establishing the tenant's general needs and options, they would then help them in their search for new rental accommodations. The Affordable Housing Coalition will also check their choice of rental accommodations to make sure that it is decent and safe and that the lease terms are appropriate. The actual cash assistance to each tenant is proposed to be as follows: (1) a fixed amount for the actual physical move of $500 or if the tenant wants to use a commercial moving company and it might be more than $500, then the actual cost of a commercial move; (2) up to two months of security deposit; (3) the first months' rent (which always has to be paid in advance) and under this package we would pay the tenants share of that first month's rent and Section 8 would pay their share, if the tenant has a Section 8 voucher; (4) we would pay for connection transfer fees for essential utilities, e.g., electricity, gas, telephone and cable TV (if they already had those); (5) other essential expenses, e.g., like an application fee, pet deposit, adaptation for making a unit accessible for disabled person; and (6) the City would pay to the Affordable Housing Coalition a fee for administering this entire program of $400 per tenant. Our initial estimate was $85,000, however, we have increased that to a maximum limit of $120,000. This is based on actual tenant needs and it is not a flat amount per tenant and not a cash handout to the tenant - an actual reimbursement of what it costs to move that tenant.

Upon inquiry of Councilman Freeborn, Ms. Caplan said that there are 40 tenants.

Councilman Newman wondered if the City decides not to purchase the property, will the tenants have to be gone from that property by June 30, 2007. If that date is firm, then it would make sense for the City to help with relocation assistance regardless of whether the City purchases the property for redevelopment or another developer purchases. But if we are not sure that date is firm, then perhaps the City should hold off until that need arises.

City Manager Jackson said that representations were made by the Housing Authority that it was their intent to sell by the end of the calendar year and to give notice immediately for relocation into other public housing properties. It is their intent to sell, if not with the City, then with another buyer for the property at the earliest possible schedule. They have direct financial incentives to go ahead and bring closer to this operation regardless of who the eventual purchaser would be.

Councilwoman Cape's concern was the relocation package was predicated on the City buying the property. She would like to talk about an overall general policy and what role the City plays. If we play this role as we look towards purchasing the property, it would make perfect sense for us to take this role. But should the City not purchase the property, then we need to look at the larger conversation about what role the City does play, because these people need help, and how do we apply that in general terms, instead of specific terms each time. If a developer comes along, what role will they play. The Community Development Block Grant funds is an exact way we can help, but we do need to look at overall general policy rather than the specifics.

Councilman Davis agreed with Councilwoman Cape and wondered if the City does help with relocation, there is not much incentive for a developer, other than the City, to come in and help with relocation.

Mr. Bob Smith, Executive Director of the Asheville-Buncombe Community Relations Council, and Ms. Julie Brown, McCormick Heights tenant, individually spoke to Council about the need to provide relocation assistance to the residents sooner rather than later.

Mr. Fred English didn't want to see anyone living in rundown homes, but was concerned about the money. He suggested City Council investigate a similar proposal that is going on in Woodfin where we can lease the property for $1 a year.

Mr. Alan Ditmore, Vice-President of the Asheville Homeless Network, said that to tear down houses of any kind cannot be good for the homeless and there are environmental reasons not to tear down structures. He suggested the apartments be converted into mixed income housing and auction off the empty apartments as condominiums so people will have an investment in the area.

In response to Vice-Mayor Jones, Mr. David Nash, representing the Housing Authority, said that if the transaction doesn't go forward, the property is probably looking at foreclosure. If the City decides not to purchase the property, most likely the property will have to close within the next few months. He also noted that in terms of options for the tenants, none of them want to move in public housing at this point, but he hoped they will consider public housing as an option and they can move in within 2 months.

In response to Councilman Newman, Ms. Caplan said that if Council approves funding at this meeting, they have a drawn up contract ready to go with the Affordable Housing Coalition and we would tell them to go ahead and meet necessary expenses for tenants starting tomorrow.

In response to Councilwoman Cape, Mr. Nash said that if the tenant plans to move from McCormick Heights to public housing, we do not have resources to help people move their belongings from one development to another and we would need to have their first month's rent and any utility deposit. We allow security deposits to be paid over-time, so that is not an upfront cost. If the tenants do move to public housing, then we would not need all the assistance and would not need for the Affordable Housing Coalition to mediate in most cases.

Because the majority of Council supported including the City's relocation assistance to tenants at McCormick Heights in the public hearing to amend the 2006 Consolidated Action Plan, Mayor Bellamy asked to be excused from participating in the following public hearing due to a conflict of interest, noting that she supported the City's relocation assistance for tenants at McCormick Heights. Councilman Freeborn then moved to excuse Mayor Bellamy from participating in this portion of the meeting. This motion was seconded by Councilman Davis and carried unanimously.

At this time, Mayor Bellamy turned the meeting over to Vice-Mayor Jones.

B. PUBLIC HEARING TO CONSIDER AMENDMENTS TO THE 2006 ACTION PLAN FOR COMMUNITY DEVELOPMENT BLOCK GRANT FUNDS

RESOLUTION NO. 07-22 - RESOLUTION APPROVING AMENDMENTS TO THE 2006 ACTION PLAN FOR COMMUNITY DEVELOPMENT BLOCK GRANT FUNDS

Vice-Mayor Jones opened the public hearing at 5:51 p.m., noting that the comments made earlier in Public Hearing Item "A" would be considered during this portion of the meeting.

Ms. Charlotte Caplan, Community Development Director, said that this is the consideration of a resolution amending the City's 2006 Consolidated Annual Action Plan. This public hearing was advertised on January 12 and 19, 2007.

Neighborhood Housing Services of Asheville has restructured its organization and activities in response to changes in the housing market that are making it increasingly difficult for

the agency to continue building quality, affordable, single-family homes. As a result, it has withdrawn from several Community Development Block Grant (CDBG)-funded new construction activities. In order to meet the U.S. Dept. of Housing and Urban Development (HUD) spending targets, it is advisable for the City to immediately re-allocate part of these funds to new, fast moving, activities that will reduce our balance of unspent CDBG funds by at least $200,000 over the next three months.

At its meeting on January 8, 2007, the Housing and Community Development Committee considered several funding proposals and recommended three new activities for CDBG funding. A list of the amendments is as follows:

A. Proposed New Allocations:

1. $200,000 to Neighborhood Housing Services (NHS) for direct homeownership assistance.
2. $86,000 to Buncombe County for a mental health crisis stabilization center at 277 Biltmore Avenue.
3. $40,000 for the installation of benches at about 30 city bus stops.

B. NHS Projects Proposed for Cancellation:

1. Infrastructure and new housing construction on Bradley Street.
2. New housing construction on scattered sites, city-wide.
3. Housing development on Brotherton Avenue.

The public hearing notices included an additional proposal for housing assistance to tenants of McCormick Heights Apartments. As a result of the earlier discussion, relocation assistance to the tenants of McCormick Heights will be included in the amount of $120,000.

The CDBG funds made available from canceled NHS projects are more than sufficient to fund the new projects. Remaining funds will be allocated through the normal process for the 2007 Action Plan.

Pros:

1. Recaptures CDBG funds from canceled projects.
2. Allocates funds to new fast-moving projects which will enable the City to comply with HUD regulations for timeliness in spending.
3. Assists NHS in carrying out its new operating plan.
4. Addresses the goals of the City's Consolidated Housing and Community Development Plan, the Strategic Operating Plan, and the 10-Year Plan to End Homelessness by:
    a. Providing affordable homeownership for at least 10 households city-wide.
    b. Assisting in the creation of a crisis stabilization center for homeless and other individuals with mental illnesses.
    c. Enhancing city transit services.

Cons:

1. Reduces the potential pool of funds available for allocation through the normal competitive process for Fiscal Year 2007.

Staff recommends adoption of a resolution amending the City's 2006 Consolidated Annual Action Plan.

Vice-Mayor Jones closed the public hearing at 6:00 p.m.

Vice-Mayor Jones said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved to adopt Resolution No. 07-22, including an appropriation of relocation assistance funds for residents at McCormick Heights as outlined by Ms. Caplan, in an amount not to exceed $120,000. This motion was seconded by Councilwoman Cape.

Councilman Mumpower felt that City Council jumped into considering purchasing McCormick Heights without having all the variables, and in his view, Council is doing it again with this relocation assistance. He felt that $120,000 to move 40 people is a lot of money. He was also concerned about the City providing for cable TV hook-up. He suggested Council wait until the staff's due diligence is done before consideration of relocation assistance. The City does not have the experience in the community to throw people out in the streets and that will not happen here.

Councilman Newman asked for a friendly amendment to the motion that the City not pay for the transfer of cable TV. Councilman Freeborn and Councilwoman Cape accepted the friendly amendment.

The motion made by Councilman Freeborn to amend the City's 2006 Consolidated Action Plan with the three amendments outlined above by Ms. Caplan and the inclusion of relocation assistance funds for residents at McCormick Heights as outlined by Ms. Caplan (with the exception that the transfer of Cable TV not being paid for by the City) in the amount not to exceed $120,000 carried on a 5-1 vote, with Councilman Mumpower voting "no."

At this time, Vice-Mayor Jones turned the meeting back over to Mayor Bellamy.

RESOLUTION BOOK NO. 30 – PAGE 202

C. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING FOR PROPERTY LOCATED AT 723 FAIRVIEW ROAD FROM RS-8 RESIDENTIAL SINGLE FAMILY HIGH DENSITY DISTRICT TO OFFICE II DISTRICT/CONDITIONAL ZONING FOR A PROPOSED OFFICE BUILDING INCLUDING SHARED PARKING WITH A CITY RECREATIONAL FACILITY

ORDINANCE NO. 3433 ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 723 FAIRVIEW ROAD FROM RS-8 RESIDENTIAL SINGLE FAMILY HIGH DENSITY DISTRICT TO OFFICE II DISTRICT/CONDITIONAL ZONING FOR A PROPOSED OFFICE BUILDING INCLUDING SHARED PARKING WITH A CITY RECREATIONAL FACILITY

Mayor Bellamy said that this public hearing was originally scheduled for January 9, 2007, but continued, at staff's request, until this date.

Mayor Bellamy opened the public hearing at 6:10 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to conditionally zone property located on 723 Fairview Road from RS-8 Residential Single-Family High Density District to Office II District/Conditional Zoning for a proposed office building including

shared parking with a City recreational facility. This public hearing was advertised on December 29, 2005, and January 5, 2007.

Ms. Cogburn said that the subject properties are located within the City limits, at 723 Fairview Road and an adjoining parcel, and include all the property at 723 Fairview Road (.09 acres) along with the parking for City of Asheville recreation facilities (to the west). The property at 723 Fairview Road currently contains two (2) structures used for multi-family housing and two (2) accessory structures. The property is surrounded on three (3) sides by institutional and recreational facilities owned by the City of Asheville. All surrounding properties are zoned RS-8 (Residential Single-Family High Density District) and where not used by the City of Asheville the properties are single-family residential in nature.

The property owners, FamProp, LLC, and the City of Asheville, are requesting that the property be rezoned from RS-8 to Office II/Conditional Zoning to allow for the reuse of the existing residential structures for offices. The City of Asheville has committed to enter into a lease agreement (should this rezoning be approved) with FamProp, LLC, in order that the offices can utilize the existing parking for the adjacent ballfields at the Murphy-Oakley Center. 723 Fairview Road currently contains two residential (multi-family) structures that would be utilized for offices (approximately 6,862 square feet) under the conditional zoning request. A shed and carport on the property are also part of this application and if used would be used in conjunction with an office use. The application proposes that the conditional zoning limit the use of the buildings to office use (excluding medical offices and clinics).

Access to the buildings is via an asphalt drive that is largely located on a platted right-of-way immediately west of 723 Fairview Road. This access would continue to be utilized for handicapped parking and deliveries. All other parking would be located on the adjoining parcel owned by the City of Asheville. This parking is mostly empty during normal business hours as it services the recreational facilities which are largely utilized in the evenings and on weekends. Access to this parking area is via an existing asphalt driveway on City of Asheville property.

Existing trees on the parcels are shown as remaining. Additional vegetation will be provided to meet City of Asheville landscape standards in the proposed parking area.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The project, if approved, must meet the technical standards set forth in the City's Unified Development Ordinance and Standards and Specifications Manual. One of the Technical Review Committee (TRC) conditions for the project was that the developer work with City staff to direct automobile traffic into the site in a safe manner for ingress and egress from Fairview Road.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The proposed project utilizes shared parking to satisfy parking needs/standards, thus preserving existing vegetation and eliminating the need for grading of the site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

The developer will utilize existing residential structures and retain the residential character and appearance of these structures. The developer will work with the City of Asheville Parks and Recreation and Planning Departments on additional plantings adjacent to the ballfield parking area (buffer for adjacent single-family homes).

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

As stated before, the developer is renovating existing residential structures for office use. These structures are in harmony with the character of other residential structures in the immediate area. The property is otherwise surrounded by institutional or recreational uses.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

This conditional rezoning supports the following goals of the City of Asheville: (1) Promoting the adaptive reuse of buildings in an effort to protect neighborhood viability and residential architecture; and (2) Allowing for appropriately scaled non-residential uses to be permitted in appropriate locations in residential areas.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

The proposed use is located along City of Asheville Transit Route 12 and is located within .3 miles of the intersection of Fairview Road and I-240. All city services are available to this development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

The size of the office development should produce little traffic.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- The proposed retention of the existing structures supports the residential character of the surrounding Oakley neighborhood although introducing a new use into the area.
- This rezoning would introduce office use into a residentially zoned area.
- The shared parking arrangement is environmentally and economically sound.
- The developer has proposed restrictions on the use of the property restricting it to only office use (excluding medical offices or clinics that would be high traffic generators).
- The developer has met twice with the Oakley Neighborhood Association to discuss his plans for the use of the property.

This conditional zoning request was recommended for approval by the Planning and Zoning Commission (unanimously) and only one person spoke (in favor) of the zoning request.

The standard conditions are as follows:

1. The project shall comply with all conditions outlined in the TRC staff report.
2. All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets.
3. All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans.
4. At the direction of the Planning Director, this Project will be reviewed by the TRC prior to issuance of any building [or grading, etc....] permits.

Mr. Clay Mooney, landscape architect for Families Together, explained some of the key aspects of the project and why it warrants Council approval.

Mr. Henry Mitchell, President of the Oakley Neighborhood Association, said that they are in unanimous support of this conditional zoning.

Mayor Bellamy closed the public hearing at 6:17 p.m.

When Councilwoman Cape questioned why Council wasn't given an overall plan for this property since the project has come before Council two other times, City Attorney Oast said that it may have been an evolutionary process.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Jones moved for the adoption of Ordinance No. 3433, to conditionally zone 723 Fairview Road from RS-8 Residential Single-Family High Density District to Office II District/Conditional Zoning for a proposed office building including shared parking with a City recreational facility conditions, subject to (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) At the direction of the Planning Director, this Project will be reviewed by the TRC prior to issuance of any building [or grading, etc....] permits; and (5) the use of the property be restricted to office use (excluding medical offices and clinics). This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 219

D. PUBLIC HEARING TO CONSIDER REZONING PROPERTY LOCATED IN THE MAIN ENKA VILLAGE AREA FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3434- ORDINANCE TO REZONE PROPERTY LOCATED IN THE MAIN ENKA VILLAGE AREA FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 6:20 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance to rezone property located in the main Enka Village area from RM-16 Residential Multi-Family High Density District to RS-8 Residential Single-Family High Density District. This public hearing was advertised on January 12 and 19, 2007.

Ms. Tuch said that on October 16, 2006, a letter from the Enka Park Commission was received in the Planning & Development Department; this letter outlined a request from the Commission to rezone the main Enka Village community from RM-16 to RS-8, citing a desire to retain the community's existing character. Two other portions of the historic neighborhood located on Lake Drive and Hillcrest Street are already zoned for single family residential (RS-2 and RS-4 respectively). The main Enka Village is comprised exclusively of single family homes on smaller lots where the majority of these 87 lots are a little less than a quarter acre (or more). These lots would comply with the RS-8 development standards and the reason for the RM-16 zoning is not apparent but is consistent with the zoning requested by Biltmore Farms for the Biltmore Lake residential community.

The letter from Enka Park Commission also requested the creation of an overlay zoning designed to reflect and enforce existing deed restrictions. The majority of those restrictions would be enforced through the RS-8 zoning designation but the RS-8 zoning would not provide clear restrictions against duplexes which may be established as a Use-by-right-Subject-to-Special-Requirements (USSR) in the RS-8 zoning district. As a USSR, duplexes may be established but must meet a number of architectural and design restrictions as well as a separation requirement of 300 feet between all other multi-family structures. These restrictions were designed to control the appearance and total number of duplexes in single family districts in order to prevent a change in neighborhood character. As a result, the RS-8 zoning designation does appear to afford an appropriate amount of protection to the character of the existing main Enka Village neighborhood.

RM-16 was established to provide a full range of multi-family housing types along with limited institutional, public, and commercial uses that would serve a high density area. It is intended that this district be located near employment centers, shopping facilities, roads and other infrastructure capable of handling the demand generated by high density residential development.

RS-8 was established to provide for a high density per acre of single family dwellings where public infrastructure is sufficient to support such development, and to stabilize the district's existing residential character in areas of existing high density single family development while promoting a suitable environment for single family living.

On December 6, 2006, the Asheville Planning and Zoning Commission reviewed the rezoning request and voted unanimously to approve the proposal (no discussion).

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- RS-8 zoning will not render existing lots non-conforming
- Setbacks are the same for both the RM-16 and RS-8 zoning districts
- RM-16 allows the establishment of multiple units on a single lot (multi-family)
- RS-8 is restricted to single family homes (unless pursuing a duplex as a USSR)

Staff recommends approval of the rezoning request for all 87 lots from RM-16 to RS-8.

Mr. Alan Ditmore, Vice-President of the Asheville Homeless Network, spoke against this rezoning in that it will reduce the potential of affordable housing supply.

The Chair of the Enka Park Commission, spoke in support of the rezoning, noting that the entire Village is basically low income housing.

Mayor Bellamy closed the public hearing at 6:29 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3434, rezoning all 87 lots identified in the Exhibit "A" map attached to the ordinance, noting that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 224

E. PUBLIC HEARING TO CONSIDER REZONING PROPERTY LOCATED AT 346 DEPOT STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

ORDINANCE NO. 3435- ORDINANCE TO REZONE PROPERTY LOCATED AT 346 DEPOT STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

Mayor Bellamy opened the public hearing at 6:29 p.m.

Urban Planner Alan Glines said that this is the consideration of an ordinance to rezone property located at 346 Depot Street from RM-16 Residential Multi-Family High Density District to Commercial Industrial District. This public hearing was advertised on January 12 and 19, 2007.

This parcel is located at the corner of Depot Street and Bartlett Street. The sloping lot has an existing building under renovation. The small area at the rear of the property that is zoned RM-16 was purchased from the City of Asheville in 2005. The staff report at that time noted the inclusion of artist studios and apartments in the building. The change in zoning will allow parking at the rear of the building to support the uses in the building.

The original action by City Council exchanged the property but did not address the owners anticipated use of the property under the existing zoning of RM-16 Residential Multi-Family High Density District. The rezoning is required to use the lot for these purposes. The area along Depot Street and the nearby river side areas are expected to transition to a mixed-use and arts district. Several lots to the south of the subject property along Depot Street were rezoned to Urban Place in April, 2005. This rezoning was accompanied by a master plan to build a new mixed-use structure on the site and restore the Glenrock Hotel. A total of 110 units were approved in the master plan along with a limited amount of non-residential uses.

The RM-16 District is established as a buffer zone between higher density commercial areas and lower density residential uses. Limited non-residential uses including institutional and commercial uses are allowed to complement the primary function of the district as a residential area. Residential density is 16 units per acre.

The Commercial Industrial District is established to provide areas for a wide range of commercial and industrial uses including: light manufacturing, wholesale and warehousing, retail sales and office uses. Residential density is 16 units per acre.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- The rezoning will allow the full range of uses for the entire lot and not separate out the back half because of the split zone.
- The sale of the original lot addition was approved by the City Council to be combined with the Depot Street parcel.
- The zoning change will support the adaptive reuse of the existing building on the parcel.

The Planning and Zoning Commission at their January 3, 2007, meeting voted 7-0 to recommend the zoning change. Staff also recommends approval of the rezoning application.

Mayor Bellamy closed the public hearing at 6:31 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Jones moved for the adoption of Ordinance No. 3435, noting that the request is reasonable based on information provided in the staff report and as stated in the recommendation. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 228

F. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO CHANGES TO THE BILLBOARD STANDARDS

Mayor Bellamy said that the public hearing on this matter was held on January 9, 2007, and action continued until this date in order to give the City Attorney time within which to respond to some of Council's concerns. At the request of City Attorney Oast, Councilman Mumpower moved to continue this matter until February 13, 2007. This motion was seconded by Vice-Mayor Jones and carried unanimously.

G. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO CREATE AN ADAPTIVE RE-USE OVERLAY DISTRICT

ORDINANCE NO. 3436 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO CREATE AN ADAPTIVE RE-USE OVERLAY DISTRICT

Mayor Bellamy opened the public hearing at 6:33 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance amending Chapter 7 of the Code of Ordinances of the City of Asheville creating an adaptive reuse overlay district. This public hearing was advertised on January 12 and 19, 2007.

This code amendment is intended to implement several infill development, community compatibility, and economic development goals and strategies of the *Asheville City Development*

Plan 2025 through the creation of an overlay district that allows for and provides incentives for adaptively reusing valuable buildings. Asheville has a stock of fine older buildings that greatly contribute to the City's quality of life and urban character. Due to design, location, and/or condition, these buildings may become functionally obsolete for use under their current zoning. An example of this is might be a very large older home on a large lot in a single family zoning district; the home may be too large for continued use as a single family home and the only value it may have for the owner is through demolition of the house and subdivision of the site into several lots. Adaptively reusing the building and lot in their current arrangement for multifamily and/or limited office uses may well be a much better option for the owner, neighborhood, and City relative to the subdivision option.

The overlay district would "overlay" a selected portion of an existing zoning district, allowing supplementary incentives and requirements to apply to the property covered by the overlay district. The City has 10 other zoning overlay districts, including those addressing historic preservation, downtown design review, the Blue Ridge Parkway, and manufactured housing.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

The Planning and Zoning Commission considered this code amendment on January 3, 2007, and recommended approval of this amendment by a unanimous vote of 7-0.

Pros –

- Several goals and strategies of the 2025 Plan will be implemented.
- A wider range of land uses would be available to existing buildings, likely extending their useful life.

Con –

- Neighborhoods may regard these overlays as a form of encroachment.

City staff recommends approval of an ordinance amending Chapter 7 of the Code of Ordinances of the City of Asheville creating an adaptive reuse overlay district.

Mayor Bellamy closed the public hearing at 6:35 p.m.

Mr. Shuford responded to various questions/comments from Council, some being, but are not limited to: what is difference of this overlay and spot zoning; what process would someone have to go through if they wanted to use this overlay; who will determine where this tool will be used; and would the overlay usually apply to a street or neighborhood.

Vice-Mayor Jones would like to see the request go through the Planning & Zoning Commission prior to coming to City Council.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3436. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Mayor Bellamy voting "no."

ORDINANCE BOOK NO. 23 - PAGE 232

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 07-23- RESOLUTION ESTABLISHING FAIR REUSE VALUE AND SET A PUBLIC HEARING TO CONSIDER APPROVING THE SALE CONTRACTS WITH MOUNTAIN HOUSING OPPORTUNITIES INC. FOR TWO PARCELS ON RALPH STREET AND CHOCTAW STREET IN EAST RIVERSIDE

Due to a conflict of interest, and at the request of Mayor Bellamy, Councilman Freeborn moved to excuse Mayor Bellamy from participating in this portion of the meeting. This motion was seconded by Councilman Davis and carried unanimously.

At this time, Mayor Bellamy turned the meeting over to Vice-Mayor Jones.

Mr. Ed Voss, Real Estate Manager, said that this is the consideration of a resolution establishing fair reuse value and setting a public hearing to consider the Sale and Redevelopment Contracts with Mountain Housing Opportunities, Inc. for parcels on Ralph Street and Choctaw Street in East Riverside.

On September 26, 2006, City Council accepted the Statement of Qualifications of Mountain Housing Opportunities, Inc. and the Green Family (MHO) and authorized the City Manager or his designee to negotiate a contract for the sale and redevelopment of two parcels in East Riverside pursuant to the Request for Qualifications issued by the City on May 19, 2006. Contracts have been negotiated with MHO for Ralph Street and Choctaw Street and the parcels have been appraised by BRB Appraisal Associates:

- The Ralph Street parcel is 3.8± acres and steeply sloped from Ralph Street to Town Branch with some flattening on each end. A greenway easement will be reserved along Town Branch. The recommended Fair Reuse Value based on appraisal is $274,000.

- The Choctaw Street parcel is 5.92± acres and varies from steeply sloped along the street fronts to moderate slope and nearly level in the middle of the property. The parcel is bisected by Town Branch and a greenway easement will be reserved here also. The recommended Fair Reuse Value based on appraisal is $426,000.

On January 10, 2007, staff reviewed the contract terms with the City Council Planning & Economic Committee and the Committee referred the contracts to City Council for approval.

Economic Development staff recommends adoption of a resolution establishing fair reuse value and setting a public hearing to approve the contracts with Mountain Housing Opportunities, Inc. for two parcels on Ralph Street and Choctaw Street in East Riverside.

Vice-Mayor Jones said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 07-23. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 283

VI. NEW BUSINESS:

VII. OTHER BUSINESS:

Councilman Freeborn said that at the January 16, 2007, meeting Council instructed our staff to develop a comprehensive plan to eliminate the open air drug market in Asheville and part of that motion was language that offered support for our Police Chief and the Police Department. He reiterated his personal support for the tremendous effort our police officers do for our community in terms of public safety and what they do day-in and day-out in terms of combating drugs. It is a hard issue to deal with on a street level, considering we do not have adequate beds for the amount of people being arrested on a daily basis, we do not have adequate sentencing, we do not have adequate job opportunities for people, and we do not have adequate child care. He hoped we can continue that support for our officers.

At this time, Vice-Mayor Jones turned the meeting back over to Mayor Bellamy.

Closed Session

At 6:54 p.m., Councilman Mumpower moved to go into closed session in order to consider the qualifications, competence, performance, character, fitness, and conditions of appointment of an individual public officer or employee. The statutory authorization is contained in G.S. sec. 160A-318.11 (a) (3); and (2) to prevent the disclosure of information that is confidential pursuant to 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. sec. 160A-318.11 (a) (2). This motion was seconded by Councilman Freeborn and carried unanimously.

At 7:50 p.m., Councilman Freeborn moved to come out of closed session. This motion was seconded by Councilwoman Cape and carried unanimously.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 7:50 p.m.

Kesha Lipe
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – February 13, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding (arrived in meeting at 7:58 p.m.); Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Vice-Mayor Jones led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

I. PROCLAMATIONS:

A. OPEN TENNIS CHAMPIONSHIP

Councilwoman Cape recognized Ms. Laura Loftis, Aston Park Tennis Manager, who was awarded, on behalf of the City of Asheville, the 2006 Adult Tournament of the Year Award from the US Tennis Association.

B. PROCLAMATION PROCLAIMING FEBRUARY, 2007, AS "BLACK HISTORY MONTH"

Councilman Newman read the proclamation proclaiming the month of February, 2007, as "Black History Month" in the City of Asheville. He presented the proclamation to Mr. Johnny Hayes, President of the Local NAACP, who briefed City Council on the history of the month.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Item "F" was removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE RETREAT HELD ON JANUARY 19, 2007, AND THE REGULAR MEETING HELD ON JANUARY 23, 2007

B. RESOLUTION NO. 07-24 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY EXCESS RIGHT-OF-WAY ON HAYWOOD STREET IN EXCHANGE FOR A RIGHT-OF-WAY OVER A PORTION OF REAL PROPERTY ON ROBERTS STREET

Summary: The consideration of a resolution authorizing the Mayor to convey excess right of way on Haywood Street in exchange for a right of way over a portion of real property located on Roberts Street.

The City and Urvana, LLC (Urvana) have negotiated an exchange of excess right-of-way on Haywood Street for a right-of-way easement across real property located on Roberts Street.

The excess right-of-way property is along the south side of Haywood Street at its intersection with Roberts Street comprising 661.3 square feet and includes a retaining wall which the City maintains. The conveyance to Urvana would reserve an easement to the City for access to the wall for maintenance. A portion of the building owned by Urvana encroaches onto this parcel

The property to be exchanged by Urvana is a 32.5 square feet portion of (PIN 9638.08-98-0734) a 0.19 acre parcel on the west side of Roberts Street at its intersection with Haywood Street. A portion of the sidewalk encroaches onto this parcel.

The value of the excess right of way to be exchanged is estimated at about $1,015 and the estimated value of the property to be received is around $104 based on an extrapolation from the tax value of the adjoining land. The difference in value between the two properties is about $911, rounded = $900. Urvana has offered cash payment of $900 as part of the exchange.

Pros:

- The exchange will be a fair exchange of value for value.
- It will return property not needed for public use to the tax rolls.
- It will retain sufficient right-of-way for public safety and access fir maintenance of the retaining wall.
- It will facilitate the renovation of the building by resolving the encroachment issues.

Con: There are no negative impacts.

Pursuant to N. C. G. S. 160A-271 a notice was duly published in the Asheville Citizen-Times on January 19, 2007.

Approval of the resolution will authorize the exchange of the properties through the process provided in N. C. G. S. 160A-271.

Economic Development staff recommends adoption of a resolution authorizing the Mayor to convey excess right of way on Haywood Street in exchange for a right of way over a portion of real property located on Roberts Street.

RESOLUTION BOOK NO. 30 – PAGE 204

C. RESOLUTION NO. 07-25- RESOLUTION AUTHORIZING THE MAYOR TO CONVEY LAND ON MCDOWELL STREET TO CHSA BUILDING PARTNERSHIP

Summary: The consideration of a resolution authorizing the Mayor to convey land on McDowell Street to CHSA Building Partnership in the amount of $17,400.

On January 9, 2007, City Council authorized advertising for upset bids pursuant to a bid from CHSA Building Partnership in the amount of $17,400. The advertisement was published on January 19, 2007, and no upset bids were received.

Disposal Parcel 152 is a 0.08 acre rectangular shaped lot on the east side of McDowell Street about 450 feet south of the intersection with Choctaw Street. The land slopes upward from McDowell Street to the rear line. It is covered with natural vegetation consisting of grass, small trees and brush. The parcel is zoned Institutional and the character of the surrounding neighborhood is primarily medical offices. The highest and best use for the subject parcel would be assemblage with an adjoining parcel.

CHSA owns the adjoining property where the medical offices of Carolina Hand Surgery Associates, P.A. are located. The proposal would combine Disposal Parcel 152 with property owned by CHSA for potential expansion of the existing development.

Approval of the resolution will authorize the sale of the property to CHSA Building Partnership.

Pros:

- The sale will be at fair market value as established by the tax appraisal and the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.
- It will facilitate expansion of existing development.

Con: There are no negative impacts.

Economic Development staff recommends adoption of a resolution authorizing the Mayor to convey land on McDowell Street.

RESOLUTION BOOK NO. 30 – PAGE 205

D. RESOLUTION NO. 07-26 - RESOLUTION AUTHORIZING CATALINA COURT IN THE SAND HILL ROAD AREA TO BECOME A PUBLICLY MAINTAINED STREET

Summary: The consideration of a resolution authorizing Catalina Court in the Sand Hill Road area of Asheville to become a publicly maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Catalina Court is a developer-constructed street that has an average width of 24 feet and a length of 0.12 miles. Transportation and Engineering Department Staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Catalina Court will be added to the official Powell Bill list.

Pros:

- The City will receive Powell Bill funds from the NCDOT to maintain the roadway.
- Homes constructed on this roadway increase the tax base in the City.

Con:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council adopt a resolution authorizing Catalina Court in the Sand Hill Road area of Asheville to become a publicly maintained street.

RESOLUTION BOOK NO. 30 – PAGE 206

E. RESOLUTION NO. 07-27 - RESOLUTION SETTING A PUBLIC HEARING DATE ON FEBRUARY 27, 2007, FOR VOLUNTARY ANNEXATION OF PROPERTY LOCATED AT 341 ROCKWOOD ROAD

Summary: The consideration of a resolution setting a public hearing date for voluntary annexation of property located at 341 Rockwood Road.

Crown/Asheville, LLC has petitioned the City of Asheville for the annexation of one lot located at 341 Rockwood Road in South Buncombe County (off of Airport Road) containing a total of approximately 1.93 acres. The area, while contiguous to other non-contiguous ("satellite") properties in the City of Asheville, is not contiguous to the primary corporate limits of the City and therefore is subject to the standards for annexation of noncontiguous areas contained in NCGS 160A-58.1.

Pursuant to NCGS 160A-58.2, such petitions must be investigated by the City Clerk for sufficiency in accordance with state law. This investigation has been completed and the Certificate of Sufficiency accompanies this petition request.

The next step in this process is for City Council to fix the date for the public hearing on this matter. It is recommended that the public hearing date be February 27, 2007. Should City Council decide to proceed with this request, the effective date for the annexation would be April 30th of 2007.

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

Pro:

- Provides for the orderly growth of the City and the tax base through the acceptance of appropriate areas into the corporate limits where owners desire annexation.

Con:

- Marginal increase in service costs (too small to measure or respond to).

City staff recommends City Council adopt a resolution setting a public hearing date on February 27, 2007, for voluntary annexation of property located at 341 Rockwood Road.

RESOLUTION BOOK NO. 30 – PAGE 208

F. RESOLUTION AUTHORIZING THE MAYOR TO RENEW THE JOINT COOPERATION AGREEMENT WITH THE ASHEVILLE REGIONAL HOUSING CONSORTIUM

This item was removed from the Consent Agenda for an individual vote.

Vice-Mayor Jones said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEM PULLED OFF THE CONSENT AGENDA FOR FURTHER DISCUSSION

RESOLUTION NO. 07-28 - RESOLUTION AUTHORIZING THE MAYOR TO RENEW THE JOINT COOPERATION AGREEMENT WITH THE ASHEVILLE REGIONAL HOUSING CONSORTIUM

Summary: The consideration of a resolution authorizing the Mayor to renew the Joint Cooperation Agreement with the Asheville Regional Housing Consortium.

In 1992 the Asheville Regional Housing Consortium was certified by the Department of HUD as an entitlement jurisdiction for the HOME Program. Asheville is the Lead Entity of the Consortium. Since 1992 the Consortium has received in excess of $15 million for the production of housing affordable to low-income families in Buncombe, Henderson, Madison and Transylvania Counties. Federal regulations require the Consortium to be recertified with HUD every three years, in order to remain an entitlement jurisdiction. All required documentation for recertification must be submitted to HUD by June 30, 2007.

Pros:

- Asheville will remain Lead Entity of the Consortium.
- The Consortium will continue to receive HOME Program funds for the production of housing affordable to income-eligible families.
- The Consortium will remain an agency with regional cooperation in addressing affordable housing needs.

Cons:

- The Consortium will be without a Lead Entity and its certification as an entitlement jurisdiction will be in jeopardy with the Department of HUD.

Community Development Division staff recommends adoption of a resolution authorizing the Mayor to renew the Joint Cooperation Agreement with the Asheville Regional Housing Consortium.

Councilman Mumpower said that as of today the national debt is $8.7 Trillion and felt it was irresponsible for the federal government and HUD to be sending this money that they don't have.

Councilman Newman spoke about the need for regional cooperation and this is a very successful regional partnership.

Councilman Newman moved to adopt Resolution No. 07-28. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 211

III. PRESENTATIONS & REPORTS:

A. CIVIC CENTER COMMISSION PRESENTATION REGARDING THE CIVIC CENTER CAPITAL IMPROVEMENT PLAN

Mr. Max Alexander, Chair of the Civic Center Commission, said that City Council approved a five year Capital Improvement Plan (CIP) for the Civic Center at their December 12, 2006, meeting. At that time, Councilman Mumpower requested the Civic Center Commission review the plan and make comments they felt were appropriate concerning it.

At their January 15, 2007, meeting the Civic Center Commission unanimously approved the following as their response. Staff has added the estimated cost of each project.

The Civic Center Commission would first like to congratulate City Council for taking action to provide for a specific CIP action plan for the venue. At the same time, the Commission would request City Council consider broadening the scope of projects to include additional work on the Thomas Wolfe Auditorium (TWA), to include.

- Inspect the TWA roof: This could be completed at little or no cost to the City.
- Repair TWA roof as warranted: Staff is currently repairing it as part of their ongoing maintenance effort. No major problems are currently known to exist but the inspection noted above would assist in determining its overall condition and future repair costs.
- Repair interior ceiling and walls of TWA: Inspection should be the first step before proceeding. Because of scaffolding needed to reach the ceiling, the cost for this could be $8,000 to the City. Actual repair costs depend on the inspection report. Previously staff have been told that a wide cost range is possible depending on plaster condition.
- Replace TWA carpet: Depending on final carpet selection, the cost could be $45,000.

Other suggested Civic Center CIP items include:

1. Inspect the venue's fire alarm system: The alarm system is inspected every six months at present at a cost of $600 per inspection. The cost for a completely new system could range as high as $500,000.
2. Provide a weatherproof storage area for any new chairs purchased: Up to $50,000 could be needed depending on final design.
3. Accelerate replacement of arena lighting: No additional cost to the City for this project, which is currently estimated at $250,000, if the City chose to reprioritize it.

The total cost for the above projects and inspections total approximately $105,000. If it were added to the first year's CIP budget, the new total would be $465,000. Any additional monies required due to inspection of the TWA roof, fire alarm system or TWA plaster are not included.

The Civic Center Commission recommends City Council consider the additional CIP projects and approve them as part of the overall Civic Center CIP plan.

Mr. Alexander responded to various questions/comments from Council, some being, but are not limited to: has the Fire Department raised concerns over the Civic Center's fire alarm system; is there a potential to just replace the carpet in the high traffic areas vs. the entire auditorium; and does the Civic Center Commission have ready access to the Civic Center Director and the City Manager.

When Councilman Mumpower asked what other items the Commission would like to bring to City Council, Mr Alexander said that they have made a tremendous amount of

recommendations to the Civic Center Director and would like to implement (1) a customer and promoter satisfaction system; and (2) a driving utilization strategy to the Civic Center.

Councilman Mumpower felt we need to have the Civic Center Commission as a filtering system first on items affecting the Civic Center.

In response to Councilman Freeborn about how this will affect the Civic Center CIP, City Manager Jackson explained that he would prefer to have the opportunity to meet with the appropriate staff for responses and would be able to respond back to Council in approximately two weeks. In terms of carpeting, lighting, etc. we don't see that in the current year's budget as a priority, but it is something that we intend to go back through the Commission and then to the Council as we look in out-years to adjust the schedule.

Councilman Freeborn asked if Mr. Alexander had any suggestions in moving the dollars of the existing Civic Center CIP and reallocating those to pay for these recommendations. Mr. Alexander responded that that was not the charge given to the Commission; however, a suggestion might be to possibly lease some capital equipment vs. purchasing.

It was the consensus of City Council to instruct the City Manager to report back to Council on the suggestions made by the Civic Center Commission, along with the suggestion of leasing vs. purchasing capital equipment.

In response to Councilman Newman, Mr. Alexander said that the Commission is pleased that City Council has moved forward with implementing both the entire deferred maintenance plan and the facility upgrades (totaling approximately $15 Million).

Councilman Newman moved to (1) support implementing both the entire deferred maintenance plan and the facility upgrades, totaling approximately $15 Million (which are identified on the full project list); (2) instruct the City Manager to take into consideration the specific recommendations by the Civic Center Commission; (3) affirm our support of the capital budget presented in December, 2006, which is roughly $400,000 a year; (4) partner with Buncombe County and our State legislators in order to expedite the deferred maintenance and basic improvements; (5) ask for authorization for a 1-cent hotel occupancy fee to help address these needs at the Civic Center; and (6) support the efforts to study the financial viability of a new performing arts center in downtown on City-owned land or elsewhere in downtown. This motion was seconded by Councilman Davis.

Councilwoman Cape wanted to make sure that as we look at a new performing arts center that we partner with those folks as well in helping us with the Thomas Wolfe and the Civic Center in the process.

There was a brief discussion about approaching our legislators and County Commissioners with a specific tax request or asking them to assist us with a revenue source. Councilman Newman said that we are asking for dialogue and the 1-cent hotel occupancy fee is our best idea. He would be open to other ideas on how to finance as long as they are fair and don't unfairly burden the middle class and working families in Asheville.

The motion made by Councilman Newman and seconded by Councilman Davis carried on a 5-1 vote, with Councilman Mumpower voting "no."

~~**RESOLUTION BOOK NO. 30 - PAGE**~~

B. ALCOHOLIC BEVERAGE CONTROL BOARD GOALS & OBJECTIONS FOR 2007

Alcoholic Beverage Control (ABC) Board Chair Charles Worley presented Council with a short summary of the contributions from the ABC system to the City over the past several years. The ABC system serves the City to control and regulate the sales of alcoholic beverages inside the City limits. Under state law, the profits of the system are distributed to the City and County.

Since the end of 2004 fiscal year, sales have grown over $2.8 Million resulting in a substantial increase in distributions to the City and County. In 2004, the City's distribution was $258,150; in 2006 it was $480,876, and increase of 86%. Results for the first half of this fiscal year reflect a 30% increase to date in profits of the system. Working capital in the system has increased by 22%, creating a solid platform for operations in the future.

At the same time we are working to improve operations and profitability, we are also being proactive in dealing with alcohol education and abuse. By law, we are mandated to distribute a minimum 7% of the net profits to programs that deal with alcohol education and rehabilitation. Our distributions to these programs have increased by over 25%. In addition, we participate in programs to prevent the sale of alcohol to underage individuals partnering with the N.C. ABC Education Division and national organizations. We have instituted training programs with our mixed beverage permitees to responsibly serve the public and prevent underage drinking.

While we are working hard to streamline our operations and become more efficient, we are also looking to the future and planning to be able to better serve our customers and benefit the City.

We are in the process of decentralizing our wholesale mixed beverage outlet functions to give our business customers a greater choice in how they do business with us as our mixed beverage sales have increased 31% since 2004. As a part of this decentralization, the hours available to our business customers have also increased.

We have engaged in a long-range planning process utilizing the demographics of the area, sales and growth patterns, and other factors to enable us to plan stores of types and in locations that will better serve our customers and the City. It recently became necessary to replace our Long Shoals Road sore due to the re-widening of Long Shoals Road and we are set to re-open a newly constructed store on Long Shoals Road next month. Our Biltmore store, so heavily devastated in the Biltmore Village flood of several years ago, was recently sold (although we are continuing to lease the building for the short-term) and we are actively seeking replacement property upon which to construct a new store in a location more convenient to our customers.

Our Merrimon Avenue store, long the most profitable of all of our customers, is in the process of undergoing extensive remodeling so that we can better serve our customers on the north end of the City. We have recently acquired property on Tunnel Road to serve as a site for the replacement of the existing Tunnel Road store. That store is now on the market with proceeds from the sale expected to be reinvested in the construction of a new store at the recently acquired site. The new location will, again, better serve our customers and provide easier access, especially during peak business seasons along Tunnel Road.

Our long-range plans have identified the need to better serve our customers in west Asheville and we have acquired property out New Leicester Highway upon which we can build a new store in the coming years. While we are not ready to begin the construction of a new store at this time, we see that process beginning in the next several years as growth continues to occur along that corridor.

Our goal is to continue to serve the City of Asheville and its citizens and residents by continuing to make our operations more efficient, by developing stores that better service the

customers, and by making certain that alcohol is served responsibly within the City of Asheville, whether through sales at the ABC stores or through sales at mixed beverage outlets. We are committed to making our mandated distributions of profits for alcohol education and alcoholism and/or substance abuse treatment programs to those organizations that can best produce results for the benefit of the public.

The next few years will see substantial changes in the ABC system in Asheville as we move forward with our plans to continue improving efficiency, educating our citizens, meeting the needs of our customers, and serving the City of Asheville.

In response to Councilman Davis, Mr. Worley said that they are not aiding in the effort of Buncombe County's new detox center. Even though he didn't think their distributions can be for capital improvements, he would be happy to talk further with Councilman Davis to see if there is a way they can assist.

In response to Councilman Mumpower about how the City of Asheville can help the ABC system, Mr. Worley said that the ABC Board has sold two of their stores and under the State law, those funds are considered part of their income, in terms of the mandated distribution. This City Council can allow them to exclude that from the income so that it can be put back into capital. A request will be coming before Council requesting City Council to exclude those funds received from the sales of those stores, so that those monies in total can be put back into the construction and acquisition of the new stores. City Attorney Oast said that this request will be on the agenda soon.

C. DISCUSSION OF SCHOOL BOARD PROCESS

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, outlined the School Board process for the two vacancies. It was confirmed by City Council that candidates must live in the City limits and live in the Asheville School District. The deadline for applications will be February 27, 2007, the interviews will held on March 20, 2007, and the appointments will be made on March 27, 2007.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR SUNSET PARK FOR THE EXPANSION OF THE EXISTING RETAIL BUILDING AND ASSOCIATED SITE UPGRADES

Vice-Mayor Jones announced that this public hearing will be re-advertised for February 27, 2007.

B. PUBLIC HEARING TO PERMANENTLY CLOSE A PORTION OF VANCE GAP ROAD

RESOLUTION NO. 07-30 - RESOLUTION PERMANENTLY CLOSING A PORTION OF VANCE GAP ROAD

Vice-Mayor Jones opened the public hearing at 6:16 p.m.

Mr. Richard Grant, Assistant Public Works Director, said that this is the consideration of a resolution to permanently close a portion of Vance Gap Road. This public hearing was advertised on January 19, 26 and February 2 and 9, 2007.

N.C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Brian Cauthren on behalf of Zealandia Holdings, LLC has requested the City of Asheville permanently close a portion of Vance Gap Road that runs between their properties (also known as Old Chunns Cove Lane).

Public Works Department staff has researched and determined this portion of Vance Gap Road is not City maintained. Closure of this portion of street will not deny any of the adjoining property owners' reasonable means of ingress and egress as Zealandia Holdings, LLC owns all adjoining property along the portion requested to be closed.

The Greenway Commission reviewed this request and said that Vance Gap Road is not in the general path of the greenway plan, so closing this road should not affect the greenway plan for this area. However, the Greenway Commission does want to keep that option open to be used as a greenway. He did talk with Mr. Cauthren and he is more than willing to sit down and discuss a possible easement for a greenway, which will connect with the other sections.

Pros:

- The closure allows the property to be used to its maximum potential.
- There will be no future compromise of ingress/regress to other property

Cons:

- In consideration of the location of the unopened right-of-way, staff can find no potential challenges regarding the closure of the alley.

City staff recommends that City Council adopt a resolution to permanently close a portion of Vance Gap Road.

Vice-Mayor Jones closed the public hearing at 6:18 p.m.

Vice-Mayor Jones said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

City Attorney Oast said that the resolution before Council does not address a greenway easement and if Council would like that assurance, he suggested Council continue the matter until that language is inserted in the resolution.

Mr. Cauthren said that they are open and willing to grant the City an easement across the property as worked out by both parties at some point.

City Attorney Oast said that the law allows the City to retain easements for utilities and not necessarily for greenways. If Council is satisfied with Mr. Cauthren's verbal promise to grant the City a greenway easement at a negotiated location, he could work with that.

Councilman Freeborn moved for the adoption of Resolution No. 07-30, noting the verbal assurance that Mr. Cauthren will grant the City a greenway easement at a negotiated location. This motion was seconded by Councilman Mumpower and carried unanimously.

C. **PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE WAL-MART EXPANSION LOCATED AT 1636 HENDERSONVILLE ROAD, FOR THE EXPANSION OF THE EXISTING RETAIL BUILDING AND ASSOCIATED UPGRADES**

ORDINANCE NO. 3437- ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE WAL-MART EXPANSION LOCATED AT 1636 HENDERSONVILLE ROAD, FOR THE EXPANSION OF THE EXISTING RETAIL BUILDING AND ASSOCIATED UPGRADES

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Vice-Mayor Jones opened the public hearing at 6:26 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Planning & Development Director Scott Shuford submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Shuford said that this is the consideration of the issuance of a conditional use permit for the Wal-Mart expansion located at 1636 Hendersonville Road, for the expansion of the existing retail building and associated upgrades.

On July 27, 2006, the petitioner Wal-Mart Stores, Inc., submitted conceptual site plans for a proposed store expansion, interior remodel and associated site upgrades at their south Asheville location in the Forest Ridge Shopping Center. It was determined that this project would reviewed as a Level III project because the total expansion area exceeds 25% of the building size threshold for a Level III project (refer to Section 7-5-9(a)(1)b.). Additionally, the overall size of the development requires that the project be evaluated for compliance with Appendix 7-F, Supplemental Development Standards for Large Retail Structures. These development standards address building design, architectural compatibility with the surrounding area, landscaping, pedestrian safety and public enhancements.

The project site is located in south Asheville off of Hendersonville Road in the Forest Ridge Shopping Center (City Exhibit 3 - Aerial Map). The property consists of approximately 23 acres and is zoned HB (Highway Business). The majority of properties surrounding the site are also zoned HB (Highway Business) and consist of a mix of commercial and office uses. Two single-family dwellings, also zoned HB, exist along Peachtree Road, to the north of the site.

Primary access to the development is via a signalized intersection on Hendersonville Road. The site can also be accessed from Peachtree Road, which borders the north side of the property. A fairly large amount of mature vegetation exists along Hendersonville Road, portions of Peachtree Road and along the perimeter of the existing service area on the south side of the

property. These vegetated areas will serve as credit towards meeting some of the landscape requirements and will only be disturbed for the installation of sidewalks and supplemental plantings that are necessary to comply with the Unified Development Ordinance (UDO) standards.

The Forest Ridge Shopping Center currently consists of an 81,922 square foot Wal-Mart store and 19 retail spaces consisting of 83,245 square feet. The project proposes the following (City Exhibit 3 - Site Plan and Façade Upgrades) (City Exhibit 4 - Site Designs):

Existing Wal-Mart Store:	81,922 square feet
Building Expansion (includes Front and South Side expansion for loading area)	38,078 square feet
New Store Total:	**120, 000 square feet**
Existing Retail Spaces:	83,245 square feet
Demolition of 7 spaces:	15,409 square feet
Rebuild of 3 spaces:	7, 320 square feet
New Retail Space Total:	**75, 156 square feet**
Total Shopping Center:	**195, 156 square feet**

In addition to the store expansion areas noted above, the entire site will be upgraded and brought into compliance with the overall development standards outlined in the UDO and also with the supplemental design standards for large retail structures (a total of 160 points must be achieved.)

Items of Interest

- Parking is shown at a rate of 4.09spaces/1000 square feet for a total of 491 parking spaces for the Wal-Mart development. Parking at a rate of 4.0spaces/1000 square feet for a total of 391 spaces is dedicated towards the remaining strip center. Combined is a total of 792 spaces that falls within the City of Asheville's minimum number of spaces required (558) and the maximum number of spaces allowed (976).
- The parking lot layout will incorporate the use of several retaining walls ranging in height from 3-feet to 8-feet in height. The parking lot in front of the Wal-Mart store will sit above the parking lot associated with the strip retail center.
- Enhanced parking lot landscaping is proposed for the entire site (including the existing service area for the development along the south side of the property.)
- New enhanced architectural façade and other exterior building and site upgrades illustrate compliance with the supplemental development standards outlined in Appendix 7-F with a possible total of 165 points. Some enhancements noted: sidewalks with pedestrian seating areas along the front façade, installation of transit shelter along Hendersonville Road, and pedestrian connections to Peachtree Road and Hendersonville (to be provided per the Technical Review Committee (TRC) conditions.)

On August 21, 2006, the TRC reviewed and approved Wal-Mart's initial proposal with conditions. The applicant requested several postponements of the review by the Planning and Zoning Commission in order to allow additional time to address some of the TRC conditions. Upon review of the revised plans staff noted a significant change in the alteration of the parking lot and felt it necessary to bring the project back before the TRC for review and comment. Subsequently, on November 21, 2006, the TRC reviewed and approved the project subject to all conditions outlined in the staff report.

Section 7-16-2(c) of the UDO states that the Asheville City council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on

406

evidence and testimony received at the public hearing or otherwise appearing in the record of case.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements once the conditions enumerated by the TRC are met. The project must meet the technical standards set forth in the UDO, the City Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The project site is already developed and is currently supporting a large retail development. Grading of the site will be necessary to build the project, as proposed. A fair amount of grading will occur within the existing parking area located in front of the existing Wal-Mart store where the main building addition, strip center addition and new parking lot layout is proposed.

   It should be noted that the amount of existing impervious surface area is being reduced with the redevelopment eliminating the need for improvements to the current stormwater system that serves the development.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The project site is already developed and currently used as a large retail development. The proposed project and associated site upgrades will greatly enhance the shopping center and is likely to add to the value of adjoining or abutting properties. Additionally, required landscaping and buffers will shield the project from less intensive uses.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The project site and those properties adjacent to it are all zoned Highway Business district and consist of a wide range of uses and a mixture of both small and large scaled buildings. The project proposes an enhanced building façade and site upgrades that increases it's compatibility with the immediate and surrounding area.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   This development supports the *Asheville City Development Plan 2025* objectives concerning infill development and the adaptive reuse of properties through flexible development standards. It also implements the strategy of permitting more intense commercial and office developments in locations where adequate public facilities exist.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

Development of the site will require final technical approval from all applicable departments including representatives of the Water Resources, MSD, Engineering, Fire and Building Safety Departments. Review of the conceptual plans by various City departments has found that adequate sewage and water utilities are available for the proposed expansion.

Additionally, the site is served by two bus routes, one along Hendersonville Road and one that loops through the shopping center parking lot. The site plan proposes construction of two bus shelters, one in the parking and one at the bus stop on Hendersonville Road.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project has been reviewed by the City's traffic engineer and is not expected to create additional traffic congestion or increase traffic hazards. The overall size of the development did, however, warrant submittal of a Traffic Impact Analysis (TIA) that will require modifications and lengthening of the right hand turn-lane on Hendersonville Road.

On December 3, 2006, the Asheville Planning and Zoning Commission reviewed the proposed development and made a positive recommendation (6-0 vote) to approve the project subject to the conditions outlined by staff and with the following conditions: 1) the developer shall provide a pedestrian connection from the bus stop on Hendersonville Road to the shopping center, and 2) the developer shall provide enhanced security in the lower lot due to its physical separation from the upper parking lot and building site.

Subsequent to the Planning and Zoning Commission meeting the developer contacted the City Engineering and Building Safety departments to address the topography constraints in providing a pedestrian connection from the bus stop on Hendersonville Road to the shopping center. Together, it was determined that a 5-foot sidewalk incorporating 5-foot landing pads at regular intervals could be provided along the driveway entrance road to the edge of the lower parking lot where internal sidewalks would than provide a connection to the shopping center. This appears to satisfy the Planning and Zoning Commission's condition noted above. Details concerning security in the lower parking lot will be addressed during the final review by the TRC.

Pro's

- Staff has not received any negative comments from the public regarding this development proposal.
- The overall size of the "renovated" Wal-Mart building (120,000 sq. ft.) is well below the average size of most new Wal-Mart's constructed today (averaging up to 180,000 sq. ft.)
- All existing perimeter vegetation will be preserved and will continue in providing an effective buffer to adjacent less intense commercial uses.
- A reduction in the overall existing impervious surface area eliminates the need for changes to the existing stormwater management on site.
- An enhanced architectural building and landscaped parking lot will significantly improve the overall appearance of the shopping center making the development more compatible with the surrounding area.
- Since the Planning and Zoning meeting, the applicant has revised the application to include upgrades to the exterior façade of the entire shopping center so that it is architecturally compatible with the proposed Wal-Mart façade.

Con's

- Existing topographic changes between Hendersonville Road and the shopping center make it difficult to provide a fully handicap accessible pedestrian connection from the street to the building.
- The building expansion and renovation of the existing parking lot will create the need for several interior retaining walls resulting in a split level parking area. The retaining walls, however, will be screened with vegetation masking the height of the walls.

Staff recommends approval of the project, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report and the conditions recommended by the Planning and Zoning Commission.; (2) The retaining walls proposed within the parking shall be screened with vegetation to reduce the visible appearance of the structures; (3) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (4) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (5) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these elevation drawings may result in reconsideration; and (6) The project shall return to the Technical Review Committee for final review of site development plans to ensure compliance with the technical standards and any other conditions associated with the project review.

In addition, a request has been received today regarding a portion of Peachtree Road. Said request, by Nettlewood Professional Park, is to upgrade Peachtree Road it in lieu of placing sidewalks on the south side of Peachtree. The purpose behind that is to have a more consistent design of that road going into the Nettlewood development. Staff has looked at that feels comfortable that the road upgrade would be preferable to the pedestrian upgrade because we have other ways to get in and out of the site from a pedestrian standpoint.

Mr. Ashley Storey spoke in support of the expansion, upgrade and renovation of not only the Wal-Mart store, but portions of the Center as well. Even though he felt that the development did not have to be evaluated for compliance with Appendix 7-F, Supplemental Development Standards for Large Retail Structures, they did accumulate more than the 160 points that would have been required, had it applied.

Mr. Alan Johnson, engineer with Freeland and Kauffman Inc. working on behalf of the applicant, said that the existing site does not meet or come close to the current City of Asheville standards. There is a fair amount of existing vegetation and landscaping around the perimeter of the site and we are working not to impact those areas (Applicant Exhibit 1 - Landscape Plan). There are also two existing stormwater ponds that front Hendersonville Road that will remain in use. Even with the existing site constraints, it is our opinion that the site plan incorporates the site standards and does comply with Appendix 7-F. Wal-Mart will be expanded by demolishing approximately 15,000 sq. ft. of retail shops and about 7,300 sq. ft. of new retail shops will be built. The retail shops that will remain will stay operational during construction and they will receive exterior renovations. With the proposed upgrades, we are eliminating over 250 parking stalls. With this reduction, we will add a lot more pervious coverage on the site. A key aspect of this project is the expanding off the front of the Wal-Mart and the fact that the existing parking lot is sloped at 4% towards Hendersonville Road. In order to address this concern, we created tiered parking. We propose a parking lot through the middle of the parking field and within the island will be two retaining walls which the highest point being approximately 8 feet. With the tiered system, the parking field in front of Wal-Mart will be graded and constructed to the City standards. The western portion of the parking field (the area in front of the retail shops that remain) will receive an asphalt overlay and will be brought up to City standards by implementing and constructing new interior islands. There will be some grading in the rear of the development

(southern area) and the remaining areas behind the retails as well as behind Wal-Mart will receive an asphalt overlay. A concern that was raised was the issue of security, specifically on the lower section of the tiered wall in the parking field. In an effort to address this concern, we will provide plenty of security cameras that will be placed all around the property. In addition, all the on-site lighting will be upgraded to provide the appropriate illumination and adequate safety while adhering to the City's standards. A feature we incorporated with this upgrade is pedestrian connectivity. We have proposed a 5-foot sidewalk that will run down the center of the parking island as well as the areas where the retaining walls are. The retaining walls will be designed with stairs in three areas to allow for additional connectivity throughout the site. There will be direct sidewalk connectivity from the Wal-Mart entrance to the existing Hendersonville Road signal. There will be sidewalks and the necessary landings constructed along the north side of the existing access drive at the signal. There will also be direct sidewalk connectivity from the Wal-Mart entrance to the Peachtree Road right-of-way. These direct connections will have a safe street crossing as all on-site crossings will consist of stamped asphalt. That is a visual and audible stimulus enhancement to alert drivers. We have also worked with the City's Engineering Department on off-site sidewalk locations. Sidewalks will be provided along the east side of Hendersonville Road from the southernmost point of the property north to the Peachtree Road intersection. A sidewalk will also be provided along Peachtree Road fronting the property and a connection will be made to the existing sidewalk on the north side of Peachtree Road. There will be two bus shelters that can be accessed via sidewalks. Other off-site improvements will consist of the lengthening of the right turn lane on Hendersonville Road, providing new pedestrian signals, and upgrading of the landing areas at the existing signal. We are providing a great amount of landscaping on site. We will preserve existing vegetation and also create adequate buffers. We will eliminate parking along the north side of the property (along Peachtree Road) to provide a 30-foot buffer. All retaining walls that will be constructed on site will be screened with vegetation. This development reduces the amount of pervious coverage on the site. The site goes from the existing .3 acre of interior greenspace to over an acre of interior greenspace. He urged City Council to support this project.

Mr. Jim Gallagher, architect for the applicant, discussed the Wal-Mart elevations (City Exhibit 4).

Mr. Fred English, resident in Haw Creek, felt that we don't need this Wal-Mart as there are others around Western North Carolina. He felt we needed to take care of our local businesses.

Mr. John Spake read a letter from Mr. Richard Grant, Member Manager of Nettlewood Associates LLC (Neighborhood Exhibit 1) which reads in part "As we understand it, the current proposal adds a sidewalk with curb and gutter to the southern edge of Peachtree Road, but does not address the northern edge, the width of the road nor the resurfacing of the road. It is our recommendation and desire to see that the applicant not be required to add a sidewalk to this section of Peachtree Road, but in turn be required to upgrade Peachtree Road to as close to a standard width of a two-lane City street and provide for curb and guttering on both edges of the Peachtree Road. This improvement would be much more beneficial to the applicant's project and the surrounding properties. ... We would ask that upon approval of this project, City Council amend staff's recommendation to delete the requirement for a new sidewalk along Peachtree Road and instead require the applicant to widen Peachtree Road to the maximum width allowed by the existing ROW with the installation of curb and gutter on both sides of the road and the resurfacing of the road from Hendersonville Road to where Peachtree Road enters the Nettlewood property (the point of prior improvement). Said letter was signed by Nettlewood Associates, Beverly-Grant, ABC Pediatrics, Asheville OBGYN, Med Oasis, Biltmore Associates, Healthcare Business Consultants, AG Edwards & Sons, Lawson Chiropractic, Southern Community Bank, eRx/Allwin Data, Charter Communications, Skidmore Harris & Burlingham, Spake Real Estate, Academy of Asheville, and Lifehouse Apartments/VOA.

After rebuttal, Vice-Mayor Jones closed the public hearing at 6:52 p.m.

Councilwoman Cape requested shade trees along the pedestrian amenities. In addition, for this to be a pedestrian friendly aspect, we need to make it easy for people to walk. Therefore, she also requested stairs be constructed on the lower tier parking area near Hendersonville Road in addition to keeping the sidewalk and landings on the north side of the property.

Councilman Mumpower asked the developer their thoughts about Nettlewood's recommendation to delete the sidewalk requirement along Peachtree Road and in turn upgrade Peachtree Road. Mr. Storey said they followed staff's recommendation which was not to upgrade Peachtree Road. They have not done any engineering studies or cost factors to determine if that is feasible to do because they have been working on what staff recommended - curb and gutter and sidewalk on our side of the right-of-way on Peachtree Road. They would be happy to talk with the adjoining land owners but because of the uncertainty, they requested that the Road upgrade not be a condition of the conditional use permit.

Councilman Mumpower moved for the adoption of Ordinance No. 3437, granting a conditional use permit for the Wal-Mart expansion located at 1636 Hendersonville Road, for the expansion of the existing retail building and associated upgrades, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report and the conditions recommended by the Planning and Zoning Commission.; (2) The retaining walls proposed within the parking shall be screened with vegetation to reduce the visible appearance of the structures; (3) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (4) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (5) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these elevation drawings may result in reconsideration; (6) The project shall return to the Technical Review Committee for final review of site development plans to ensure compliance with the technical standards and any other conditions associated with the project review; and (7) that the requirement for the sidewalk along Peachtree Road be waived if, upon further evaluation, the applicant is willing to upgrade a section of Peachtree Road. This motion was seconded by Councilman Davis and carried unanimously.

At the request of Councilman Newman for a friendly amendment to address the concerns of Councilwoman Cape, Mr. Shuford suggested the condition that the developer and Planning staff explore other ways to make a more direct and safe pathway from Hendersonville Road to the lower level of the parking lot area and in addition that any of the pedestrian ways be treated with landscaping in a manner that would provide shade. Councilman Mumpower and Councilman Davis both accepted this friendly amendment.

Councilwoman Cape felt that the friendly amendment is not strong enough. City Council's job is to state the conditions upon which we are interested in partnering with the developer on this project and we want pedestrian amenities adequately addressed.

Councilman Newman felt the condition should be flexible and maybe the way the site plan is designed is the best and safest way. There may be a shorter route, but there may be some people that would prefer to walk longer than to have to walk up steps.

In response to Councilman Newman, Mr. Shuford suggested that if stairs would be provided in that location to try to make a more direct connection, then it be in addition to what is being proposed here, opposed to something that would be a trade-off. It would need to be reviewed by both our Building Safety Department and our Engineering staff with regard to whether that would be something that would have a lot of use and would be safe.

Councilman Newman re-worded the prior friendly amendment to ask Planning staff and the developer to explore whether there is a more direct pedestrian access that can be added to the development to enhance pedestrian safety and quality access to the site from Hendersonville Road to the lower level of the parking lot area. And if it is staff's determination that it is a feasible connection (doable, practical, safe and is a true amenity that has some merit with regard to pedestrian access to the property), then City Council expects City staff to insist the developer install said access. In addition, that any of the pedestrian ways be treated with landscaping in a manner that would provide shade. Councilman Mumpower and Councilman Davis both accepted this re-worded friendly amendment. Mr. Storey felt confident that they could sit down with City staff and review the factors and respond in the spirit of what Council is saying. Mr. Johnson said that they would continue to work with staff and if it is doable, they will make it happen.

Councilman Mumpower felt that safety above all else should lead the way and trusts that City staff will make that a primary consideration.

In response to Councilman Newman, Mr. Shuford said that there appears to be some negotiation between Nettlewood Associates and the developer about the upgrade of Peachtree Road. If they can work out an arrangement that is satisfactory that enables Peachtree Road to be improved, then City staff would certainly sign off on that. If they cannot work out that situation, then the developer will do what is shown on the site plan, which is the sidewalk and curb and gutter on a portion of Peachtree Road.

The motion made by Councilman Mumpower and seconded by Councilman Davis granting a conditional use permit for the Wal-Mart expansion located at 1636 Hendersonville Road, for the expansion of the existing retail building and associated upgrades, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report and the conditions recommended by the Planning and Zoning Commission.; (2) The retaining walls proposed within the parking shall be screened with vegetation to reduce the visible appearance of the structures; (3) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (4) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (5) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these elevation drawings may result in reconsideration; (6) The project shall return to the Technical Review Committee for final review of site development plans to ensure compliance with the technical standards and any other conditions associated with the project review; (7) that the requirement for the sidewalk along Peachtree Road be waived if, upon further evaluation, the applicant is willing to upgrade a section of Peachtree Road; (8) to ask Planning staff and the developer to explore whether there is a more direct pedestrian access that can be added to the development to enhance pedestrian safety and quality access to the site from Hendersonville Road to the lower level of the parking lot area. And if it is staff's determination that it is a feasible connection (doable, practical, safe and is a true amenity that has some merit with regard to pedestrian access to the property), then City Council expects City staff to insist the developer install said access; and (9) any of the pedestrian ways be treated with landscaping in a manner that would provide shade, carried on a 5-1 vote, with Councilman Freeborn voting "no."

ORDINANCE BOOK NO. 23 - PAGE 236

At 7:40 p.m., Vice-Mayor Jones called for a brief recess. After the recess, at 7:58 p.m., Mayor Bellamy arrived at the meeting.

D. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR THE THOMS ESTATE LOCATED ON BEAVERDAM ROAD, WILD CHERRY ROAD AND ELK MOUNTAIN SCENIC HIGHWAY FOR A RESIDENTIAL DEVELOPMENT CONSISTING OF 162 SINGLE AND MULTI-FAMILY DWELLINGS

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 8:00 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Nathan Pennington submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Pennington said that this is the consideration of the issuance of a conditional use permit for the Thoms Estate located on Beaverdam Road, Wild Cherry Road and Elk Mountain Scenic Highway for a residential development consisting of 162 Single and multi-family dwellings.

The Asheville City Development Plan 2025 states that infill development offers another method for implementing the City's Smart Growth vision. There are hundreds of vacant and under-developed properties scattered throughout the City and there are numerous developed properties that are ripe for redevelopment.

Another important goal of the City's Smart Growth program is the protection of open space and other natural areas. The positive aspects of open space preservation are many and include environmental benefits such as the preservation of native plant communities, the protection of wildlife habitat, increased water quality, and reduced erosion control. Protecting and restoring connections between parks, riparian corridors, greenways and other important ecological areas is a key concept for conservation development and ecosystem management. Networks of preserved open spaces and riparian corridors can also help to shape and guide urban form. Approximately 36.2 acres of the site is to be retained as contiguous open space of areas greater than two acres with large areas in the hillside area (>2,200 ft.) preserved as such. Additional open space is provided as isolated pockets surrounding the developed areas. The total impervious surface of the project is limited to approximately 16 acres according to the submitted site plan. The development is to include a park with public access along Beaverdam Road, and an existing structure within this area is proposed to be converted into a community building/museum.

Lastly, the comprehensive plan encourages development that designs landscapes to absorb stormwater instead of carrying it off-site in storm sewers. The proposed development incorporates a number of best management practices including vegetated inceptor swales and rain gardens to treat and maintain stormwater onsite.

One of the objectives of the Strategic Operating Plan (SOP) is to promote strategies that encourage sustainable, high density, infill growth. Although this development is considered low density at less than 2 units per acre and is a greenfield development, it does propose a more sustainable development pattern that balances other goals. Additionally, the SOP supports planning that ensures transportation choices; a bus shelter will be placed in the proposed park along Beaverdam Road that may be reached from connections within the neighborhood.

This review concerns a proposed 162 single and multi-family neighborhood with development standard bonuses for number of dwelling units per building, setbacks, sidewalks and road modifications (City Exhibit 3 - Aerial Map). Pursuant to Section 7-16-2(b)(17) of the Unified Development Ordinance (UDO), development standard bonuses for residential zoning districts are reviewed as a conditional use.

The subject site is located in north Asheville, the vast majority of which is located within the City of Asheville's corporate limit, at 77 Elk Mountain Scenic Hwy (City Exhibit 3 - Site Plan). A small portion of the subject property is located within unincorporated Buncombe County. The only development proposed in the County's jurisdiction is a small portion of a driveway. The subject property consists of 17 parcels totaling approximately 82.7 acres in area. Two of the lots are zoned RS-2 (Residential Single-Family Low Density District), and the other 15 lots are zoned RS-4 (Residential Single-Family Medium Density District). The subject site is surrounded almost entirely by low density residential development and the Asheville Country Club (west).

The RS-2 zoning district was created to establish a low density for single-family dwellings and other compatible uses in recognition of environmental constraints such as, but not limited to, steep slopes, impervious soils, high water tables, and flooding. It is also the intent to preserve the general welfare by protecting important resources such as, but not limited to, watersheds and view sheds. In addition to recognizing environmental constraints and preserving important resources, the district is also intended to stabilize and protect the district's residential character while promoting a suitable environment for single-family living. The RS-4 zoning district was created with the same intent, but to establish a higher density at 4 units per acre and to support opportunities for other non-residential uses normally required to provide the basic elements of a balanced and attractive residential area.

Early in the application process, the developer held a separate neighborhood meeting on December 14, 2006, to help communicate the proposed development plans to the community. Despite these efforts, staff has continued to receive numerous phone calls, e-mails, and other correspondence expressing a wide variety of technical and non-technical concerns throughout the review process.

The proposed development is classified as a "Planned Community" allowed under State statutes which allows for a different form of home ownership not commonly considered in Asheville. The community will appear and operate much like a single family neighborhood but without individual lot ownership. Instead, all property beyond the individual structures will be owned and managed by a homeowner's association. This affords the developer more freedom in designing the layout of the community to achieve a comparable number of units while preserving additional open space and reducing infrastructure costs. The underlying zoning of RS-4 would not normally permit this form of development; however, Section 7-16-2(d)(17)(c.) of the UDO provides that, *in order to promote exceptional development projects, the city council may permit the alteration of development standards for projects that exhibit exceptional site and/or structure design that is appropriate to the architectural and/or environmental context of the surrounding neighborhood.* Through the various site plans, the applicant must demonstrate that the proposed development provides a minimum of three "exceptional development" features. The applicant has chosen to meet this requirement by incorporating the following standards into the project design:

- Higher quality building design
- Building design and orientation sensitive to surrounding neighborhood context and/or community heritage
- Enhanced stormwater management
- Pedestrian orientation and amenities (proposed to be restricted to residents only)
- The inclusion of transit facilities

At their December 18, 2006, meeting the Technical Review Committee (TRC) approved this project subject to the conditions in their staff report. However, certain aspects of the project continued to be explored with various city departments including building safety and engineering. At the TRC hearing, the applicant agreed that the proposed roads, with the exception of the areas indicated as driveways, would be public and built to city standards with the understanding that the applicant would continue to investigate the possibility of a gated community with private roads to be maintained by the homeowner's association. Furthermore, because of the existing topography, the applicant has proposed to deviate from standard sidewalk design but would still have to comply with all applicable state accessibility and building code standards which becomes significantly more challenging when proposing private roads and rights-of-way. Prior to Planning & Zoning Commission meeting, the applicant's designers did meet with representatives from the Building & Safety Department and, ultimately, were able to successfully demonstrate the project's ability to comply with the state's accessibility code while maintaining private roads and rights-of-way. The City of Asheville does allow private roads provided they are designed and built to public road standards; however, while there are no technical standards expressly prohibiting the use of gates, Planning staff did continue to advise the applicant that the recommendation beyond TRC would be that the roads and sidewalks remain open for public access regardless of the road status.

At the January 3, 2007, meeting of the Planning and Zoning Commission, a large number of residents came out to express concerns and opposition to the proposed development. The primary concerns voiced included:

- Density and scale
- Increased traffic/insufficient road infrastructure
- Decreased quality of life
- Devaluation of property
- Pedestrian and bicycle safety
- Restricted access (lack of connectivity to community)
- Increased stormwater runoff and erosion control
- Protection of endangered species

After significant public comment and detailed comments from the developer and the developer's counsel, the Commission deliberated at length and, after 2 failed motions, ultimately voted to approve the project (5-2) subject to the conditions recommended by staff with the following modifications:

- Eliminate condition #9 – that all roads and sidewalks remain open for general public access (no gates).
- Add new condition - explore the staff recommended Edgedale Dr./Tsali Trail access point for suitability as an emergency access only or investigate other more suitable locations for a third access.
- Add new condition - that the stormwater management measures be improved beyond those currently proposed.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case pursuant to Section 7-16-2(c) of the UDO. Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
This has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and all other applicable laws and standards that protect the public health and safety. Although all minimum technical standards appear to have been met the City's Standards and Specifications manual encourages connectivity of streets for safety and improved access and where permitted, a pedestrian connection to adjacent development may be required for increased pedestrian safety. The applicant is proposing to restrict access to the new roads and sidewalks and by not allowing open public access so it removes the opportunity for improvements to traffic congestion and pedestrian safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
The applicant has proposed a number of measures that will lessen the environmental impact on the project site. By clustering development, the proposed design decreases the amount of grading that will need to occur in order to accommodate the development while preserving a greater amount of overall open space. Over one-third of the property will be preserved as contiguous open space of areas greater than two acres. Additional open space is provided as isolated pockets surrounding the developed areas. It should be noted that a traditional subdivision would most likely result in a greater loss of forested areas, an increase in the amount of grading, lessen the likelihood for project amenities and would not require site plan review by the Planning and Zoning Commission or City Council.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
The master plan displays a topographically sensitive design that preserves a significant amount of open space including preserved buffer areas around the perimeter of the site; additionally, the applicant has stated that the homes will be highly detailed and constructed with high quality materials. Staff feels that the proposed project would have no discernible effect on surrounding property values.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The proposed development is a low density development of detached and attached single family homes and, as such, would integrate well with other single-family residences in the area. Additionally, a significant amount of open space is being preserved on the site effectively mitigating the mass of some of the larger structures through buffering and distance separation.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

The application of exceptional development standards and proposed site features supports several goals and objectives as described in both the *Asheville City Development Plan 2025* and the *Strategic Operating Plan*. However, staff remains concerned over the applicant's desire to restrict access to the proposed roads and sidewalks through gates or other means which would reduce the projects attractiveness in terms of community connectivity and integration which is also a goal of the *ACDP 2025*.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The development will gain access from Wild Cherry Road, Elk Mountain Scenic Hwy., and Tsali Trail. Additional fire access points will be provided from Elk Mountain Scenic Hwy., Wild Cherry Rd., and Killian Rd. A bus shelter is being provided in the proposed park along Beaverdam Rd. In addition, technical review from other departments has not revealed any problems for providing an urban level of service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
A traffic impact analysis has been prepared and submitted to the city engineer for review. The proposed project is not expected to cause undue traffic congestion or create a traffic hazard. Alternative locations for the third access point (Tsali Trail) are possible and can be considered.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:
- A significant amount of the site will be preserved and undisturbed.
- Extensive trails and sidewalks would be provided connecting residents of the new development to the larger community.
- A transit shelter will be provided.
- Low Impact Development (LID) measures are proposed to aid in managing stormwater quality.
- A community park is proposed along Beaverdam Rd.

Cons:
- Project will require modifications to site development standards including number of dwelling units per building, setbacks, stormwater, sidewalk, and road design.
- Applicant wishes to gate the community and prevent public access to roads and sidewalks which, if approved, would negatively impact pedestrian and vehicular connectivity.

Staff concurs with the Planning & Zoning Commission and recommends approval of the proposed project and Conditional Use Permit subject to the conditions in the TRC staff report and those listed below. Additionally, staff recommends approval to the development standard modifications listed above.

Staff would also recommend that Council consider the issue of whether the roads and sidewalks should remain open for public access. Should Council feel that this is not feasible, then staff would recommend that other options be explored including, but not limited to:

- Keep sidewalks open for public access (but not roads)
- Require other off-site improvements to aid in pedestrian safety
- Manage public access for vehicles by allowing the gates to be open from sun-up to sun-down and at any time as requested by emergency management officials.

Mr. Craig Justus, attorney representing the developer/applicant, (Applicant Exhibit 1) believed that this is an exceptional site design for this property. It is the position of City staff that they meet all seven standards for a conditional use permit. We are, however, asking for a few modifications. The City's 2025 Plan sets out many goals for development of the City and this project meets many of those goals. The only major point of difference between us and staff is whether this community should be gated. He said the Thoms family has owned this property since 1943 and though all those years this property has been a private estate. We are trying to maintain the private estate nature of this piece of property. We believe this project is the golden goose for the City of Asheville and this project should be approved because it enriches the community and the City of Asheville.

Mr. Kent Smith, CEO of Golden Development Resources, (Applicant Exhibit 2) said that Thoms Estate is a new standard for development. He looked for a viable way to develop the property and not compromise its integrity as a private estate in the process. This is a very attractive development plan that preserves greenspace. They developed a plan and met with the neighborhood. A number of their concerns are not necessarily as it relates to this development plan but about the City's ability to provide services for them and any additional homes. There is a need for refinement of the guidance that is provided to the development community. Regarding the concern of stormwater, our stormwater system controls the stormwater at a higher level than is being currently controlled. We will increase the value of the homes on a per unit basis through open space and the introduction of amenities, which is reflected in their price point. He noted that those things lose their value if they become available to the public at large. Our plan consists of (1) pedestrian-oriented streets, sidewalks and trails; (2) preserved open space - (a) stream and wildlife corridor has been preserved; (b) 36.7 acres of open space (44.5%); and (c) preserved open space is associated with the preserved historic structures on site; (3) environmentally sensitive design (e.g., stormwater management and preservation of steep slopes); (4) 5.28 acre of green space along Beaver Creek (community park) and restoration of the Killian House (circa 1834) as a community building; (5) 5 less acres of pavement; and (6) lower density. He showed a comparison of their plan and an alternate plan. The alternate plan is a plan that can be done with approval at the TRC level only. The alternate plan has zero green space and is a classic residential subdivision and the stormwater is controlled with pipes, discharging into Beaverdam Creek. Regarding traffic, they have two access points - one on Wild Cherry Road and one on Elk Mountain Scenic Highway. In order to keep people from driving through the development's residential neighborhood, they want the development to be gated. In the event of emergency access, even with gates, any emergency vehicle operators can open those gates and leave them open for alternate emergency access. We are replacing over a mile of new water and sewer lines which will benefit the residents on and off the site. The two access points - one on Tsali Trail and one off Wild Cherry that they don't know why they are required. We would like the ability to eliminate those two access arteries, which will receive tremendous support from the neighborhood. Alignment with 2025 consists of (1) managing stormwater and runoff to better-than-predevelopment standards; (2) preservation of open space; (3) green building techniques (clustering of homes preservation of green space, using environmentally sensitive materials and building practices); (4) adaptively reuse existing onsite structures; (5) provide area for public transportation and a transit shelter; (6) design home layout to minimize impervious surface; (7) provide a public park on Beaverdam Road; (8) historical preservation of Killian House; and (9) encourages walking and biking. He urged Council's approval for (1) two access points (specifically eliminating the access point onto Tsali Trail); (2) removal of fire access easement over Dickerson Lane; (3) removal of sidewalk requirement on Tsali Trail (allows existing

vegetation to be preserved); (4) private streets and controlled access; and (5) setup a task force to evaluate sustainable development and a means to encourage it.

Mr. Robert Dungan, attorney representing Mr. and Mrs. Pearlman, Ms. Cathy Mills, Ms. Virginia Mills, Mr. Ed Fisher and Ms. Susan Phillips, believed that City Council should not approve this conditional use permit as designed because it fails to meet many of the conditional use permit standards. Regarding Condition No. 2, if the staff feels that a traditional subdivision would most likely result in a greater loss of forested area and more grading, an exhibit demonstrating a legally compliant "traditional subdivision" should be submitted to demonstrate this finding. He said the green spaces in the plan are isolated and not contiguous. In addition, what will be the maintenance costs be to the City of the public park and the Killian House. Because there will be increased water flow, there should be forested corridors through the runoff areas. Regarding Condition No. 3, if the staff finds that developer will commit to high quality architecture, then a guarantee of "high quality" needs to be part of the conditions of approval. At a minimum, a package of design guidelines should be submitted to prove this finding. Regarding Condition No. 4, the proposed site is inconsistent with the pattern of development of Beaverdam and Elk Mountain Roads. Regarding Condition No. 5, the proposed site is inconsistent with smart growth policies, the goals of City Council, and transit supported development. In the City of Asheville 2025 Plan, Land Use Goal III, it says the City should permit and encourage transit supportive density (8-16 units per acre minimum) along and adjacent to major corridors and at logical transit nodes. The majority of the density is too far to support transit. They would have to move the density to where it can support transit. In the City of Asheville 2025 Plan, Land Use Goal V, it says the City should encourage the construction of affordable housing throughout the community. In the City of Asheville 2025 Plan, Land Use Goal IX, Strategy 5, it says the City's open space standards should require the connection of open space areas where feasible. The green spaces should be contiguous habitat in order to provide environmental corridors for habitat circulation. And, in the City of Asheville 2025 Plan, Land Use Goal X, Strategy 1, the City should revise its subdivision regulations to require pedestrian, where feasible, vehicular connections within the subdivision and between the subdivision and adjacent property. A gated entry will facilitate access, but negate neighborhood connectivity which contradicts the goals of the 2025 Plan. Regarding Condition No. 6, the bus shelter is required for this project, but the site, as proposed, does not support this facility because the majority of the density of the site is too far away from the facility to make effective use of it. In addition, he questioned whether a project three miles from the City center qualifies as infill development. Regarding Condition No. 7, there were some questions about traffic off of Kimberly as to how many of those people drive up and use Town Mountain Road to get to the City as opposed to use Beaverdam Road, and whether or not there was any attention in the report to the traffic coming out of the Asheville Country Club and the numerous golfers. He felt City Council should turn down this development as designed. The developer should reconsider his design and make changes, such as move the majority of the density toward Beaverdam Road; connect the undisturbed habitat with the undisturbed forest corridors; design guidelines for the architecture that we would know what is coming; no gates on the development; delete the park; and keep the floodplain with the homeowners association maintaining it or use it as an alternate ingress/egress point opposed to Wild Cherry Road.

The following individuals spoke against the conditional use permit for various reasons, some being, but are not limited to: entrance will be cut directly across from 66 Elk Mountain Scenic Highway, causing depreciation of property values and destroying peace and privacy; during build-out the roads will be subject to heavy equipment, construction traffic, excessive use, problematic accidents, problems with passage of school bus traffic, and endanger lives of children; grave concern for bicyclists who use Elk Mountain Scenic Highway to access the Blue Ridge Parkway; the entrance should be located at the entrance of the Killian House property; the Killian House entrance is only 6/10 of a mile from the Beaverdam Fire Department; there are 4 existing hard surface entrances to the Thoms property from Elk Mountain Scenic Highway that could be used for emergencies; suspicion that the City rebuilt a bridge on Wild Cherry Road and

widened the bridge on the proposed subdivision side; we are endanger of losing our value of place; no gated community because gates are designed to keep the community out and are built to market to wealthy people who are coming from other places who are afraid of crime; increased water runoff for people south of the development, therefore, request City verify the developer's hydrological engineering so flooding does not worsen; development is being built very close to a floodplain area; increased traffic on area streets, possibly even with gridlock on Kimberly Avenue; both Elk Mountain Scenic Highway and Beaverdam Road are already hazardous to pedestrians and bicyclists; the developer should be required to install sidewalks around the entire perimeter of the property, especially around the property abutting Elk Mountain Scenic Highway; connection of the walkway south of Tsali Trail to Beaverdam Drive and the proposed Beaverdam Greenway; speed of traffic on Elk Mountain Scenic Highway is too high; proposed development homes will shadow existing modest homes; eliminate entrance on Tsali Trail; proposed density is excessive and places too much burden on the existing infrastructure; placing the bulk of the high density near the existing single-family homes depreciates property values; only the residents of the development will benefit from the greenspace; the actual number of units that could be built on Thoms Estate property of 83 acres may be somewhere between 100 and 140; traffic analysis is flawed in that none of the entrances are clearly indicated on the site plan; request for City to prohibit gated communities; existing traffic corridors cannot accept the additional traffic from development of the Thoms Estate; in the immediate future, other developments are proposed or have been approved that will increase the population, traffic and infrastructure requirements in Beaverdam even more; the development holds no tangible amenities for the existing communities; residents at the top end of Beaverdam Road are concerned about how they will be evacuated in an emergency, e.g. flash flood; request for a moratorium on building large subdivisions in Beaverdam Valley until the roads, water and sewer systems are upgraded to handle the additional stress; since there is no hope to widen Beaverdam Road, Elk Mountain Scenic Highway, Kimberly Avenue and Merrimon Avenue, the City should work with the County to adopt a policy with a long range prospective of traffic before consideration of the Thoms Estate development; and the history of the Thoms Estate has been an open Estate until the current owner has taken residence:

Mr. Jerry Sherrill, resident on Elk Mountain Scenic Highway
Mr. Brad Brock, resident of lower end of Wild Cherry Road
Mr. Sean O'Connell, resident on Edgedale Drive (Neighborhood Exhibit 2)
Ms. Susie Berl, representing the Creekside Homeowners Association
Ms. Julie Roepnack, resident on Elk Mountain Scenic Highway
A resident on Wisteria Drive
Mr. Gerald Green, resident on Cumberland Avenue
Dr. Robert Phillips, resident on Wisteria Drive
Ms. Elaine Light
Ms. Nickie Marmo, resident on Beaverdam Road
Ms. Julie Niwinski, resident on Wild Cherry Road
Mr. Don Cole, resident on Robinhood Road
A resident on Brooklyn Road
Ms. Mary Jo Simpson, resident on Wild Cherry Road

Mr. Bill Wescott spoke in support of the conditional use permit. He felt the developer is restoring a beautiful piece of property, especially with the preservation of the Killian House. This is a high quality development. He hoped that some of the issues could be resolved because the gated and traffic issues are not peculiar to this Thoms Estate development.

Mr. Sam Wheeler, resident on Tsali Trail, spoke in support of the development because there is no perfect development. The issue of gates is purely an economic issue.

Ms. Francie Talley, resident on Wild Cherry Road, spoke about the need for a walking/ biking trail on Beaverdam Road as development increases. Being able to use alternative ways of transportation is an environmental necessity.

Mr. Craig Justus noted that change is very emotional. Developers who build in the community need to know what is expected of them and they do meet those requirements. This project is 33% less density than what the City's ordinance allows on this piece of property. There are technical standards that say residential lots shall abut a public street or a private street, built to public standards. Throughout the ordinances, there are references to allow private streets in the City of Asheville. There is no written policy that says the City is going to prohibit gated communities. The developer has presented a plan and has spent a lot of money in anticipation of a great project that preserves a lot of open space and he is asking for private roads and a gated community to control access. Unless the development drives the need to have connectivity, City staff has not said that connectivity is required as a manner of normal operation of the roads in that area. We have dealt with the connectivity situation regarding emergency vehicles. The developer is dedicating a park to the City in order to conform to the City's Greenway Plan. The development standard variation they are asking for is clustering to preserve open space. He urged Council to approve the conditional use permit.

After rebuttal, Mayor Bellamy closed the public hearing at 9:58 p.m.

Throughout discussion, Mr. Pennington responded to several questions, some being, but are not limited to: will there be only one construction entrance throughout the build-out; why was the cluster approved which was so close to a road; what kind of buffer is around the clustered area and around the entire perimeter of the property; did the City's bridge upgrade have anything to do with this project or was it normal maintenance; does this development represent smart growth; and does the Town of Biltmore Forest have a policy prohibiting gated communities.

In response to Councilman Freeborn, Mr. Pennington said that in order for the developer to proceed with the alternate plan without Council approval the property would have to be a major subdivision with review by the TRC for all applicable codes. This property does have hillside areas greater than 220 feet which regulate grading and the amount of density you can have. Also, when you subdivide there are certain lot frontages you have to have and abut a public street or a street built to City standards. Staff only evaluated the plan before Council and not the alternate plan. If the developer goes through TRC with a major subdivision element and if they met all of their density requirements and the grading allowances, then it is something that could be reviewed before that body as a major subdivision.

Upon inquiry of Councilman Mumpower, Mr. Pennington said the developer has proposed some best management practices in relation to vegetated inceptor swales, rain gardens and other storm control devices to maintain water on-site.

In response to Councilman Mumpower, Mr. Pennington said that we do not have a formal policy restricting people from putting in gated communities. The statement in the Technical Standards Manual states "the City discourages the use of cul-de-sac and encourages connectivity of streets for safety and improved access. Where permitted, a pedestrian connection to adjacent development may be required." Planning & Development Director Scott Shuford also responded that we discourage gated communities where we can, but we do not have anything in our Code to prohibit them. "The Ramble" is a gated community with private streets that meet the City's standards.

When Councilman Mumpower asked if Tsali Trail could be eliminated as an access, Mr. Pennington said the entrance at Tsali Trail was originally proposed to line up with Edgedale Drive. There was an outcry from the neighbors about the impact of having that line up. Then

there came a proposal from former Traffic Engineer Anthony Butzek to shift that westward so it would be closer to Elk Mountain Scenic Highway, and by doing that, it might have lost its intent.

Regarding the public parking being proposed, Councilman Mumpower asked if the City has reviewed the cost factors, or if there is even a need for a park that size in a floodplain. He wondered if this will be a City benefit or a liability. Mr. Pennington responded that this is in the conception phase and he didn't believe it has been discussed with the Parks & Recreation Department.

Councilwoman Cape hoped that this development is not an either/or situation - either Council approves the developer's plan or they build the alternate plan. She didn't hear the neighbors say they wanted to drive through the new community, only that they wanted to walk in this new community and be neighbors. Mr. Pennington noted some options that might aid Council in reaching a compromise regarding the issue of whether the roads and sidewalks should remain open for public access. Should Council feel that this is not feasible, then staff would recommend that other options be explored including, but not limited to: (1) keep sidewalks open for public access (but not roads); (2) require other off-site improvements to aid in pedestrian safety; and (3) manage public access for vehicles by allowing the gates to be open from sun-up to sun-down and at any time as requested by emergency management officials.

Councilman Davis asked if other growth in the area was considered in the traffic study. Ms. Gay Sprague, Sprague & Craig Consulting Engineers in Greenville, S.C., said that City staff did ask her to review the TIA because the current Traffic Engineer conducted the study before he became employed by the City and that would be a conflict of interest. The City's ordinance requires background traffic be included and the new approved development was included in this study. There was an assumption of a very steady rate of growth on the road (which included the new approved development). The City's ordinance requires that analyses be done by standard methodologies and those were used in the study and all the results came out at an acceptable level of service.

In response to Councilman Davis, Mr. Shuford said that we knew that there was an effort to provide some level of community access to the area for a park. But, this is the first we heard that it was going to be a public park. As a result, we don't have the analysis to say that is something that we as a City can take on. That's not saying it's not something extremely desirable either. As far as that component is concerned, if Council wants to move forward, he will try to craft a condition for Council, or if Council wants to postpone action, staff will get more information.

Mr. Smith said that the controlled access to the community is in the minds of the consumers and at this price point is an added element of security. If it is the consumer's perception, it is their reality and they will pay more for it. We had no intention of offending anyone by the introduction of the gates. We did it with the hope we could reduce the density and increase the value. He was not opposed at all to evaluate locations (Tsali Trail and Wild Cherry Road) to find a good, safe spot along Elk Mountain Scenic Highway to where we could have pedestrian access so they could enjoy some of the open areas and some of the common amenities that are available there.

Councilman Davis hoped that Tsali Trail could be used for possibly a pedestrian access, but felt it should be eliminated as a vehicular access.

When Councilman Newman asked Mr. Dungan if he was concerned that if Council did not approve this plan, with conditions, that the alternate plan could be built without City Council approval, Mr. Dungan replied that he was not concerned in that he didn't think they can get that many units on the property once they have to meet all the City's requirements.

Councilman Mumpower moved to grant a conditional use permit adopting the proposed Master Plan for the Thoms Estate located on Beaverdam Road, Wild Cherry Road and Elk Mountain Scenic Highway for a residential development consisting of 162 single and multi-family dwellings, with the requested modifications to the number of dwelling units per building, setbacks, sidewalk and road design, subject to the conditions recommended by city staff and also subject to the following conditions: (1) The main "spine" road must maintain a 50 foot right-of-way; (2) A cross access agreement must be executed between the Thoms property and the property to be retained by Selene Thoms for fire access purposes; (3) The project shall comply with all conditions outlined in the TRC staff report; (4) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (5) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (6) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department; (7) This Project will be reviewed by the TRC prior to issuance of any building [or grading, etc....] permits; and (8) All roads shall be public roads or private roads built to City standards; all applicable State Building and Fire Code standards must be addressed in the final road design and layout; and (9) a minimum of two pedestrian access points onto the development. Said motion died for a lack of a second.

Councilman Mumpower said that this is a city and it has to grow. If people don't want property to be developed, then they must purchase it or otherwise accept the fact that City Council does its best with smart growth, which consists of trying to be fair and even-handed. Personally he doesn't like gated communities, but that's not his role. His role is to look at our governing ordinances and determine if they have met the criteria and did we set up a filtering process that they had a reasonable chance of getting through. Then we make a decision on whether they tried to make a good faith effort to do something with their property within the restraints of our governing ordinances. He does find that they do meet the seven conditional use standards.

Upon inquiry of Councilman Freeborn, Mr. Smith said that they had no problem with eliminating the access point onto Tsali Trail.

In response to Councilman Freeborn regarding the long-term costs associated with the public park, Mr. Smith said that they never got into defining exactly what that park was. It seemed like a logical use of the land. We have let it evolve along the way. He would like the opportunity to evaluate whether putting in some kind of a conservation easement or something that might foster a wildlife habitat or something like that makes sense, but he wasn't sure what that is at this point.

When Councilman Freeborn asked what the price point would be, Mr. Smith said they haven't finished the pricing structure, but suspected they would range from approximately $400,000-1,000,000.

In response to Councilman Freeborn, Ms. Sprague said that the intersection at Merrimon Avenue and Beaverdam Road is currently at a level of service "C" and in the build out year (2010), with the other developments in the area and some regular rate of growth, it will be a level of service "D".

Councilman Freeborn said that before the project is built out, he feared that people will before Council asking that more public dollars be spent on that intersection. He felt this is a model project, but not on a road that is already at a level of service "C". He feels this will be a burden on our community. He can understand that a gated community will drive the price point, but we have other high end communities in Asheville at the same price point that are not gated.

We need to make it clear to the development community what exactly it is that we want, because we are growing as a community and we do have infill issues. This isn't the kind of infill that we want to see, but the essence of the project is what we want to see.

Councilwoman Cape said that the International Traffic Engineers have just come up with a traffic analysis that level of service is not an adequate way to talk about traffic. She would like City Council to direct its staff to look at traffic analyses that makes a difference in our community, not just on level of service.

Councilman Cape moved to grant a conditional use permit adopting the proposed Master Plan for the Thoms Estate located on Beaverdam Road, Wild Cherry Road and Elk Mountain Scenic Highway for a residential development consisting of 162 single and multi-family dwellings, with the requested modifications to the number of dwelling units per building, setbacks, sidewalk and road design, subject to the conditions recommended by city staff and also subject to the following conditions: (1) The main "spine" road must maintain a 50 foot right-of-way; (2) A cross access agreement must be executed between the Thoms property and the property to be retained by Selene Thoms for fire access purposes; (3) The project shall comply with all conditions outlined in the TRC staff report; (4) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (5) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (6) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department; (7) This Project will be reviewed by the TRC prior to issuance of any building [or grading, etc....] permits; and (8) All roads shall be public roads or private roads built to City standards; all applicable State Building and Fire Code standards must be addressed in the final road design and layout; (9) There be two accesses to the project - one at Elk Mountain Scenic Highway and one on Beaverdam Road, with the Killian House being a gatehouse to be maintained by the developer; (10) accessibility for pedestrian and bicyclists amenities through the community; and (11) move the parking in the multi-family area so that they are internal to the project. This motion was seconded by Councilman Davis.

Councilman Mumpower felt that the elimination of the Tsali Trail as an access point should be added as a condition, as well as some language regarding the public park and making it our option to whether we accept it or not.

When Councilman Mumpower asked what risk factors are involved in the application of our ordinances on an arbitrary basis, City Attorney Oast responded that we may be at risk of having the City Council decision overturned.

Regarding to the access on Beaverdam Road, Mr. Justus said that one problem was with the site distance. In fact the entrance on Beaverdam Road was the developer's first choice. But, the former City Traffic Engineer didn't think it was a good idea.

Councilwoman Cape requested that we have an analysis of whether or not an entrance onto Beaverdam Road is safe and if so, to recommend that.

With regard to the access on Beaverdam Road, Mr. Shuford said that there are a lot of constraints and a lot of consequences of trying to access directly onto Beaverdam Road as opposed to utilizing Wild Cherry Road, ranging from environmental consequences to some of the site distance issues. From staff's standpoint, taking into account the former City's Traffic Engineer's comments, staff is comfortable with two access points.

Councilwoman Cape and Councilman Davis both agreed to delete condition nine from their motion because of the constraints of accessing directly onto Beaverdam Road.

Councilwoman Cape and Councilman Davis both agreed to include a condition to eliminate Tsali Trail as an access point.

Councilwoman Cape felt it was important for the developer preserve the Killian House. It is an asset to the entire community, including the development. City Attorney said we know we want a greenway through that property. As far as preserving the property or dedicating it as a public park, that is an issue we don't have enough information on to make a decision. Therefore, he suggested a condition that the developer dedicate a greenway through that property and that the Killian House and the associated acreage be offered to the City as a park. We then have the option of not accepting it and if for reasons satisfactory to us (like it's too expensive and we don't accept it), and that if the developer chooses to use the property in another way, it comes back to City Council as a modification to the conditional use permit.

Councilwoman Cape and Councilman Davis both agreed to include a condition to get a greenway through that property and that the Killian House and the associated acreage be offered to the City as a park.

Mayor Bellamy called for a vote on the following motion, which was made by Councilwoman Cape and seconded by Councilman Davis: Motion to grant a conditional use permit adopting the proposed Master Plan for the Thoms Estate located on Beaverdam Road, Wild Cherry Road and Elk Mountain Scenic Highway for a residential development consisting of 162 single and multi-family dwellings, with the requested modifications to the number of dwelling units per building, setbacks, sidewalk and road design, subject to the conditions recommended by city staff and also subject to the following conditions: (1) The main "spine" road must maintain a 50 foot right-of-way; (2) A cross access agreement must be executed between the Thoms property and the property to be retained by Selene Thoms for fire access purposes; (3) The project shall comply with all conditions outlined in the TRC staff report; (4) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (5) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (6) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department; (7) This Project will be reviewed by the TRC prior to issuance of any building [or grading, etc....] permits; and (8) All roads shall be public roads or private roads built to City standards; all applicable State Building and Fire Code standards must be addressed in the final road design and layout; (9) accessibility for pedestrian and bicyclists amenities through the community; (10) move the parking in the multi-family area so that they are internal to the project; (11) eliminate Tsali Trail as an access point; and (12) the developer dedicate a greenway through that property and that the Killian House and the associated acreage be offered to the City as a park. Said motion failed on a 2-5 vote, with Councilwoman Cape and Councilman Davis voting "yes" and Mayor Bellamy, Vice-Mayor Jones, Councilman Freeborn, Councilman Mumpower and Councilman Newman voting "no."

Mayor Bellamy didn't feel the project meets the seven conditional use permit standards, with at least two of those standards not met being Condition No. 2 and Condition No. 7. She didn't feel the stormwater issues were addressed adequately. She felt the density on the developer's plan is located where it is because of the slopes and the alternative plan did not take into consideration any of the steep slopes. She was concerned that the issues raised today by the neighborhood are the same issues they expressed months ago, thus raising a concern of a neighborhood that is inclusive and inviting. There are some larger issues City Council will need

to address. Our subdivision ordinances were created at a time when we needed the extra development in our community so we were open to a lot of different changes. Now that we are doing a lot of infill development, it is a problem and that ordinance needs to be addressed sooner rather than later. In addition, our steep slope ordinance will be coming before Council soon. She personally doesn't support gated communities, however, a few months ago the Housing Authority said that a solution to their issues is a gated community and Council felt that was okay. We do need guiding principles to the UDO. We need to tell developers what the core values are that we want as a City Council. We need to decide what development and growth do we really want to occur and we also need to talk to the County about their land use ordinances and their desire for growth.

It was the consensus of City Council to instruct the City Manager to continue working on the issues raised by Mayor Bellamy.

Vice-Mayor Jones explained why she felt that Condition No. 4 and Condition No. 7 were not met by this project.

When Mayor Bellamy asked if the developer would be willing to review the concerns and try to address them, Mr. Justus replied "yes", but Council will need to give them guidance on which items they which addressed. Because, due to time constraints, he didn't have the opportunity to state that the developer will be doing better than what is existing now with stormwater. In terms of traffic, the experts, including the City's Traffic Engineer, said there will be no problem with traffic and if at the TRC stage they would have imposed something upon them, they would have negotiated with that. They are willing to talk about traffic issues, but are uncertain who to talk to.

Mr. Shuford said that City Council has given staff a lot of input and we know what the issues are. We can start to address several of the issues. Another option would be to refer this back to the Planning & Zoning Commission for consideration and input on the specific issues.

After a brief discussion, Councilman Mumpower moved to reconsider this conditional use permit. This motion was seconded by Councilman Newman and carried on a 4-3 vote, with Councilwoman Cape, Councilman Davis, Councilman Mumpower and Councilman Newman voting "yes" and Mayor Bellamy, Vice-Mayor Jones and Councilman Freeborn voting "no."

Councilman Mumpower moved to table this conditional use permit for an indefinite period of time. This motion was seconded by Councilman Newman and carried on a 4-3 vote, with Councilwoman Cape, Councilman Davis, Councilman Mumpower and Councilman Newman voting "yes" and Mayor Bellamy, Vice-Mayor Jones and Councilman Freeborn voting "no."

City Attorney Oast said that the public hearing will be re-advertised with notices being sent to the appropriate abutting property owners. He noted that City Council can re-open the public hearing when this matter comes back before Council, allow the public to comment only on the new information presented.

E. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED AT 175 MARIETTA STREET FROM INSTITUTIONAL DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING IN ORDER TO REVIEW ACCESS FOR A FUTURE COMMERCIAL DEVELOPMENT

At the request of the petitioner, due to illness, Councilman Davis moved to continue this public hearing until February 20, 2007. This motion was seconded by Councilman Mumpower and carried unanimously.

V. UNFINISHED BUSINESS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO CHANGES TO THE BILLBOARD STANDARDS

Mayor Bellamy said that the public hearing on this matter was held on January 9, 2007. At the request of City Attorney Oast, Councilwoman Cape moved to continue this matter until February 27, 2007. This motion was seconded by Councilman Davis and carried unanimously.

VI. NEW BUSINESS:

A. RESOLUTION NO. 07-29- RESOLUTION SETTING A PUBLIC HEARING DATE ON MARCH 20, 2007, ON AN ECONOMIC DEVELOPMENT AGREEMENT AND VOLUNTARY ANNEXATION FOR BILTMORE PARK TOWN CENTER

Summary: The consideration of a resolution fixing the date for a public hearing on an annexation agreement and voluntary annexation for Biltmore Park Town Center.

Biltmore Park Town Center is a proposed high-density, mixed use development project in south Buncombe County. The development program consists of approximately 200,000 sq. ft. of retail/dining; a 50,000 sq. ft. 15-screen cinema; 100,000 sq. ft. of new office space; 150 room hotel; approximately 264 housing units (175 rental/89 condo); and 1,850 spaces of structured parking. The estimated capital investment for the project is $123-130 million. Job creation of 1,200 new jobs is expected at build-out. Construction employment is estimated to create 300 jobs. The developer has requested consideration being given for this investment and its early annexation in the form of an economic development grant agreement.

The project offers a number of important public benefits, and the developers have agreed to an immediate voluntary annexation of the project area, approximately 35 acres, which is currently not in the City.

The economic development grant in consideration of immediate voluntary annexation is to be paid in 5 annual installments, which take into account the prospective tax revenues (property, sales, etc.) from the property coming to the City, beginning with calendar year 2008.

Pursuant to NCGS 160A-31, petitions for voluntary annexation must be investigated by the City Clerk for sufficiency in accordance with state law. This investigation has been completed and the Certificate of Sufficiency accompanies this petition request. This area is contiguous to the existing corporate limits and qualifies for annexation by petition as set forth in NCGS 160A-31.

This project will require two actions, both of which are interdependent on each other for City involvement:

1. Approval of voluntary annexation agreement; and
2. Approval of economic development agreement.

The parties have agreed in concept to the terms outlined above, and the respective staffs are working out the details. These two interdependent agreements may be combined into one document. The law requires a public hearing on ten days notice for the voluntary annexation. Council also holds public hearings for economic development incentive agreements. These will be scheduled to coincide.

Pros:

- Provides for orderly growth of City and growth of tax base through acceptance of appropriate areas into corporate limits where owners desire annexation.
- Provides new economic development anchor opportunity for the City, by providing new City area to attract new employers and jobs, including construction jobs for extended periods.
- $123 million increase to City tax base at project build-out.
- Meets the City of Asheville's definition of Smart Growth: "...makes efficient use of land, fully utilizes urban infrastructure...promotes variety of transportation & housing...protects architectural & environmental character of the City through compatible, high quality, & environmentally-sensitive development practices...implemented through effective policies, regulations, capital projects & incentives"
- Increase Asheville's efforts to develop Sense of Place and additional destinations to enhance tourism and length of visitor stays and increased visitor spending.
- High density mixed use and structured parking reduces land use by 23 acres.

Con:

- Marginal increase in service costs.

March 20, 2007, is the date recommended for the public hearings on this matter. Should City Council decide to proceed, the effective date of annexation would be April 30, 2007.

City staff recommends City Council adopt a resolution fixing the date for a public hearing on an annexation agreement and voluntary annexation for Biltmore Park Town Center.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 07-29, setting a public hearing for March 20, 2007. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 210

VII. OTHER BUSINESS:

Councilman Freeborn explained how the community can help Vance Elementary School to raise funds for worthy causes.

Councilman Mumpower presented the new Drug Commission poster for January-February, 2007. He also announced a short program on Thursday, February 22, 2007, sponsored by the Drug Commission - Shine Some Light on the Harms of Hard Drugs and encouraged the community to participate.

Mayor Bellamy announced a play at the Reid Center on Sunday, February 18, 2007. After that, the Department of Corrections Secretary will participate in a fund-raising dinner for the renovations at the Reid Center.

Councilwoman Cape briefed Council on a national conference she attended which looked at different ways in our community of health, land use planning, climate protection, etc. and the partnerships around those issues.

Mayor Bellamy briefed Council on a meeting she recently attended (which was the reason why she arrived at the Council meeting late) which dealt with the issue of supporting our court system with additional funding from our governor and our legislators. In conjunction with this issue, Councilman Mumpower explained the "48 Faces of Harm" program.

The following claims were received by the City of Asheville during the period of January 12-25, 2007: Ethel Pack (Transit Services), Kyle Gerhardt (Police), Latessa Johnson (Fire), Susan Kreidler (Transit Services), Judith Cavallo (Water) and Jamie Jones (Police). The following claims were received by the City of Asheville during the period of January 26 - February 8, 2007: Gayle Battles (Water), Andrew Pomeroy (Water), Mary L. Grile (Water), Ted Tolbert (Water), Fire Department (Water) and Pamela I. Norfleet (Water). These claims have been referred to Asheville Claims Corporation for investigation.

The City was served with a Complaint on January 31, 2007, which is generally described as follows: Devon Nemire-Pepe vs. City of Asheville. The nature of the proceeding is a complaint for personal injury as a result of a broken and missing piece of sidewalk and/or curb. This matter will be handled in-house.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Helaine Greene, presented City Council with information of a salvage yard currently operating in the River District and squarely within a 100-year floodplain. She believed that this type of business poses a serious public safety hazard should the area ever be flooded again. City Manager Jackson updated City Council with a report shared with Ms. Greene.

At 11:51 p.m., Councilman Freeborn moved to continue this meeting, in order to hold a closed session, until Friday, February 16, 2007, at Noon, in the Council Chamber located on the 2nd Floor of the City Hall Building. This motion was seconded by Councilman Mumpower and carried unanimously.

Friday – February 16, 2007 - Noon

Continuation of Regular Meeting of Tuesday, February 13, 2007

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

Mayor Bellamy said that this is a continuation of the regular meeting held on Tuesday, February 13, 2007, and was continued until this date in order to hold a closed session.

At Noon, Councilwoman Cape moved to go into closed session for the following reason: (1) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville, State of North Carolina, County of Buncombe. The statutory authorization is N. C. Gen.

Stat. sec. 143-318.11 (a) (3). This motion was seconded by Councilman Freeborn and carried unanimously.

At 12:57 p.m., Councilman Mumpower moved to come out of closed session. This motion was seconded by Councilwoman Cape and carried unanimously.

At 12:58 p.m. Mayor Bellamy called the Council meeting back to order.

Mayor Bellamy said we come back after discussion of the Judges decision on our legal challenge to the Sullivan Acts. It is the decision of Asheville City Council to appeal to the Supreme Count. Mayor Bellamy said Asheville is being treated differendy so this action is necessary.

Mayor Bellamy said public meetings will be announced for education and input.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 1:01 a.m.

Kusha Lipe
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – February 20, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and Deputy City Clerk Phyllis Coms

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "C", "D", "I" and "J" were removed from the Consent Agenda for individual votes.

At the request of Councilwoman Cape, Consent Agenda Items "E" and "F" were removed from the Consent Agenda for discussion.

At the request of Mayor Bellamy, Consent Agenda Item "M" was removed from the Consent Agenda for an individual vote.

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 13, 2007,**

B. **RESOLUTION NO. 07-31 - RESOLUTION AUTHORIZING WARREN HAYNES DRIVE, SAVANNAH WOODS COURT AND SABIAN COURT, IN THE SAND HILL ROAD AREA OF ASHEVILLE, TO BECOME PUBLICLY MAINTAINED STREETS**

Summary: The consideration of a resolution authorizing Warren Haynes Drive, Savannah Woods Court & Sabian Court, in the Sand Hill Road Area of Asheville, to become publicly maintained streets.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Warren Haynes Drive, Savannah Woods Court & Sabian Court are developer-constructed streets that have an average width of 25 feet and a length of 0.42 miles, 0.09 miles and 0.04 miles respectively. Transportation and Engineering Department staff inspected these streets and found them to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Warren Haynes Drive, Savannah Woods Court & Sabian Court Catalina Court will be added to the official Powell Bill list.

Pros:

- The City will receive Powell Bill funds from the NCDOT to maintain the roadway.
- Homes constructed on this roadway increase the tax base in the City.

Con:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council approval of a resolution authorizing Warren Haynes Drive, Savannah Woods Court & Sabian Court, in the Sand Hill Road Area of Asheville, to become publicly maintained streets.

RESOLUTION BOOK NO. 30 - PAGE 214

C. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE PREUSSER RESEARCH GROUP AS PART OF A NIGHT TIME SAFETY BELT ENFORCEMENT PROJECT

This item was removed from the Consent Agenda for an individual vote.

D. BUDGET AMENDMENT TO RECEIVE THE PREUSSER RESEARCH GROUP GRANT TO PAY OFFICERS TO WORK WITH SUPPLEMENTAL ENFORCEMENT ACTIVITIES RELATED TO THE NIGHT TIME SAFETY BELT ENFORCEMENT PROJECT

This item was removed from the Consent Agenda for an individual vote.

E. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM TO ASSIST THE POLICE DEPARTMENT IN THE INVESTIGATION AND REDUCTION OF TRAFFIC CRASHES

This item was removed from the Consent Agenda for an individual vote.

F. BUDGET AMENDMENT TO RECEIVE THE N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM GRANT TO ASSIST THE POLICE DEPARTMENT IN THE INVESTIGATION AND REDUCTION OF TRAFFIC CRASHES

This item was removed from the Consent Agenda for an individual vote.

G. RESOLUTION NO. 07-34 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM FOR HIGHWAY SAFETY GRANT FUNDS

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the North Carolina Governor's Highway Safety Program for highway safety grant funds and the associated budget amendment in the amount of $10,000.

The City of Asheville Police Department (APD) serves as a regional liaison under the North Carolina Governor's Highway Safety Program, and as a part of this commitment receives an annual grant of $10,000 to cover expenses associated with its participation. The $10,000 grant this year will fund the purchase of computer equipment or traffic safety programs and travel expenses associated with the regional liaison duties. There is no local match of funds required for this grant.

The APD currently participates in the North Carolina Governor's Highway Safety Program Highway Safety campaigns. In order to facilitate better participation and efficiency of highway safety initiatives, a regional law enforcement network was created to enhance communication and effectiveness. The Asheville Police Department promotes highway safety statewide by designating a member of the department to serve as the regional liaison for GHSP Region 8 (Western North Carolina).

This action conforms to the City Council's Strategic Operating Plan under Partnerships to Improve Critical Services and Infrastructure. Goal 2, Objective A: Research and develop strategies for securing significant new recurring revenue sources.

Pro:

- Reimbursement revenue to cover the cost of obtaining the needed computer equipment and to cover the travel expenses incurred as a result of the liaison position.

Cons:

- Dedicate the man-hours for the officer charged with the liaison duties to accomplish the goals stated in the grant contract.
- The city will have to bear the cost of maintaining the equipment.

City staff recommends City Council adopt (1) a resolution authorizing the City Manager to enter into an agreement with the N.C. Governor's Highway Safety Program to provide an officer to act as the Regional Law Enforcement Liaison which requires funding for travel expenses (the remainder of the grant amount would be utilized by the Police Department to purchase computer equipment to assist officers in conducting traffic safety related business); and (2) an associated budget amendment in the amount of $10,000.

I. RESOLUTION APPROVING PARKS & RECREATION DEPARTMENT'S LIST OF CO-SPONSORED EVENTS FOR 2007

This item was removed from the Consent Agenda for an individual vote.

J. RESOLUTION ANNOUNCING PARTICIPATION IN THE ASHEVILLE-BUNCOMBE CLEANLINESS COLLABORATION

This item was removed from the Consent Agenda for an individual vote.

K. RESOLUTION NO. 07-37 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH THE ASHEVILLE CONVENTION AND VISITORS FOR BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY ON A WAYFINDING TASK FORCE

Summary: Per City Council's direction, staff is working toward implementing a comprehensive wayfinding and signage program for the Asheville area. The wayfinding program aims to address several identified City Council goals: 1) improving signage into and out of City parking facilities; 2) providing information kiosks in the downtown; 3) removing sign clutter and obsolete signage; 4) improving directional signage for residents and visitors.

The City has joined with the Convention Visitors Bureau (CVB) to develop the Partnership on Wayfinding Task Force. This task force includes City of Asheville Staff, CVB staff, and representatives from other municipalities, Buncombe County, and the NCDOT. The Task Force is in the process of hiring a consultant to develop a master plan and oversee the project through implementation. The CVB, as contracting agency for the Buncombe County Tourism Development Authority (TDA), is willing to take the lead role in administering the contract.

The estimated overall cost for the wayfinding program is between $750,000 and $1,000,000. This initial estimate is for all expenses from master planning through sign installation. The proposed City of Asheville contribution to this effort is $75,000. The remainder of the funding (approximately 90%) will be sought from the TDA Product Development Fund as well as other municipalities and the County. Although the TDA funding is not yet secured, the TDA board has shown a strong interest this project.

City staff proposes moving ahead with the partnership for wayfinding by taking the following steps: 1) Set aside $ 75,000 from the City's parking fund, because of the strong parking component in the wayfinding program. 2) Develop an interagency agreement with the TDA that specifies the cost-sharing arrangement and roles and responsibilities. 3) Continue to take a lead role in defining the scope of the project.

Staff is of the opinion that this arrangement is beneficial to the City. The initial investment of $75,000 will be followed by about ten times that amount in initial investment in the community, while accomplishing identified City goals. If the City took on responsibility of just providing the parking deck signage, the cost could reach the amount of the City match proposed for the whole program.

As part of the wayfinding master plan, the consultants will be asked to quantify the ongoing costs associated with the program. City Council should be aware that once a signage program is in place there will be additional costs associated with maintenance, upkeep, and sign replacement. The City is likely to be asked to take on maintenance responsibility of the signs within the City limits.

Staff will ensure that the wayfinding master planning process includes ample opportunities for input from stakeholders, City Council, and the public. The goal is to have a signage program that reflects the character of the community.

City staff recommends City Council approve the resolution authorizing the City Manager to sign an agreement with the Tourism Development Authority in the amount of $75,000.

RESOLUTION BOOK NO. 30 - PAGE 220

L. RESOLUTION NO. 07-38 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH MOTOROLA INC. FOR THE 800 MHZ RADIO PROJECT

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Motorola, Inc., in the amount of $1,023,184, for the 800Mhz Radio project.

After successfully upgrading our public safety radio system to a fully-digital system, staff's final task is to fully enable roaming. Two technology options were available to the City to fully enable seamless roaming, and staff has chosen the "Simulcast" option as the least risky and most beneficial approach to complete this project, particularly given the environmental uncertainty due to the Sprint/Nextel/FCC 800 Mhz band reconfiguration currently underway.

The benefits of the 800 Mhz work that has been completed thus far include:

- Increased transmission security
- Improved officer safety through better console identification
- Ability to be part of the State's VIPER system, allowing better communication during significant future events
- Better building coverage, thus improved officer safety

Funding for this contract will come from the $1.32 million in Capital Improvement Program (CIP) funding that City Council has approved for radio system upgrades over the last two fiscal years. Staff anticipates, based on vendor deadlines, that work can be complete by October of 2007.

Pros:
The benefits of this contract will include:

- Finish project utilizing Council approved budgetary dollars
- Seamless roaming for *all* radios
- Fewer "radio busy" due to the technical nature of Simulcast solution

Con: Risks present in this project are the normal risks associated with modification of a production public safety technology system. Risk mitigations will include utilization of experienced contractors and formal project and change management methodologies.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign a contract with Motorola, Inc., in the amount of $1,023,184, for the 800Mhz Radio project.

RESOLUTION BOOK NO. 30 - PAGE 223

M. RESOLUTIONS MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE FOLLOWING EVENTS: (1) THE MOUNTAIN SPORTS FESTIVAL ON MAY 4-6, 2007; (2) THE ASHEVILLE DOWNTOWN ASSOCIATION'S DOWNTOWN AFTER 5 EVENTS ON MAY 18, JUNE 15, JULY 20, AUGUST 17 AND SEPTEMBER 14, 2007; (3) THE FOURTH OF JULY CELEBRATION ON JULY 4, 2007; (4) THE 76TH ANNUAL CITY OF ASHEVILLE OPEN TENNIS CHAMPIONSHIPS PICNIC ON JULY 19-20, 2007; (5) THE GOOMBAY! FESTIVAL ON AUGUST 25-27, 2007; (6) THE LEXINGTON AVENUE ARTS AND FUN FESTIVAL ON SEPTEMBER 9, 2007; (7) THE FIESTA LATINA FESTIVAL ON SEPTEMBER 22, 2007; (8) THE 11TH ANNUAL BREWGRASS FESTIVAL ON SEPTEMBER 22, 2007; (9) THE ASHEVILLE GREEK FESTIVAL ON SEPTEMBER 28-30, 2007; AND (19) THE ASHEVILLE GRIZZLIES HOME HOMES ON VARIOUS DATES DURING THE SUMMER OF 2007

This item was removed from the Consent Agenda for an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ITEMS PULLED OFF THE CONSENT AGENDA FOR AN INDIVIDUAL VOTE

C. RESOLUTION NO. 07-32 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE PREUSSER RESEARCH GROUP AS PART OF A NIGHT TIME SAFETY BELT ENFORCEMENT PROJECT

D. ORDINANCE NO. 3438 - BUDGET AMENDMENT TO RECEIVE THE PREUSSER RESEARCH GROUP GRANT TO PAY OFFICERS TO WORK WITH SUPPLEMENTAL ENFORCEMENT ACTIVITIES RELATED TO THE NIGHT TIME SAFETY BELT ENFORCEMENT PROJECT

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the Preusser Research Group for a total grant package of $200,000 and an associated budget amendment in the amount of $73,000.

The Preusser Research Group has awarded the City of Asheville Police Department (APD) a total grant package of $200,000 as a part of its Night Time Safety Belt Project. The grant funds equipment and overtime salary expenses associated with establishing an expanded night time seat belt enforcement program that includes a two-week campaign period each quarter. Enforcement activities will occur on five nights during each of the two-week periods for a total of forty (40) nights throughout the year.

The grant funds will be shared among several local agencies as a result of the law enforcement partnership that has been established for the purpose of increasing safety belt usage through night time safety belt checkpoints. The highway safety and checking station equipment, totaling $84,969, will actually be purchased by Preusser Research Group and distributed to APD. APD along with Biltmore Forest Police Department, Woodfin Police Department, Buncombe County Sheriff's Office, North Carolina State Highway Patrol, and the Buncombe County District Attorney's Office will utilize this equipment for night time checking stations. At the end of the project, some of the equipment will be distributed to the participating agencies to assist them with their own future checking stations.

The remaining $115,031 is to be utilized to fund officers to work the checking stations. $73,000 will be allocated to the City of Asheville to provide funding to pay overtime for this supplemental enforcement. The remaining $42,031 available to pay officers will be distributed by the Preusser Group to the three other agencies participating in the enforcement campaign and to subsidize the Buncombe County District Attorney's Office.

Additionally, the Preusser Research Group will fund significant paid media to film a public service commercial with a local focus. It will be aired on the local television stations and will promote the safety and quality of life of citizens in this area. Funding for this paid media portion will be provided by Preusser Research Group and paid separately from the $200,000 grant amount.

There is no local match of funds required for this grant. The budget amendment is only for the $73,000 allocated to APD for overtime expenses.

The APD feels strongly about highway safety and regularly supports activities to enhance the safety of all residents and visitors to Asheville. The grant opportunity between the City of Asheville and Preusser Research Group is an opportunity to influence safety belt usage among thousands of motorists in this area. As a result, more lives may be saved and fewer serious injuries sustained from tragic motor vehicle crashes.

This action conforms to the City Council's Strategic Operating Plan under Partnerships to Improve Critical Services and Infrastructure. Goal 2, Objective A: Research and develop strategies for securing significant new recurring revenue sources.

Pros:

- Reimbursement revenue to cover the cost of paying officers to work the supplemental enforcement campaigns over the course of the year.
- Be awarded a substantial amount of highway safety enforcement equipment with no purchase cost to the city.
- No local match of funds required.

Cons:

- Dedicate the man-hours needed to accommodate the needs of this project. It is anticipated that APD will need to provide ten (10) officers each night of the campaign for each of the forty (40) nights of enforcement activities.
- The city will have to bear the cost of maintaining the equipment.

City staff requests City Council to adopt a resolution authorizing the City Manager to enter into an agreement with the Preusser Research Group to purchase highway safety enforcement equipment for the police department and to fund officers to work this supplemental enforcement project during 2007; and approve the associated budget amendment in the amount of $73,000.

Mr. Tim Peck felt it was inappropriate that in order for Asheville citizens to obtain the law enforcement they desire they have to gathering up substantial private contributions to supplement police officers paychecks. In addition, he felt the decision on whether to wear a seatbelt is his and it is not the role of City government to create "behavior change."

Mr. Bill Fishburne spoke against adoption of this budget amendment in that it is selling law enforcement. He felt we have better uses of police officer's time than seatbelt checks.

Rev. Christopher Chiaronmonte wondered if the City of Asheville is buying justice by accepting private money from a private organization.

Police Chief Bill Hogan pointed out that the Preusser Research Group was hired by the National Highway Traffic Safety Administration to administer the grant so it is not a private company. He explained that the Police Department is a full-service police department. Thirty percent of our call for service and workload is related to traffic enforcement and traffic crash investigation. Anything we can do to reduce traffic crashes reduces our workload, plus more importantly it saves lives and reduces injuries. In addition, this is not taking police officers off the street, but it is an extra duty assignment. He also noted that a lot of crime has been deterred from traffic stops.

Councilman Mumpower felt this creates an unfair reputation of the Police Department as being heavy-handed and is a distraction at a time when we have a lot of other problems, e.g., speeding in neighborhoods, open air drug market. In addition, he felt that we should not accept any money from the federal government because of the staggering federal deficit.

In response to Councilwoman Cape, Police Chief Hogan explained the Police Department's policy regarding off-duty employment by our police officers.

Councilman Freeborn moved for the adoption of Resolution No. 07-32. This motion was seconded by Councilwoman Cape and carried on a 5-2 vote, with Councilman Davis and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 216

Councilman Freeborn moved for the adoption of Ordinance No. 3438. This motion was seconded by Vice-Mayor Jones and carried on a 5-2 vote, with Councilman Davis and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 - PAGE 243

E. RESOLUTION NO. 07-33 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM TO ASSIST THE POLICE DEPARTMENT IN THE INVESTIGATION AND REDUCTION OF TRAFFIC CRASHES

F. ORDINANCE NO. 3439 - BUDGET AMENDMENT TO RECEIVE THE N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM GRANT TO ASSIST THE POLICE DEPARTMENT IN THE INVESTIGATION AND REDUCTION OF TRAFFIC CRASHES

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the North Carolina Governor's Highway Safety Program to assist the Asheville Police Department in the investigation and reduction of traffic crashes, and an accompanying budget amendment of in the amount of $175,000.

The Asheville Police Department (APD) has received a grant from the North Carolina Governor's Highway Safety Program (GHSP) for equipment to outfit a dedicated traffic unit. The total amount of the grant is $175,000, which includes $131,250 in grant funds from GHSP and a required 25% City match of $43,750.

This grant will allow the City to fully outfit a dedicated traffic unit of five officers for traffic enforcement, accident reduction, community traffic education, and overall improved public safety. The grant includes fully equipped police vehicles and special traffic investigation and enforcement equipment. The equipment, training and technology provided in this grant will enhance the police department's ability to conduct traffic crash reconstruction and traffic homicide investigation. This is an equipment grant with no personnel costs.

This grant opportunity came about after the adoption of the 2006-07 budget, so the City match of $43,750 was not budgeted. Based on the current financial forecast for FY 2006-07, staff recommends that the local match of $43,750 be appropriated from fund balance.

This action conforms to the City Council's Strategic Operating Plan under Partnerships to Improve Critical Services and Infrastructure. Goal 2, Objective A: Research and develop strategies for securing significant new recurring revenue sources.

Pros:

- The Police Department obtains much needed traffic enforcement equipment that will improve its ability to address traffic related issues throughout the city.
- The City does not have to bear the full cost of initially purchasing the equipment.

- The City receives five patrol vehicles to address traffic issues.

Cons:

- The City is required to use $43,750 in matching funds.
- The City will have to bear the full cost of replacing the equipment in future budgets.
- The Police Department will have to dedicate five personnel to the traffic team.

City staff requests City Council to adopt a resolution authorizing the City Manager to enter into an agreement with the N.C. Governor's Highway Safety Program to assist the Asheville Police Department in the investigation and reduction of traffic crashes, and an accompanying budget amendment, in the amount of $175,000, to purchase traffic enforcement equipment.

In response to Councilwoman Cape, Police Chief Bill Hogan explained what the vehicles will be used for and the reasoning behind purchasing those types of vehicles. He said that he would be happy to research vehicles that could use the alternative fuel E-85.

Councilman Mumpower wondered if this item should have come before the City Council Public Safety Committee prior to City Council as a way to streamline discussion.

Councilman Freeborn moved for the adoption of Resolution No. 07-33. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 30 - PAGE 217

Councilman Newman moved for the adoption of Ordinance No. 3439. This motion was seconded by Councilman Freeborn and carried unanimously.

Upon inquiry of Mayor Bellamy, Police Chief Hogan said that he will be reporting to Council, on February 27, 2007, information in order to begin dialogue on a comprehensive drug plan.

ORDINANCE BOOK NO. 23 - PAGE 245

I. RESOLUTION NO. 07-35 - RESOLUTION APPROVING PARKS & RECREATION DEPARTMENT'S LIST OF CO-SPONSORED EVENTS FOR 2007

Summary: The consideration of a resolution approving Parks and Recreation Departments list of co-sponsored events for 2007.

The Parks and Recreation Department annually presents for consideration a list of co-sponsored events. The Department requests City Council's approval of this list that will provide authorization for in-kind support by the City.

The Parks and Recreation Department uses a matrix to assist in determining the minimum requirements for an event to be considered for co-sponsorship. This matrix includes specific points given for such areas as economic development, out of town spending, whether the event is designed for raising funds for local charities, or whether the event increases cultural awareness and understanding. A total of 29 events were approved last year costing the City approximately $80,000. This year the number of events is reduced to 23 and the cost to the city is approximately $72,000. The following is the recommended list:

- Asheville Criterium/Asheville Bicycle Racing Club
- Asheville Greek Fest/Holy Trinity Greek Orthodox Church
- Biltmore Estate 15K/5K Fun Run Classic Race/Kiwanis Club of Asheville
- CROP Walk/ecumenical group of churches
- Dickens Festival/Biltmore Village
- Downtown After 5/Asheville Downtown Association
- Dr. Martin Luther King Jr. Peace Walk/Dr. Martin Luther King Jr. Association of Asheville/Buncombe County
- Fiesta Latina/YMI Cultural Ctr.
- GoomBay! Festival/YMI Cultural Ctr.
- Hard Lox, Asheville's Jewish Food Festival/Beth Ha Tephila Synagogue
- Jazz & Gospel in the Park/Eagle Market Street Development Association
- Light Up Your Holidays Premier Celebration/Light Up Your Holidays Festival
- Midday Musicals/Community Foundation of WNC
- Organic Fest/Pure Food Partners
- Relay for Life/American Cancer Society
- Shindig on the Green/Folk Heritage Committee
- St. Patrick's Day 10K/5K/Fun Run/Asheville Catholic School
- Thomas Wolfe 8K Road Race/Asheville Track Club
- Walk America/March of Dimes
- 2007 Buncombe Memory Walk/Alzheimer's Association
- 4th Annual Montford Arts & Music Festival/Montford Neighborhood Association
- 8th Annual Asheville Citizen-Times Half Marathon/5K Run/ABCCM & Asheville Citizen-Times
- 10th Annual Buddy Walk/Western Carolina Down Syndrome Alliance

Pros:

- Generates in excess of $10 million dollars for the local economy.
- Provides additional quality cultural programming and diversity.
- Allows fundraising opportunities for charities.
- Expands and enhances special events and festivals in Asheville.

Cons:

- The City's financial contribution is approximately $72,000.
- Events contribute to decline on infrastructure and equipment provided to the organizers.

The Asheville Parks and Recreation Department recommends City Council approval of the resolution approving list of co-sponsored events for 2007.

Councilman Mumpower had no trouble with co-sponsoring festivals, however, was concerned with the amount of the City's financial contribution.

Councilwoman Cape felt that it was interesting to note that in matrix used to evaluate potential City co-sponsored events, the economic development weight of room nights is high, which demonstrates to the Buncombe County Tourism Development Authority (TDA) another way, through co-sponsored events, the City is helping with tourism in the community. Councilwoman Cape asked that the TDA to be made aware of this.

In response to Mayor Bellamy, Mr. Butch Kisiah, Superintendent of Recreation, explained how the $10 Million for the local economy was computed.

At the request of Vice-Mayor Jones, City Manager Jackson said that more scrutiny would be placed on the formula used in computing revenue to the local economy.

Councilman Freeborn moved for the adoption of Resolution No. 07-35. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 219

J. RESOLUTION NO. 07-36 - RESOLUTION ANNOUNCING PARTICIPATION IN THE ASHEVILLE-BUNCOMBE CLEANLINESS COLLABORATION

Summary: The consideration of a resolution announcing participation in the Asheville-Buncombe Cleanliness Collaboration.

The Asheville Chamber of Commerce has taken the lead in reinvigorating county-wide cleanliness efforts by bringing together representatives from the Chamber, the City of Asheville, Buncombe County, UNCA, NCDOT, A-B Tech, Quality Forward, RiverLink, downtown businesses and residents, and others. The collaboration was established to initiate sustainable efforts for the cleanliness and beautification of Asheville and Buncombe Bounty. It plans a call to action and an event to kickoff a month of cleanups across the area during April, as well as ongoing reinforcement of these efforts.

Pros:
- The collaboration's efforts support the work already performed by city staff to clean, beautify, enforce and educate on the subject of cleanliness.
- Broad participation in the collaboration is vital for full community buy-in of the importance of cleanliness and beautification.
- The city will be a leader in this effort; other participating organizations will follow the city's lead in adopting the partnership resolution.

Cons:
- There are no cons.

Staff recommends adoption of the resolution declaring collaboration and announcing the City's participation in the Asheville-Buncombe Cleanliness Collaboration.

Ms. Masterson, with the Chamber of Commerce, spoke in support of this resolution noting that ideas are always welcome from the public about how we can sustain clean-up efforts.

Mayor Bellamy gave statistics about what the City of Asheville is doing to step up what they are doing regarding cleanliness and how they are working with other organizations.

Councilman Mumpower moved for the adoption of Resolution No. 07-36. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 - PAGE 223

M. RESOLUTION NO. 07-39 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE MOUNTAIN SPORTS FESTIVAL ON MAY 4-6, 2007

RESOLUTION NO. 07- 40 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE DOWNTOWN ASSOCIATION'S DOWNTOWN AFTER 5 EVENTS ON MAY 18, JUNE 15, JULY 20, AUGUST 17 AND SEPTEMBER 14, 2007

RESOLUTION NO. 07- 41 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE FOURTH OF JULY CELEBRATION ON JULY 4, 2007

RESOLUTION NO. 07- 42 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 76TH ANNUAL CITY OF ASHEVILLE OPEN TENNIS CHAMPIONSHIPS PICNIC ON JULY 19-20, 2007

RESOLUTION NO. 07- 43 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE GOOMBAY! FESTIVAL ON AUGUST 25-27, 2007

RESOLUTION NO. 07- 44 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE LEXINGTON AVENUE ARTS AND FUN FESTIVAL ON SEPTEMBER 9, 2007

RESOLUTION NO. 07- 45 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE FIESTA LATINA FESTIVAL ON SEPTEMBER 22, 2007

RESOLUTION NO. 07- 46 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 11TH ANNUAL BREWGRASS FESTIVAL ON SEPTEMBER 22, 2007

RESOLUTION NO. 07-47- RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GREEK FESTIVAL ON SEPTEMBER 28-30, 2007

RESOLUTION NO. 07- 48 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GRIZZLIES HOME HOMES ON VARIOUS DATES DURING THE SUMMER OF 2007

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following 2007 Special Events: (1) 2007 Mountain Sports Festival on May 4-6, 2007; (2) Asheville Downtown Associations' 2007 Downtown After 5 Events on May 18, June 15, July 20, August 17, and September 14, 2007; (3) Fourth of July Celebration on July 4, 2007; (4) 76th Annual City of Asheville Open Tennis Championships Picnic on July 19-20, 2007; (5) GoomBay! Festival on August 25-27, 2007; (6) Lexington Avenue Arts and Fun Festival on September 9, 2007; (7) Fiesta Latina Festival on September 22, 2007; (8) 11th Annual Brewgrass Festival on September 22, 2007; (9) Asheville Greek Festival on September 28-30, 2007; and (10) Asheville Grizzlies home games, various dates, throughout the summer.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events:

- The Mountain Sports Festival, scheduled for May 4-6 at Carrier Park, is an event to draw attention to the vast opportunities in Asheville as a destination for adventure sports.

- For many years, the Asheville Downtown Association has co-sponsored with the City of Asheville Parks and Recreation the Downtown After Five series to bring both citizens and visitors to the downtown area. This year Downtown After 5 will be held on May 18, June 15, July 20, August 17 and September 14, with the stage located at intersection of Battery Park Ave. and O.Henry Street.

- Asheville Parks and Recreation produces the 4th of July Celebration and Fireworks spectacular as a community celebration and to attract visitors to the downtown area. This event will be held in Pack Square in 2007.

- The 76th City of Asheville Open Tennis Championships Picnic, scheduled for July 19 & 20 at Aston Park, is a hospitality picnic for the spectators and players.

- The Asheville Goombay Festival is a unique celebration of African heritage and traditions. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held August 25-27 in the Eagle/Market Street area of downtown Asheville.

- The Lexington Avenue Arts and Fun Festival, an event that showcases Lexington Avenue, on September 9, 2007.

- Fiesta Latina is fundraiser for the Hispanic traditions in Asheville. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held on September 22 in the Eagle/Market Street area of downtown Asheville.

- The 11th Annual Brewgrass Festival, which is a benefit for the Big Brothers/Big Sisters program, has requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their event and allow for consumption on September 22, at Martin Luther King, Jr. Park.

- The Asheville Greek Festival is a unique celebration of Greek heritage and traditions. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held September 28-30 at Martin Luther King, Jr. Park.

- The Asheville Grizzles are a semi-professional sports team that seek to serve alcohol at their home games throughout the summer at Memorial Stadium.

Pros:

- Allows fundraising opportunities for charities
- Generates economic impact for the community
- Provides additional quality cultural programming and diversity

Cons: There are no negative issues associated with this request.

The Asheville Parks and Recreation Department recommends City Council adopt the resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following 2007 Special Events: (1) 2007 Mountain Sports Festival on May 4-6, 2007; (2) Asheville Downtown Associations' 2007 Downtown After 5 Events on May 18, June 15, July 20, August 17, and September 14, 2007; (3) Fourth of July Celebration on July 4, 2007; (4) 76th Annual City of Asheville Open Tennis Championships Picnic on July 19-20, 2007; (5) GoomBay! Festival on August 25-27, 2007; (6) Lexington Avenue Arts and Fun Festival on

September 9, 2007; (7) Fiesta Latina Festival on September 22, 2007; (8) 11th Annual Brewgrass Festival on September 22, 2007; (9) Asheville Greek Festival on September 28-30, 2007; and (10) Asheville Grizzlies home games, various dates, throughout the summer.

Councilman Newman moved for the adoption of Resolution Nos. 07-39 through 07-48. This motion was seconded by Councilman Freeborn and carried on a 6-1 vote, with Mayor Bellamy voting "no."

III. PRESENTATIONS & REPORTS:

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED AT 175 MARIETTA STREET FROM INSTITUTIONAL DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING IN ORDER TO REVIEW ACCESS FOR A FUTURE COMMERCIAL DEVELOPMENT

Mayor Bellamy announced that the applicant withdrew his petition and no public hearing will be held on this matter.

B. PUBLIC HEARING TO CONSIDER THE CONVEYANCE OF CITY-OWNED REAL PROPERTY LOCATED ON RALPH STREET AND CHOCTAW STREET TO MOUNTAIN HOUSING OPPORTUNITIES INC. AND THE GREEN FAMILY TO REDEVELOP CONSISTENT WITH THE CITY'S REQUEST FOR QUALIFICATIONS

RESOLUTION NO. 07-49 - RESOLUTION TO CONVEY CITY- OWNED REAL PROPERTY LOCATED ON RALPH STREET AND CHOCTAW STREET TO MOUNTAIN HOUSING OPPORTUNITIES INC. AND THE GREEN FAMILY TO REDEVELOP CONSISTENT WITH THE CITY'S REQUEST FOR QUALIFICATIONS

At Mayor Bellamy's request, Councilman Freeborn moved to excuse Mayor Bellamy from participating in the matter due to a conflict of interest. This motion was seconded by Councilman Davis and carried unanimously.

At this time, Mayor Bellamy turned the meeting over to Vice-Mayor Jones.

Vice-Mayor Jones opened the public hearing at 5:50 p.m.

Real Estate Manager Ed Vess said that this is the consideration of a resolution approving the Sale and Redevelopment Contracts with Mountain Housing Opportunities, Inc. for parcels on Ralph Street and Choctaw Street in East Riverside.

On September 26, 2006, City Council accepted the Statement of Qualifications of Mountain Housing Opportunities, Inc. and the Green Family (MHO) and authorized the City Manager or his designee to negotiate a contract for the sale and redevelopment of two (2) parcels in East Riverside pursuant to the Request for Qualifications issued by the City on May 19, 2006. The sale contracts have been negotiated with Mountain Housing Opportunities, Inc., for Ralph Street and Choctaw Street. We have a letter from the Green Family which indicates that they will be participating as an equity partner, but they are withdrawing as a bidder, per se. They do not want to be in the sale contract or to be on the deed.

The purchase prices for the parcels reflected in the contracts conform to the respective fair reuse values established by City Council on January 23, 2007, which are consistent with the appraisals by BRB Appraisal Associates:

The Ralph Street parcel is 3.8± acres appraised at $274,000. It is steeply sloped from Ralph Street to Town Branch with some flattening on each end. A greenway easement will be reserved along Town Branch.

The Choctaw Street parcel is 5.92± acres appraised at $426,000. It varies from steeply sloped along the street fronts to moderate slope and nearly level in the middle of the property. The parcel is bisected by Town Branch and a greenway easement will be reserved here also.

Consistent with MHO's intent to develop the parcels in two phases, the dates for deeding provided in the contract are January 31, 2008, for Ralph Street and January 31, 2009, for Choctaw Street. Prior to deeding, the contracts provide for submission of a redevelopment plan for the parcels within six (6) months after the contract is executed. The redevelopment plan must be consistent with the goals set forth in the Request for Qualifications including the development of affordable workforce housing. Subsequent to Council approval of the redevelopment plans, construction plans and evidence of financing will be required prior to deeding. Construction must commence within three (3) months after the date of the deed and must be completed within eighteen (18) months after commencement.

Pros:

1. The sale will be at fair reuse value.
2. The proposed redevelopment will further the goals set forth in the RFQ, specifically the provision of affordable workforce housing.
3. It will return vacant underutilized property to the tax rolls.
4. Redevelopment of the property will significantly enhance the tax base.
5. It will enhance the stability and vitality of an existing revitalized community.
6. It will facilitate completion of a substantial portion of the Asheville Greenway system.

Con: The only negative is the loss of some park land, but the trade off is the Greenway will be a more accessible and desirable amenity than the unused vacant land.

On January 10, 2007, staff reviewed the contract terms with the City Council Planning & Economic Development Committee and the Committee referred the contracts to City Council for approval.

Approval of the resolution will authorize execution of the sale and redevelopment contracts with MHO as the qualified developer for the parcels on Ralph Street and Choctaw Street.

Economic Development staff recommends adoption of a resolution approving the Sale and Redevelopment Contracts with Mountain Housing Opportunities, Inc. for parcels on Ralph Street and Choctaw Street in East Riverside.

Councilman Davis responded to Mr. Fred English and explained the process to date and that the property, once developed, will pay taxes.

Vice-Mayor Jones closed the public hearing at 5:59 p.m.

Vice-Mayor Jones said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 07-49. This motion was seconded by Councilwoman Cape and carried unanimously.

At this time, Vice-Mayor Jones turned the meeting back over to Mayor Bellamy.

RESOLUTION BOOK NO. 30 - PAGE 260

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 07-50 - RESOLUTION FOR ENHANCEMENT OF CHILD PORNOGRAPHY AND INTERNET PREDATOR INVESTIGATIONS

Police Chief Bill Hogan said that this is an update on information pertaining to child pornography and internet predator investigations and initiatives by the Asheville Police Department.

The Asheville Police Department (APD) receives approximately 4-6 reports of child pornography or on-line predatory behavior each year. This number of reports has remained consistent over the last four years. In comparison, APD receives 60-70 reports of sexual assault, rape, indecent liberties with a child, and indecent exposure each year, with "some" cases involving computer evidence that is consistent with child pornography investigations. To date, APD has not conducted on-line chatting or the luring of suspected internet predators.

Current initiatives: The APD is currently developing a Detective position within Criminal Investigations to conduct child pornography and internet predator investigations. This position will also assist with more than 150 Internet Fraud referrals that APD receives yearly from the Internet Fraud Complaint Center (IFCC). This dedicated child pornography / internet predator position does not currently exist within the Criminal Investigations Division, but has been requested in the 2007/2008 budget. A white collar crime / fraud Detective has been redirected and is currently receiving training and equipment to fill this position. The selected Detective will receive extensive training in computer forensic examination, allowing them to recover and extract network and personal computer information that is vital to these investigations. Currently, the State Bureau of Investigations (SBI) is the only area agency that conducts computer forensics. The backlog in the computer forensics division of the SBI is more than one year, making it essential that APD have this ability "in-house." The selected Detective is already scheduled for a computer "search and seizure" class as a foundation for the following classes:

- CyberCop 101: Basic Data Recovery and Acquisition Training.
- Criminal Investigations in an Automated Environment.
- Seized Computer Evidence Recovery Specialist Program.

Additionally, the APD is currently purchasing a Forensics Tower II Computer, Field Analysis Notebook Computer and associated equipment to recover data from suspect computers. This training and equipment was budgeted for in the 2006/2007 budget and will cost approximately $15,000.

Future Plans: Upon completion of this training, the APD Detective will be prepared to fully investigate child pornography and on-line predatory behavior. The Detective will be able to examine network information and extract hidden files on personal computers to further these examinations. This Detective will receive additional training and cooperate with the National Association to Protect Children and the U.S. Department of Justice, Internet Crimes Against Children program. This Detective will work cooperatively with their peer at the Buncombe County Sheriffs Department to further area investigations into child pornography and internet predators. The computer forensics function will greatly enhance APD investigations into internet fraud and identity theft also. The first year cost of this position is $64,796. The following years cost will be $40,935. It will take approximately 8 to 12 months for this position to be fully operational.

Mr. Grier Weeks, representing the National Association to Protect Children, thanked City Council for adoption of this resolution.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 07-50. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 30 - PAGE 251

B. RESOLUTION NO. 07-51 - RESOLUTION REQUESTING LEGISLATIVE ACTION FOR THE CITY OF ASHEVILLE IN THE 2007 GENERAL ASSEMBLY

City Attorney Oast said that this is the consideration of a resolution requesting legislation for the City of Asheville in the 2007 session of the North Carolina General Assembly, and appropriate action with respect to other legislative matters.

Since the discussion with Council on January 9, 2007, the General Assembly convened on January 24, and there have been several developments of relevance to the City's legislative interests.

1. The deadline for submission of requests for local legislation has been established.

2. Several pieces of legislation have been initiated on subjects that Council expressed interest in:

   a. Strengthening of sex offender laws – There have been several bills (including HB 27, 28, 29, and SB 17) introduced to strengthen and clarify laws relating to child pornography and sexual predators.

   b. A bill (HB 39) was introduced to permit the provision of economic development incentives to "endangered manufacturers."

c. A bill (HB 55) was introduced to require public employers to take certain steps to verify immigration information on new employees.

d. Bills have been introduced (HB 86 and 87) that would affect the ability of the City to annex; one of those bills is a local act that would apply only in Buncombe County.

e. The Asheville Chamber of Commerce on January 12, 2007, adopted its legislative agenda.

As the foregoing are matters with respect to which legislation has been introduced, the appropriate action for Council is a resolution stating Council's position (endorsing, approving, etc.). There is no particular deadline for taking this action, and with respect to some of the items, Council may wish to perform some more investigation before taking action, such as learning what the League of Municipalities' position is, or the position of other cities. In fact, a bill has been introduced today in support of affordable housing bonds for the State of North Carolina. He will report on various legislation as they develop.

With respect to specific requests for legislative action, Council has indicated an interest in the following:

1. Sullivan Acts. As Council knows, the Sullivan Acts require the City to provide water to customers outside the City limits, and prohibit the City from charging differential rates for outside service. Under the general law, other cities can and do charge differential rates for services provided outside of the city. The proposed resolution requests repeal of these acts.

2. Civic Center. A bill authorizing the City to charge a 1% room occupancy tax as a revenue source to fund improvements to the Civic Center. Council has adopted a plan for these improvements, and on February 13, directed that a request for this funding source be requested. A draft bill will be prepared and transmitted to the delegation, along with a copy of the plan.

3. Annexation. As with the last two years, there is the possibility that legislative action will be required to annex some properties into the City that cannot be annexed by other means, but whose incorporation into the City is desirable for service provision reasons. Specifically, there are some parcels between Asheville and Woodfin near UNC-A, that should have municipal services (police, fire) availability, should the need arise. We have spoken with Woodfin in the past about this. Depending on how further discussions proceed, legislative action may be necessary. Because of limitations on "blank bills," we will need to consult the delegation to determine what form this action should take.

4. Housing Authority Board Term of Office. The Housing Authority Board of Directors unanimously approved reducing their term of office from 5 years to 4 years. This request was recommended by Mayor Bellamy in order to bring the terms more in line with other boards.

At this point, action is needed with respect to the items of local legislation noted above. Council may want to obtain further information and develop a position with respect to the bills that have already been introduced.

City Attorney Oast noted that the list of bills that have already been introduced outlined above is not a comprehensive list. At this point, he requested Council take action on the specific requests for local legislation.

Councilman Mumpower said that it takes time to draft bills and if we are going to encourage our local delegation to pursue strong efforts toward the criminal justice system reform the sooner we advise them, the better. He said that North Carolina is the 48th state in the country in funding right now. He felt it was very important to put this in front of our delegation as soon as possible, if nothing else but to illustrate how important we believe this issue to be.

City Attorney Oast said that he could bring back to Council another resolution on March 13, 2007, that addresses the matters that are not necessarily appropriate for local legislation, noting that the deadline concerning these actions would be April 10 and April 18, 2007. He felt that when he checks the legislation that has been introduced, is that there are bills that have already been introduced or in the process of being drafted addressing the issues Council has raised.

In order to expedite the general resolution supporting the criminal justice system reform, Mayor Bellamy said that Council would be willing to work with the Assistant City Attorney in order to bring this matter before Council on February 27, 2007.

Councilman Newman suggested we adopt the resolution on local legislative and ask the Mayor to write a letter to the local delegation identifying the other important Council issues, e.g., the Land for Tomorrow initiative.

Mayor Bellamy noted that the other important legislative issues Council is interested in are still on the table, e.g., additional subsidy for day care, but are not listed today because they do not require specific legislative writing by our delegation.

Councilman Mumpower said that he wants our delegation to introduce a bill for the criminal justice system reform and that it should be included as an item of local legislation.

Councilwoman Cape said that in order to show how the criminal justice system reform is specific to Asheville, she suggested language about the closing of the recent mental health facilities which overloads our court system.

Councilman Davis felt there is an overall need for a justice center. He would support a general statement to our legislators requesting reform for the judicial system, but also supported partnering with the Buncombe County Commissioners in this request.

Mayor Bellamy felt that we need to put computerization of the court system as another important legislative issues to come before Council.

Councilman Newman said that our legislators probably have the sense of an appropriations bill that funds judicial systems across the state. He suggested we let them know this is a priority for Asheville and let them figure out how to accomplish it.

Councilman Mumpower said that our legislators are comfortable intruding in our local affairs in areas that are not necessarily in the City of Asheville's interest and since criminal justice system reform is crucial to Asheville, he suggested local intervention.

Councilman Mumpower moved to submit the Sullivan Acts request to our local delegation. This motion was seconded by Councilwoman Cape and carried unanimously.

Councilman Newman moved to submit the Civic Center request to our local delegation. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Vice-Mayor Jones moved to submit the annexation request to our local delegation. This motion was seconded by Councilman Davis and carried unanimously.

Vice-Mayor Jones moved to submit the Housing Authority Board of Director's term reduction from 5 years to 4 years to our local delegation. This motion was seconded by Councilman Mumpower and carried unanimously.

Councilman Mumpower moved to submit a general statement of support for the criminal justice system reform in Buncombe County. This motion was seconded by Councilman Freeborn and carried unanimously. It was the consensus of Council's understanding that if it is possible to do this through a local bill, we would urge them to do that, but if it is appropriate to address it through a statewide appropriations process, then we encourage that route.

Vice-Mayor Jones asked about legislation (1) allowing Asheville to have the ability to work with our business license structure; and (2) other ideas for property tax relief. Mayor Bellamy said that these will be discussed at a later date since they would have to be accomplished through state-wide legislation.

After a brief discussion, initiated by Vice-Mayor Jones, about a local bill two of our legislators have introduced prohibiting Buncombe County (and municipalities statewide) to annex, Councilman Mumpower moved to oppose that bill and request withdrawal. This motion was seconded by Vice-Mayor Jones and carried unanimously.

Councilman Freeborn felt we should ask our delegation to sponsor a bill that gives us a variety of tools to promote voluntary annexations.

Councilman Mumpower said a tool might be allowing Asheville to have additional taxing resources, e.g., the room tax, then that enables the City to keep the property tax lower, which makes coming into the City more attractive. There are other taxing capacities that he won't advocate for but other cities have. And, if other cities have them, then in fairness, Asheville should have them.

Councilman Newman moved to ask our legislators to allow Asheville to work with developers who are proposing significant new developments along the periphery of our City to work with them on voluntary annexation. This motion died for a lack of a second.

Councilman Mumpower moved to request our state legislation to give fair consideration to providing Asheville the same resources supportive of the voluntary annexation option that other cities and municipalities in the State of North Carolina have. This motion was seconded by Councilman Freeborn and carried unanimously.

Councilman Mumpower moved support House Bill 55 which was introduced to require public employers to take certain steps to verify immigration information on new employees.

After a short discussion, it was the consensus of Council to not consider the legislative issues that have already been introduced because there are a number of other statewide issues that Council is interested in and those will be discussed at the February 27, 2007, meeting. Councilman Mumpower withdrew his motion.

Councilman Newman was agreeable to discussing support of state funding for the expansion of the Asheville Art Museum at the February 27, 2007, meeting.

C. RESOLUTION NO. 07-52 - RESOLUTION ESTABLISHING THE CITY OF ASHEVILLE'S FEDERAL PRIORITIES AND LEGISLATIVE AGENDA FOR FISCAL YEAR 2008

Economic Development Director Sam Powers said that the purpose of this agenda item is to review and request City Council prioritization of federal legislative initiatives and federal funding requests for the 110th Congress.

At the November 14, 2006, meeting, City Council reviewed potential federal legislative initiatives that Council members had noted as of interest. These legislative initiatives are as follows:

1. Legislative action to remedy changes to the funding of Asheville Transit system negatively affecting the system.
2. Support for national and state legislation/resources to address illegal immigration issues at the local level, specifically in respect to criminal behavior and the employment of illegal aliens.
3. Support federal legislation securing the necessary funds to continue the North Carolina Health Choices Initiative to insure our children in North Carolina by supporting Senate Bill S.3913 (Keep Children Covered Act of 2006).
4. Support raising the federal minimum wage.
5. Support changes to require that Social Security offices be located on public transportation routes so that all citizens have access to the services provided by the agency. - This item has been addressed.

Council also received from staff an updated list of projects that are potential candidates for federal funding. These projects are outlined as follows:

1. Reid Center for the Creative Arts Renovation
2. Asheville Transit System Bus Acquisition Pilot Project (also addressed through CIP)
3. Sustainable (Green) Building Fire Station Enhancements
4. Driving and Firearms Simulator/Firing Range Upgrades
5. Public Safety Radio System
6. Traffic Signal Preemption
7. Thomas Wolfe Cabin Project

City Council has the opportunity to (1) identify potential new initiatives; (2) select and prioritize initiatives for inclusion in a federal priorities agenda; and (3) consider how to communicate with our legislative delegation.

Staff recommends that Council list and prioritize Federal initiatives and projects and pass a resolution communicating stated priorities to the federal elected delegation and appropriate federal funding agencies.

At the request of Councilman Freeborn and Mayor Bellamy, support for public housing initiatives, including HOPE 6, was added to the list for federal funding.

Vice-Mayor Jones explained why she will not be supporting any of the potential projects for federal funding, but did hope that the HOPE 6 initiative could be included in the federal legislative initiatives as the fifth item (since the Social Security Office changes have been addressed).

Councilman Newman spoke in support of the Thomas Wolfe Cabin Project and asked that City staff pare down the request to a more basic maintenance budget to take care of this property.

Mayor Bellamy asked for an anti-crack bill that deals with the harsh realities of crack cocaine be placed under the potential federal legislative initiatives.

Councilman Mumpower explained that he will be voting against any project or initiative that has dollars in it because of the current federal debt.

Councilman Mumpower moved to support legislative action to remedy changes to the funding of Asheville Transit system negatively affecting the system. This motion was seconded by Councilwoman Cape and carried unanimously.

After a brief discussion, Councilman Mumpower moved to support national and state legislation/resources to address illegal immigration issues at the local level, specifically in respect to criminal behavior and the employment of illegal aliens. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Vice-Mayor Jones voting "no." Vice-Mayor Jones feels this may be another unfunded mandate; however, she was supportive of ways that we can really crack down on the criminal element.

Councilman Freeborn moved to support federal legislation securing the necessary funds to continue the North Carolina Health Choices Initiative to insure our children in North Carolina by supporting Senate Bill S.3913 (Keep Children Covered Act of 2006). This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

After a brief discussion, Councilman Newman moved to support raising the federal minimum wage. This motion was seconded by Vice-Mayor Jones and carried on a 5-2 vote, with Councilman Mumpower and Councilman Davis voting "no."

After a brief discussion, Councilman Freeborn moved to support public housing initiatives, including HOPE 6. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Councilman Freeborn moved to support an anti-crack bill. This motion was seconded by Councilman Mumpower and carried unanimously.

Councilman Freeborn moved to support the Reid Center for the Creative Arts Renovation as a candidate for federal funding. This motion was seconded by Councilwoman Cape and carried on a 5-2 vote, with Vice-Mayor Jones and Councilman Mumpower voting "no."

Councilman Newman moved to support the Asheville Transit System Bus Acquisition Pilot Project (not being addressed in the Capital Improvement Plan) as a candidate for federal funding. This motion was seconded by Councilwoman Cape and failed on a 3-4 vote, with Councilwoman Cape, Councilman Freeborn and Councilman Newman voting "yes" and Mayor Bellamy, Vice-Mayor Jones, Councilman Davis and Councilman Mumpower voting "no."

Councilwoman Cape moved to support sustainable (green) building fire station enhancements as a candidate for federal funding. This motion was seconded by Councilman Newman. There was considerable discussion of Council's policy regarding LEED certification for City facilities. City Manager Jackson said that City staff will bring back this issue for specific discussion by the end of March. The motion made by Councilwoman Cape and seconded by Councilman Newman failed on a 3-4 vote, with Councilwoman Cape, Councilman Freeborn and

Councilman Newman voting "yes" and Mayor Bellamy, Vice-Mayor Jones, Councilman Davis and Councilman Mumpower voting "no."

Councilman Freeborn moved to support the driving and firearms simulator/firing range upgrades as a candidate for federal funding. This motion died for a lack of a second.

Councilman Freeborn moved to support the public safety radio system as a candidate for federal funding. This motion was seconded by Councilman Newman and failed on a 3-4 vote, with Mayor Bellamy, Councilman Freeborn and Councilman Newman voting "yes" and Vice-Mayor Jones, Councilwoman Cape, Councilman Davis and Councilman Mumpower voting "no."

Councilman Newman moved to support the traffic signal preemption as a candidate for federal funding. This motion was seconded by Councilman Freeborn and failed on a 2-5 vote, with Councilman Freeborn and Councilman Newman voting "yes" and Mayor Bellamy, Vice-Mayor Jones, Councilwoman Cape, Councilman Davis and Councilman Mumpower voting "no."

Councilman Newman moved to support the Thomas Wolfe Cabin Project as a candidate for federal funding and request City staff to pare down the budget request for just basic maintenance. This motion was seconded by Councilman Davis and failed on a 3-4 vote, with Councilwoman Cape, Councilman Davis and Councilman Newman voting "yes" and Mayor Bellamy, Vice-Mayor Jones, Councilman Freeborn and Councilman Mumpower voting "no."

Vice-Mayor Jones moved to add as a federal legislative initiative support for incentives for local governments to have LEED certification and energy efficient vehicles. This motion was seconded by Councilman Freeborn and carried on a 5-2 vote, with Councilman Davis and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 253

VI. NEW BUSINESS:

A. REVIEW AND CONSIDER CRITERIA FOR SCHOOL BOARD QUESTIONS

After a short discussion, it was the consensus of City Council to ask the School Board candidates to respond to the following questions in writing, at the appropriate time: (1) What do you believe is the cause of our extraordinarily high drop out rate for black males in the City school system?; (2) The City school system is currently responsible for educating approximately 50% of students living within the City limits. What are your thoughts on this reality and the $21,000,000 of City school supplement utilized in education of those students?; (3) What are your views on the role of the school system to community health, nutrition, and childhood diseases?; (4) How do you address the problem of minority student achievement gap?; and (5) Should upper administrative staff be required to live in the Asheville City School District, and why?

B. RESOLUTION NO. 07-53 - RESOLUTION APPOINTING MEMBERS TO THE RECREATION BOARD

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Recreation Board.

The term of Shelly Booth expires on June 30, 2008, and the term of Laura Williams expires on June 30, 2009.

City Council instructed the City Clerk to arrange interviews for Carolyn Stanberry, Adam S. Pittman and Scott Barnwell. However, it was determined that Mr. Barnwell was appointed to the Board on July 25, 2006.

Councilman Mumpower moved to appoint (1) Carolyn Stanberry as a member of the Recreation Board to serve the unexpired term of Ms. Booth, term to expire June 30, 2008; and (2) Adam S. Pittman as a member of the Recreation Board to serve the unexpired term of Ms. Williams, term to expire June 30, 2009, or until their successors have been appointed. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 269

C. RESOLUTION NO. 07-54 - RESOLUTION APPOINTING MEMBERS TO THE GREENWAY COMMISSION

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Greenway Commission.

The terms of Jack Saye and Phyllis Styles, as members on the Greenway Commission, expired December 31, 2006.

City Council instructed the City Clerk to arrange interviews for Hartwell Carson, Glen Locascio and Dawa Clark. Mr. Carson was unable to be contacted for an interview.

It was the consensus of City Council to reappoint Phyllis Styles to serve an additional three-year term, term to expire December 31, 2009, or until her successor has been appointed.

After Council spoke highly of both candidates interviewed, Hartwell Carson received no votes; Glen Locascio received 5 votes; and Dawa Clark received 2 votes. Therefore, Glen Locascio was appointed as a member of the Greenway Commission to serve a three-year term, term to expire December 31, 2009, or his successor has been appointed.

RESOLUTION BOOK NO. 30 – PAGE 270

D. RESOLUTION NO. 07-55 - RESOLUTION APPOINTING MEMBERS TO THE TREE COMMISSION

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Tree Commission.

The terms of Monty Wooten and Robert Halliday, as members on the Tree Commission, expired on December 31, 2006.

City Council instructed the City Clerk to arrange interviews for Laura Uberbacher, Mary Carol Koester and Bill Hascher. Ms. Koester withdrew her application

Councilman Freeborn moved to appoint Laura Uberbacher and Bill Hascher as members to the Tree Commission to each serve a three-year term respectively, terms to expire December 31, 2009, or until their successors have been appointed. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 271

E. RESOLUTION NO. 07-56 - RESOLUTION APPOINTING MEMBERS TO THE PUBLIC ART BOARD

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Public Art Board.

The term of Tina McGuire expires on December 31, 2007, and the term of Dana Irwin expires on December 31, 2008.

City Council instructed the City Clerk to arrange interviews for Lisa Messa and Julie Calhoun-Roepnack. It was noted that Harry Harrison is a candidate but it was not necessary to bring him in for an interview.

After Council spoke highly of the candidates, Harry Harrison received 7 votes; Lisa Messa received no votes and Julie Calhoun-Roepnack received 7 votes. Therefore, Ms. Calhoun-Roepnack was appointed to fill the unexpired term of Ms. McGuire, term to expire December 31, 2007; and Mr. Harrison was appointed to serve the unexpired term of Ms. Irwin, term to expire December 31, 2008, or until their successors have been appointed.

RESOLUTION BOOK NO. 30 – PAGE 272

F. RESOLUTION NO. 07-57 - RESOLUTION APPOINTING MEMBERS TO THE ALCOHOLIC BEVERAGE CONTROL BOARD

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Alcoholic Beverage Control Board.

The terms of Debora Holmes-Young and Kenneth Kaplan expired on November 13, 2006.

It was the consensus of City Council to reappoint Mr. Kaplan, term to expire November 13, 2009, or until his successor has been appointed.

City Council instructed the City Clerk to arrange interviews for Wiley Neal Evans, DeRothea G. Williams and William C. Dickason. Mr. Evans was interested, however, was unable to attend the interview.

After Council spoke highly of the candidates, Wiley Neal Evans received no votes; DeRothea G. Williams 5 received votes; and William C. Dickason received 2 votes. Therefore, Ms. Williams was appointed as a member of the Alcoholic Beverage Control Board to serve three-year term, term to expire November 13, 2009, or until her successor has been appointed.

RESOLUTION BOOK NO. 30 – PAGE 273

G. RESOLUTION NO. 07-58 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Asheville-Buncombe Community Relations Council.

The term of Clara Jeter expired on December 31, 2006.

City Council instructed the City Clerk to arrange interviews for Ms. Ira Naiman, Mr. Craig White, Ms. Amanda Hendler-Voss, Ms. Shirley Schultz, Ms. Clara Hanrahan, and Ms. Martha

Swindell Brown, Ms. Sharon West, and Mr. Michael Vavrek. The following is the status of four of the candidates: (1) Ms. Naiman and Ms. Hendler-Voss withdrew their applications; (2) Ms. Brown has moved; and (3) Mr. Vavrek is interested, however, was unable to attend the interview.

After City Council spoke highly of the candidates, City Council voted until one candidate received a majority vote. As a result, Mr. Craig White was appointed as a member of the Asheville-Buncombe Community Relations Council to serve a three year term, term to expire December 31, 2009, or until his successor has been appointed.

RESOLUTION BOOK NO. 30 – PAGE 274

H. CONSIDERATION OF APPOINTMENTS TO THE FILM COMMISSION, THE AMERICANS WITH DISABILITIES ACT COMPLIANCE COMMITTEE, AND THE DOWNTOWN COMMISSION

It was the consensus of City Council to (1) instruct the City Clerk to re-advertise for candidates for the Film Commission; and (2) ask Vice-Mayor Jones to contact the Chair to discuss the need for the Film Commission.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Bonnie Love and Carol Ann Pothier as members of the Americans with Disabilities Act Compliance Committee, to each serve an additional three-year term respectively, terms to expire August 22, 2009, or until their successors have been appointed.

It was the consensus of City Council to instruct the City Clerk to arrange the following interviews for vacancies on the Downtown Commission: Amy Merritt, Brad Galbraith, Hutch Kems and James Kilbourne.

VII. OTHER BUSINESS:

Councilman Mumpower noted (1) Biltmore Press printing the Drug Commission posters for the first three months of the year; and (2) the "Stop the Harm" anti-drug vigil on February 22, 2007.

Councilwoman Cape described (1) the State of Black Asheville community forum at UNC-Asheville; and (2) the performance by children at the Reid Center for their renovation campaign.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Steve Arpin asked for City Council assistance with City and State regulations at his home at 13 Detroit Place. City Manager Jackson said that he will report back to Council with what we can remedy and what is not possible within public safety standards.

Rev. Christopher Chiaronmonte spoke to Council about homelessness in Asheville.

Ms. Mildred Brooks related concerns for the children at Asheville High School. Mayor Bellamy said that she would be happy to contact her and discuss her concerns.

At 8:26 p.m., Councilman Mumpower moved to go into closed session for the following reasons (1) to establish or to instruct City staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property, including McCormick Heights, by purchase, option, exchange or lease. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11 (a) (5); and (2) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between

the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville, Reid Thompson and the Board of Adjustment. The statutory authorization is N. C. Gen. Stat. sec. 143-318.11 (a) (3). This motion was seconded by Councilman Mumpower and carried unanimously. This motion was seconded by Councilman Freeborn and carried unanimously.

At 10:25 p.m., Councilman Freeborn moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:25 p.m

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones (was excused from the meeting due to illness at 7:50 p.m.); Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Ms. Megan Sanchez's 4th Grade Class from Emmanuel Lutheran led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Jones gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "C" and "D" were removed from the Consent Agenda for individual discussions.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 20, 2007

B. RESOLUTION NO. 07-59- RESOLUTION REAPPOINTING BONNIE LOVE AND CAROL ANN POTHIER TO THE AMERICANS WITH DISABILITIES ACT COMPLIANCE COMMITTEE

Summary: It was the consensus of City Council to reappoint Bonnie Love and Carol Ann Pothier to the Americans with Disabilities Act Compliance Committee to each serve an additional three-year term respectively, terms to expire August 22, 2009, or until their successors have been appointed.

RESOLUTION BOOK NO. 30 – PAGE 275

C. BUDGET AMENDMENT FOR PROJECT MANAGEMENT OF THE CITY-OWNED PROPERTY REQUEST FOR QUALIFICATIONS

This item was removed from the Consent Agenda for individual discussion.

D. RESOLUTION AMENDING THE CIVIC CENTER CAPITAL IMPROVEMENT PROGRAM

This item was removed from the Consent Agenda for individual discussion.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ITEM PULLED FROM THE CONSENT AGENDA FOR INDIVIDUAL DISCUSSION

C. ORDINANCE NO. 3441 - BUDGET AMENDMENT FOR PROJECT MANAGEMENT OF THE CITY-OWNED PROPERTY REQUEST FOR QUALIFICATIONS

Summary: The consideration of a budget amendment, in the amount of $68,750, for project management on the City-owned property Request for Qualifications (RFQ).
